By W. Steven Barnett, Ph.D. Allison H. Friedman-Krauss, Ph.D. G.G. Weisenfeld, Ed.D. Michelle Horowitz, B.A. Richard Kasmin, M.A. James H. Squires, Ph.D. ACKNOWLEDGEMENTS—The opinions expressed in this report are solely those of the authors. We wish to thank the Heising-Simons Foundation for supporting the development, production, and dissemination of this publication. Established in 2007 by husband and wife Mark Heising and Elizabeth (Liz) Simons, The Heising-Simons Foundation is dedicated to advancing sustainable solutions in the environment, supporting groundbreaking research in science, and enhancing the education of the nation's youngest learners. The authors would like to extend their thanks to Sandy Ogilvie, Michelle Ruess, Michelle Ramjug, Milagros Nores, and Andrew Barnett, for their assistance on this report.

The primary data source for this report is the 2016 State of Preschool Survey conducted by NIEER under contract to the National Center for Education Statistics (NCES). NCES publications related to the survey are available on-line at http://nces.ed.gov/pubsearch/.

This publication is a product on the National Institute for Early Education Research (NIEER), a unit of the Graduate School of Education at Rutgers, The State University of New Jersey. NIEER supports early childhood education policy by providing objective, nonpartisan information based on research.

# Executive Summary

#### REMARKABLE PROGRESS, BUT UNEVEN CHANGE LEAVES SOME FAR BEHIND

State funded preschool continued to grow in access, spending, and supports for quality in the 2015-2016 school year. Both enrollment and spending per child increased, as did states' total investment in preschool. Three states improved policies and consequently met additional quality standards benchmarks. Yet, progress has been mixed—some states moved boldly ahead, while others stagnated, and a few regressed.

When NIEER compiled the first Yearbook on state preschool in 2002, only two states served 50 percent of 4-year-olds and just three served more than 30 percent (which is now below the national average). No state met all of the quality standards benchmarks and many met just two. In 2015-2016 three states and the District of Columbia served more than 70 percent of 4-year-olds, a figure not reached by any state in 2002, and 18 states and the District of Columbia served more than 30 percent. With respect to quality, six states had programs that met all 10 current benchmarks for policies related to quality.

This remarkable progress largely reflects change in states that committed to offer every child a high quality early education. For example, Iowa went from serving just 4 percent of 4-year-olds and meeting three benchmarks for quality standards to serving 64 percent with six or seven benchmarks (in their two programs). In another example, Maine has gone from 10 to 40 percent of 4-year-olds enrolled and raised its quality standards from meeting three to nine benchmarks. Both states are continuing to move forward.

At the other extreme, seven states still offer no program at all and 15 states (including those with no program) have made negligible progress on enrollment, serving fewer than five percent of 4-year-olds in 2015-2016. Thirteen state programs meet no more than half the quality standards benchmarks.

Table 1 summarizes findings from this year's report for enrollment, quality standards, and funding of state preschool. Notably, this year we include two sets of quality standards benchmarks—the current set and a new set described in detail later in the report. Our new benchmarks reflect current research, focusing on policies that directly influence classroom experiences.

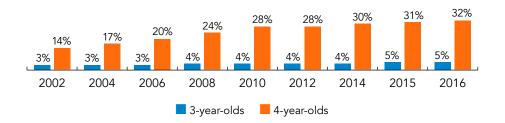

Enrollment continued to rise, albeit slowly. States added 2,725 more 3-year-olds and 40,131 more 4-year-olds. Several noteworthy program changes took place in 2015-2016. Connecticut began a third state-funded preschool program. Indiana moved from a pilot program to full program status. California's Transitional Kindergarten (TK) was added as a state-funded preschool program. Guam became the first U.S. territory to provide a preschool program meeting the criteria for inclusion in this report. Fourteen programs added more than one thousand 3- and 4-year-olds since the previous year. However, four programs decreased the number of 3- and 4-year-olds served by more one thousand, offsetting some of the gains made in other states.

State funding for preschool rose by more than \$564 million in 2015-2016 from the previous year, adjusted for inflation. (We do not count TK as an increase since it existed the prior year, but was not counted as preschool.) This is an eight percent increase in total state funding, somewhat smaller than last year's. Per child spending increased by \$253 to \$4,976. Inflation-adjusted spending per child has now clearly surpassed pre-recession levels and is approaching a level not seen since 2004.

In this 2016 Yearbook, NIEER introduces a new set of quality standards benchmarks for the first time since publication began. For 2015-2016 we continue to rate state policies against the same standards used for many years (i.e., the "current" benchmarks), while also displaying how states would fare on new benchmarks as a guide for areas that need improvement. As we are just introducing these new benchmarks, states have not had time to revise their policies in response; and it may take several years for such change to be implemented. Overall, six programs met all 10 current quality standards benchmarks but only two states—Alabama and Rhode Island—meet all ten new benchmarks.

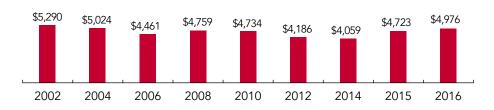

The new set of benchmarks raises the bar and reflects a shift toward supports for practices more directly linked to the quality of children's experiences in the classroom. Four new or revamped quality standards benchmarks focus more on what programs do (process) than what programs have (inputs or structure). Additional information about the new benchmarks is found later in the report on pages 14-17 and 29-31.

Some states did improve on the current set of benchmarks in 2015-2016. Maine now requires class size to be limited to 16 children with one adult for every eight children; vision, hearing, and health screenings and referrals as well as support services; and site visits. Pennsylvania's Pre-K Counts programs are now required to provide at least one meal per day and added vision, hearing, and health screenings and referrals as well as support services. Vermont's new Universal Prekindergarten program under Act 166 requires site visits. Some states slid backwards. Alaska, suffering from funding troubles, lost three quality standards benchmarks. Kansas' Prekindergarten program increased class sizes to 25 children, and no longer meets the class size benchmark.

#### PERCENT OF STATE POPULATION ENROLLED

#### AVERAGE STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

#### WHAT'S NEW?

#### **Resources:**

- Total state funding for preschool programs increased to almost \$7.4 billion, an increase of more than \$564 million (adjusted for inflation) across the 43 states and D.C.<sup>1</sup> that offered preschool during the 2015-2016 year, an 8 percent increase in real dollars. Most of this increase comes from California and Texas, up more than \$200 million and \$100 million, respectively, from last year, adjusted for inflation.
- State preschool funding per child increased by \$253 (inflation-adjusted) from last year to \$4,976. All reported funding per child reached \$5,696, a real one-year increase of \$397.
- In addition to California and Texas, nine other states reported an increase in state spending of more than \$10 million. Twenty-five states increased spending per child. Notably, Indiana increased spending per child by more than \$3,000 while increasing enrollment.
- Eighteen states received competitive federal Preschool Development Grants (PDG) that contributed nearly \$210 million in 2015-2016. Just over \$108 million of the federal PDG spending supported increased enrollment or quality enhancement in state preschool while the remaining funds supported children in preschool programs outside of state-funded programs.

#### **Enrollment:**

- Nearly 1.5 million children attended state-funded preschool, including nearly 1.3 million 4-year-olds. Almost five percent of 3-year-olds and 32 percent of 4-year-olds were served in state-funded preschool.
- Approximately 19,000 of these children were enrolled in state-funded preschool and supported either entirely or partially by federal PDG funding.
- Across all public programs—pre-K general and special education enrollment plus federally and state-funded Head Start—43 percent of 4-year-olds and 16 percent of 3-year-olds were served. Over the last decade, enrollment across all state programs at age 4 has risen by only 5 percentage points and enrollment at age 3 by 1.5 percentage points. However, fourteen states enroll more 50 percent of 4-year-olds across these three publicly-funded programs.
- Enrollment increased by 40,131 four-year-olds and 2,725 three-year-olds. Approximately 50 percent of this increase can be attributed to the federal PDG. Eight states reduced enrollment of 3- and 4-year-olds.

#### **Quality:**

- Three programs improved on NIEER's Quality Standards Benchmarks checklist—Maine gained four new benchmarks while Pennsylvania's Pre-K Counts program gained two; both programs now meet nine out of ten current benchmarks. Vermont gained one benchmark.
- Five states (Alabama, Mississippi, North Carolina, Rhode Island, West Virginia) plus one program in Louisiana (NSECD) met all 10 current benchmarks for minimum state preschool quality standards. These states include some with the highest percentages of children in poverty. Alaska no longer met all 10 benchmarks after the state restructured their program to compensate for reduced funding.
- Many states met fewer than half of the current quality standards benchmarks, including states with high numbers of children in poverty serving large numbers of children (e.g., Arizona, California TK, Florida, Indiana, Ohio, Pennsylvania K4, Texas, and Wisconsin 4K). D.C. sets high standards, but charter schools serving many of the children are not required to meet these standards.
- NIEER introduced a new set of quality standards benchmarks to emphasize a greater focus on process quality and reflect new research on early childhood education quality. Only two states, Alabama and Rhode Island, met all 10 of these new quality standards.

#### **Major Developments:**

- Guam became the first U.S. territory to offer a publicly-funded preschool program, serving 72 four-year-olds (2.7% of 4-year-olds in Guam) in four public school classrooms across Guam in 2015-2016. Guam spent \$12,185 per child, including program start-up costs and met seven quality standards benchmarks.
- California's TK, which serves children too young to enter kindergarten, is included as a state preschool program for the first time. A total of 89,937 children attended TK in 2015-2016.

<sup>1</sup> For the sake of comparison, the District of Columbia will be referred to as a "state" throughout this report. Hence, there is a total of 44 states providing state-funded pre-K.

- Indiana's On My Way Pre-K expanded in 2015-2016 and graduated from pilot-program status to full inclusion in the Yearbook.
- 2015-2016 was the first year of Vermont's Universal Prekindergarten program under Act 166, which requires all school districts in the state to provide universal, publicly funded preschool for a minimum of 10 hours per week to 3-, 4-, and 5-year-olds not enrolled in kindergarten.
- Eighteen states received federal PDG funding to support enrollment of low-income 4-year-olds in high quality preschool. Almost \$210 million was used to support nearly 30,000 four-year-olds and to raise quality. Just over half of that amount supported about 19,000 four-year-olds enrolled in state-funded preschool programs. Without PDG this year, progress on enrollment and quality could have been much more limited.
- Lack of state support for preschool Dual Language Learners (DLLs) continues to be a serious concern. Only 22 state programs could report the number of DLLs they serve. Just five programs (in four states) require teachers of DLLs to have any special qualifications preparing them for the challenges of educating DLLs. On a more positive note, most states have culturally sensitive early learning and development standards. However, unless teachers are supported in achieving them, such standards are unlikely to lead to effective practice.

#### TABLE 1: STATE RANKINGS AND QUALITY CHECKLIST SUMS

STATE	Access for 4-Year-Old Rank	Access for 3-Year-Old Rank	Resource Rank Based on State Spending	Resource Rank Based on All Reported Spending	Current Quality Standards Checklist Sum (Maximum of 10)	New Quality Standards Checklist Sum (Maximum of 10)

\* At least one program in these states did not break down total enrollment figures into specific numbers of 3- and 4-year-olds served. As a result, enrollment by single year of age was estimated. <sup>†</sup> Data on Florida's quality standards are from the 2013-2014 school year. Publicly available documents were reviewed for any policy changes that would have changed the benchmarks met.

#### NATIONAL ACCESS

Total state pre-K enrollment, all ages1,487,728
State-funded preschool programs 59 programs in 43 states and D.C. $^{\scriptscriptstyle 1}$
Income requirement 34 state programs have an income requirement
Minimum hours of operation
Operating schedule 2 full calendar year; 37 school/academic year; 20 determined locally
Special education enrollment, ages 3 and 4
Federally funded Head Start enrollment, ages 3 and 4727,312 $^{\rm 3}$
Total federal Head Start enrollment, ages 3 and 4745,190 <sup>3</sup>

State-funded Head Start enrollment, ages 3 and 4......18,757<sup>4</sup>

#### NATIONAL QUALITY STANDARDS CHECKLIST SUMMARY

POLICY	Of the 59 state-funded pre-K initiative CURRENT

#### NATIONAL RESOURCES

Total state pre-K spending	\$7,390,801,7965
Local match required? 14 state program	ns require a local match
State Head Start spending	\$165,758,194
State spending per child enrolled	\$4,976
All reported spending per child enrolled*	\$5,696

 Pre-K programs may receive additional funds from federal or local sources that are not included in this figure.

\*\* Head Start per-child spending includes funding only for 3- and 4-year-olds.

\*\*\* K-12 expenditures include capital spending as well as current operating expenditures.

<sup>1</sup> Throughout this report, the District of Columbia is included like a state, resulting in a list of 44 states for rankings. In 2015-2016, Guam began offering a "state"-funded preschool program but is not included in totals or rankings in this report.

<sup>2</sup> NIEER's definitions of hours of operation are as follows: part-day programs serve children for fewer than 4 hours per day; school-day programs serve children at least 4 hours per day but fewer than 6.5 hours per day; and extended-day programs serve children for more than 6.5 hours per day. Some programs offer multiple hours of operation but only the minimum one is listed here.

<sup>3</sup> The enrollment figures for federal Head Start include children enrolled in the program in all 50 states, D.C., and the U.S. territories, as well as enrollment in the Migrant & Seasonal and American Indiana/Native Alaskan programs. These numbers do not include children funded by state match.

<sup>4</sup> This figure is based on the Head Start enrollment supported by state match as reported by the Administration for Children and Families and additional information from surveys of state supplemental Head Start programs. This figure includes 15,349 children who attended programs that were considered to be state-funded preschool programs and are also included in the state-funded preschool enrollment total.

<sup>5</sup> This figure includes federal TANF funds directed toward preschool at states' discretion.

# National Overview

#### ENROLLMENT CONTINUES TO CLIMB SLOWLY

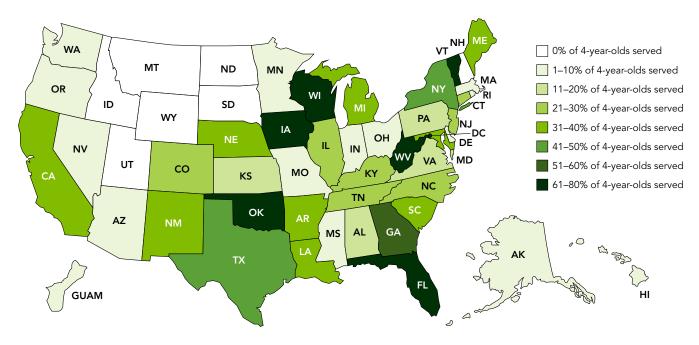

State-funded preschool served 1,487,728 children during the 2015-2016 school year. Eighty-six percent, or 1,276,719 children were 4-year-olds, continuing the trend that state preschool is a program predominantly for 4-year-olds. Table 2 reports the number and percentage of the population of 3- and 4-year-olds enrolled by state and nationally.

Total enrollment in 2015-2016 increased by 40,023 children from the previous year. Compared to 2014-2015, fewer 3-yearolds were added but more 4-year-olds were, likely in part due to the federal PDG program. Table 3 reports enrollment changes from the first year we started tracking state preschool (2001-2002) and from 2014-2015.

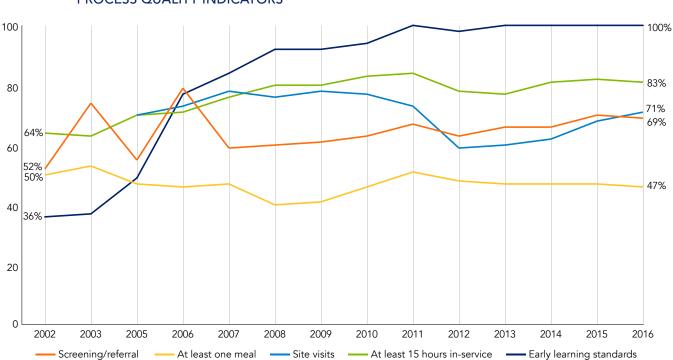

Across the country, almost 32 percent of 4-year-olds and nearly five percent of 3-year-olds were enrolled in state-funded preschool in 2015-2016. Enrollment varied widely from state-to-state. The District of Columbia once again served the highest percentage of 3-year-olds (70%) and 4-year-olds (81%). Three other states—Florida, Oklahoma, and Wisconsin—served more than 70 percent of 4-year-olds in the state. The top ten states for access for 4-year-olds all served at least close to 50 percent of 4-year-olds (District of Columbia, Florida, Oklahoma, Wisconsin, Vermont, West Virginia, Iowa, Georgia, New York, and Texas). On the flip side, 14 states with preschool programs served less than 10 percent of 4-year-olds (Oregon, Washington, Ohio, Massachusetts, Delaware, Rhode Island, Arizona, Mississippi, Nevada, Alaska, Missouri, Hawaii, Indiana, and Minnesota). Seven states continue to have no program, although Montana did serve 462 children through federal PDG. Guam became the first U.S. Territory to fund public preschool, serving 72 children in 2015-2016. Figure 1 displays a map of the percent of 4-year-olds enrolled in state-funded preschool in each state.

Particularly concerning is the unequal growth in state-funded preschool. Nationwide, over the past 15 years, enrollment of 4-year-olds has more than doubled from 14 percent to 32 percent, but many states remain far below average, while others are far above. Enrollment of 3-year-olds is also unequal, with many states doing little or nothing to serve that age. Progress at the top end has been dramatic: In 2002 the District of Columbia served 44 percent of 4-year-olds, but by 2016 served 81 percent. Florida did not have a state-funded preschool program in 2002 but by 2016 they served 76 percent of 4-year-olds. Unfortunately, children in many other states have been left far behind. The 14 states currently serving less than 10 percent of 4-year-olds, have shown little progress in the past decade-and-a-half. Some of these states serve a smaller percentage of 4-year-olds now than they did in 2002. For three states with new programs (Hawaii, Indiana, and Mississippi), it remains to be seen which path they will take.

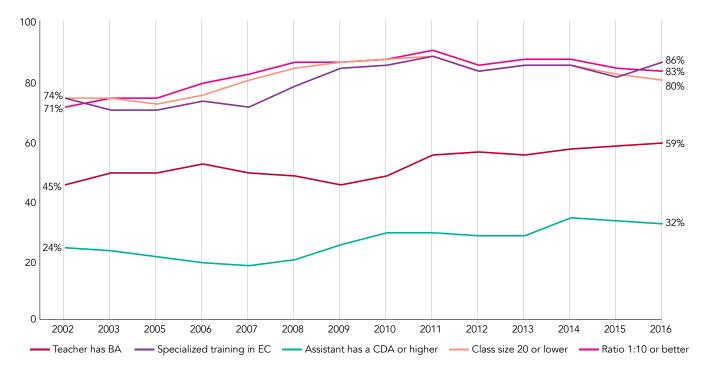

The percent of 3-year-olds served in state-funded preschool has increased by only two percentage points since 2001-2002.

## FIGURE 1: PERCENT OF 4-YEAR-OLDS SERVED IN STATE PRESCHOOL

#### FIGURE 2B: PERCENT OF STATE PRESCHOOL PROGRAMS MEETING BENCHMARKS BETWEEN 2002-2016: STRUCTURAL QUALITY INDICATORS

#### FIGURE 2A: PERCENT OF STATE PRESCHOOL PROGRAMS MEETING BENCHMARKS BETWEEN 2002-2016: PROCESS QUALITY INDICATORS

Twenty-nine of the 44 states with state preschool enrolled 3-year-olds during the 2015-2016 school year. Only seven states serve even ten percent of 3-year-olds (District of Columbia, Vermont, Illinois, New Jersey, Arkansas, Nebraska, West Virginia). New Mexico, New York, and Oklahoma served 3-year-olds this year but did not last year.

Preschool special education and Head Start are two other public programs that serve a substantial number of preschool-age children. Table 4 shows the number and percentage of 3- and 4-year-old children in each state served across state-funded preschool, preschool special education, and Head Start. To the extent possible, we present unduplicated counts with children served by multiple programs counted only once. Enrollment across all three public programs is at most (because some duplication likely still remains) 43 percent at age 4 and 16 percent at age 3, showing little progress beyond the previous year. Fourteen states enroll over 50 percent of 4-year-olds across these three programs.

#### **QUALITY STANDARDS**

Figures 2A and 2B display the percentage of programs meeting each of the current quality standards benchmarks from 2001-2002 through 2015-2016. Clearly progress has been made across policies relating to both structure and process for state-funded preschool. However, progress seems to have stalled after the Great Recession and is only now beginning to rebound. Every state has comprehensive early learning standards and the vast majority met benchmarks for class size, ratio, specialized training of teachers, and annual hours of teacher in-service professional development.

Three states' policy changes resulted in gaining additional benchmarks in 2015-2016: Maine now limits class sizes to 16 with a one to eight staff to child ratio, and requires vision, hearing and health screenings and referrals, comprehensive support services, and site visits. Pennsylvania's Pre-K Counts program now requires vision, hearing and health screenings and referrals, comprehensive support services, and at least one meal per day. Vermont now requires site visits. Policy changes in Alaska resulted in the loss of three quality standards benchmarks and the Kansas Prekindergarten program lost one benchmark after raising the maximum class size.

Six state programs met all 10 current quality standards benchmarks in 2015-2016: Alabama, Mississippi, North Carolina, Rhode Island, West Virginia, and one Louisiana program (NSECD). Thirteen programs in 12 states met nine of the 10 benchmarks (Arkansas, Kentucky, Louisiana LA 4, Maine, Michigan, Minnesota, New Jersey Abbott, Oklahoma, Oregon, Pennsylvania HSSAP and Pre-K Counts, Tennessee, and Washington).

It was not all good news on the quality front—nine programs met fewer than half of the quality standards benchmarks. The District of Columbia, Ohio, Texas, and Wisconsin 4K met four; Arizona, Florida, and Indiana met three; and California TK and Pennsylvania 4K met only two. In the District of Columbia requirements vary across public schools, community-based organizations, and public charter schools. Charter schools are given control over many policies, resulting in D.C. not meeting several quality standards benchmarks. Table 5a summarizes the current quality standards benchmarks met by each program.

#### A New Focus: Raising the Bar on Quality

Since 2003, the *State of Preschool Yearbook* has compared each state program's policies against a checklist of 10 researchbased quality standards benchmarks. These quality standards benchmarks, designed to reflect what research suggested was important for high-quality programs, have been largely unchanged for more than a decade. This current set of quality standards benchmarks was never intended to guarantee quality, but rather to identify *minimum* resources necessary to support high quality, which also requires adequate funding and strong implementation. Today, most programs meet at least seven benchmarks and only two benchmarks are met by less than 50 percent of programs. Such progress, by itself, would provide good reason to adopt more rigorous standards. However, in addition, research over the last decade has found that policies more directly aimed at continuous improvement of teaching are likely to have stronger impacts on actual classroom experiences for children.<sup>2</sup>

This year NIEER introduces a revised set of 10 quality standards benchmarks that better align with recent research and a focus on process quality. The new benchmarks were developed to capture policies that affect classroom experiences that support children's learning and development. This includes policies that provide for continuous improvement of teaching through multiple pathways. We envision high-quality preschool as a system in which well-qualified teachers receive ongoing coaching as part of a larger set of continuous quality improvement processes operating at multiple levels, based on aligned standards for learning and teaching. Recent research indicates that coaching focused on improving interactions with children based on feedback from direct observations of teachers can lead to significant improvements in classroom practices and children's outcomes.<sup>2</sup>

<sup>&</sup>lt;sup>2</sup>Barnett, W. S. & Frede, E. C. (2017). Long-term effects of a system of high-quality universal preschool education in the United States. In H.-P. Blossfeld, N. Kulic, J. Skopek, & M. Triventi (Eds.)., *Childcare, early education and social inequality: An international perspective*. Cheltenham, UK: Edward Elgar Publishing. Weiland, C. (2016). Launching preschool 2.0: A roadmap to high-quality public programs at scale. *Behavioral Science & Policy, 2*, 37-46.

Figure 3 outlines the changes in the quality standards benchmarks. Below, we provide additional detail on the four major changes:

- We enhanced the Early Learning and Development Standards (ELDS) benchmark. Now, in additional to being comprehensive to cover multiple domains of learning, the benchmark requires that ELDS must be (1) vertically aligned (with K–3 or college & career ready standards and infant and toddler standards) and horizontally aligned (with child assessments), (2) supported (though professional development and/or additional resources), and (3) culturally sensitive.
- 2. We added a new benchmark focused on supports for curriculum implementation. State policies are rated on whether they provide (1) guidance for selecting or adopting curricula and (2) supports for curriculum implementation with fidelity (such as training, ongoing technical assistance, or additional funding). In adding the Curriculum Supports benchmark, we discontinue the Meals benchmark. While nutritious meals are important, whether or not programs meet this benchmark is primarily determined by program operating schedule.
- 3. We greatly strengthened the professional development (PD) benchmark. Previously the benchmark was that lead teachers receive at least 15 hours of in-service PD each year. This requirement is now extended to include assistant teachers. Additionally, both lead and assistant teachers are required to have individualized professional development plans and, most importantly, to receive ongoing coaching, or classroom embedded support.
- 4. We replaced the monitoring benchmark, which required programs to have site visits at least once every five years, with the requirement for a continuous quality improvement system (CQIS). To meet this new benchmark, programs must complete structured observations of classroom quality (using a valid and reliable measure) and use this information to inform an improvement plan with teacher feedback.
- A complete guide to the current and new benchmarks and supporting research begins on page 29.

CURRENT STANDARD	NEW STANDARD	CHANGE
Comprehensive Early Learning Standards	Comprehensive Early Learning and Development Standards that are horizontally and vertically aligned, supported, and culturally sensitive	Enhanced
None	Supports for Curriculum Implementation	New
Lead Teacher Degree (BA)	Lead Teacher Degree (BA)	No change
Lead Teacher Specialized Training in ECE/CD	Lead Teacher Specialized Training in ECE/CD	No change
Assistant Teacher Degree (CDA)	Assistant Teacher Degree (CDA)	No change
Teacher-in-Service (15 hours/year)	15 hours/year of professional development, individualized plans professional development plans, and coaching for lead and assistant teachers	Enhanced
Maximum Class Size (20)	Maximum Class Size (20)	No change
Staff-Child Ratio (1:10)	Staff-Child Ratio (1:10)	No change
Screenings & Referrals & 1 Support Service	Screenings & Referrals	Slight Change
Meals (At least 1)	None	Discontinued
Monitoring (Site Visits at least once every five years)	Continuous Quality Improvement System	Changed

#### FIGURE 3: CURRENT AND NEW QUALITY STANDARDS BENCHMARKS

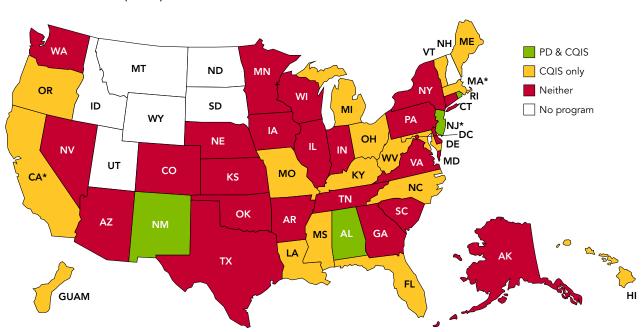

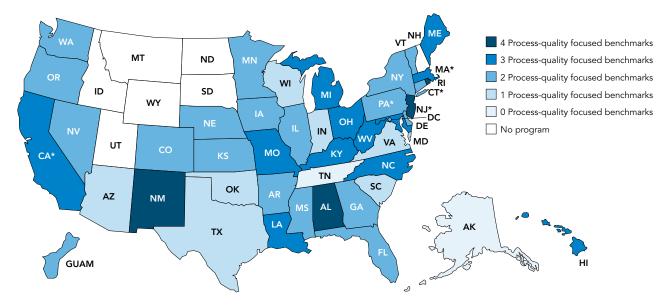

FIGURE 4: NEW PROFESSIONAL DEVELOPMENT (PD) AND CONTINUOUS QUALITY IMPROVEMENT SYSTEM (CQIS) QUALITY STANDARDS BENCHMARKS MET BY STATES

\* These multi-program states have programs with different quality standards. Data displayed on the map reflect quality standards benchmarks in the largest program in the state.

#### FIGURE 5: TOTAL (OUT OF 4) NEW PROCESS-QUALITY FOCUSED QUALITY STANDARDS BENCHMARKS MET BY STATES

\* These multi-program states have programs with different quality standards. Data displayed on the map reflect quality standards benchmarks in the largest program in the state.

As NIEER raises the bar with its new quality standards benchmarks, many states met fewer benchmarks, reflecting the increased rigor of the new benchmarks. Only two programs, Nebraska and Ohio, met more quality standards on new benchmarks compared to current benchmarks in 2015-2016. Thirty-five programs met fewer new benchmarks than current quality standards benchmarks. Notably, Tennessee met four fewer quality standards on the new compared to current sets of quality standards. Oklahoma and Pennsylvania HSSAP met three fewer.

Only two states, Alabama and Rhode Island met all ten of the new quality standards benchmarks. Six programs met nine of the new benchmarks: Louisiana NSECD, Maine, Michigan, New Jersey Abbott, North Carolina, and West Virginia. Eleven programs met fewer than half: Arizona and Indiana each met only one; California TK and Pennsylvania K4 met two; the District of Columbia, Florida, Pennsylvania Ready to Learn, and Wisconsin 4K met three; and Connecticut CDCC, South Carolina CDEP, and Texas met four. Table 5b summarizes the new quality standards benchmarks met by each program. Our hope is that as we set out these new research-based benchmarks and provide information on the extent to which states do or do not meet them, state policies we be upgraded in response.

New professional development (PD) and continuous quality improvement system (CQIS) benchmarks are met by relatively few states. Only six programs in four states met the new professional development benchmark. (Alabama, all three New Jersey programs, New Mexico, and Rhode Island). Twenty programs met the new CQIS benchmark. Figure 4 shows which states met these two new quality standards benchmarks.

Looking at the four quality benchmarks that are new or substantially changed (Early learning and Development Standards, Curriculum Supports, Professional Development, and CQIS) and focused on process quality, only four programs met all four (Alabama, New Jersey Abbott, New Mexico, and Rhode Island). Four programs met none of these new quality standards: Alaska, Pennsylvania Ready to Learn and K4, and Tennessee. Figure 5 color codes states by the number of these new benchmarks met.

#### **RESOURCES: AN UPHILL BATTLE**

In 2015-2016, 43 states and the District of Columbia spent almost \$7.4 billion on preschool, not including special education funds. The remaining seven states did not contribute to this total as they did not have a preschool program meeting the definition of state-funded preschool used in this report. (See page 27 for our explanation of what constitutes a state-funded preschool program.) Total state spending in 2015-2016 increased by more than \$564 million, adjusting for inflation, an eight percent increase in spending from 2014-2015.

In addition, Guam spent \$877,330 on the first year of its preschool program, including start-up costs. Table 6 reports state spending per child and in total, as well as changes in spending from the previous year.

On average, state spending per child was \$4,976, an increase of \$253 from the previous year, adjusted for inflation. This is the third largest year-to-year increase since the *Yearbook* began, and it raises the average per child spending to above prerecession levels for the first time.

State spending per child varied dramatically across the states from \$16,812 in the District of Columbia to less than \$2,000 in Mississippi—meaning the District of Columbia spends almost nine times as much per child as Mississippi.

Many states rely on additional funds from local and federal sources to help fund their preschool programs. In 2015-2016, federal PDG dollars were a notable addition to funding for 18 states. Some states provide for local education agencies to share preschool costs through a formula just as they do for K–12 education. Funding from all sources is a better indicator of the total resources available to support preschool (though not a better indicator of state financial commitment). Unfortunately, not all states can fully, or even partially, report spending from local and federal sources. As a result, the all-reported spending per child numbers, reported in Table 6, understate total spending nationally, and comparisons across states can be distorted by differences in reporting.

Despite these limitations, local schools and federal funds added almost \$1.1 billion to state preschool during the 2015-2016 school year, or \$720 per child. Approximately \$108 million, or 10 percent, was from the federal PDG. Spending from all-reported sources totaled more than \$8.4 billion in 2015-2016, an all time high. Non-state funds reported included over \$560 million in required local funds, \$74 million in non-required local funds, and \$434 million in non-TANF federal funds (including PDG). All reported spending per child was \$5,696, an increase of \$397 from the previous year, adjusted for inflation.

#### FEDERAL PRESCHOOL DEVELOPMENT GRANTS (PDG)

Preschool Development Grants (PDG) are competitive federal grants awarded to 18 states to (1) to build the state's capacity to provide high-quality preschool or (2) to expand access to high-quality preschool for high-need communities. The PDG program was part of the Preschool for All initiative jointly administered by the Department of Education and the Department of Health and Human Services (HHS), although with the reauthorization of Every Student Succeeds Act, PDG administration was moved solely to HHS. During the first round of funding, in December 2014, 18 states were awarded grants. States received four years of funding and 2015-2016 is the first full school year during which PDG funding was utilized by states.

In 2015-2016, states used almost \$210 million in federal PDG funding. In some states, all PDG funding was used to create new seats in and/or enhance the quality of (including extending the length of the day) existing state preschool seats. In other states, PDG funding supported enrollment of children in programs outside of state-funded preschool or a combination of state preschool and other programs. Just over 50 percent of PDG funding was used to serve additional children within state-funded preschool programs. The remainder of the PDG funding supported children outside of state-funded preschool. Montana is the only PDG state that did not have a state-funded preschool program as defined by this report.

Overall, we estimate that federal PDG funding supported more than 30,000 children in 2015-2016 through either new seats or quality enhancements. Approximately 19,000 of these children were served in state preschool programs; the rest were in programs outside of state preschool. PDG funding was used to create nearly 19,000 new seats and to enhance quality or extend length of day for more than 11,000 seats. Figure 6 describes PDG funding and its use in each of the 18 states receiving federal PDG grants.

A case can be made that PDG has been an effective federal-state partnership. For example, using federal PDG funding, Rhode Island doubled the number of children in state-funded preschool between 2014-2015 and 2015-2016. Alabama experienced a 56 percent increase in preschool enrollment over the last year—75 percent of this increase in enrollment was funded by federal PDG dollars. Similarly, 90 percent of the increase in enrollment in Tennessee's VPK was funded by PDG dollars. In addition, PDG was used to raise the quality of preschool. PDG-funded seats were required to meet 12 quality standards including the provision of a full school day. Many of the required PDG standards align with NIEER's current and new quality standards benchmarks.

		PDG-SUPPORT	ED ENROLLMENT	PDG SPENDING			
STATE	Total	New seats	Enhanced seats	Seats in state preschool	Total	Included in state preschool spending*

#### FIGURE 6: FEDERAL PRESCHOOL DEVELOPMENT GRANT (PDG) ENROLLMENT AND SPENDING

\* Federal PDG funding is included in the total, or all-reported, spending numbers.

\*\* Additional children are supported by PDG funding in Tennessee outside of state-funded preschool but the number of children was not known.

Note: Data come from the survey of state preschool administrators and states' PDG Annual Performance Reports.

Note that, in some PDG states, NIEER's calculation of state spending per child can be distorted compared to other years by PDG funding. State spending is divided by total enrollment, which includes children supported entirely and/or partially by federal PDG funds. For PDG states, the all-reported spending per child may better represent the level of support in comparison to prior years.

#### THE NEED FOR DATA: 20/20 VISION

NIEER's quality standards benchmarks gauge the extent to which states' preschool policies lay the groundwork for highquality preschool. However, this does not directly assess the quality of children's actual experiences in preschool classrooms. Even NIEER's new quality standards benchmarks are still preconditions for quality, not a guarantee.

For this reason, we hope to be able to include direct measures of quality in future Yearbooks. To investigate the extent to which this may be possible, we collected data from the states regarding data on classroom quality and child outcomes that has already been collected (or will be collected soon). A total of 34 programs in 32 states and the District of Columbia report having a program evaluation. An additional six programs (including Guam) are currently either planning or piloting an evaluation. Twenty-five programs measured classroom process quality in their evaluation, and 28 programs measured child impacts or "program impacts." Eighteen programs reported measuring both classroom quality and child impacts. Many of the states with program evaluations are also leaders in quality as assessed by NIEER's quality standards benchmarks. Alabama and Rhode Island, the two states that met all 10 new standards, and five of the six programs that met nine (Louisiana NSECD, Michigan, New Jersey Abbott, North Carolina, and West Virginia), have completed evaluations that include both child outcomes and classroom process quality. Figure 7 summarizes information on state-funded programs' evaluations.

The last nationally representative picture of observed early childhood classroom quality was in 2005, as part of the Early Childhood Longitudinal Study—Birth Cohort. Since then, early childhood education programs have expanded across the country and policies have changed—at both the state and federal levels. The nation is long overdue for another snapshot of observed early childhood classroom quality. We recommend a new nationally representative study of early childhood education classrooms including state- and locally-funded preschool programs as well as child care and Head Start. Ideally, this data collection effort would provide classroom quality data that is also representative at the state level. A national report card on the observed quality of experiences provided to children in both public and private preschool would inform policy making and provide a tool for parents to understand what is available and how much it varies across the nation and state by state.

\* These states serve special education children in their state pre-K programs but were not able to provide the number of children for at least one of their programs. Estimates were used based on the average percent of special education students in state pre-K across all programs and enrollment numbers for each program.

\*\* These states serve special education children in their state-funded Head Start pre-K programs but were not able to provide the number of children. Estimates were used based on the percent of children with IEPs in Head Start in the state as reported by the PIR. \*At least one program in these states were able to report the number of children enrolled in state pre-K and Head Start. This information was used to estimate an unduplicated count of Head Start

enrollment.

<sup>11</sup> Totals can overestimate public enrollment in state pre-K, pre-K special education, and Head Start as some or all of Head Start children may be served in a state's pre-K program and many states could not report this information.

For details about how these figures were calculated, see the Methodology section and the Roadmap to the State Profile Pages.

#### TABLE 5A: 2015-2016 STATE PRESCHOOL QUALITY STANDARDS (CURRENT)

STATE/ PROGRAM	Comprehensive early learning standards	Teacher has BA	Specialized training in pre-K	Assistant teacher has CDA or equiv. Jnited States		\$4,976	\$253	\$7,390,801,796	\$564,026,707		\$5,696
Guam***		\$12,185	NA	\$877,330	\$877,330		\$12,185

For details about how these figures were calculated, see the Methodology section and Roadmap to the State Profile Pages.

\* Vermont could not break out the state, local, and federal spending (other than PDG) from the total amount reported.

\*\* 1,274 3-year-old children were served in W/'s Universal Pre-K program but were funded by sources not reported by the state. 1,181 5-year-olds and children with instructional IEPs were served in lowas' SWPP program but were funded by sources not reported by the state. In both cases, these children were removed from the per-child spending calculations. Similar adjustments were made for 2014-2015.

\*\*\* Guam's spending includes start-up costs for their new  $\ensuremath{\mathsf{Pre-K}}$  program.

#### WHAT QUALIFIES AS A STATE PRESCHOOL PROGRAM?

NIEER's State Preschool Yearbook series focuses on state-funded preschool education programs meeting the following criteria:

- The program is funded, controlled, and directed by the state.
- The program serves children of preschool age, usually 3 and/or 4 years old. Although programs in some states serve broader age ranges, programs that serve only infants and toddlers are excluded. The program must reach at least one percent of the 3- or 4-year-old population in the state to be included.
- Early childhood education is the primary focus of the program. This does not exclude programs that offer parent education but does exclude programs that mainly focus on parent education. Programs that focus on parent work status or programs where child eligibility is tied to work status are also excluded.
- The program offers a group learning experience to children at least two days per week.
- State-funded preschool education programs must be distinct from the state's system for subsidized child care. However, preschool programs may be *coordinated* and *integrated* with the subsidy system for child care.
- The program is *not* primarily designed to serve children with disabilities, but services may be offered to children with disabilities.
- State supplements to the federal Head Start program are considered to constitute de facto state preschool programs if they substantially expand the number of children served, and if the state assumes some administrative responsibility for the program. State supplements to fund quality improvements, extended days, or other program enhancements or to fund expanded enrollment only minimally are not considered equivalent to a state preschool program.

While ideally this report would identify all preschool education funding streams at the federal, state, and local levels, there are a number of limitations on the data that make this extremely difficult to do. For example, preschool is only one of several types of education programs toward which local districts can target their Title I funds. Many states do not track how Title I funds are used at the local level, and therefore do not know the extent to which they are spent on preschool education. Another challenge involves tracking total state spending for child care, using a variety of available sources, such as CCDF dollars, TANF funds, and any state funding above and beyond the required matches for federal funds. Although some of these child care funds may be used for high quality, educational, center-based programs for 3- and 4-year-olds that closely resemble programs supported by state-funded preschool education initiatives, it is nearly impossible to determine what proportion of child care funds are spent this way.

#### AGE GROUPINGS USED IN THIS REPORT

Children considered to be 3 years old during the 2015-2016 school year are those who were eligible to enter kindergarten two years later, during the 2017-2018 school year. Children considered to be 4 years old during the 2015-2016 school year were eligible to enter kindergarten one year later, during the 2016-2017 school year. Children considered to be 5 years old during the 2015-2016 school year were already eligible for kindergarten at the beginning of the 2015-2016 school year.

## Roadmap to the State Profile Pages

#### How to interpret data on the individual state profiles

For each state with a preschool education program, we include one page with a description of the state's program, followed by a page with data on the program's key features, focusing on access, quality, and resources.

The first page for each state begins with two sets of bar graphs. The first set shows percentages of the state's 3-year-olds and 4-year-olds enrolled in the state preschool program. The second set shows the state's spending per child enrolled in the state preschool program. Both sets of bar graphs depict changes in state preschool over time, from fiscal year 2002 (which corresponds to the 2001-2002 school year) through fiscal year 2016 (which corresponds to the 2015-2016 school year). Due to space constraints, not all years can be included. Instead, data is included for the years ending in 2002, 2004, 2006, 2008, 2010, 2012, 2014, 2015, and 2016. Most of the data used for comparison purposes come from NIEER's previous Yearbooks, although spending figures are adjusted for inflation and represent 2016 dollars. In addition, there are some exceptions in cases where states revised data or reported data differently. The percent of children enrolled is calculated using Census estimates of 3- and 4-year-old children in each state.

Following the bar graphs is a brief narrative providing information on the main features of the state's program(s). This includes details such as the program's history, the types of settings in which state-funded preschool can be offered, enrollment eligibility criteria, and evaluations (if conducted). In many cases, the narrative also describes unique or particularly interesting aspects of the state's program(s) that may not be highlighted elsewhere in the report, as well as relevant new developments in the 2015-2016 school year and expected changes for the 2016-2017 school year. Some descriptive information in the narratives was originally based on information found in the reports Seeds of Success from the Children's Defense Fund and Quality Counts 2002 from Education Week.

For the 43 states with preschool programs and the District of Columbia, the bottom of the first page of each state profile presents four numbers showing the state's ranking on the following measures:

- The percentage of the state's 4-year-old population enrolled in the state's preschool program (Access Rankings 4-Year-Olds);
- The percentage of the state's 3-year-old population enrolled in the state's preschool program (Access Rankings 3-Year-Olds);
- State expenditures per child enrolled in the program (Resources Rankings State Spending);
- All reported expenditures per child enrolled in the program, including local and federal spending as well as state spending (Resources Rankings All Reported Spending).

The All Reported Spending ranking often provides a more complete picture of pre-K spending in states using local and federal funding sources than the State Spending ranking alone. Because states vary in their ability to report spending from these other sources, however, this ranking is imperfect and sometimes underestimates total spending.

New for the 2015-2016 Yearbook, the bottom of the first page of each state profile (including Guam) also presents two boxes indicating the total number of quality standards benchmarks met on both the current and new sets of benchmarks.

California, Connecticut, Iowa, Kansas, Louisiana, Massachusetts, New Jersey, Pennsylvania, South Carolina, and Wisconsin each have more than one distinct preschool education initiative, therefore information is presented slightly differently for these states and is explained on their individual profiles.

State profile pages are also given for the seven states that did not fund preschool education programs in the 2015-2016 school year. For these states, the table of quality standards is omitted. These profiles do report enrollment data for special education and federally funded Head Start, however. In addition, data on per-child spending for K-12 education and federal Head Start are included. State-funded Head Start spending and enrollment are also provided for no-program states. Profile pages are also included for five US territories that do not offer "state-funded" preschool (American Samoa, Northern Mariana Islands, Palau, Puerto Rico, and the Virgin Islands). For these five territories, a narrative is provided but none fund preschool programs for which we could report on access, quality standards, and resources.

The following sections provide an overview of information contained in the data tables on the state profile pages and explain why these elements are important. Data in the tables are for the 2015-2016 school year except where noted.

#### ACCESS

The Access data table begins with the total state preschool enrollment, which is the number of children of all ages enrolled at a specific point in time. Following that is the percentage of school districts (or other local education authorities, such as counties or parishes) providing state-funded preschool programs. This information shows the extent of the initiative's geographic coverage. Next, the table shows what, if any, income requirement is used in determining eligibility for the program.

Data on the minimum hours of operation (hours per day and days per week) and operating schedule (academic or full calendar year) are shown as additional measures of access because working parents may find it difficult to get their children to and from programs that operate only a few hours a day or week. The amount of time children participate in a preschool program also matters for other reasons, such as influencing the program's effects on children's development and learning.

The Access data table also shows enrollment of 3- and 4-year-old children in two federally funded programs: preschool special education and Head Start. The Head Start enrollment total includes children in the American Indian/Alaskan Native and Migrant & Seasonal programs. The final item in the table reports how many children ages 3 and 4 are participating in Head Start through state supplemental funds.

Two Access pie charts illustrate the percentages of the state's 3- and 4-year-olds enrolled in the state-funded preschool program(s), special education, and Head Start. The remaining children are categorized as enrolled in "Other/None." These children may be enrolled in another type of private or publicly funded program (e.g., state-subsidized child care) or may not be attending a center-based program at all. We calculated an unduplicated count for special education enrollment in order to more accurately represent the number of children served in the state. The special education percentage in the pie chart represents children who are in special education but not enrolled in Head Start or state preschool programs. For the second time, in the 2016 report, we also calculated an unduplicated count for Head Start enrollment in order to avoid double counting Head Start children enrolled in state-funded preschool. For the states that were able to report this information, the Head Start percentage does not include children also enrolled in state-funded preschool.

#### QUALITY

State policies in critical areas related to quality are shown in the Quality Standards Checklist table. This year we continue with the same 10 policies and also introduce a new set of quality standards benchmarks. Both sets are presented together in the Quality Standards Checklist table on the profile pages. For each policy area, states receive a checkmark when their policy meets or exceeds the related benchmark standard. The first column in the Quality Standards Checklist table lists the policy that is being evaluated. The second column presents information about each state program's requirements regarding each policy. The third column lists the current benchmark for each policy—that is, the rigor of the state requirement needed to meet the benchmark. The fourth column depicts whether or not the state preschool program's requirements met the current benchmark for each policy and the sixth column indicates whether or not the state's policy met the new benchmark. Boxes at the bottom of the fourth and sixth columns display the total number of current and new benchmarks met by the state program.

The current Quality Standards Checklist represents a set of minimum criteria, established by state policy, needed to ensure the effectiveness of preschool education programs, especially when serving children who are at-risk for school failure. Although the checklist is not intended to be an exhaustive inventory of all the features of a high-quality program, each of these research-based standards is essential for setting the groundwork for high-quality experiences for children. Meeting all 10 standards does not necessarily guarantee that a program is of high quality, but no state's prekindergarten policies should be considered satisfactory unless all 10 benchmarks are met. Although programs may routinely engage in practices meeting criteria for quality standards, credit is given only when the practices are explicitly required in state policy.

The limitations of the research are such that judgment inevitably plays a role in setting specific benchmarks based on evidence. When originally establishing the quality standards benchmarks we gave more weight to the risk of losing substantial benefits by setting benchmarks too low than to the risk of raising costs by setting benchmarks too high, but the benchmarks were still conceived as minimum standards.

Based on advances in research over the nearly decade and a half since establishing the current set of quality standards benchmarks, we have created a new set of quality standards. These shift the focus somewhat from policies related to classroom structure toward policies better able to shape the classroom processes associated with positive child developmental outcomes.<sup>3</sup> Specifically, we introduce one new quality standards benchmark and make substantial changes or enhancements to three others. These changes are described in the paragraphs that follow.

Of the 10 standards we use to gauge the quality of state-funded preschool programs, four (on both the current and new checklists) involve teacher qualifications or training. State preschool policies are evaluated based on whether programs require teachers in all classroom to have at least a bachelor's degree,<sup>4</sup> whether they require teachers to have specialization in preschool education,<sup>4</sup> and whether they require assistant teachers in all classrooms to have at least a Child Development Associate (CDA) or equivalent credential based on coursework.<sup>5</sup> The current fourth standard related to teacher training is whether state policies require teachers to have at least 15 hours of annual in-service training.<sup>6</sup> In the new set of benchmarks, the bar has been raised with regard to staff professional development. We now assess state policies as to whether both teachers *and* assistant teachers are required to have at least 15 hours of annual in-service training and individualized professional development plans. To meet the new quality standards benchmark, state policies must also require that all classrooms receive coaching, or ongoing-classroom embedded support.<sup>7</sup> Teacher qualifications and support receive this emphasis in our checklist because of their relationships to teaching quality. Better education and training, including ongoing support, for teachers can improve the interactions between children and teachers, which in turn affects children's learning.<sup>8</sup>

Class size and staff-child ratios are also emphasized in the Quality Standards Checklist, with the expectation that states will limit class sizes to 20 children at the most,<sup>9,10</sup> and have no more than 10 children per staff member.<sup>9,10</sup> With smaller classes and fewer children per teacher, children have greater opportunities for interaction with adults and can receive more individualized attention, resulting in better outcomes.

- <sup>4</sup> Based on a review of the evidence, a committee of the Institute of Medicine and National Research Council of the National Academy of Science, recommended that preschool teachers have a BA with specialized knowledge and training in early childhood education. Institute of Medicine and National Research Council (2015). *Transforming the workforce for children*, youth through age 8. Washington, D.C.: The National Academies Press. Other reservch support comes from: Barnett, W.S. (2003). Better teachers, better preschoolers: Student achievement linked to teacher qualifications. *Preschool Policy Matters*, 2. New Brunswick, NJ: NIEER. Bowman, B. T., Donovan, M. S., & Burns, M. S. (Eds.). (2001). *Eager to learn: Educating our preschoolers*. Washington, DC: National Academy Press. Burchinal, M. R., Cryer, D., Clifford, R. M., & Howes, C. (2002). Caregiver training and classroom quality in child care centers. Applied Developmental Science, 6, 2-11. Minervino (2014). Whitebook, M., Howes, C., & Phillips, D. (1989). Who cares? Child care teachers and the quality of care in America. (Final report on the National Child Care Staffing Study). Oakland, CA: Child Care Employee Project.
- <sup>5</sup> Preschool classrooms typically are taught by a team of a teacher and an assistant. Research focusing specifically on the qualifications of assistant teachers is rare, but the available evidence points to a relationship between assistant teacher qualifications and teaching quality. There is much evidence on the educational importance of the qualifications of teaching staff generally. Barnett (2003). Bowman, Donovan, & Burns (2001). Burchinal, Cryer, Clifford, & Howes (2002). Whitebook, Howes, & Phillips (1989). The CDA has been recommended to prepare assistant teachers who are beginning a career path to become teachers rather than permanent assistants. Kagan, S. L., & Cohen, N. E. (1997). Not by chance: Creating an early care and education system for America's children [Abridged report]. New Haven, CT: Bush Center in Child Development and Social Policy, Yale University.
- <sup>6</sup> Good teachers are actively engaged in their continuing professional development. Bowman, Donovan, & Burns (2001). Frede, E. C. (1998). Preschool program quality in programs for children in poverty. In W.S. Barnett & S.S. Boocock (Eds.). Early care and education for children in poverty: Promises, programs, and long-term results (pp. 77-98). Albany, NY: SUNY Press. Whitebook, Howes, & Phillips (1989) found that teachers receiving more than 15 hours of training were more appropriate, positive, and engaged with children in their teaching practices.
- <sup>7</sup> Research suggests that professional learning and continuous coaching are instrumental for supporting teaching practices related to high quality experiences for children. Clements, D. H., & Sarama, J. (2008). Experimental evaluation of the effects of a research-based preschool mathematics curriculum. American Educational Research Journal, 45, 443-494. Hawley, W. & Valli, L. (1999). The essentials of effective professional development: A new consensus in L. Darling-Hammond & G. Sykes (Eds.). Teaching as the Learning Profession. Handbook of Policy and Practice, Jossey-Bass Publishers, San Francisco. Institute of Medicine and National Research Council (2015). Minervino (2014). Phillips, D. A., Lipsey, M. W., Dodge, K. A., Haskins, R., Bassok, D., Burchinal, M. R.,...Weiland, C. (2017). Puzzling it out: The current state of scientific knowledge on pre-kindergarten effects: A consensus statement. Brookings and Duke Center for Child and Family Policy. Pianta, R. C., Mashburn, A. J., Downer, J. T., Hamre, B. K., & Justice, L. (2008). Effects of web-mediated professional development resources on teacher–child interactions in pre-kindergarten classrooms. Early Childhood Research Quarterly, 23, 431-451. Weber, R. & Trauten, M. (2008). A review of the research literature: Effective investments in child care and early education profession. Oregon State University, Family Policy. Program, Oregon Childcare Research Partnership. Whitebook, M., & Bellm, D. (2013). Supporting teachers as learners: A guide for mentors and coaches in early care and education. Washington, DC: American Federation of Teachers. Weitado (2016). Yoshikawa et al. (2013).
- <sup>8</sup> Pianta, R., Downer, J., & Hamre, B. (2016). Quality in early education classrooms: Definitions, gaps, and systems. *Future of Children, 26*, 119-137. Weiland (2016). Yoshikawa et al. (2013).
  <sup>9</sup> A large body of literature establishes linkages between staff-child ratio, program quality, and child outcomes. A ratio of 1:10 allows more children per teacher than in programs that have demonstrated large gains in disadvantaged children and is the lowest (fewest number of children per teacher) generally accepted by professional opinion. Barnett (1998). Long-term effects on cognitive development and school success. In W.S. Barnett & S.S. Boocock (Eds.). *Early care and education for children in poverty: Promises, programs, and long-term results* (pp. 11-44). Albany, NY: SUNY Press. Bowman, Donovan, & Burns (2001). Frede (1998). NICHD Early Child Care Research Network (1999). Child outcomes when child care center classes meet recommended standards for quality. *American Journal of Public Health, 89*, 1072-1077. National Association for the Education of Young Children (2005). NAEYC early childhood program standards and accreditation criteria. Washington, DC: Author. A recent meta-analysis of class sizes and ratios in early childhood education programs: Are thresholds of quality associated with greater impacts on cognitive, achievement, and socioemotional outcomes? *Education Evaluation and Policy Analysis*.
- <sup>10</sup> Early education programs that have been evaluated and found to be effective all limit class sizes to less than 20 with teacher to child ratios of 1 to 10 or better, including Boston's Public School Prekindergarten Program, New Jersey's Abbott Preschool Program, and Oklahoma's Early Childhood Four-Year-Old Program.

<sup>&</sup>lt;sup>3</sup> Minervino, J. (2014) Lessons from research and the classroom: Implementing high-quality pre-k that makes a difference for young children. Seattle, WA: Bill and Melinda Gates Foundation. Weiland (2016). Yoshikawa, H., Weiland, C., Brooks-Gunn, J., Burchinal, M., Espinosa, L. M., Gormley, W. T., ... Zaslow, M. (2013). Investing in our future: The evidence base on preschool education. Ann Arbor, MI: Society for Research in Child Development.

Early learning and development standards (ELDS) are also critical to quality, as they offer programs guidance and ensure that they cover the full range of areas essential to children's learning and development.<sup>11</sup> States should have comprehensive ELDS covering all areas identified as fundamental by the National Education Goals Panel<sup>12</sup>—children's physical well-being and motor development, social/emotional development, approaches toward learning, language development, and cognition and general knowledge. These standards should be specifically tailored to the learning of preschool-age children so that it is appropriate for their level of development. The ELDS benchmark was enhanced in the new set of standards. States should have ELDS, that in addition to being comprehensive, are vertically aligned with the state's infant and toddler standards and either K–3 or college and career ready standards,<sup>13</sup> as well as horizontally aligned with child assessments.<sup>14</sup> The state should have supports in place for the ELDS such as professional development and resources,<sup>14</sup> and the ELDS should be sensitive to children's diverse cultural and language backgrounds.<sup>15</sup>

Curriculum supports are included in the new Quality Standards Checklist. To meet this new benchmark, state policies are not required to mandate the use of specific curriculum models, but rather must provide guidance for or have a process for approving the use of curricula as well as provide support for curriculum implementation, such as training or ongoing technical assistance. Research has demonstrated that the use of domain general and specific curricula, when implementation is supported, has positive effects on children's learning.<sup>16</sup>

The Quality Standards Checklist also addresses the comprehensive services that preschool education programs should be expected to offer. Programs should provide at least one meal.<sup>17</sup> While nutritious meals are important for children's growth and development, this requirement has been removed from the new set of quality benchmark standards because whether or not a program meet the requirement was largely determined by operating schedule. Programs should also provide vision, hearing, and health screenings and referrals<sup>18</sup> as well as other support services, such as parent education, parent conferences and/or home visits, or referrals for such services.<sup>19</sup> In the new set of quality standards benchmarks, states are no longer required to provide support services; however, this change does not diminish the importance of these services for children and families. These various services are included because children's overall well-being and success in school involves not only their cognitive development but also their physical and social/emotional health.<sup>20</sup>

It is important to note that the Quality Standards Checklist (both the current and new) focuses on state preschool policy requirements rather than actual practice. A state with good policies may have some programs that fail to comply with these policies; conversely, a state with weak policies may have many programs that exceed state minimum standards. While evaluating implementation of standards is outside the scope of this report, the current checklist does include an indicator of whether states are taking steps to monitor programs' implementation of the quality standards. Policies requiring strong state quality standards are essential, but it is also necessary to have a means of ascertaining that individual preschool programs meet those standards.<sup>21</sup> Therefore, programs should require that all sites are visited for program quality at least once every five years to enforce standards and to ensure high-quality education in state-funded preschool programs.

In the new set of standards, the monitoring benchmark is changed to focus on state requirements regarding a continuous quality improvement system (CQIS). Beyond monitoring programs, CQIS requires that each classroom receives an annual structured observation of classroom quality in order to gauge quality on a valid and reliable measure, and critically, information from the observation is used to help teachers improve their classroom practices. While we do not rate programs based on the results of the classroom observations, research suggests the CQIS can improve classroom practices related to high-quality experiences for children.<sup>22</sup>

#### **RESOURCES**

The table in the Resources section provides the following information: total state spending for the state preschool program; whether a local match, monetary or in-kind, is required; amount of state Head Start spending; state spending per child enrolled in the program; and all reported (local, state, and federal) spending per child enrolled in the program. These measures show various views of the resources dedicated to state preschool programs, which allows for a more complete picture of a state's commitment to preschool education. For example, a state's total spending may appear low, but may prove to be high relative to the number of children enrolled. On the other hand, a state with a high total funding level may have a low per-pupil spending level if it enrolls a large number of children. In some states, local communities contribute substantial additional funds to state preschool education by using local funding sources or by leveraging federal funding sources. In such cases, the figure that includes all reported spending is the best gauge of the level of available resources, to the extent that information about local and locally allocated federal spending is available. In 2015-2016, several states also utilized federal Preschool Development grant (PDG) dollars which is reflected in the all reported spending number.

The bar chart in the Resources section compares per-child spending in state-funded preschool programs to federal Head Start and K–12 per-child spending. Head Start per-child spending for the 2015-2016 year includes funding only for 3- and 4-year-olds served. Past years' figures have unintentionally included funds for Early Head Start, which made per-child amounts seem artificially higher (although this has been corrected for the past few years). Different colors indicate the different funding sources (local, state, and federal). Separate colors are used to indicate any TANF funds that a state directs toward its preschool initiative. While TANF funds are federal dollars, it is the state's decision to devote these funds to preschool education, as opposed to other purposes. Data on the amounts of local and federal preschool funds are included in the bar chart when available.

## Guide to State Profiles

#### ACCESS

Total state pre-K enrollment	Number of children of all ages in state pre-K program
School district that offer state program	Percentage of school districts in state where program is offered
Income requirement	Maximum family income for participants
Minimum hours of operation	Minimum hours per day and days per week program operates
Operating schedule	Annual schedule of operations (academic/school year or full calendar year)
Special education enrollment, ages 3 and 4	
Federally funded Head Start enrollment, ages 3 a	nd 4Number of slots for 3- and 4-year-olds in Head Start funded with federal money
State-funded Head Start enrollment, ages 3 and 4	4Number of slots for 3- and 4-year-olds in Head Start funded with state money

#### **QUALITY STANDARDS CHECKLIST**

POLICY	STATE PRE-K REQUIREMENT
Early learning & development standa	ards
Curriculum supports	<b>New:</b> Approval process for selecting curricula and supports in place for curriculum implementation
Teacher degree	
Teacher specialized training	
Assistant teacher degree	
Staff professional development	
Maximum class size	
Staff-child ratio	
Meals	
Screening & referral	<i>Current:</i> Screenings and referrals for vision, hearing, and health must be required; at least one additional support service must be provided to families <i>New:</i> Screenings and referrals for vision, hearing, and health must be required
Monitoring/Continuous quality improvement system	<i>Current:</i> Site visits must be used to demonstrate ongoing adherence to state program standards <i>New:</i> Annual structured observations of classroom quality and information collected is used for classroom/program improvement

#### RESOURCES

Total state pre-K spending	
Local match required?	Whether state requires local providers to match state monetary contributions to program
State Head Start spending	Total state funds spent to supplement Head Start program

State Profiles

Alabam

irst Class Pre-K: the Alabama Voluntary Pre-Kindergarten (FCVPK) is a supplemental grant program administered by the Department of Early Childhood Education that provides funding for preschool education for 4-year-olds. First Class is available in all counties throughout Alabama and provides funding to start new classrooms, support quality improvements in existing classrooms, and provide extra support to classrooms serving low-income populations. First Class classrooms are in all 67 Alabama counties and are housed in many different locations, including Head Start programs, private child-care centers, community organizations, faith-based centers, colleges and universities, military agencies and public schools.

The program began in 2000, serving 750 children. As of 2015-2016, the program serves more than 11,000 4-year-olds in a full-day education program, approximately 19% of the state's four-year-old population, and enrollment increased by approximately 4,000 children from the prior school year. The 2015-2016 enrollment total includes around 3,000 additional children partially financed by a \$17.5 million federal Preschool Development Grant (PDG), which was awarded to Alabama in 2014 to expand pre-K access across the state in high-risk areas. State funding in 2015-2016 rose by \$10 million to \$48.5 million. Looking forward, slots created by PDG are expected to be funded on an ongoing basis with state and local appropriations. All state residents who meet the age criteria are automatically eligible for FCVPK.

FCVPK requires use of a curriculum incorporating recently updated early learning standards aligned to kindergarten content standards and Teaching Strategies GOLD objectives, the required formative assessment tool. All FCVPK classrooms are supported by a coach and monitored for continuous improvement. Monitors work with program administrators to ensure that FCVPK grants are properly administered, provide appropriate leadership to teaching staff in concert with coaches to improve instruction, and support the development of leadership skills necessary for effective program management and improvement. Alabama requires each classroom to have a lead teacher with a BA plus an early learning credential and in 2015 introduced policies to support salary parity.

Funds for FCVPK are distributed by the Alabama Education Trust Fund Budget on a competitive awarding basis to programs running full-day, school-year programs. Grantees must locally match the award, and sliding-scale fees can be included in the matching funds. There are three levels of grants that can be awarded to pre-K programs: (1) Pre-K Excellence Grants of up to \$45,000 per grant are awarded to aid programs in meeting Alabama's quality standards, such as financing teacher education and teacher support programs. These grants are intended for use by programs that have other primary sources of funding and are awarded on a three-year cycle. (2) Pre-K Tiered Grants of \$80,200 to \$92,700 per grant differ from the Excellence grants as they are intended to be primary sources of funding. These grants are awarded to classrooms serving a certain share of the free and reduced-price lunch eligible population. These grants are also awarded on a three-year basis. (3) New Classroom or Plus Grants of \$120,000 to \$150,000 per grant are one-year grants awarded to new classrooms for the cost of materials, equipment, furnishings, and one full year of the general expenses of operation.

## Alaska

he Alaska Pre-Elementary program, previously called the Alaska Pre-Kindergarten Program, is available to 4-year-olds in 11 school districts and has been operating since the 2009-2010 school year. Previously, a majority of programs operated in combined public school and Head Start programs. In the 2015-2016 school year, Alaska changed the way the competitive grants are offered to include two types of grantees. The three-year renewal grants allow grantees that were previously receiving funding to design programs based on community needs. Districts that have never received grants are eligible to apply for a one-year pre-elementary development grant. Development grants are geared toward strategic planning to begin implementing or support existing Pre-Elementary goals until they can be switched to renewal grants.

The Alaska Pre-Elementary program shifted from pilot status in the 2011-2012 school year with a change in funding and recompetition for state grants in fiscal year 2013. Funding is granted to public schools that may subcontract with Head Start programs. The state pre-K program had a total budget of \$2.5 million and served children in eight districts for the 2012-2013 school year. There was an \$800,000 drop in funding in the 2013-2014 school year, so fewer children were served that year. Although pre-K funding was slated for closure in 2014-2015, supporters were successful in providing grant extensions for two full years. Despite this, budget reductions have continued to be a challenge within the state. The switch to renewal grants and pre-elementary development grants was in response to funding challenges in order to help local communities develop and support preschool programs. These changes were a result of inconsistent funding for prekindergarten over the last few years which also impacted program implementation and quality. Alasksa receives no federal funding for the prekindergarten program. All state funding goes directly to school districts, leaving minimal funding for program support, monitoring, or evaluation.

The Teaching Strategies GOLD assessment was piloted by the state three times per year in two-thirds of the programs during the 2011-2012 school year. The state required its use for all grantees in the new competition. An evaluation of the program was completed in the 2010-2011 school year, determining process quality as well as program impact and child results based on pre-and post-assessments using the DIAL II, PPVT, and ECERS instruments.

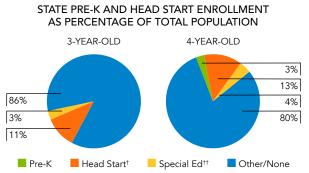

Alaska has offered a supplement to federally recognized Head Start programs since the 1980s. The financial support is part of an effort to develop program quality through school readiness activities and professional improvement. The funds also offer admission to additional children and families whenever possible.

### Arizona

rizona began funding preschool programs in 1991. Supplemental services for preschool, full-day kindergarten, and first-third grade education were supported by the Early Childhood Block Grant (ECBG) from 1996 to 2010. Children from families with incomes at or less than 185% of the federal poverty level qualified for ECBG-funded programs. ECBG funds were distributed to school districts with the requirement that some of the funds are passed through to private childcare centers or faith-based programs. ECBG funds were frozen in fiscal year 2010, due to budget constraints, and then revoked.

In 2006, Arizona voters established a dedicated funding source, using tobacco taxes, for early childhood development and health programs, and created the Early Childhood Development and Health Board, known as First Things First (FTF), to oversee use of those funds. The FTF Board allocates public funds to communities based on their birth to five population and the percentage of young children in poverty. Informed by local data, volunteer regional councils prioritize and recommend early childhood programs to fund. These public funds can be used for various early childhood programs, including increasing access to early learning. This is accomplished through Quality First (QF) Scholarships serving young children living at or below 200% FPL. The QF Scholarship program receives the bulk of FTF funding, about \$41.4 million in 2017.

Private child care, public schools, Head Start settings, tribally regulated programs, family child care homes, and faith-based programs are eligible to receive QF Scholarships as long as they participate in Quality First, the state's Quality Improvement and Rating System (QIRS) and (with limited exceptions) have met QIRS quality standards. QF Scholarship reimbursement rates vary by program type.

In the 2015-2016 school year, 5,365 preschool-aged children were served in center-based programs. Allocations of early childhood funds to regional councils decreased in 2015-2016 due to a 24% drop in tobacco tax revenue between 2007 to 2015 (about \$40 million less per year) and a projection that tobacco revenues would continue to decrease. In response, the FTF Board determined that a budget reset was necessary to ensure consistent funding levels over the next nine to 15 years. As a result, regional spending on QF Scholarships decreased by 38% between 2014-2015 and 2015-2016. Despite the decrease, the scholarships remain the highest funded program at FTF.

QF Scholarships also help Arizona draw down a greater amount of federal funds for child care vouchers to working families. Arizona receives more than \$118 million per year in federal Child Care and Development Fund (CCDF) funds, which are administered by the state Department of Economic Security (DES) and require the state to provide both Maintenance of Effort (MOE) and matching funds. Historically, these requirements were met with state General Fund dollars appropriated by the Legislature. In fiscal year 2012, all General Fund appropriations to child care vouchers were eliminated. FTF collaborated with DES to leverage FTF investments in early learning quality and access (including scholarships) to meet federal MOE and state match requirements. Over the six years this MOU has been in place, Arizona has leveraged almost \$228 million in CCDF funds that otherwise would have been lost.

In 2014, Arizona was awarded a federal Preschool Development Grant (PDG) award, providing funding for access to preschool for 2,370 children in 15 high-needs communities statewide. The PDG also enhanced the quality of those programs by funding their participation in the state QIRS, which includes on-site and inclusive coaching, mental health consultation, child care health consultation, community-based professional development and college scholarships for early educators, and financial incentives.

### Arkansas

he Arkansas Better Chance (ABC) and Arkansas Better Chance for School Success (ABCSS) programs were founded as part of a statewide education reform initiative beginning in 1991. ABC was initially funded through a dedicated sales tax. Between 2001 and 2007, an excise tax on packaged beer provided additional funding for the program. Forty percent of the program's overall financial support must be local contributions, either in-kind or monetary. The program also receives federal funding.

When additional funds became available in the 2004-2005 program year, ABCSS was launched. Three- and 4-year-olds in families whose income falls below 200% of the federal poverty level are eligible for the ABCSS program. Children birth to 5 from low-income families (below 200% FPL) are eligible for early childhood education services offered by ABC. Eligibility for ABC is also determined by other risk factors including: developmental delay, foster care, low parental education level, having a parent in active overseas military duty, non-English speaking family members, having a teen parent, parental substance abuse, or low birth weight. Pre-K access through both programs is offered in diverse settings, including Head Start, service cooperatives, public schools, private business, and nonprofit organizations.

An additional path for preschool teachers in the ABC program, the Birth through Prekindergarten Teaching Credential, was established in January 2011, when Act 187 of 2009 became effective. Five institutions have been permitted to offer the credential.

The Arkansas Early Childhood Education Framework for Three and Four Year Old Children, outlining guidelines for providing services to 3- to 5-year-olds, was revised in 2016. Standards are aligned with the AR Learning Standards and the state's infant and toddler standards. The Kellogg Foundation has provided funding to help align the early learning standards with the K–12 Learning Standards. ABC also assesses both quality outcomes and impact on child outcomes through an ongoing study that began in the 2005-2006 year. ECERS is used to evaluate classroom quality.

In December, 2014, Arkansas was awarded a competitive federal Preschool Development Grant for \$14.9 million. This grant enabled the state to create 1,371 new slots and enhance 1,506 existing slots in the ABC/ABCSS programs. The state also received a one-time \$1.5 million cost of living adjustment.

This report outlines the ABC and ABCSS programs together as they have similar requirements and standards.

### California

4-year-olds

3-vear-olds

4-year-olds SPP only

STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

n 2008, the California State Preschool Program Act consolidated several early childhood initiatives into one funding stream, resulting in the California State Preschool Program (CSPP). CSPP encompasses: (1) the CSPP that began in 1965 and provided preschool services to children at risk for neglect, abuse, family violence, or who were receiving protective services; (2) the Prekindergarten and Family Literacy Program (PKFLP), which began in 2007 and added a literacy component to CSPP; and (3) General Child Care programs. CSPP provides both part- and full-day preschool to 3- and 4-year-olds with a family income at or below 70% of the state median income. Children who are at risk of abuse, neglect, or exploitation, receiving protective services, homeless, or receiving CalWORKS cash aid are also eligible to attend.

State spending on CSPP increased almost \$109 million from the 2014-2015 to 2015-2016 school year due to funding shifts enabling all CSPP programs operated by local educational agencies to be funded entirely with state funding. Federal funding decreased but there was a net increase in total spending. CSPP awards funding through a competitive application process to school districts, private and faith-based agencies, and Head Start programs. Children are served in either full-day or part-day programs, depending on family eligibility and need. Children must remain eligible throughout the year to receive full-day services but can remain in part-day programs regardless of changes to eligibility. Teachers are required to have California Child Development Associate Teacher Permits, and can receive grants for professional learning. CSPP classrooms receive structured quality observations using the Early Childhood Environment Rating Scale, Revised Edition (ECERS-R) at least once a year.

California Transitional Kindergarten (TK) began during the 2012-2013 school year as a result of California's Kindergarten Readiness Act of 2010 which moved the kindergarten eligibility age from December 2 to September 1 so that all children would be 5 years old when entering kindergarten. TK was also authorized as part of California's Kindergarten Readiness Act of 2010 and is the first year of a two-year kindergarten program for children born between September 2 and December 2. TK follows kindergarten regulations for class size, teacher qualifications, standards, funding, and serving English language learners. TK is profiled as a separate preschool program for the first time in this report.

The California Preschool Learning Foundations, which provide guidance to both CSPP and TK are aligned with the Common Core State Standards, California Infant and Toddler Learning and Development Foundations, California Content Standards, and the Head Start Child Development and Early Learning Framework.

Using various local and state funding sources, the California Quality Rating and Improvement System (CA-QRIS) Consortium was established to continue the work done through California's Federal Race to the Top—Early Learning Challenge (RTT-ELC) grant. The RTT-ELC grant charged the Regional Leadership Consortia with incorporating a locally driven QRIS to improve the quality of early learning programs throughout the state. The goal of the QRIS is to ensure that children in California have access to high quality programs so they thrive in their early learning settings and succeed in kindergarten and beyond. The CA-QRIS Consortium strives to improve the quality of early learning in three areas of program quality: child development and readiness for school, teachers and teaching, and program and environment quality. The \$50 million dedicated to the CSPP QRIS Block Grant is intended to build on the local QRIS efforts of current lead agencies and their consortia and to raise the quality of CSPP.

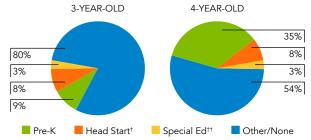

California's overall support for state-funded preschool, including enrollment and funding for both CSPP and TK, is depicted in the first two pages of this state profile. The third page focuses solely on CSPP and the fourth page provides information on TK.

SPENDING PER CHILD ENROLLED

#### Data are for the 2015-2016 school year, unless otherwise note

### Colorado

he Colorado Preschool Program (CPP) was launched in 1988 in an effort to target 3- and 4-year-olds in need of language development support, with the goal of lowering dropout rates and reducing dependence on public assistance. In 1992, CPP became a permanent program and expanded its target population to all children who lack overall school readiness due to family risk factors. Risk factors for eligibility are defined in statute and include eligibility for free- or reduced-price meals, being a dual language learner, being in foster care, a family history of abuse or neglect, homelessness, low parental education levels, parental substance abuse, or having a teen parent, as well as locally determined risk factors. Four-year-olds must meet at least one risk factor to enroll in CPP, while 3-year-olds are required to meet a minimum of three risk factors.

During the 2013 legislative session, the Colorado legislature created a new type of CPP slot known as the Early Childhood At-Risk Enhancement, or ECARE, slot. The intention of this new approach was to allow school districts more flexibility. ECARE slots may be used to fund half-day pre-K, full-day pre-K, or full-day kindergarten. School districts may change the usage of their allotted ECARE slots from year to year, based on the needs of their early childhood population. In the 2015-2016 school year, 98% of the 178 school districts in Colorado offered CPP. Two types of slots can be allocated to districts: CPP slots, which can be used to serve eligible pre-K students, and ECARE slots which can be used to serve pre-K students or to provide full-day opportunities for eligible kindergartners. Two half-day slots can be combined to create full-day opportunities for pre-K children with very high needs. In the 2015-2016 school year, 21,496 pre-K children attended CPP/ECARE, a slight decrease from the previous year.

Schools may subcontract with private child care centers, Head Start, or other community-based or public agencies. The Charter School Institute also participates in the Colorado Preschool Program as a direct recipient of funds. Funding is awarded competitively with priority given to districts not currently participating in CPP. CPP may use additional funding sources, such as federal Head Start money, to extend the program day, supplement services, or provide wraparound care.

CPP funding is determined through the Colorado school finance formula, with preschoolers receiving half the amount of students in grades 1 through 12 given that they receive half-day programming. These funds are distributed directly to public schools, which are given a predetermined number of half-day slots to serve eligible children. Beginning in 2010-2012, the state enacted consecutive budget cuts, including a reduction in funding available for K–12 students. During those years, funding for CPP dropped by \$6 million to \$67 million. Funding for CPP has since recovered, with total state and local funding (through a required local match) in 2015-2016 at \$86 million.

# Connecticut

onnecticut serves prekindergarten children in three state-funded programs: School Readiness Program (SRP), Child Day Care Contracts (CDCC), and the new program Smart Start. As of July 2013, the Connecticut Office of Early Childhood (OEC) provides oversight for these programs and has been working to better align them. In previous years, parent fees for participation in CDCC were re-determined every six months, which did not meet the NIEER definition of a state-funded preschool program, therefore excluding it from the Yearbook. Due to a policy change of re-calculating fees annually, and the provision that allows families that are over income to remain enrolled, CDCC is included in Connecticut's entry this year for the second time.

SRP was founded in 1997 to increase access to early childhood programs for 3- and 4-year-olds. Financial support is available to 20 Priority School Readiness districts, as defined by legislation, and 47 Competitive School Readiness municipalities that have one or more schools in which 40% or more of the children are eligible for free- or reduced-price lunch or are one of the communities identified within the 50 lowest-wealth-ranked towns in the state, as defined by legislation. All families, regardless of income levels, can apply for School Readiness spaces in Competitive and Priority municipalities; however, 60% of children enrolled in each municipality must meet the income guideline of at-or-below 75% of the state median income (SMI). In 2015-2016, SRP enrolled 12,263 three- and four-year-olds in full-day, school-day, or part-day programs, a small increase from the previous year. FY2016 state funding increased to \$119.1 million from \$101.8 million the previous year.

CDCC are jointly funded through state funding and the Social Service Block Grant (SSBG) and must operate for at least 10 hours per day. In 2015-2016, CDCC enrolled 2,387 preschool-age children, targeting children with household incomes below 75% SMI with state funding and targeting children with household incomes below 200% of the federal poverty level with SSBG funds. Although CDCC served fewer 3- and 4-year-olds in 2015-2016, the program had a slight increase in the number of infants and toddlers served. CDCC programs, which do not operate in public schools, are reimbursed through a purchase-of-service contracting system administered by OEC.

Smart Start was created during the 2014 legislative session with the intent of expanding publicly funded pre-K for 3- and 4-year-olds in public school settings. Funding is distributed to local or regional boards of education through a competitive grant process. In 2015-2016, 13 school districts received funding to offer the six-hour, five-day-a-week program that operated 1,080 hours per year. In addition to the \$1.6 million in state funds (Tobacco Settlement dollars) for operations, \$1.4 million in state bonds were used for capital improvements.

SRP, Smart Start, and CDCC non-Head Start programs must be NAEYC accredited. Pre-K programs operating within public schools, private child care centers, and faith-based settings have until the third anniversary of the first day children attend the program to achieve accreditation. To help prepare programs that are not accredited and to monitor quality, annual ECERS ratings by state-approved raters are required.

In 2014, Connecticut was awarded a competitive federal Preschool Development Grant-Expansion. In 2015-2016, there were a total of 712 PDG-funded preschool spaces in the state, 430 were new preschool slots that operated separately from the three state-funded preschool programs, 244 spaces were dually funded in combination with SRP, and 35 spaces were dually funded with CDCC. These dually funded spaces are included in the programs' total enrollment counts.

Connecticut's contribution and commitment to state-funded prekindergarten, including state expenditure and enrollment for all three state programs are summarized in the first two pages of the state profile, followed by descriptions of CDCC, SRP and Smart Start.

### Delaware

ince the program began in 1994, the Delaware Early Childhood Assistance Program (ECAP) has provided comprehensive early learning services for Head Start-eligible 4-year-olds. Modeled after the federal Head Start program, ECAP requires participating programs to follow Head Start Performance Standards. Ten percent of enrollment slots are reserved for children with disabilities; the remainder of children must live in families whose income is at or below 100% FPL. The 2007 Head Start Reauthorization Act allowed children living in households with incomes between 100 and 130% FPL to comprise, at most, 35% of the programs' funded enrollment.

Community Needs Assessment Data determine who receive ECAP grants, which are available to for-profit child care, Head Start agencies, public schools, and private and faith-based centers.

Delaware Stars is the quality rating improvement system (QRIS) for early childhood programs, which aligns with the Head Start Performance Standards. Since December 2012, all ECAP programs must participate in the Delaware Stars QRIS. ECAP-only programs that do not receive mixed funding, if successfully monitored, can participate in an alternate pathway to QRIS and enter with a Star 4 rating. All ECAP programs are required to maintain at least a Star 4 rating.

In the 2017-2018 school year, 3-year-olds will be eligible for ECAP-funded enrollment in order to move toward a system of continuity within the state.

mong the first in the nation to invest in early education, the District of Columbia has offered prekindergarten (pre-K) since the 1960s. DC began to bolster its investment in pre-K significantly in 2008 through the Pre-K Enhancement and Expansion Amendment Act of 2008 (Pre-K Act). The Pre-K Act expanded the DC public pre-K program to provide quality, universally accessible pre-K education. Following the passage of this legislation, the percent of children enrolling in the DC Public Pre-K program increased significantly. During the 2007-2008 school year, 68% of the 4-year-old population and 33% of the 3-year-old population were enrolled in a pre-K program. In 2015-2016, 81% of all 4-year-olds and 70% of all 3-year-olds residing in the District were enrolled in the DC public pre-K program. Given such high availability and participation, the provision of prekindergarten services to 4-year-olds in the District can be considered universal. Moreover, the District of Columbia has a higher percentage of 3- and 4-year-olds enrolled than any other U.S. state or territory.

2002

2004

2006

2008

The Office of the State Superintendent (OSSE), the agency with authority over the majority of programs and services for young children and their families in the District, also administers the DC Public Pre-K program. Additionally, both the DC Public Schools and the DC Public Charter School Board have authority to oversee implementation of programs offered within these school-based settings. In an effort to provide high-quality pre-K services across multiple programs, pre-K services also are offered within high-quality community-based organizations.

Children attend DC's pre-K program five days per week during the school year, and services are provided for a minimum of 6.5 hours per day for at least 180 instructional days. Extended-day services are common in community-based organizations and many public and public charter schools.

Reflecting its commitment to quality, the DC Public Charter School Board uses its Performance Management Framework (PMF) to hold schools accountable to high standards. The PMF requires all public charter local education agencies (LEAs) to receive a score annually based on student outcomes, the results of the Classroom Assessment Scoring System (CLASS), which measures the quality of teacher-child interactions, and student attendance. Information collected is shared with families and other stakeholders. DCPS' Head Start School Wide Model holds its classrooms to the rigorous expectations reflected in the Head Start Performance Standards, as well as IMPACT, the teacher evaluation system. Community-based organizations also collect CLASS data to inform program and classroom quality.

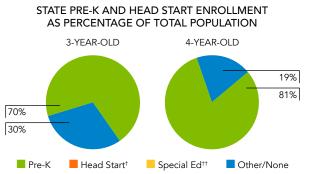

Funding for pre-K programs is calculated based on the school funding formula used for K through 12. The formula, called the Uniform Per Student Funding Formula (UPSFF), is based on the DC General Education Fund. The spending per pupil adjusts through a series of weights accounting for the costs of different grade levels and addresses the different needs of students.

### Florida

PERCENT OF STATE POPULATION ENROLLED

#### STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

Iorida's Voluntary Prekindergarten (VPK) Education Program was created as a result of the 2002 state constitutional amendment requiring prekindergarten access for all of Florida's 4-year-olds. The program began operating in 2005, serving approximately 100,000 children. Since that time, enrollment has increased steadily to more than 175,000 children in the 2011-2012 program year, decreasing in 2012-2013 and 2013-2014 in response to a declining preschool population but increasing slightly in 2015-2016. Starting in the 2016-2017 school year, parents are permitted to postpone enrollment for 4-year-olds in the VPK program and 5-yearolds will be eligible. VPK was jointly managed in 2013-2014 by Florida's Office of Early Learning (OEL) and the Department of Children and Families. Florida's Office of Early Learning (OEL) was established as an independent agency administratively linked to the DOE, separated from Florida's Agency for Workforce Innovation in 2011.

Age-eligible children are enrolled in either a 300-hour summer program, which every school district is mandated to offer, or a school-year program totaling 540 instructional hours. Teachers in the school-year program are required to have at minimum, a Child Development Associate (CDA) degree or equivalent credential. Teachers in the summer program are required to have a bachelor's degree. In 2011, the Florida Early Learning and Developmental Standards for Four-Year-Olds was approved by the State Board of Education, which all programs were required to meet in the 2012-2013 school year. The state is currently revising these standards and will begin implementation during the 2018-2019 school year. A variety of settings provide VPK, such as public schools, accredited nonpublic schools, licensed child care centers, accredited faith-based centers, and licensed family child care homes. The majority of children are provided services in nonpublic school settings. Regional early learning coalitions are formed to monitor programs for compliance and to administer VPK. The coalitions also distribute funds to VPK programs based on a fixed hourly rate.

The VPK program is reviewed annually as part of the legislative appropriation process and funding is determined by the legislative body. VPK is assessed annually based on the Florida Kindergarten Readiness Screener (FLKRS), composed of FAIR and ECHOS, administered within the first 30 days of kindergarten, comparing children and programs that participated in VPK to those that did not. Legislation adopted in 2011 requires the State Board of Education to periodically adopt a minimum kindergarten readiness rate to assess satisfactory delivery of the VPK Education Program by providers and schools. Beginning with the 2011-2012 program year, the state changed the requirements for children to be ready for kindergarten to require that children be rated as proficient on both the ECHOS and FAIR components of FLKRS. Beginning with the 2012-2013 school year, all providers were required to administer the Florida VPK assessment at the beginning and end of the school year. Results from the first and third assessment periods will be collected and used as a pre- and post-assessment to demonstrate learning gains. Starting with the 2014-2015 school year, Work Sampling was added to the FLKRS. In 2015-2016, Teaching Strategies GOLD was used by all VPK providers to assess children's development in domains not covered by the VPK assessment. However, the state legislature decided against using this assessment in subsequent years.

Florida's School Readiness Program, a separate initiative started in 1999, expanded in 2001 by incorporating two other state programs—the Prekindergarten Early Intervention Program, which focused on young children's health, and the State Migrant Prekindergarten Program, which served 3- and 4-year-olds whose parents are migratory agricultural or fishing industry laborers. The program offers financial assistance for child care to qualified parents. This report focuses solely on the VPK program.

Please note that funding and enrollment data are current; all other information was provided and confirmed for the 2014 Yearbook. Information regarding new quality standards benchmarks was obtained through a thorough review of the Education Code, Annual Report, and other publicly available documents.

### Georgia

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

eorgia's Preschool Program started in 1992 as a small pilot program and expanded in 1995 to become the nation's first statefunded universal preschool program for 4-year-olds. State lottery revenues generate funding for the program in a variety of settings such as public schools, private child-care centers, faith-based organizations, Head Start agencies, state colleges and universities, and military facilities.

Total spending for the 2015-2016 school year was \$317 million, an increase of \$5.8 million over the 2014-2015 school year. The program received funding to operate 60 additional Summer Transition programs during the 2015-2016 school year. In 2014-2015, the budget included a one percent increase in salary for both lead and assistant teachers, as well as a one-time payment to Georgia's preschool providers for investment in new curriculum, classroom technology and refurbishment, and professional development opportunities. The review was conducted to update the list of approved comprehensive curricula to be used in Georgia's preschool classrooms. The preschool budget for the 2016-2017 school year includes an additional approximately \$36.4 million. This increase was appropriated in the state budget for lead and assistant teacher salaries. A new salary scale was also developed for preschool lead teachers based on years of experience to continue to support salary parity between preschool teachers and K-12 teachers.

In 2011, the Georgia General Assembly funded a multi-year evaluation of the program. The evaluation is being conducted by researchers from Frank Porter Graham Child Development Institute at the University of North Carolina at Chapel Hill. Data on the first two phases of the study have been released and demonstrate significant gains for children participating in the program across all domains of learning. Currently, the researchers are following a representative sample of children who attended Georgia's Preschool Program through third grade. Results from the preschool and kindergarten year have been released. In addition to these evaluations, DECAL also has commissioned studies related to professional development for Georgia's Preschool Program teachers and summer transition.

Budgetary constraints in the preschool program during the 2011-2012 school year resulted in several changes. The program was cut by 20 days, though this was eliminated by the 2013-2014 year, returning the program to its 180-day schedule. Other changes included a teacher-student ratio of 1:11 being allowed, and the maximum class size became 22 students.

he Executive Office on Early Learning (EOEL) launched Hawaii's first publicly funded pre-K program in 2014-2015 with an initial \$3 million investment. Hawaii's Department of Education (DOE) is the only statewide public education system in the country comprising only one school district. In July of 2015, the EOEL became attached to the DOE for administrative purposes only; at this time, the EOEL is not considered a part of the DOE. Currently, all pre-K classrooms are located within public schools, as is mandated by a provision in the Hawaii state constitution that bars the distribution of public funds to privately run programs.

In the 2015-2016 school year, the EOEL's Public Prekindergarten Program served 375 students. Classrooms serve 4-year-olds during the year before they are eligible to attend kindergarten, with priority given to those students who are considered to be "at-risk," including those from low-income families (defined as 250% FPL).

Teachers in the EOEL Public Prekindergarten Program are part of the Hawaii State Teachers Association and, as such, are granted salary and benefit parity with teachers in the K–12 grades. Reflecting a commitment to quality standards, lead teachers in the Public Prekindergarten Program are required to have a BA with licensure, while assistant teachers are required to have an associate's degree. The union contract requires all lead teachers to participate in 21 hours of in-service training each year.

Classrooms in the EOEL Public Prekindergarten Program participate in CLASS observations twice a year, and formative child assessments are conducted three times a year using Teaching Strategies GOLD. In addition, all programs undergo fiscal monitoring annually and a review of program records more than once per year.

In 2014, Hawaii was awarded a federal Preschool Development Grant (PDG). The PDG is administered by the Hawaii State Public Charter School Commission who began implementation in Year One with four charter school classrooms in the 2015-2016 school year, serving 78 children. The schools chosen for Year One implementation were intentionally selected, due to limited access to high-quality preschool programs, so that three of the four schools apply a varying degree of Hawaiian culture instruction. One has Hawaiian cultural elements infused into instruction, another is a Hawaiian immersion school with the majority of students enrolling with English as their first language and then learning the Hawaiian language. The third school is a Hawaiian-medium school with culture and language embedded throughout instruction and family engagement activities.

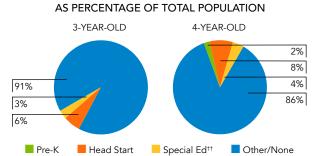

In Year Two of the PDG grant, two additional classes will be added for a total of six PDG-implemented classrooms. In Years Three and Four, a total of 18 classrooms will be implemented statewide in public charter schools on four islands, of which nine will have varying degrees of Hawaiian cultural and language learning focus.

### Idaho

# NO PROGRAM

daho does not have a state-funded preschool program but the state does provide other investments in early education. The state invests \$200,000 TANF dollars to support 200 additional slots in Head Start. Additionally, in 2015, the Idaho Falls EICAP Head Start and Early Head Start Program received \$1.8 million in operational funds and \$1.2 million in start-up funds to serve 72 children ages birth to three years in center-based Early Head Start. Legislation was passed in 2015 authorizing Pay for Success contracts in Idaho. Pay for Success allows private funders to invest in scaling up social programs to improve the scope of the programs' impacts. In addition, the Lee Pesky Learning Center is seeking support from the State Department of Education to move forward with authority to provide early literacy programs for students in a pre-K setting. Currently no further advancements have been made on utilizing this mechanism.

Idaho updated and revised their Early Learning eGuidelines in 2013. The eGuidelines cover a broad range of early learning domains, including: motor development, physical well-being, and health; approaches to learning and cognitive development; general knowledge; social-emotional development; and communication, language, and literacy. Approaches to learning, social and emotional development, and cognition domains include guidance through third grade while the other domains cover birth through kindergarten. The eGuidelines are aligned with the Idaho Core Standards, the Head Start Child Outcome Framework, and the National Association for the Education of Young Children (NAEYC) standards.

The Idaho STARS quality rating and improvement system (QRIS) for child-care providers is a multi-agency collaboration. Idaho's QRIS helps child-care providers by increasing their skills and knowledge in early care and education through a Professional Development System (PDS). Participation in Idaho STARS is voluntary. The QRIS meets the goals set in the Early Learning Guidelines.

Idaho has been focused on the future and in 2015 convened a small group early childhood leaders from across the state to organize an Early Childhood Steering Committee. The committee worked toward a mission and purpose statement to address several big questions: (1) What would ideal early (learning) education look like? (2) What is the school readiness culture we aspire to create? (3) What pieces need to be in place and in which order? As a result, the committee drafted a legislative bill that would provide greater access to high-quality, inclusive, early learning environments and give parents choices regarding how to get their children ready to learn by kindergarten. Currently there are efforts to find a legislative sponsor.

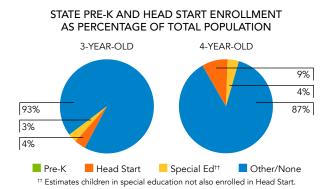

Idaho recently received a three-year grant from the Kellogg Foundation to build support for pre-K in the state. The money will be used to create additional state-supported pre-K options and increase public support.

#### SPENDING PER CHILD ENROLLED

## Illinois

n 1985, the Illinois Prekindergarten Program for At-Risk Children was founded. Beginning in 1998, the program has been funded through the state Early Childhood Block Grant (ECBG), which also supports the Prevention Initiative for children birth to age three. ECBG funding is required to be used to serve children age three or younger in addition to 4-year-olds. The Illinois Preschool for All initiative began in 2006 with the goal of providing preschool education to all 3- and 4-year-olds in Illinois by 2012. The program operates in all counties in the state but budget constraints have prevented the program from serving all children who want to attend. Illinois has not had a full state budget since July 2015. However, the ECBG did receive a \$79.5 million dollar increase for the 2016-2017 school year.

Preschool for All is provided through public schools, private child care, Head Start, family child care homes, faith-based centers, higher education institutions, and regional offices of education. Funding for the program is awarded on a competitive basis. By July 2016, all pre-K teachers were required to meet bilingual education requirements. Preschool for All programs are required to provide instruction in children's home language if there are 20 or more English Language Learners (ELL) with the same home language enrolled in a program. Language of instruction is determined locally when there are fewer than 20 ELLs speaking the same home language–however English as a Second Language and other home language supports may be provided.

Children who most need the program are prioritized for enrollment and children must have at least two risk factors to be eligible for Preschool for All. In their funding proposals, agencies and school districts define "at-risk" status. Risk factors include (among others) low income, history of family neglect, violence, or abuse, exposure to drug or alcohol abuse in the family, developmental delays, low parent education, and homelessness or unstable housing. The second level of priority for Preschool for All enrollment is for families with incomes at 400 percent of the federal poverty level. However, in light of limited funding, no programs have funding to serve children at this second priority level.

Illinois received federal Race to the Top and Race to the Top–Early Learning Challenge grants. The state used this funding in part to implement a Quality Recognition and Improvement System (QRIS), ExceleRate Illinois, beginning in 2013-2014. Preschool for All programs are required to participate in the QRIS. Funding from these grants was also used to revise the Illinois Early Learning and Development Standards to align them with Common Core State Standards and the Head Start Framework and implement the KIDS assessment. In 2014, Illinois was awarded a competitive federal Preschool Development Grant – Expansion Grant for \$20 million. During the 2015-2016 school year, 3,110 children were served in the state using this funding, including 2,559 new slots and 551 enhanced Preschool for All slots.

Illinois will implement the Kindergarten Individual Development Survey (KIDS) statewide starting with the 2017-2018 school year. The process to develop this kindergarten assessment began in 2010-2011. KIDS was developed based on the Desired Results Developmental Profile-School Readiness and it has been piloted, field tested, and calibrated.

ndiana successfully launched two state-funded preschool pilot programs, with the goal of expanding enrollment of low-income 4-year-old children in high-quality early childhood education. The On My Way Pre-K program was signed into law in 2014 to provide grants to eligible low-income four-year-old children for qualified early education services. The pilot operated in 13 school districts across four counties in the state in 2014-2015. The 2015-2016 school year marks the first full year of the On My Way Pre-K program. Current levels of funding have been extended through 2018, and a longitudinal study through third grade of the preschool children enrolled with these grants and a control group will be completed by Purdue University.

During the 2013 legislative session, the Indiana General Assembly enacted the Early Education Matching Grant (EEMG) through 2018. The EEMG program currently serves less than one percent of the population, which does not meet this report's definition of a state-funded preschool program, and is therefore not profiled in this publication.

Both On My Way Pre-K and EEMG require services to be delivered via public schools, licensed or registered child care providers who have achieved Level 3 or Level 4 in Paths to QUALITY<sup>TM</sup>, and, for On My Way Pre-K, accredited private schools. The programs have encouraged expansion of the number of Level 3 and Level 4 high-quality programs in Indiana, affecting not only the 4-year-old children enrolled with state funding, but also all other children enrolled in these programs. Together, On My Way Pre-K and EEMG also have increased the number of high-quality slots in Indiana for low-income children, who now have an opportunity to both attend pre-K and to be better prepared for kindergarten.

#### QUALITY STANDARDS CHECKLIST

Total state pre-K spending	\$9,542,255
Local match required?	Yes
State Head Start spending	\$0
State spending per child enrolled	\$6,020
All reported spending per child enrolled*	\$6,594

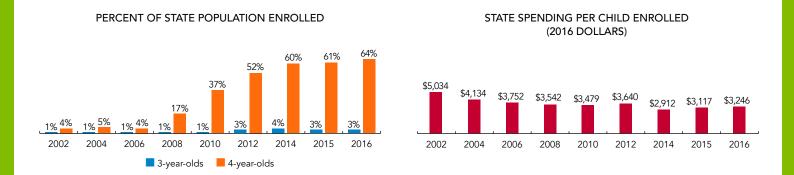

Pre-K programs may receive additional funds from federal or local sources that are not included in this figure.

\*\* Head Start per-child spending includes funding only for 3- and 4-year-olds.

owa has two state-funded pre-K programs: Shared Visions and the Statewide Voluntary Preschool Program (SWVPP). The Shared Visions program has provided services to 3-, 4-, and 5-year-olds since 1989 through competitive grants to public schools, licensed non-profit child care centers, other public non-profit agencies, and Head Start. Shared Visions serves children in part-, school-, or extended-day programs, and all programs are required to meet NAEYC standards. The 2015-2016 school year was the first year of a five-year competitive grant cycle and budget constraints resulted in a slight decrease in the number of awards granted and children served.

In 2007, Iowa began the SWVPP to increase 4-year-olds' access to pre-K. All 4-year-olds in the state are eligible to attend SWVPP. Funding for SWVPP is based on a school funding formula in which 4-year-olds are funded at 50% of the K–12 student aid amount. SWVPP operates at least 10 hours per week and programs may collaborate with Head Start, other preschool programs, or child care programs to offer full-day services.

Both SWVPP and Shared Visions have undergone formal evaluations and additional evaluations are currently underway. Additionally, as part of the state longitudinal data system, all children enrolled in both programs receive a unique state identification number.

An important difference between the two state-funded pre-K programs concerns how child eligibility is determined. Shared Visions is a targeted program where at least 80% of children are required to meet income eligibility guidelines (family income at or below 130% FPL). Children can also qualify for the program based on other risk factors but may be required to pay a fee on a sliding scale. Services within this program are provided in 32 locations, which represent less than seven percent of school districts. In addition, services are provided in 35 other community-based locations, representing 16 organizations. In contrast, SWVPP is available in 96% of school districts and all children in the state who turn four by September 15 are eligible to attend the program.

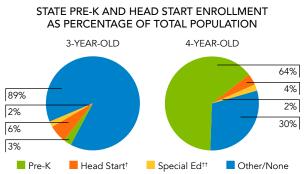

Shared Visions lead teachers are required to have at least a BA degree if they are employed by public schools. Lead teachers employed by nonpublic settings follow NAEYC standards which require at least 75% to have a BA in ECE or a related field. The other teachers are required to have at least an AA degree in ECE or CD. All SWVPP lead teachers must have at least a BA and an lowa teaching license with an early childhood endorsement.

lowa's overall support for state prekindergarten, including enrollment and funding for both Shared Visions and the Statewide Voluntary Preschool Program are shown in the first two pages of this state profile. The third page focuses on Shared Visions whereas the fourth page provides information about SWVPP.

### Kansas

ansas supports two state-funded prekindergarten programs. The first, established in 1998, is the Kansas State Pre-Kindergarten Program, formerly known as the Four-Year-Old At-Risk Program. The second is the Kansas Preschool Program, formerly known as the Pre-K Pilot Program, which was first offered in the 2006-2007 school year and is funded with tobacco dollars from the Master Settlement Agreement.

The Kansas State Pre-K Program, operated by the Kansas State Department of Education, is available in 181 out of 286 school districts in the state. The program provides funding to public schools directly, although schools may subcontract with community-based organizations to provide services. To be eligible for the program, children must meet at least one of the eight risk factors: eligibility for free or reduced price lunch (185% FPL), academic or developmental delay based upon validated assessments, English Language Learner status, migrant status, a parent lacking a high school diploma or GED, having a single parent, having a teen parent, or having a referral from the Department for Children and Families agency. Child inventories on randomly selected children in each classroom, as well as classroom and parent surveys, are among data collected via a web application.

The Kansas Preschool Program is also operated by the Kansas State Department of Education and accessible in 14 of 105 counties. Grants are awarded to school districts and nonprofit community partnerships or community agencies on behalf of a coalition of service providers. At least 50% of the children enrolled must meet either one of the risk factors listed above or one of the alternate risk factors, such as being referred by an early childhood organization, qualifying for reduced-price lunch (185% Federal Poverty Level), or having a parent on active military duty. The other half must be eligible according to standards set by local programs.

In 2013-2014, sites participating in both programs began receiving technical assistance and support from KSDE. The initial support focused on increasing collaboration at the community level and data-driven decision-making. As of the 2013-2014 school year, both Kansas programs were required to use the Kansas Early Learning Standards, which are aligned with Kansas College and Career Ready Standards, K–12.

Kansas also provides funding for the Parents as Teacher Program, serving children from prenatal to 3 years old and their families. Managed by the Kansas State Department of Education, the program offers services through local school districts and coordination with other communities.

The first two pages of this profile address the general assistance and commitment to prekindergarten in Kansas, including enrollment and spending for both the State Pre-Kindergarten Program and the Kansas Preschool Program. The third page focuses solely on the Kansas Preschool Program, while the last page discusses the Kansas State Pre-K Program.

State spending per child enrolled	\$1,990
All reported spending per child enrolled*	\$1,990

 Pre-K programs may receive additional funds from federal or local sources that are not included in this figure.

\*\* Head Start per-child spending includes funding only for 3- and 4-year-olds.

 $^{\star\star\star}$  K-12 expenditures include capital spending as well as current operating expenditures.

he Kentucky Preschool Program (KPP) was launched in 1990, in response to the Kentucky Education Reform Act. The program is available to 4-year-olds from low-income families as well as 3- and 4-year-olds with disabilities. In the 2015-2016 school year, 19,182 eligible children were enrolled, a 2.5% increase over the previous year. Income eligibility for preschool increased from 150% to 160% of the federal poverty level. Children who do not meet state eligibility requirements may participate based on space availability, though they are funded by the district or tuition rather than state dollars.

The General Assembly approved an additional \$18 million for state-funded preschool, increasing the state share of the budget to \$90.1 million for 2015-2016. However, the state expenditure was higher, \$92.68 million. In addition to state funds, \$56.4 million from federal sources and \$6.48 million from non-required local sources supported KPP in 2015-2016.

KPP is administered by the Kentucky Department of Education (KDE), Office of Teaching and Learning, Division of Program Standards, School Readiness Branch. Funds are distributed to school districts through a funding formula. Each of Kentucky's 173 school districts offered KPP services in 2015-2016. School districts may subcontract with private child care centers, Head Start programs, and special education providers to offer preschool services.

In 2016-2017, KDE in collaboration with the State Board of Education, the Early Childhood Advisory Council, the Child Care Advisory Council, and the Cabinet for Health and Family Services introduced a new grant program to incentivize cooperative public/private partnerships between public school districts and child care providers to develop full-day, high-quality programs for at-risk children.

All early childhood programs that receive public funds, including KPP, migrated into Kentucky All STARS, the state's quality and rating improvement system in 2015-2016. Moving forward, the ECERS-3 will be used to evaluate classrooms, including classrooms observed during the Preschool Program Review (P2R) process. P2R also includes a self-evaluation of the preschool standards through an online survey and site visits at least once every five years to observe classrooms at every site. Additionally, the KDE, Division of Consolidated Plans and Audits randomly selects 14 districts to receive a site visit each year.

## Louisiana

STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

he 8(g) Student Enhancement Block Grant Program was created to compensate for the loss of the Model Early Childhood Program when matching annual appropriations for that program ended. At that time, local school districts began using the 8(g) Block Grant Program to offer preschool programs to at-risk 4-year-olds. In the 2015-2016 school year, 65 of 70 districts used 8(g) block grants to provide preschool to 2,311 children. Enrollment priority is given to children from low-income families, but children also qualify for the program if they are screened and deemed "developmentally unprepared."

Louisiana also operates two other state-funded preschool programs alongside the 8(g). Louisiana's largest pre-K program, The Cecil J. Picard LA4 Early Childhood Program (formerly LA4 and Starting Points) was established in 2001 and serves children in public schools, charter schools and one tribal school. In the 2015-2016 school year, 16,183 four-year-olds were enrolled.

Also established in 2001, the Non-Public Schools Early Childhood Development program (NSECD) reimburses preschool tuition for enrolled children from families with incomes below 200% of the federal poverty level. With the implementation of Act 3 and unification of Louisiana's preschool programs, preschool tuition is now reimbursed for families at 185% of the federal poverty level. Programs operate in 16 parishes throughout the state, though all parishes have the opportunity to participate.

An assessment of process quality and program impact/child outcomes for Louisiana's three pre-K programs was conducted by the Cecil J. Picard Center for Child Development and Learning at the University of Louisiana-Lafayette in 2012-2013. A 2015-2016 evaluation is currently in process for the NSECD program.

During the 2012 session, the Louisiana Legislature passed Act 3, unifying multiple early childhood initiatives under the direction of the Department of Education and in collaboration with other state agencies. This system contains aligned program standards, a quality rating and improvement accountability system in which all programs receiving state and/or federal funds will be required to participate, a unified professional development system, birth-through-five early learning and development standards, and a cross-agency integrated data system.

In July 2013, the Department of Education launched 13 Community Network Pilots to test this new unified system. In January 2015, the state expanded the number of Community Network Pilots to include an additional 33 communities on the way to full implementation of Act 3, scheduled for the 2015-2016 school year, considered to be a learning year. During the learning year, the state released Practice Performance Profiles assigning each site and network a rating with no consequences based on results. After the learning year, any program rated unsatisfactory for any two years in a three-year period will not be eligible for public funding.

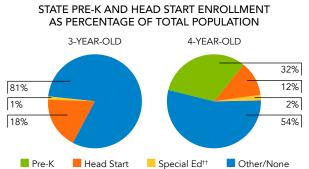

In 2014, Louisiana was awarded a competitive federal Preschool Development Grant for \$2.4 million. In the 2015-2016 school year, pursuant to Bulletin 140, network members statewide will participate in the early childhood care and education accountability system, which includes both classroom observations and student assessment, and in the coordinated enrollment process. A total of 340 children are served using these grant dollars in new slots.

To document the contributions Louisiana makes to prekindergarten, we first present summary information reflecting the state's overall performance through enrollment and state spending for all three programs. We then present additional details about the 8(g), Cecil J. Picard LA4, and NSECD programs.

## Maine

aine established its Two-Year Kindergarten initiative in 1983 by allocating resources to local districts through the school funding formula. State-funded programs for 4-year-olds have been separately defined as the Public Preschool Program (PPP) since 2007, and remain funded through Maine's school funding formula, with distributions of funds to 135 of the 256 school administrative units (SAUs), and 135 of the 191 SAUs with kindergarten. Though not required, PPP funds are available to any SAU choosing to offer the program.

Although many SAUs have partnered with community-based child care programs or Head Start agencies to offer early childhood services, the majority of PPP classrooms are located in public schools.

Maine's Chapter 124, Public Preschool Program Standards were promulgated as a regulation in December 2014. The Standards implemented programmatic changes in 2015-2016, including child-staff ratio, group size, the use of evidence-based curricula, and child screening and assessments. First-year programs received a monitoring visit from the Maine Department of Education.

In 2015-2016, Maine's preschool programs served 5,442 children, approximately 42% of the state's 4-year-olds. In 2015-2016 the state spent \$17.4 million on PPP. This does not include additional weighted state funds, federal funds, and local funds that were blended by school districts. Schools are required to provide a local match to draw down their per-pupil state subsidy. The required local match is part of the school funding formula based on property wealth.

In 2014, Maine was awarded a federal Preschool Development Grant: Expansion Grant award that supported 434 children through enhancing the quality of existing slots or creating new slots in PPP in 2015-2016.

Maryl

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

aryland created the Extended Elementary Education Program (EEEP) in 1980 as a pilot preschool program in Baltimore City and Prince George's County. The 2002 Bridge to Excellence in Public School Act created the Maryland Prekindergarten Program, which required all local boards of education to increase pre-kindergarten enrollment in public schools to all 4-year olds from families with incomes at or below 185% of the federal poverty level (FPL) by the 2007-2008 school year.

Since 2012-2013, enrollment in the Maryland Prekindergarten Program has steadily increased. In an effort to expand pre-K to children above 185% FPL, in 2014, Maryland enacted the Prekindergarten Expansion Act, adding an additional \$4.3 million per year to increase access to half-day and full-day public pre-K for 4-year-olds from families with household incomes at or below 300% FPL. That same year, Maryland was awarded a Preschool Development Grant (PDG) of \$15 million per year through fiscal year 2017. These funds, which can be used to support children from families with incomes at or below 200% FPL, have been used to serve 2,732 children in the state pre-K program.

In addition to public prekindergarten, Maryland has 51 early learning centers of distinction known as Judy Centers, which are located in Title 1 school districts. The Judy Centers work collaboratively with select elementary schools to offer comprehensive, year-round services for children from birth to age 6. In 2015, Judy centers served 15,205 children in this age group. In 2015-2016, a total of 31,740 children—5% of the 3-year-old population and 36% of the 4-year-old population—participated in the state pre-K program.

The Division of Early Childhood Development (DECD) housed in the Maryland State Department of Education (MSDE) is responsible for early care and education in Maryland. Funding for the Maryland Prekindergarten Program is based on the K-12 per pupil amount, prorated for the percent of children attending half- and full-day programs.

All state-funded pre-K programs must participate and achieve Level 5 in Maryland EXCELS, the state's QRIS system. Maryland's Division of Early Childhood Development, Early Learning Branch, monitors pre-K programs annually using a self-developed checklist. Through the required participation in Maryland EXCELS, pre-K programs are able to access targeted technical assistance, both online and face-to-face.

Massachusetts

he Massachusetts Department of Early Education and Care (EEC) was established in 2005 to improve quality, affordability, and access to preschool education services. That same year, the state launched its Universal Pre-Kindergarten (UPK) initiative, which serves children from age 2 years, 9 months, until they arrive at the locally determined kindergarten eligibility age. Public schools, private child-care centers, Head Start programs, family child care, and faith-based centers are eligible for UPK grants if they offer full-day, full-year services. UPK is usually a competitive grant program, though renewal grants have been used in recent years due to funding constraints. During the 2015-2016 program year, the state issued \$6.3 million in renewal grants for the existing 224 UPK grantees, further supported by \$26 million in federal Child Care and Development Fund grants. Individual child eligibility for enrollment in a UPK classroom is not based on income level, although programs must be willing to serve children from families with income levels at or below 85% of the state's median income (SMI).

For the 2015-2016 program year, UPK programs were required to be, at a minimum, self-assessed at level 3 in EEC's Quality Rating and Improvement System (QRIS), to have an income-eligible contract and/or voucher agreement in place, and be willing to accept EEC-subsidized or low-income children. UPK programs were also required to be accredited by one of several eligible agencies (including NAEYC), to collect observational formative assessment data on all children in the UPK classroom(s), and to demonstrate preschool-to-third-grade alignment with the local school district. As part of the grant requirements, UPK programs must provide the state with: (1) child-level data using either a State Assigned Student Identification or program-specific child ID number and (2) staff information from EEC's Professional Qualifications (PQ) Registry.

Massachusetts also offers the Inclusive Preschool Learning Environments (IPLE) Grant, or the Grant 391 program. The IPLE Grant is designed to support inclusive preschool learning environments serving preschool-age children with and without disabilities in high quality, inclusive early education and care settings. This program has funded typically developing preschool-age children since 1985. There is no income qualification for enrollment. During the 2015-2016 program year, the state issued \$9.0 million in renewal grants for the existing 92 IPLE grantees, further supported by \$3.7 million in federal IDEA funds. The FY 2016 grant priorities supported program capacity to offer inclusive preschool learning environments in center-based programs and public school preschool programs and enhanced program quality by continuing to require IPLE-funded programs to participate in QRIS.

In 2014, Massachusetts was awarded a federal preschool development grant (PDG) for \$60 million over four years. During the 2015-2016 school year, these funds were used to create 850 new preschool slots for low-income children. Unlike other PDG grantees, Massachusetts did not use the funds to enhance or improve existing, state-funded UPK or IPLE slots.

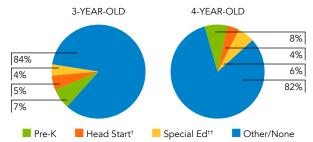

To document Massachusetts' contributions to pre-K, we first present a summary of the state's overall performance through enrollment and spending for both the UPK and IPLE/Grant 391 programs. We then present additional details about both the IPLE/Grant 391 and UPK programs separately on the subsequent pages.

## Michigan

stablished in 1985, the Michigan School Readiness Program (MSRP) was developed to provide preschool education for at-risk 4-year-olds, and is associated with the state's early childhood initiative, Project Great Start. MSRP is now called the Great Start Readiness Program (GSRP). The program has moved from part-day to serving the majority of children in school-day programs to better suit the needs of families.

Intermediate School Districts (ISDs) receive financial support directly, but they may distribute funds to local school districts and to providers in community-based settings to offer GSRP. The level of poverty in each ISD and a funding formula determine overall ISD funding. GSRP has both a community needs assessment and a formula component that contribute to the final grantee allocation.

All GSRP providers must attain a three-star or higher rating in Michigan's Great Start to Quality (tiered rating and improvement system). In previous years, 75% of families in the program had to be at or below 300% FPL. Starting in 2013-2014, 90% of families had to be at or below 250% FPL with some exception for up to 300% FPL. Any family over-income for the remaining 10% must pay a fee on a locally determined sliding scale. A new legislated prioritization process was put in place for ranking each family's household income into quintiles. The 2013-2014 school year was also the first in a three-year transition to roll back the age-eligibility date, from December 1 to September 1 to align with a change in the kindergarten entry date. In the 2015-2016 school year, the new age eligibility date changed to September 1, however, parents are allowed to request exception through December 1. In the 2016-2017 school year, the September 1 cut-off date will have no exceptions.

In fiscal year 2013-2014, Michigan invested an additional \$65 million in GSRP, increasing the number of slots available and increasing the per-slot funding by \$225. In fiscal year 2014-2015, Michigan invested another \$65 million in GSRP, though per-slot funding was kept level. Of the total funding allocated for GSRP, a \$10 million special transportation fund for GSRP has been set aside. In both budget increases, two percent of funding was specifically earmarked for recruiting and increasing public awareness of GSRP. In fiscal year 2015-2016, an additional \$4.3 million was invested. An additional \$300,000 was allocated for ongoing statewide evaluation activities. Cross-ISD boundary enrollment has always been permitted via GSRP policy, but this was legislatively allowed beginning in the 2014-2015 school year, with slot funding following the child.

## Minnesota

s part of Minnesota's efforts to increase access to early childhood education for children birth to five, the state financially supplements Early Head Start and Head Start. All state-supported Head Start programs are required to follow the Early Childhood Indicators of Progress (ECIPs), Minnesota's early learning standards birth to kindergarten entrance. ECIPs guide required training, support, and technical assistance for all program staff. The ECIPs, which are currently being revised, are aligned with the English Language Arts Common Core standards for the early grade, the state's college and career ready standards. The ECIPs will soon be aligned with the Head Start standards as well.

Minnesota spent \$25 million to supplement federally funded Head Start in the state during the 2015-2016 school year. The state served an additional 1,617 three- and four-year-olds in Head Start and additional children under age three in Early Head Start. Local grantees can decide how to allocate funds between Head Start and Early Head Start. The state supplement for Head Start and Early Head Start increased by \$5 million for the 2015-2016 school year.

Organizations receiving federal Head Start funding can also receive supplemental funding from the state. Head Start programs are eligible to receive funding directly but they are permitted to subcontract with private child care, family child care, and public schools to provide the program. All programs are required to follow the federal Head Start Performance Standards. Head Start programs are only required to participate in Parent Aware, the state's QRIS, if the conditions outlined in the <u>performance standards</u> are met. American Indian/Alaska Native (AI/AN) programs do not have to participate. Currently in Minnesota all but two AI/AN programs participate in Parent Aware.

Minnesota has other state-supported early childhood initiatives that are not included in the State of Preschool Yearbook. The Early Learning Scholarships Programs provides scholarships to eligible families in order to increase access to high-quality early childhood programs. Families with children between the ages of three and four as of September 1 are eligible for scholarships and can chose any early childhood program that receives a Three- or Four-Star Parent Aware Rating. During 2015-2016 school year, approximately 11,219 scholarships of up to \$7,500 were awarded using an appropriation of \$44.13 million.

The School Readiness Program aims to improve children's kindergarten readiness through preschool education programs and home visits. Individual districts can exercise local control over the services provided, but all programs must meet the following requirements: provision of appropriate screenings and referrals for children as needed, support for parent involvement, use of research-based program content, and collaboration with other local programs. Early childhood services are provided through subcontracts with school districts, community-based organizations, and charter schools.

The Voluntary Pre-kindergarten program began during the 2016-2017 school year, serving approximately 3,330 children in 74 school districts and charter schools. The program was established by Governor Dayton and the 2016 Legislature, and there are plans to expand the program pending legislative approval. The goal of the program is to prepare children for success in school through high-quality early learning programs.

## Mississippi

he Early Learning Collaborative Act of 2013 established Mississippi's first state-funded, voluntary pre-K program. The Early Learning Collaborative Act provides funding to local communities to establish, expand, support, and facilitate the successful implementation of quality early childhood education and development services. Implementation began in January 2014, with capacity to serve 1,774 children. Pre-K programs in Head Start centers, licensed child-care facilities, public, parochial, or private schools, formed and maintained a stakeholder council called an Early Learning Collaborative, involving a minimum of two of those program auspices. The Early Learning Collaborative designated a Lead Partner of either a public school or other nonprofit entity with the instructional expertise and operational capacity to manage a Collaborative's Pre-Kindergarten (Pre-K) program.

The 2014-2015 and 2015-2016 school years saw steady state funding for preschool in the state, at \$3 million per year. The 2015-2016 school year is the third year Mississippi will operate under the current RFP. As long as the Early Learning Collaborative Act of 2013 is funded, current collaboratives that meet program requirements will continue to be funded. The voluntary pre-K program intends to improve quality, increase access to high-quality pre-K programs for 4-year-olds, and prepare more children to enter kindergarten ready to succeed in school. The program also will provide supports to local programs to improve quality, and families will have access to information about the pre-K program. Pre-K programs will increase their collaboration with other early childhood education programs and related services. Pre-K programs will implement an integrated, effective system of early childhood curriculum, instruction, assessment, and program evaluation, including curricula aligned with the MDE's Early Learning Standards for Classrooms Serving Four-Year-Old Children. In the 2016-2017 school year, the program will implement the LAP-3 assessment in order to identify children who may need additional interventions or gifted services.

## Missouri

he Missouri Preschool Program (MPP) began serving 3- and 4-year-olds in early childhood settings in 1998. The MPP operates in public schools, private child-care centers, and nonprofit agencies. In 2015-2016, MPP was offered in 13% of districts in the state. Ninety percent of children were enrolled in programs that were operated by a public school. All preschool programs are required to work with their local Parents as Teachers (PAT) program, which provides parent education, including family visits and group connections, and health and development screenings. In addition, PAT provides referrals to services that may be beneficial to the family, based on need or request.

State-funded MPP contracts for all providers are eligible for renewal for a limit of five years; after this period, contracts are made available to other grantees. A competitive grant process determines where MPP funds are awarded, though programs serving children with special needs and those from low-income families are given priority. Programs use sliding payment scales, based on criteria including eligibility for free or reduced-price lunch.

Funding for MPP in 2015-2016 was \$11.75 million, a decrease of \$1.9 million from the previous year. Of the total budget, \$9.7 million came from the state's Tobacco Settlement Fund and the remaining dollars came from the state's general revenue. In the 2015-2016 school year, 2,489 children attended MPP, a 42% decrease from the previous year.

Effective 2014-2015, site visits are conducted for all MPP programs on a regular basis throughout the year. On-site consultation hours are also provided. The number of hours ranged from 14 to 20 annually, based on a program's need. In 2015-2016, ECERS-3 was piloted for professional development and planning.

### Montana

# NO PROGRAM

ontana does not offer a state-funded pre-K program (as defined in this report) but the state has made other commitments to early learning, and early childhood education is one of Governor Steve Bullock's top priorities. During the last legislative biennium, the Governor proposed the Montana Early Edge Initiative to fund voluntary public preschool but was unsuccessful in his budget request for a two-year, \$37 million state investment in preschool. The Governor continues to support investments in preschool though recently House Bill 563 was rejected, which would have provided \$12 million in grants to school districts, Head Start, and other high-quality preschool providers to offer preschool to 4-year-olds from families at or below 200% of the federal poverty level.

In 2014, Montana was awarded a competitive federal Preschool Development Grant. The state received \$10 million per year for up to four years to develop preschools for low- and moderate-income families in 16 communities. During the 2015-2016 school year, the state provided 462 low-income 4-year-olds with new early childhood education slots, many of which were created through partnerships with Head Start and other early childhood programs in the state.

The Board of Public Education adopted a new rule that includes Early Childhood Education Program and Content Standards for school districts that choose to provide public preschool to children ages three to five. It also changed requirements for educator licensure to include an Early Grades endorsement (age three to grade three) and changed the educator preparation program requirements for the early grades endorsement. These recommendations were approved by the Montana Board of Public Education in November 2014 and went into effect July 1, 2015.

The Montana Early Learning Standards cover multiple domains including: approaches toward learning, physical wellbeing and motor development, language development, social-emotional development, and cognitive and general knowledge. The Montana Early Learning Standards were based on the combination of Montana's Early Learning Guidelines for children ages three to five and the Montana Guidelines for infants and toddlers, created in 2014.

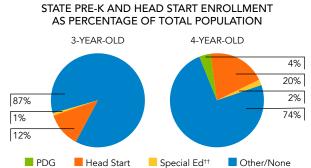

The Best Beginnings Advisory Council (BBAC), which was established in 2011, is the state early childhood advisory council and collaborating entity for the early childhood system in Montana. BBAC is housed within the Department of Public Health and Human Services and aims to ensure all children have access to high-quality early childhood programs. Local coalitions work to increase coordination across early childhood systems in the state. Best Beginnings STARS to Quality Program is Montana's voluntary quality rating improvement system (QRIS). The QRIS aligns quality indicators with support and incentives for early childhood programs and early childhood programs. Licensed preschool programs can participate in the QRIS and earn up to five stars, indicating the level of quality.

#### SPENDING PER CHILD ENROLLED

## Nebraska

he Nebraska Early Childhood Education Grant Program began as a pilot in 1992 and expanded in 2001. The program provides preschool education for children ages three to five. At least 70% of awarded grant funding to participating programs must be used to provide services to children with one of the following risk factors: disability or developmental delay, living in a home in which English is not the primary language, eligibility for free- or reduced-price lunch (185% FPL), having teen parents or parents who have not completed high school, and having been born prematurely or with a low birth weight. The program seeks to serve children of diverse social and economic characteristics.

Direct financial support is available for public schools and education service units that partner with child-care centers, as well as Head Start agencies and/or human services agencies. Grantees are obligated to match 100% of the funding using local and/or federal sources. Funding is awarded through competitive grants. The program monitors child, program, and family outcomes annually.

\*\* Head Start per-child spending includes funding only for 3- and 4-year-olds.

evada's state-funded Pre-K program, initially called the Early Childhood Education Comprehensive Plan when it began in 2001, is now referred to as the Nevada State Pre-Kindergarten Program (State PreK). State PreK programs operate in both communitybased organizations and school districts. In 2015-2016, 65% of the school districts (11 out of 17) provided State PreK-funded programs or classrooms. Funding is made available through competitive grant applications and awards are determined based on community needs as stated in individual grant applications, but preference is given to 4- and 5-year-olds who will be eligible to attend kindergarten the following year. Children are also prioritized if they are from low-income families, homeless, English Language Learners, or receiving special education services. There is not an income requirement for program eligibility. In 2015-2016, nearly 98% of State PreK children were in public school programs operated by their local school districts.

Formed in 2013, the Office of Early Learning and Development (ELD) within the Nevada Department of Education (NDE) is responsible for administering multiple early childhood state and federal funding sources including State PreK and the Preschool Development Grant (PDG). In 2014, Nevada was awarded a competitive federal Preschool Development Grant that expanded State PreK to a full-day for 493 of the 1,566 children enrolled in State PreK. An additional 289 children were served with PDG funds, but not enrolled in State PreK.

State funding for the State PreK program remained flat for 2015-2016 at \$3.3 million, but enrollment in the program increased by 12% to 1,566 children. In order to fund the increased enrollment numbers, local districts either modified services, including limiting plans to expand to full-day programming, and/or supplemented state funds. State PreK was not able to continue funding its evaluation.

## New Hampshire

# NO PROGRAM

ew Hampshire does not have a state-funded pre-K program, as defined in this report. However, the state provides support for early childhood education through other means. The Department of Health and Human Services (DHHS) licenses early childhood programs and administers preschool scholarships through its child-care assistance program for low-income families. The Department of Education (DOE) oversees early childhood special education programming and progress monitoring of IDEA Part B funded preschool programs. New Hampshire school districts also use Title I funds and local funds to implement voluntary preschool programs in public schools. In 2014-2015, Title 1 funding totaling \$1.7 million was spent on early childhood learning programs in the state. Through IDEA Part B and Title I, 27% of 4-year-olds in New Hampshire were supported in 2014-2015.

DOE issues both early childhood education and early childhood special education teacher licensure endorsements for birth through grade three. The New Hampshire Early Childhood and After School Professional Development System at the New Hampshire DHHS Child Development Bureau offers voluntary endorsements and credentials for professionals serving young children and their families.

Groups of stakeholders in the state, including DHHS, DOE, and the Spark New Hampshire Early Childhood Advisory Council, are working together to align birth through age 8 efforts. Together, along with private partners, these groups contributed time and resources to early childhood systems-building in the state and submitted New Hampshire's ultimately unsuccessful Preschool Development Grant Application.

The New Hampshire Early Learning Guidelines were introduced in 2005 and address development and learning for children birth through age 5. The guidelines cover multiple domains including approaches to learning, communication and literacy development, social and emotional development, physical development, creative expression and aesthetic development, and health and safety. The guidelines are aligned with New Hampshire's academic standards as well as New Hampshire Kindergarten Readiness Indicators. The state's new Early Learning Standards, released in 2015, align with the New Hampshire College and Career Ready Standards, by expanding to include emergent literacy, early numeracy, and science and social studies.

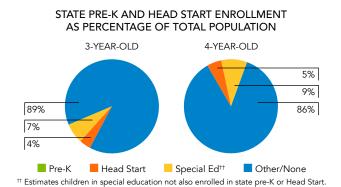

The Child Development Bureau within the Department of Health and Human Services administers New Hampshire's Quality Rating and Improvement System which is currently under revision. Categories of standards in the proposed revision include: Curriculum, Environment, and Assessment; Engaging Families and Communities as Partners; Early Childhood Administrator and Educator Qualifications; and Measured Standards of Environmental Quality and Teacher-Child Interactions using the Environmental Rating Scale (ERS) and Classroom Assessment Scoring System (CLASS), respectively.

## New Jersey

STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

he state of New Jersey funds three preschool programs. The largest and most intensive of the programs, formerly known as the Abbott Preschool Program, served 43,597 children in 35 of the state's poorest school districts during the 2015-2016 school year. The New Jersey Department of Education (DOE) provides funding to eligible districts to provide the program to all 3and 4-year-olds who live in those districts and choose to enroll. Private child-care centers or Head Start programs that meet state standards may contract with districts to deliver services. Abbott districts also receive supplemental child care subsidy funds from the state Department of Human Services (DHS) to provide extended-day and extended-year services to eligible families. When the school funding formula went into effect in 2008-2009 school year, a "hold harmless" article was put in place which requires that former Abbott districts receive no less in preschool aid from the DOE than they did in the 2008-2009 school year.

The Non-Abbott Early Childhood Program Aid (ECPA) program is required only in districts where 20 to 40% of children meet the criteria for free or reduced-price lunch services. In the 2015-2016 school year, several former ECPA districts participated in the federal Preschool Expansion Grant, which resulted in an increase in enrollment, reversing a three-year trend of declining enrollment. Future enrollment changes in these districts are expected, with additional children enrolling and/or moving from half- to full-day programs.

The third program, formerly known as the Early Launch to Learning Initiative (ELLI) was established in 2004 as part of New Jersey's efforts to offer access to high-quality prekindergarten education to all of the state's low-income 4-year-olds. Initially, all Non-Abbott districts were eligible to apply for funds; however, new districts have been unable to apply in recent years due to limited funds. The 2015-2016 school year continues to see 24 districts offering the ELLI program to 631 children, holding stagnant from the previous year. Funding for the ELLI program has remained the same since the 2008-2009 school year.

In 2014, New Jersey was awarded a competitive federal Preschool Development Grant (PDG) for \$17.5 million annually for four years, subject to federal appropriations. Through this grant, in the 2015-2016 school year, 883 additional children were enrolled in preschool ECPA and ELLI programs as well as other districts. PDG funding was also used to enhance the quality of 753 slots in ECPA and ELLI programs.

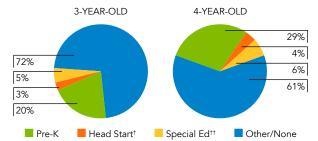

In order to present the contributions New Jersey makes to preschool education through its three separate programs, summary information reflecting the state's overall commitment to preschool is first presented, where enrollment and state spending for the former Abbott, ECPA, and ELLI programs are combined to demonstrate a comprehensive state profile. Next, we present specific details about each initiative in the state: the third page of this profile focuses exclusively on the former Abbott program, the fourth page on the former ECPA program, and the final page on the former ELLI program.

## New Mexico

tate-funded New Mexico PreK (NM PreK) began in the 2005-2006 school year with the enactment of the PreK Act of 2005. NM PreK is jointly administered by the New Mexico Public Education Department (PED) and the Children, Youth and Families Department (CYFD). PED is responsible for funding and monitoring the NM PreK programs provided through school districts and CYFD for the programs operating in community-based organizations and other eligible providers. In the 2015-2016 school year, 70% of school districts offered NM PreK, the fourth consecutive year of additional school districts offering the program.

In prior years, NM PreK was solely funded through state funds, however for the past two years, federal TANF funds were added to the state dollars. In 2015-2016, TANF spending increased by \$11 million to \$17.1 million, increasing the total operating budget to \$51 million, from \$39.7 million the previous year. A competitive process awards programs funds, though preference is given to programs in communities with public elementary schools designated as Title I. Two-thirds of enrolled children at each program site must live in the attendance zone of a Title I elementary school, though eligibility is not determined by a specific family income requirement. Starting in 2015, all NM PreK programs were required to participate in the state's new QRIS, FOCUS, as part of the Race to the Top Grant awarded to the state in 2012.

Hours and days per week vary by program with the minimum number of hours being 450 per year. In 2014-2015, the legislature provided limited funding for an Extended-day PreK pilot to double the instructional hours to 900 per school year. Some private or nonprofit facilities use Child Care Subsidy for wrap-around care to assist parents who qualify, or offer reduced rates for private pay. PreK programs in public schools can extend the day using operational dollars or Title I funds.

Following a significant decrease in enrollment during the 2010-2011 school year, participation and funding for NM PreK has steadily increased. In the 2015-2016 school year, 9,757 children (predominently 4-year-olds) participated in NM PreK, an increase of 16% from the previous year. CYFD was awarded \$3.3 million from the legislature to fund Early PreK for 3-year-olds which began serving additional children in 2016-2017.

The New Mexico Early Learning Guidelines (NMELGs) were updated in the summer of 2014 and are aligned with the state's new KEA and the Common Core State Standards. The New Mexico Kindergarten Observation Tool was field tested in approximately 50% of school districts in 2015-2016, with statewide implementation in 2016-2017.

# New York

PERCENT OF STATE POPULATION ENROLLED

#### STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

n 1998, New York State began its Universal Prekindergarten Program (UPK) (\$385 million) with the goal of making prekindergarten education available to all 4-year-olds in the state, regardless of family income or other risk factors. The Targeted Prekindergarten Program (TPK) (\$1.3 million) merged with UPK during the 2007-2008 school year.

In 2014, through a competitive grant process, the state began the New York State Priority Prekindergarten (NYSPPK) (\$25 million) program which creates new full- and half-day slots for high-need children in low-income districts and provides funding to convert half-day slots to full-day.

In 2014-2015, the state issued another competitive grant called Statewide Universal Full-Day Prekindergarten Program (SUFDPK) to provide full-day prekindergarten, resulting in a dramatic increase in access to full-day slots in New York City (\$300 million) and some expansion of full-day program elsewhere in the state (\$40 million). In the 2015-2016 school year, 49,219 SUFDPK slots were available to 4-year-olds in full-day programs in 53 school districts and 18 community-based organizations.

During 2015, New York was also awarded a \$25 million Federal Preschool Development Grant (PDG) to support enrollment of 2,401 low-income 4-year-olds in five school districts. PDG funds were used to create new slots and enhance existing slots. Yet, another competitive grant, Expanded Prekindergarten for 3 and 4 Year Olds Students (\$30 million), began in 2015-2016, creating an additional 1,046 slots for 4-year-olds and 1,509 slots for 3-year-olds.

Overall, in 2015-2016, a total of 120,069 3- and 4-year-old children were served in state administered prekindergarten programs, with an operating budget exceeding \$806 million. Approximately 75% of children served were in in full-day programs.

The New York Board of Regents adopted revised early learning standards in 2011—the New York State Prekindergarten Foundation for the Common Core. These comprehensive, multi-domain standards are currently aligned with state K-3 standards, state college and career ready standards, and the New York State Common Core Learning Standards. New York implemented a quality rating and improvement system (QRIS) in 2012, called QUALITYstarsNY. Although not required to participate in the QRIS, programs are encouraged to do so by the New York State Education Department, especially those in low-performing districts.

# North Carolina

ince 2001, North Carolina has provided state-funded pre-kindergarten education, originally via the More at Four Pre-Kindergarten Program. During the 2011-2012 school year, administrative control of the program was relocated from the Department of Public Instruction to the Department of Health and Human Services and the program was renamed the North Carolina Pre-Kindergarten (NC Pre-K) Program. The NC Pre-K Program delivers a high-quality educational experience during the year prior to kindergarten entry, enrolling at-risk 4-year-olds from low-income families who have not participated in other early childhood programs.

The program currently serves 26,851 4-year-olds, approximately 22% of the 4-year-old population in North Carolina. Pre-K programs receiving funding are mandated to operate 6.5 hours per day for 36 weeks each year. Student eligibility for services generally consists of being from a household with income at or below 75% of the state median income. Yet up to 20% of children enrolled may have a household income above that threshold contingent on having one of five risk factors, such as a developmental delay or identified disability, a chronic health condition, or limited English proficiency. Not all eligible children are able to enroll in NC Pre-K as funding is limited. Waiting lists exist in counties where funding is not sufficient to serve all eligible children.

NC Pre-K classrooms are available statewide in privately licensed Head Start programs, childcare centers, and public schools. All programs must earn high-quality ratings under the state child-care licensing system to qualify for participation in NC Pre-K and the state's subsidy system. Program standards set for NC Pre-K must be met in both public and nonpublic settings.

North Carolina has a maximum class size of 18 for 4-year-olds and requires a staff-child ratio of 1:9. Lead teachers must have a bachelor's degree and a Birth-through-Kindergarten License. Classroom staff are required to use approved curricula and formative assessments that are aligned with the state's early learning standards. Staff conduct ongoing formative assessments to gather information about each child's growth and skill development, as well as to inform instruction. All formative assessments used by the NC Pre-K Program must be approved by the NC Child Care Commission, based on the assessment tool's ability to collect information on children's behaviors, development, skills, knowledge, strengths, needs, and interests across all domains of development.

Funding for the state pre-K program comes primarily from state general appropriations and North Carolina Education Lottery receipts, as well as from federal funds and a required contribution from local sources. In 2015-2016, approximately \$211 million of federal, state, and local funds supported the program. The majority of funding for NC Pre-K comes from the state, including \$78 million generated by the North Carolina Education Lottery.

### North Dakota

# NO PROGRAM

orth Dakota's 64th Legislative Assembly provided \$3 million in state funds for pre-kindergarten during the 2016-2017 school year through the North Dakota Department of Commerce for early care and education programs and school districts serving low-income children.

The North Dakota Department of Public Instruction has multiple early childhood education initiatives, including two grant opportunities for educators and school districts. Pre-kindergarten, Head Start, and child care lead and assistant teachers can enhance their credentials at North Dakota state colleges and universities through Early Childhood Continuing Education Grants of up to \$3,000 every two years. Early Childhood Environment Grants provide up to \$10,000 to establish, support, or enhance new or expanded early childhood environments.

The North Dakota Pre-Kindergarten Content Standards, published in 2013, are voluntary and cover multiple domains including social-emotional development, language development, physical well-being and motor development, approaches toward learning, and cognitive and general knowledge. The standards were aligned with the state's kindergarten standards and the Head Start Child Outcomes Framework. The state sponsors professional development for early childhood professionals that is aligned with these standards.

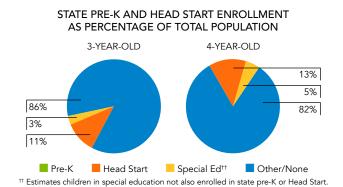

North Dakota is part of a consortium with nine other states and three nationally recognized research partners that received a \$6.1 million Enhanced Assessment Grant from the U.S. Department of Education. The consortium's goal is to improve a state-of-the-art system for assessing young children's learning and provide parents, students, teachers, policymakers, and other early childhood stakeholders with a critical resource for generating clear information about children's learning and learning goals.

SPENDING PER CHILD ENROLLED

## Ohio

he Ohio Public Preschool Program (PSP) was officially established in 1990, after four years as a pilot program. Ohio's focus is on ensuring children have access to quality programs through public preschool and publicly funded child care. The state has worked to remove barriers to funding, so all types of programs have access to both public preschool and child care funds. This report focuses on the Ohio Department of Education's publicly funded preschool program, which does not include the publicly funded preschool programs in child care (where approximately 34,000 preschool-aged children are served in highly rated programs).

Ohio's child outcomes data show that children participating in the public preschool program perform better on the Kindergarten Readiness Assessment than demographically similar children not participating in the preschool programs. Ohio is operating its publicly funded programs under common program and child standards, so a significant number of preschool-aged children receive services through a combination of these preschool programs, which are required to be highly rated. Additionally, eligible providers expanded from school districts to include highly rated child care providers, charter schools, and chartered nonpublic schools. In the 2014-2015 school year, all eligible providers rated as high quality were able to apply for grants to implement the program.

The state added \$22 million to fund preschool in the 2013-2015 state budget biennium. This increased the number of funded children from 5,700 in 2012-2013 to 11,090 in 2014-2015. In 2015-2016, the state added \$15 million to the \$45 million already being invested in Early Childhood Education. This increased the number of funded children to 14,765 in 2015-2016. Ohio will disseminate another \$15 million increase in funding for the Early Childhood Education program in 2016-2017, enabling the state to serve a total of 18,440 preschool-aged children.

Through this program, sites have been monitored annually for quality via desk audits, internal monitoring materials, proposal of plans and documentation, along with annual licensing visits, classroom observations, and child assessments. Beginning in 2013- 2014, Ohio began using its expanded tiered quality rating and improvement system as the monitoring system across all Ohio programs including public preschool and child care programs. Through this monitoring system, programs submit annual documentation of desk audits and program plans. Programs also receive on-site visits, including classroom observations every two to three years based on the rating level of the program. The ECE program has been evaluated for process quality using the ELLCO tool, with various stages completed in 2009, 2011, and 2012. Programs began participating in Ohio's tiered quality rating and improvement system during the 2013-2014 school year.

# Oklahoma

PERCENT OF STATE POPULATION ENROLLED

klahoma started its Early Childhood Four-Year-Old Program in 1980 with the intent of serving all 4-year-olds in the state. In 1990, the program received statewide funding for 4-year-olds eligible for the federal Head Start program, but local areas could choose to serve additional 4-year-olds through local funds or tuition. In 1998, Oklahoma became the second state in the nation to provide free preschool for all 4-year-olds, with 99% of school districts providing the program. Approximately 74% of the state's 4-year-olds are enrolled in the program. Most of these children (84% of enrollment) are in full-day programs. Schools can collaborate with other agencies and programs to provide extended-day services.

Through the state's school finance formula, public school districts receive funding for the Early Childhood Four-Year-Old Program. A per-pupil rate, calculated using the age of the child and the length of the program day, is used to repay districts. Oklahoma was hit hard by the 2008-2009 recession, and state tax revenue in recent years has only recently climbed back to levels seen in 2009. The Oklahoma legislature has increased the share of total tax funding revenue going to education, enabling spending per pupil to remain fairly steady in recent years.

Districts can support centers other than public schools by placing public school teachers in child-care centers, Head Start settings, and community-based programs. Children in these sites receive the same services as children in public school locations and are considered public school enrollees.

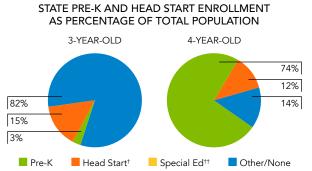

In 2016, Oklahoma adopted the Oklahoma Academic Standards, which created vertically aligned pre-K to 12th grade standards. The Oklahoma State Department of Education is providing continuous professional development and support to help districts successfully implement these standards to strengthen pre-K programs and provide effective instruction and learning beyond the early years. Oklahoma is investigating the use of an Early Learning Inventory, which will assess the strengths and needs of students at the beginning of kindergarten. Oklahoma plans to pilot the Early Learning Inventory during the 2017-2018 school year and implement it statewide over the next few years.

# Oregon

stablished in 1987, the Oregon Head Start Prekindergarten (OHSP) program provides comprehensive child and family development services for 3- and 4-year-old children from low-income families. In 1992, a state-federal partnership was formalized between the Region X Office of Head Start and the Oregon Department of Education to support a collaborative Head Start and state prekindergarten system, which later expanded to serve additional Head Start-eligible children.

\$8,929

2016

OHSP programs operate using federal and/or state funds. To provide state funding for the program, general fund dollars are allocated on a biennial basis by the state legislature. OHSP program funding is available to a number of organizations. Nonsectarian private and public organizations not receiving federal Head Start funding, including public schools, private agencies, community action agencies, government agencies, and colleges and universities, have been awarded competitive state prekindergarten funds. In 2015-2016, enrollment in OHSP programs increased slightly. Approximately 23% of OHSP children were served in public schools, and 77% of children were in Head Start settings. Programs ensure children receive services in inclusive settings, with almost 20% of enrolled students qualifying for and receiving special education services in regular classrooms. Federal Head Start Performance Standards must be followed, and all programs must meet monitoring requirements.

In 2012, Oregon adopted the Head Start Child Development Early Learning Framework (now the Head Start Early Learning Outcomes Framework), which is currently being aligned with Common Core State Standards for K–12. The Oregon Department of Education implemented Teaching Strategies GOLD as the primary developmental assessment tool, requiring its use by all State Head Start Prekindergarten programs beginning July 2012. No formal evaluation has been conducted of the Oregon Head Start Prekindergarten program to date. Program quality is monitored by the Early Learning Division of the Oregon Department of Education through ongoing communication with grantees and the Regional Office of Head Start. Evaluations are conducted on site for every grantee every three years, either through the Oregon Department of Education and/or the Office of Head Start, though additional site visits are conducted as needed. Regardless of funding source, all children enrolled in the OHSP programs receive unique identifier numbers so that children's developmental progress can be followed as they enter the K–12 system.

In addition, beginning in fall 2016, Oregon began an additional state-funded preschool program called Preschool Promise. This program was created via new legislation and funding to develop and implement a mixed-delivery preschool program for children from families with income up to 200% of federal poverty level guidelines. The mixed-delivery model recognizes that high-quality learning experiences can take place in a wide variety of settings, and families should be able to choose the setting that works best for them and their children. In the first year of implementation, the program plans to serve more than 1,200 children in four to six communities.

# Pennsylvania

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

he Commonwealth of Pennsylvania (PA) currently serves pre-kindergarten-age children via four different pre-kindergarten programs: The Pennsylvania Four-Year-Old Kindergarten and School-based Prekindergarten programs (K4/SBPK), the Ready to Learn (RTL) Block Grant (known prior to the 2014-2015 school year as the Accountability Block Grant Program), the Pennsylvania Head Start Supplemental Assistance Program (PAHSSAP), and the Pennsylvania Pre-K Counts Program (PAPKC). The PA Department of Education provides oversight for each of these programs. Policy for the PAPKC and PAHSSAP is developed by the Department of Education, but the Office of Child Development and Early Learning (OCDEL, an office jointly accountable to the Departments of Education and Human Services) administers and monitors these programs.

The prekindergarten programs in PA with the most longevity are the K4/SBPK programs, which are funded through the state's general fund. Funds are available to districts wishing to offer these programs, and in the 2015-2016 school year, just over 18% of school districts offered pre-K through the K4/SBPK program. Many of the policy decisions for this program are decentralized to individual school districts at the local level.

During the 2004-2005 school year, Pennsylvania authorized its second prekindergarten program, the Education Accountability Block Grant, now called the Ready to Learn Block Grant. RTL is funded through a state aid formula, with 75% of funds targeted to serving children who have not achieved proficiency on the PA System for School Assessment test. School districts can opt to offer this pre-K program or choose from a list of other approved services. In the 2015-2016 school year, the state budget impasse significantly delayed the release of the Ready to Learn applications; therefore, funds were provided to districts without the annual reporting requirements and hence no specific program data is available for the 2015-2016 school year. Funding and enrollment data from the 2016-2017 school year were used to complete this year's survey.

The PAHSSAP was also created during the 2004-2005 school year, with an original investment of \$15 million. The PAHSSAP provides extended-day services for federally funded Head Start children, as well as additional slots in Head Start programs. All programs are required to meet the federal Head Start Performance Standards. After a state budget impasse, \$4.8 million in expansion funding which included a COLA increase was awarded in 2015-2016.

The PAPKC Program was created in the 2007-2008 school year, with the intention of further expanding access within the commonwealth to high-quality pre-kindergarten programs. PAPKC serves children who are income-eligible at 300% FPL, though districts have the option to set lower income thresholds. PAPKC programs can also serve children up to two years before their locally determined kindergarten entry age, though individual programs have the flexibility to make decisions based on local demand.

PAPKC funds are awarded on a competitive basis every five years, with the most recent re-bidding occurring in 2013. Programs from a variety of auspices (e.g., Head Start, child care, private academic schools and school districts) can apply for PAPKC funding. In 2014, the legislature awarded additional funds to expand PAPKC slots. In the 2015-2016 school year, PAPKC received expansion funding but not until after a significant budget impasse. Programs' expansion funds were 25% of their awarded amount for the 2015-2016 school year, however expansion programming did not begin until after January 2016. In the 2015-2016 school year, changes in non-regulatory guidance updates included a meal requirement for part-day programs and the inclusion of comprehensive (developmental, behavioral, vision, hearing, and health) screenings and referrals, if necessary. In 2016-2017, policies on inclusion and expulsion will be released.

Fiscal monitoring is required of each grantee in all four programs and is conducted by the state. For the HSSAP and PAPKC programs, onsite monitoring is conducted annually by program specialists. Additionally, PAHSSAP programs are required to use either CLASS, ECERS, or another locally selected tool to annually conduct structured observations of classroom quality, and PAPKC programs are required to have an ECERS assessment annually. In the 2016-2017 school year, the ECERS-3 will be implemented. In addition, PAPKC and PAHSSAP programs are required to regularly input program and child assessment data into the statewide data system. Outcomes from ongoing child assessment are collected twice annually, using a tool approved by OCDEL.

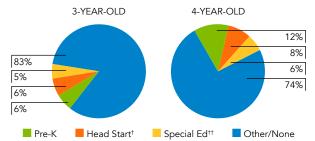

The first two pages of this state profile provide data on the commonwealth's commitment and contributions to serving children in state-funded pre-K programs, including state expenditures and enrollment data, aggregated across the four programs. The subsequent pages provide disaggregated data for each individual program.

## Rhode Island

he Rhode Island State Pre-Kindergarten Program began in the fall of 2009 and is offered through public schools, Head Start programs, and private child care. These agencies can apply for competitive grants to provide the pre-K program. All children who turn 4 years old on or before September 1st and are living in participating communities are eligible for the program, but enrollment is determined through a lottery.

The Rhode Island Education Aid Foundation Formula, the state's school funding formula, provides funding for the Rhode Island State Pre-Kindergarten Program. Using a phased-in approach, \$10 million will be invested over 10 years to expand access to high-quality pre-K, beginning with communities with a high proportion of children eligible for free and reduced-price lunch. The goal is that pre-K expansion will create high-quality learning programs, improve access for the students who need it the most, and assure a smooth transition between early childhood and K–12. Rhode Island Department of Education plans to expand access from 17 classrooms and 306 children in 2014-2015 to 60 classrooms and 1,080 children in 2017-2018. The Rhode Island General Assembly increased the investment in the Rhode Island State Pre-Kindergarten Program by \$1 million for the 2015-2016 school year.

Additionally, in 2014, Rhode Island was awarded a competitive federal Preschool Development Grant (PDG) for \$2.3 million to expand access to its high-quality pre-K program. PDG funding is being used to expand access in high-need communities and to improve program monitoring, evaluation, and technical assistance. As a result of PDG, enrollment in the pre-K program nearly doubled between the 2014-2015 and 2015-2016 school years.

Teachers in the program must have a bachelor's degree with an early childhood teaching certificate. The Rhode Island Department of Elementary and Secondary Education provides training and technical assistance through a vendor to all staff on an ongoing basis. The Rhode Island Pre-Kindergarten Program has been assessed for both process quality and program impact/child outcomes, including classroom quality and child outcomes in literacy, arithmetic, and social-emotional development. A new evaluation of the program is also being planned which will gauge child outcomes and overarching classroom quality and include an analysis of long-term costs. The Rhode Island Department of Human Services provides state funding to supplement the federal Head Start program to create additional slots for children.

# South Caroling

outh Carolina has two state-funded preschool programs administered by the state's recently created Office of Early Learning and Literacy (OELL), housed within the South Carolina Department of Education (SCDOE) and the Office of South Carolina First Steps to School Readiness (First Steps). School districts are required to offer at least one part-day pre-K program and there has been a recent shift toward serving more children in full-day programs.

The EIA Child Development Program (also called 4K) was initiated in 1984 by the South Carolina Education Improvement Act. The 26% of school districts that provide EIA 4K services set their own eligibility criteria from a state-specified list of risk factors that includes low parent education, history of foster care, homelessness, teen parents, and low income. State funding for districts offering half-day EIA 4K is allocated to districts by the OELL and is based on the number of kindergarteners qualified for free or reduced-price lunch in each district. All of the 10,599 children who attended EIA 4K in 2015-2016 attended programs located in public schools. Three school districts previously funded for only half-day EIA 4K programs, began to provide full-day services in 2015-2016 through the Child Development Education Program (CDEP).

The Child Development Education Program (CDEP), the state's second early education initiative, was codified with the approval of the Read to Succeed legislation in June 2014 with passage of Act 284. CDEP is, therefore, no longer considered to be a pilot and its name reflects this change. CDEP was established in 2006, as a result of Abbeville County School District v. South Carolina. The court ordered the state to provide funding for school-day preschool in the counties named in the lawsuit if they opted to participate.

Children who qualify for free or reduced-price lunch, those receiving Medicaid, or those with a documented developmental delay were eligible to participate in CDEP. In 2015-2016, the program was expanded to include 31 additional classrooms, with 74% of the 82 school districts providing CDEP. CDEP is administered by the OELL in public schools; for children who are enrolled in private child-care centers, CDEP is administered by First Steps. The Read to Succeed legislation requires that all pre-K students be given a readiness assessment. In 2015-2016, programs were able to choose from a list of three approved formative assessments.

OELL staff provide technical assistance to CDEP district coordinators, directors, and teachers through email, phone correspondence, and requisite onsite monitoring visits to the public school-based classrooms. Monitoring visits include an evaluation based on the ELLCO (Early Language and Literacy Classroom Observation) checklist and a fidelity verification measuring the curriculum being implemented. Feedback is provided to the district coordinators and to the teachers for quality improvements.

First Steps Regional Coordinators make both announced and unannounced monitoring and technical assistance visits to funded CDEP classrooms in private child-care centers throughout the school year. These technical assistance visits may include unannounced evaluative monitoring using an ERS Assessment appropriate to measure the curricular fidelity. Deficiencies noted during monitoring visits will be reviewed with the program administrator and shall form the basis of a Programmatic Improvement and Technical Assistance Plan. In 2016-2017, additional staff were hired to support monitoring and TA for the EIA 4K classrooms.

South Carolina's general contribution and commitment to state-funded prekindergarten, including state expenditure and enrollment for both EIA 4K and CDEP, are summarized in the first two pages of the state profile. The EIA 4K program is the focus of the third page, and the fourth page covers CDEP.

## South Dakota

# NO PROGRAM

outh Dakota currently does not have a state-funded preschool program, as defined by this report; but the state does support early childhood education in several ways. In 2011, the South Dakota Bright Start Initiative began providing services to Native American children. The program focuses on infant brain development as well as early childhood development. The Head Start State Collaboration Office, within the Department of Education, oversees the early childhood special education and Birth to Three early intervention programs. The Division of Child Care Services within the Department of Social Services oversees licensing early childhood programs and administers direct child-care assistance payments to low-incomes families.

The South Dakota Early Learning Guidelines are used in all settings that serve children from birth to 5 years old and cover multiple domains including: health and physical development, creative arts, language and literacy, social studies, social-emotional development and approaches toward learning, mathematics, and science. The Guidelines are aligned with the South Dakota Content Standards for Kindergarten, which are part of the K-12 State Standards incorporating the Common Core State Standards for English language arts and mathematics. The University of South Dakota collaborated with the Head Start State Collaboration office and multiple other stakeholders to develop the guidelines.

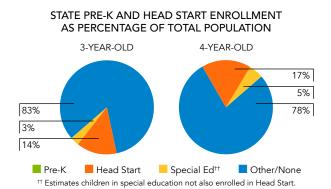

Legislation to fund state preschool was recently introduced into the South Dakota legislature.

#### SPENDING PER CHILD ENROLLED

### Tennessee

uilding upon the 1998 Early Childhood Education Pilot Project, Tennessee Voluntary Pre-K (VPK) was launched in 2005. Since 2012, almost every district has offered at least one full-day VPK classroom where low-income, homeless, or children in foster care receive priority for enrollment. The second tier for priority includes students with an IEP and English Language Learners. VPK enrollment leveled off between 2008 and 2015 but in 2016 approximately 18,116 at-risk children were served, an increase of almost 2,000 children from the previous school year.

The Tennessee State Department of Education, Division of Early Learning and Literacy has administrative authority over VPK. Only local education agencies are eligible to apply for state-funded VPK grants through a competitive process. Districts may, however, contract with private child care agencies, Head Start agencies, institutions of higher education, public housing authorities, and any three-star QRIS rated program in a community-based or private child-serving agency. Programs contracted to provide VPK services must operate within the jurisdiction of the school district.

Since its inception, VPK has relied on numerous funding sources, including general education revenue and, in the past, lottery revenue and federal TANF funds. State funds for the VPK program have been mostly level since the 2014 school year. Federal Head Start, IDEA, Title I, and other funds are used to provide the required 25% local match. Districts have used the same funding, \$117,490 per classroom, to operate VPK for the past three years. In 2014, Tennessee was awarded a competitive federal Preschool Development Grant for \$17.5 million, to expand pre-K enrollment in Nashville and Shelby County. PDG funds supported 1,648 children in new slots and 3,010 in improved slots in VPK classrooms. There were additional children served through PDG funds in other programs, however the exact number is unknown.

During the 2014-2015 school year, the Peabody Research Institute (PRI) at Vanderbilt University was involved in the fifth year of an ongoing external evaluation on the effectiveness of the VPK program. The study reported statistically significant cognitive and social-emotional gains for VPK participants during the pre-K year and a significant reduction in kindergarten retention for participants. However, the gains appeared to gradually dissipate and turned significantly negative in some subtests (favoring the controls), by third grade. PRI reports that the quality of pre-K programs across the state is inconsistent, and in some cases below expectations, based on ECERS classroom observations. ECERS data collected by PRI on a statewide sample shows the average ECERS score is about 4 with the Activities subscale at 3 (on a 7-point scale). Only a very small fraction of classrooms scored 5 or higher (the threshold for a rating of "good") overall. PRI has received additional funding to continue to follow a portion of the children through their 7th grade year (2018-2019).

\* Pre-K programs may receive additional funds from federal or local sources that are not included in this figure.

\*\* Head Start per-child spending includes funding only for 3- and 4-year-olds.

n 1985, Texas began funding half-day prekindergarten for eligible 4-year-olds through the Texas Public School Prekindergarten program. Currently, districts that have 15 or more eligible 4-year-olds are required to offer prekindergarten. Districts that have 15 or more eligible 3-year-olds can also offer prekindergarten, but are not required to do so. The free public prekindergarten program is available in approximately 87% of school districts statewide.

The Texas Education Agency (TEA) Office of Early Childhood Education oversees the free public prekindergarten program in school districts and open enrollment charter schools. Funding for half-day pre-K programs is based on Average Daily Attendance (ADA) and is provided through the Foundation School Program as part of the K–12 funding system. Students are eligible to participate if they meet at least one of the following conditions: qualify for free or reduced-price lunch (185% of FPL), homelessness, foster care, parent on active military duty or who was injured or killed on active duty, and/or unable to speak or comprehend English.

In 2015, the Texas Legislature passed House Bill 4 to provide funding for quality improvements in Texas Public School Prekindergarten programs, which included a \$118 million appropriation implemented in the 2016-2017 school year. Districts and open-enrollment charter schools applied for grants to implement a High-Quality Prekindergarten Grant Program. To be eligible for grant funding, a school district or charter agreed to use a curriculum aligned with the Prekindergarten Guidelines, increase prekindergarten teacher training and/or qualifications, implement student progress monitoring, provide kindergarten readiness results, and develop quality family engagement plans. The agency awarded funding to 573 district and charter schools that serve more than 80% of eligible 4-year-olds in the state.

In the fall of 2015, the Children's Learning Institute at the University of Texas-Health Science Center, in partnership with the Texas Education Agency, developed a comprehensive professional development platform for early childhood educators. The Engage platform provides targeted professional development in topics in early childhood education, as well as the CIRCLE student progress monitoring tool, coaching resources including an assessment of teacher interactions, a classroom observation tool and parent resources. The Engage platform is free to all public school teachers and private provider staff, including Head Start, participating in the Texas Rising Star program through the Texas Workforce Commission.

TEA's Early Childhood Data Systems (ECDS) is a state data reporting platform that is part of the Texas Student Data System (TSDS). Through the ECDS, early childhood data is collected and used to inform school districts, early childhood programs, communities and stakeholders about the effectiveness of prekindergarten programs in preparing children to be successful in kindergarten. Starting in the 2016-17 school year, school districts and charter schools will report demographic information on prekindergarten students enrolled, number of half-day and full-day classes, source of funding, class size/ratio, type of curriculum and the type of progress monitoring tool (if administered). Kindergarten programs will report demographic information, type of assessment and the beginning of year results from the Kindergarten entry assessment. High Quality Prekindergarten grantees are required to administer and report student progress monitoring and kindergarten entry results. The information collected in ECDS is now being reported on the Texas Public Education Information Reports (TPEIR) web page.

### Utah

## NO PROGRAM

tah currently does not provide a state-funded pre-K program meeting the criteria for this report. However, the state does have several other early childhood initiatives.

In 2014, Utah House Bill 96 was passed, creating the High Quality School Readiness Initiative. The purposes of the Utah School Readiness Initiative are to increase school readiness, improve academic performance, and reduce remediation costs associated with poor academic outcomes. In 2014, Utah approved future investment in some early learning programming through a partnership between businesses and the state. The Utah High-Quality School Readiness Initiative (HB96) was signed by Governor Herbert, allowing the newly created School Readiness Board to enter into results-based financing contracts with private entities to fund proven high-quality early childhood education programs to serve at-risk students. The bill also creates grant funding for existing public and private early education programs to increase quality, and funds independent evaluation. The bill details components of high-quality programs as well as home-based educational technology programs that may enter into a results-based contract with the Board. The initiative began serving children in the 2014-2015 school year.

Utah Senate Bill 101, the High Quality School Readiness Expansion (HQSR-E), was passed in 2016. HQSR-E is intended to expand access to high-quality school readiness programs for eligible students to increase school readiness, improve academic performance, and reduce remediation costs associated with poor academic outcomes. The HQSR-E Grant program provides grant funds to LEAs with existing early education programs deemed high-quality, as determined by the Early Childhood Environment Rating Scale ECERS-3, ECERS-R, and some additional rubric criteria. Programs eligible to apply for the program are those that (1) are providing services to economically disadvantaged 4-year-olds, (2) can illustrate how the funds will be used to expand their current program, and (3) are deemed high-quality school readiness programs.

During the 2016-2017 year, the UPSTART program, an online preschool program is reaching just over 10,000 students. Approximately \$8.2 million was allocated to the program, which includes an independent evaluation. These funds include TANF (\$2 million) which can only be used for students who fall below the 200% FPL. The remaining funds (\$6.2 million) may be used for any students, but at least 30% of the students enrolled have to qualify for free/reduced lunch.

For the first time, during the 2016-2017 school year, Utah offered Head Start programs some limited funding to increase the number of high-quality preschool program slots. Three programs applied for and were awarded funding which came from TANF.

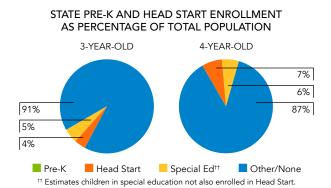

In February 2017, the Utah State Board of Education agreed to have the Early Childhood Core Standards revised. The standards were originally written and adopted in 2012. The Early Childhood Core Standards cover multiple domains including: physical well-being and motor development, social-emotional development, approaches toward learning, language development, and cognitive and general knowledge. Revised standards were adopted in 2013 and provide strategies and activities aligned with these domains.

SPENDING PER CHILD ENROLLED

### Vermont

### STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

ermont has a 30-year history of providing state-funded preschool. In 1987, the Vermont Early Education Initiative (EEI) was created as an annual competitive grant program to finance early education opportunities for at-risk 3- to 5-year-olds. Act 62 was signed into law in 2007, which significantly expanded publicly funded prekindergarten education for 4-year-old children in public schools and private programs. With Act 62, pre-K programs were supported through the state's Education Fund similarly to K-12, prorated based on the 10 hours per week model. In the 2014 Legislative Session, legislators passed Act 166, which built on Act 62 by requiring all Vermont school districts to provide universal, publicly funded prekindergarten education for a minimum of 10 hours per week for 35 weeks annually for all 3-, 4-, and 5-year-old children who are not enrolled in kindergarten. Act 166 also requires an annual legislative evaluation of the state's pre-K efforts that includes TS GOLD data, quality rating and improvement system (QRIS) level, and the creation of a pre-K monitoring system.

As mandated, in 2015-2016, all of Vermont's local education agencies (LEAs) provided pre-K through an arrangement of school-based programs and partnerships with qualified private, family-based or center-based providers, private preschools, and/or with Head Start programs. All pre-K programs, including those operated by public schools, are required to attain at least four out of five stars in Vermont's quality rating system, Step Ahead Recognition Systems (STARS), or to hold NAEYC accreditation. An exception is made for programs that have three stars. These programs are allowed to operate if the provider has developed a plan to achieve four or five stars within three years and the plan is approved by the Secretaries of Agency of Education and Agency of Human Services. STARS require structured observations of classroom quality using the ECERS or CLASS.

The newly revised Vermont Early Learning Standards (VELS) for birth through grade three were approved by the State Board of Education in August 2015. The VELS are aligned with the Head Start Early Learning Outcomes Framework, Common Core State Standards in English language arts and mathematics, as well as Next Generation Science Standards. The VELS are much more extensive, covering children from birth to third grade, than the previous standards that only covered pre-K.

Funding for Act 166 is provided by a mix of federal, state, and local dollars. State funding per pupil was set at \$3,000 for the 2015-2016 school year based on an adequacy study. Federal funding in 2015-2016 came from various sources, including a \$33 million, four-year federal Preschool Expansion grant to create full-time, comprehensive, high-quality preschool experiences for 4-year-olds in families with incomes under 200% FPL.

### Virginia

he Virginia Preschool Initiative (VPI) began in 1995 in order to serve at-risk 4-year-olds not enrolled in existing preschool programs. The VPI program served 18,356 four-year-old children in the 2015-2016 school year, increasing the number of children enrolled for the fifth consecutive year. Eighty-eight percent of eligible school divisions operate VPI classrooms, and the majority of children participate in public school settings. Funding allocations to local school divisions are based on the number of students eligible for free lunch, but criteria for student eligibility are based on risk factors including, but not limited to: poverty, family unemployment, limited English proficiency, homelessness, parent with limited education, and parent incarceration. VPI programs may provide services on either a part- or school-day schedule throughout the school year.

Lottery revenues continued to account for all state funding for VPI in 2015-2016. In 2011, VPI was evaluated for both program quality and child outcomes by the Curry School of Education at the University of Virginia. Program monitoring by state education staff and consultants was conducted through site visits every two years prior to 2011-2012 to review program facilities, on-site safety procedures, and program record checks. Site visits were eliminated due to budget constraints in 2011-2012. Desk monitoring of local plans and results of child assessments continue as methods to conduct an annual review of program-level outcomes. Virginia's federal preschool expansion grant program, VPI+, expands services to four-year-olds in high needs communities. The state serves an additional 1,230 students in 11 school divisions within this program. In the 2015-2016 school year, these school divisions were awarded \$16,661,897 to provide 1,280 new VPI+ slots and 1,574 improved state-funded VPI slots.

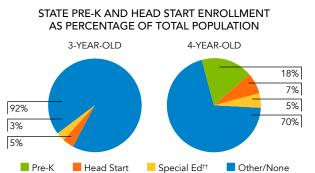

In the 2015-2016 school year, new eligibility criteria were mandated by the General Assembly to include children living in households with incomes up to 200% of the federal poverty level. Previously, there was no state mandated income requirement for program eligibility. In the 2016-2017 school year, new income requirements will allow 15% of slots to be used for local eligibility criteria.

### Washington

he Washington State Early Childhood Education and Assistance Program (ECEAP), overseen by the Washington Department of Early Learning (DEL), was created in 1985 to prepare 3- and 4-year-olds from low-income families for success in school and in life. ECEAP focuses on the well-being of the whole child by providing comprehensive nutrition, health, education and family support services to Washington's most at-risk young children. Funding for ECEAP is awarded through a competitive process. ECEAP is operated by a variety of agencies including school districts, educational service districts, colleges/universities, nonprofit organizations, and local governments. The program is offered in 36 of the state's 39 counties. Head Start serves 3- and 4-year-olds in two of the counties not served by ECEAP, and the other county is sparsely populated.

Three- and 4-year-olds from families with incomes at or below 110% of the federal poverty level are eligible to attend ECEAP. Children with IEPs are also eligible to enroll in ECEAP, regardless of income. Up to 10% of enrollment can be children who do not meet the income requirement but experience other risks that could jeopardize learning, development, or school success. Enrollment is prioritized based on a combination of income and other risk factors.

ECEAP is one strategy behind DEL's goal to ensure that 90% of children in the state are ready for kindergarten by 2020. In 2015-2016, Washington State invested a total of \$97 million in ECEAP, an increase of more than \$20 million from the previous year. State funding comes from both the state general fund and the "opportunity pathways account," which consists of lottery funds. The increase in state spending on ECEAP corresponded with the creation of an additional 1,600 new slots and an increase in per-child spending. In 2015-2016, DEL hired research staff for the first time and also piloted research-based curricula (Creative Curriculum and HighScope). In 2010, the Legislature passed House Bill 2731 establishing ECEAP as a statutory entitlement for all eligible children by the 2018-2019 school year. This has since been extended to 2020-2021.

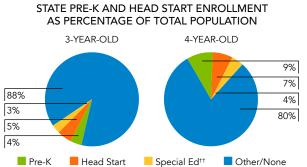

The state of Washington has committed to focusing on creating high-quality early learning experiences for young children via ECEAP. As of 2014-2015, all ECEAP sites were required to participate in the state's QRIS, Early Achievers, and receive a rating of level four or five by March 2016. Structured observations of classroom quality are conducted every three years using the ECERS and CLASS as part of the QRIS. ECEAP teachers assess children's development three times a year using Teaching Strategies GOLD.

### West Virginia

STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

est Virginia began offering preschool programs to 3- and 4-year-olds through the Public School Early Childhood Education program in 1983, when the state changed school policies to allow local school boards to serve children before kindergarten. Legislation passed in 2002 required, by 2012, pre-K to be available to all of the state's 4-year-olds. In 2015-2016, approximately 66% of the state's 4-year-olds were enrolled in West Virginia's Universal Pre-K program. In addition to 4-year-olds, some kindergarten age-eligible children with documented needs, and 3-year-olds with special needs, may attend the program. During the 2015-2016 school year, approximately 11% of 3-year-olds in the state were enrolled.

The West Virginia Universal Pre-K System provides prekindergarten programs in all 55 counties in the state. Public schools receive West Virginia Universal Pre-K funding directly, but half of all programs are required to partner with child care centers, private prekindergarten, or Head Start agencies in order to meet demand. Programs are permitted to use additional funding from IDEA and federal Head Start.

The state has implemented many changes in recent years to improve program quality. Beginning July 1, 2013, all new lead teachers in nonpublic settings were required to have at least a BA degree in Early Childhood or a related field. Beginning July 1, 2014, all assistant teachers were required to apply for the Early Childhood Classroom Assistant Teacher Authorization, which requires a CDA or equivalent, as determined by the West Virginia Board of Education. West Virginia has also increased the duration of its preschool program, increasing instructional days per year and hours per week since 2012. Beginning in the 2016-2017 school year, all programs will operate for a full day (25 hours per week minimum).

The West Virginia Universal Pre-K program has been assessed for both process quality (in 2009 and 2012) and program impact/ child outcomes (in 2005). All classrooms receive structured quality observations once every three years using the Early Childhood Environment Rating Scale. Programs also develop monitoring systems to offer ongoing continuous quality improvement, using monitoring tools recognized by a local collaborative team. Children are assessed three times per year using the Early Learning Scale, and this information is applied to track child and program outcomes over time, guide teacher professional development and coaching, make adjustments to curricula, and measure kindergarten readiness. The Universal Pre-K program is also currently conducting a multiyear study to assess the effects of participation in the program.

### Wisconsin

STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

isconsin's Constitution has included a promise to provide free, voluntary education for 4-year-olds since it became a state in 1848. Districts in Wisconsin are not required to offer the Four-Year-Old Kindergarten program (4K), but if they do, it must be open to all age-eligible children. As it currently stands, 399 of Wisconsin's 413 school districts do offer the program. Funds for 4K are distributed to public schools, which then may subcontract with private child-care centers, community-based programs, or Head Start agencies. Most programs operate part-day, four or five days per week, but some operate full-day, two or three days per week.

Funding for 4K is part of the overall school funding formula, funded at 50% of the funding for other grade levels. Districts receive 60% of full-day funding if they offer additional hours of parent outreach. During the 2015-2016 school year, almost 71% of the state's 4-year-old population was enrolled in 4K.

In the 2011-2012 school year, Wisconsin implemented a statewide early literacy assessment for kindergarten students, and 4K programs began early literacy screening with PALS PK in 2013-2014. The state does not require another assessment at 4K, so districts determine their own assessment process. The 4K program was last evaluated for both process quality and program impact/child outcomes during the 2003-2004 year, but the University of Wisconsin-Madison is currently involved in a national study exploring 4K in Wisconsin and New Jersey. Literacy learning standards were revised in 2013.

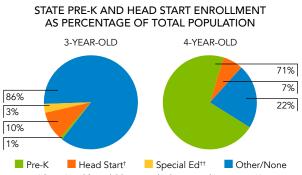

The Wisconsin Head Start program is a separate, state-funded program offering supplemental state finances to federal Head Start grantees to provide comprehensive early childhood education for 3- and 4-year-olds with disabilities or from low-income families. Participating programs follow the federal Head Start Performance Standards, and children meet Head Start enrollment eligibility guidelines. Reductions in state supplemental funding have led to fewer spaces. Efforts have been made to bring together Head Start technical assistance and training with other professional development efforts at both the state and local levels.

The first two pages of Wisconsin's profile give an overview of the state's overall promise and assistance to state-funded prekindergarten programs, including enrollment and state expenditures for both the 4K program and the Head Start State Supplement. The third page presents information on the 4K program, and the fourth page focuses on the Wisconsin Head Start program.

\*\* Head Start per-child spending includes funding only for 3- and 4-year-olds.

Wyoming

### NO PROGRAM

he state of Wyoming does not offer a state-funded preschool program, according to definitions used in this report. However, the state does provide support for other early childhood education programs.

Local school districts can use a portion of Title I funding for early childhood education. The Department of Health administers a statewide developmental preschool system to provide IDEA service for 3- to 5-year-old students, and the Department of Family Services (DFS) uses TANF dollars to fund 10 schools in the state. The Department of Education administers the TANF programs through a competitive grant process which funds high-quality preschool services for children whose families qualify for TANF. In the 2014 budget, the Wyoming State Legislature appropriated \$665,000 for an Early Childhood Community Partnership Grant program to develop, enhance, and sustain high-quality early childhood education programs. DFS administers these grant funds. DFS also licenses several programs through the University of Wyoming, community colleges, school districts, and private preschool and child care facilities to provide academic instruction. Both licensed and non-licensed programs are able to and do pursue accreditation through the National Association for the Education of Young Children (NAEYC).

The Wyoming Early Childhood State Advisory Council was created in 2010 and is a collaboration of a number of individuals across multiple disciplines. The council's mission is to serve Wyoming children and families by facilitating statewide collaboration, evaluating the early childhood system, and making recommendations to the governor, lawmakers, and state agencies. Wyoming also has an Early Intervention Council which focuses on children with special needs.

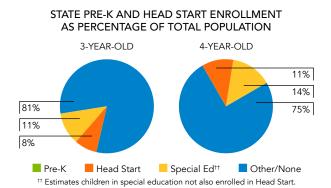

In 2012, the state adopted the comprehensive Wyoming Early Learning Foundations. The Foundations cover multiple domains including cognition and general knowledge, physical well-being/motor development, approaches toward learning, social/emotional development, and language development.

### American Samoa

## NO PROGRAM

merican Samoa does not provide publicly-funded preschool as defined in this report but does support early childhood education in several other ways. The Early Childhood Education/Head Start (ECE/HS) division is housed within the American Samoa Department of Education (ASDOE). The ASDOE and both elementary and secondary schools operate early childhood education centers.

The American Samoa Children's Cabinet serves as the territory's early childhood advisory council. The Cabinet operates under the Office of the Governor and includes representation from the ASDOE, the Department of Human and Social Service, and the Department of Health.

American Samoa's early learning guidelines, for children ages 3 to 5, address multiple domains including social and emotional development, mathematics, science, approaches to learning, logic and reasoning, social studies, physical development and health, language development, literacy, English language development, and creative arts expression. The early learning guidelines are aligned with the Head Start Child Development and Learning Framework.

In 2012-2013 American Samoa was in the process of developing a quality rating and improvement system, though details concerning its current status are unavailable. One component of the system would be use of quality program assessment tools for quality assurance and monitoring.

\*\* Head Start per-child spending includes funding only for 3- and 4-year-olds.

he Guam Department of Education launched its first publicly funded Pilot Prekindergarten Program in October 2015, with an initial \$877,330 investment including \$513,157 in classroom start-up costs. The Guam Department of Education oversees one school district, comprised of four regions. Each of the four regions has one Prekindergarten Program classroom. Currently, all four pre-K classrooms are located within public schools.

In the 2015-2016 school year, the four Prekindergarten Program classrooms served 72 four-year-old children, approximately 2.6% of the territory's four-year-old children. All age-eligible children may enroll in the program—there is no specified income requirement. The Prekindergarten Program operates six hours a day, five days a week, following the school year or academic calendar, providing 820 hours of services per year. During this school-day program, both lunch and breakfast are served.

The maximum class size for the program is 18, with a teacher to student ratio of 1 to 9. Lead teachers are required to have an Associate's degree with early childhood education specialization and either pre-K or pre-K to 2nd grade certification. The Pilot Prekindergarten Program is in its initial stages and polices regarding classroom-embedded coaching support will be reviewed in the future to include Prekindergarten teachers. Lead teachers are required to participate in 30 clock hours of in-service professional development annually. Assistant teachers are not required to participate in professional development and need only a high school diploma.

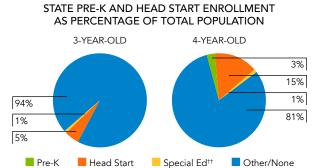

A formal evaluation of the program is still in the planning stages and will be conducted by the Guam Department of Education's Administrator for Research, Planning & Evaluation.

### Northern Mariana Islands

# NO PROGRAM

Ithough the Commonwealth of the Northern Mariana Islands (CNMI) does not provide state-funded preschool as defined in this report, the territory does support early education in other ways. Since 1984, the CNMI Public School System has operated the Head Start program, operating in 10 centers across multiple islands, providing center-based services four days per week, 152 days per year, in both the morning and the afternoon. The CNMI Head Start program served approximately 462 preschool-aged children in 2015-2016 and also provided specialized services for young children with special needs.

CNMI have early learning guidelines for children birth through age 5 which address multiple domains including logic and reasoning, social studies, physical development and health, language development, literacy, mathematics, science, English language development, social and emotional development, approaches to learning, and creative arts expression. The guidelines are aligned with the Head Start Child Development and Learning Framework.

CNMI is currently developing a quality rating and improvement system (QRIS). Program quality assessment tools are also used for quality assurance and monitoring, which will be one component of the QRIS.

### Palau

## NO PROGRAM

he Republic of Palau does not have a state-funded preschool program meeting the criteria of this report, but the territory does support other early childhood education initiatives. The Palau Community Action Agency operated center-based Head Start for 350 3- to 5-year-olds throughout the Republic's 16 states in 2015-2016. In addition, three of the predominant religious denominations (Roman Catholic, Seventh Day Adventist, and Palau Evangelical Church) have established private kindergartens in Koror State which enrolled a total of 101 preschoolers. However, many young children living in communities outside Koror State continue to lack access to early education. Many small communities do not meet the requirement that at least 10 eligible children enroll in the Head Start program and cost of access and enrollment into the private kindergartens is beyond parental means.

The Family Health Unit within the Ministry of Health helped to prepare the Palau Early Childhood Comprehensive System (PECCS) proposal in 2003, which included a three-year work plan to develop a National Framework on Early Childhood Development for School Readiness.

In their Education for All National Plan for 2002-2010, the Ministry of Education identified "expanding and improving comprehensive early childhood care and education, especially for the most vulnerable and disadvantaged children," as a chief goal. Ministry responsibilities include developing appropriate curricula for all public preschool, elementary school, and secondary school programs, and recommending minimum qualifications and requirements for preschool, elementary, and secondary school teachers.

### Puerto Rico

## NO PROGRAM

uerto Rico does not have a state-funded preschool program as defined in this report. However, the territory, which operates as one single school district, does support several early learning initiatives.

The Department of Education of Puerto Rico and the Puerto Rico Education Council oversee elementary and secondary public education, monitor academic standards, and issue licenses to educational institutions. Programs for preschool-aged children are administered by the Administration for Integral Child Care and Development (ACUDEN) and the Department of Education has authority over early childhood special education. There are seven levels of education in Puerto Rico. Level 1 is nursery school for children under age 4 which is optional and consists of Early Head Start, Head Start, and other prekindergarten programs. Level 2 is compulsory preschool, also known as kindergarten, which is mandatory for 5-year-olds.

Puerto Rico has a 16-member Early Childhood Advisory Board (ECAB) administered by ACUDEN with representation for agencies responsible for Head Start, child care, education, higher education, and other constituent groups. ECAB was responsible for developing Unidos por la Niñez Temprana (United for Early Childhood), Puerto Rico's plan for providing services to children from birth through 5 years. In collaboration with the Department of Education, the ECAB developed and promoted the use of the Early Learning Guidelines by all early learning programs. Teachers, directors, and supervisors across various early learning programs received training in implementing the guidelines.

Puerto Rico has a five level quality improvement and rating system (QRIS) to measure the quality of infant, toddler, and preschool centers. ACUDEN partnered with the University of Puerto Rico and other government agencies to create and validate Puerto Rico's QRIS whose identification symbol is the Pasito (meaning "baby step"), with five Pasitos identifying a high-quality center.

### Virgin Islands

# NO PROGRAM

he Virgin Islands does not provide a preschool program as defined by this report. However, the Department of Human Services, which houses the Office of Child Care and Regulatory Services and the Head Start Program, oversees early childhood education and care across multiple settings. The Department of Human Services uses local funds to surpass the federally required Head Start local match. The Virgin Islands Child Care Revised Rules and Regulations provide standards that all child care and early childhood education facilities, including private centers, Head Start, and Early Head Start, must follow. All early childhood education teachers and directors were required to earn a CDA credential by June 2015, and 24 hours of professional development training is required each year. These regulations also require maximum class sizes of 18 for 3-year-olds (with 1:9 staff to child ratio) and 20 for 4-year-olds (with 1:10 staff to child ratio).

Published in April 2010, the Virgin Islands Early Learning Guidelines were developed to improve the quality of care and education and focus on school readiness and provide a common set of preschool standards across all settings. The Guidelines provide advice on what children should know, understand, and be able to do by the time they reach kindergarten in the domains of language and literacy; mathematical understanding; approaches to learning; social, emotional, and values development; creativity and the arts; science; social studies; and physical health and development. The Guidelines also provide strategies for teachers, caregivers, families, and community members to help children achieve these goals. Content of the Guidelines is aligned with the Head Start Framework and the Common Core State Standards, adopted by the Department of Education.

The Virgin Islands Infant & Toddler Developmental Guidelines were released in 2013 and reflect expectations of what children should know, understand, and be able to do by the time they reach their third birthday. They are aligned with the Early Learning Guidelines and cover the same domains.

### THE STATE OF PRESCHOOL SURVEY METHODOLOGY

### **Respondent Universe**

The respondent universe for this study is the state preschool administrators in the 50 states and the District of Columbia, plus the U.S. territories. Data are collected directly from these entities through a web-based survey form. More than one agency supports early childhood education programs in some states. As a result, some states have more than one respondent. Note that in some states, there are no state programs to support publicly provided early childhood education. As such, these states do not have state preschool administrators and they do not report data on the topic. Other administrators in these states, however, are contacted to update and confirm a state narrative on the status of other early childhood programs in the state each year.

### **Statistical Methodology**

This is a universe data collection, employing a survey form. All states with publicly supported early childhood education have responded to the collection effort, with the exception of Florida. Information on Florida was obtained through a direct search of public records. In addition, information was sought from territories; Guam is now the first territory to operate its own preschool program comparable to state-funded programs. Because the data collection is based on a universe of sample members, weighting adjustments and adjustments to variances for statistical test purposes are not necessary. Some statistical adjustments are made to the resulting data, however, to help unduplicate enrollment counts that can arise when the same child is enrolled in more than one publicly funded program. More specifically, when states report that they have included children with disabilities in both the special education in state preschool count is subtracted from the preschool special education enrollment counts. Similarly, when states reported that they have included Head Start children in counts of children in state preschool and Head Start, the Head Start in state preschool count is subtracted from the Head Start enrollment. Children with disabilities enrolled in Head Start are also subtracted from the preschool special education enrollment count to avoid duplication.

### Methods to Maximize Response Rate and Ensure Data Accuracy

Several steps have been taken to maximize the response to this data collection. First, the data are collected through a userfriendly, web-based, computer-assisted interview (CAI) program. This flexibility allows respondents to enter information as time and data availability permit. Further, respondents are offered opportunities to check previous years' entries prior to data collection beginning and to review a current year's entries before the data are published. The first data check acts both as a data quality control step, in terms of reminding respondents what kinds of data will be needed for the current year's collection, and as a reminder that the current year's data collection is about to begin. Allowing respondents to review current year's data entry before results are published acts as another data quality control check and also provides respondents with confidence that accurate data will be reported from their respective states, further garnering cooperation.

Once surveys are completed, data are checked by NIEER staff for entry errors, consistency with prior year's data, and consistency with information available from public documents (for example, with published state education agency regulations and guidance). Any apparent inconsistencies or errors are discussed with the respondents for resolution. When data have been compiled and summarized for publication in a public use data set and reports, the results are then sent back to the state administrators who provided the information for final verification.

### **Tests of Procedures and Methods**

Each year, staff at NIEER review changes to policies that support early childhood education at the state and federal levels. Modifications are then made to the questionnaire and the related web-based CAI instruments to reflect these policy changes. In addition to the policy review, respondents are sent data from the previous year's data collection, allowing them to correct errors or to update information for the formal release of the data. NIEER staff actively solicit opinions regarding the clarity, usefulness, and availability of data requested by the survey from the primary respondents. This facilitates NIEER staff learning about new or changing policies from the provider perspective.

The CAI instruments undergo extensive testing prior to the initiation of data collection. Tests are run to verify that logical skips through the instrument are functioning as expected so that respondents are not asked questions that are not meaningful based on responses to prior questions. Prior to publication, respondents are sent current year answers for one last verification for accuracy before the data are released.

The survey form was developed by staff and faculty at NIEER with technical input and guidance from staff at NCES. NIEER is responsible for collecting the data and developing initial NCES reports, again with guidance from NCES. The annual State Preschool Yearbook, subsequently produced by NIEER, is not an NCES product and is solely the responsibility of NIEER.

All initiatives included in the current report meet the criteria outlined by NIEER, which defines state preschool education programs as initiatives that are funded and directed by the state to support group learning experiences for preschool-age children, usually ages 3 and 4. For more information about these criteria, please see, "What Qualifies as a State Preschool Program?" on page 27. This report covers the same initiatives as our 2015 report, with the addition of a program in Indiana

that was considered a pilot in this report last year, additional programs in California and Connecticut, and a new program in Guam. In the 2015 report, two programs in Vermont were included but in 2016 only the new Universal Prekindergarten program is included in the report.

The survey included yes or no questions, questions that asked state administrators to select which of several choices best described their program, and open-ended questions. The survey included questions on access, operating schedule, child eligibility and reassessment, program standards, statewide early learning standards, curriculum, personnel, resources, structured observations of classroom quality, other program monitoring, evaluations, and important changes to the program since the last survey.

### **Collection of Non-Survey Data**

Although most of the data in this report were collected through the surveys, there are a few exceptions. Total federal, state, and local expenditures on K-12 education in the 2015-2016 school year were calculated by NIEER based on data from the National Education Association's report, Rankings and Estimates: Rankings of the States 2015 and Estimates of School Statistics 2016. Total K-12 spending for each state includes current operating expenditures plus annual capital outlays and interest on school debt. This provides a more complete picture of the full cost of K-12 education than including only current operating expenditures, which underestimate the full cost. Our estimate of K-12 expenditures is also more comparable to total preschool spending per child because this funding generally must cover all costs, including facilities. Expenditure per child was calculated for each state by dividing total expenditures by the fall 2015 enrollment. We estimated the breakdown of expenditure per child by source, based on the percentages of revenue receipts from federal, state, and local sources in each state.

The Administration for Children and Families (ACF) and the Office of Head Start in the U.S. Department of Health and Human Services were the sources of data on federal Head Start spending and enrollment and Head Start enrollment supported by state match. In addition, some data were obtained from the Education Commission of the States, State Pre-K Funding: 2015-2016 Fiscal Year Report and through the Head Start Program Information Reports (PIR) for the 2015-2016 program year. Where necessary, states were asked for clarification and/or additional information regarding state supplements to Head Start. Head Start data are provided in Appendix B.

Populations of 3- and 4-year-olds in each state were obtained from the Census Bureau's datasets and are shown in Appendix C. As in the past, NIEER used estimates for the July immediately preceding the program year (e.g., July 2015 for the 2015-2016 program year) to calculate percentages of 3- and 4-year-olds enrolled in state preschool programs, federal Head Start, and special education.

The U.S. Office of Special Education Programs provided data on special education enrollment in the Individuals with Disabilities Education Act Preschool Grants program (IDEA Section 619 of Part B) in the 2015-2016 program year. These data are provided in Appendix D.

In the 2016 Yearbook, NIEER again attempts to provide a more accurate estimate of unduplicated enrollments, whether in state preschool, Head Start, special education, or other settings, through a series of calculations. Because many children who are counted in special education enrollments are also enrolled in state preschool or Head Start programs, it is important to ensure that those children are not counted twice. Thirty-nine states and the District of Columbia reported including children in special education in their state preschool enrollment figures, while four states and Guam do not include these children in their enrollment count. Thirty-one of the 39 states and the District of Columbia were able to provide the number of children in special education who were also counted in their enrollment; another four multi-program states provided breakdown for some, but not all, programs. Those children were subtracted from the special education enrollment figure for the state, but remain in the state preschool enrollment figure in the enrollment pie charts and when calculating total enrollment across both programs. The remaining four states were unable to report special education enrollment numbers, and, therefore, estimates were used based on the average percent of special education students in state preschool and enrollment numbers for each program. Information from the PIR regarding special education students were used for one Head Start program (See Table 4).

Three- and four-year-olds enrolled in Head Start with an IEP or IFSP, as reported in the 2015-2016 PIR, were also removed from the special enrollment total used in the enrollment pie charts. As the PIR does not report a breakdown of special education students by age, estimates were based on total special education enrollment and the percentage of all Head Start enrollees who were 3 or 4 years old. Three-year-olds enrolled in Early Head Start programs were not included in this estimate.

Beginning with the 2014-2015 Yearbook, 3- and 4-year-olds who were enrolled in both Head Start and state preschool were removed from the Head Start enrollment total used in the enrollment pie charts. In 2015-2016, 21 programs were able to report information on the number of children enrolled in state preschool who were also enrolled in Head Start. These children were subtracted from the total Head Start number but remain in the state preschool enrollment number for the enrollment pie charts and when calculating total enrollment across both programs. Ten programs reported that children were dually enrolled in Head Start and state preschool but could not report the number of children. In these states, the number of children in state preschool and Head Start may be an overestimate.

### **Determination of State Rankings**

States are given rankings in four areas: the percentage of 4-year-olds enrolled in state preschool (Access Ranking– 4-Year-Olds), the percentage of 3-year-olds enrolled in state preschool (Access Ranking–3-Year-Olds), state spending per child enrolled (Resources Ranking–State Spending), and all reported spending per child enrolled (Resources Ranking– All Reported Spending). The measures of access for 3- and 4-year-olds were calculated, as described above, using state data on enrollment in the preschool programs and Census population data. When a state did not report separate enrollment numbers of 3-year-olds and 4-year-olds, the age breakdown was estimated by other means, such as using the average proportion of children enrolled in state preschool at each age in states that served both 3- and 4-year-olds, and provided data by age. State per-child spending was calculated by dividing state preschool spending (including TANF spending directed toward the state preschool initiative) by enrollment. All reported spending per child was calculated by dividing the sum of reported local, state (including TANF), and federal spending by enrollment. Beginning with the 2014-2015 report, we also provide an indicator of whether the state was able to report local and/or federal resources (see Table 6). New for 2015-2016, federal Preschool Development Grant (PDG) spending for state preschool is included in all reported spending.

All states (and D.C.) that provided data were ranked, starting with "1" for the state with the highest percentage of its children enrolled in the state preschool education program or the state program that spent the most per child. Guam is not included in the state rankings. States that did not serve children at age 3 receive notations of "None Served" on the ranking of access for 3-year-olds. Throughout this report, the District of Columbia is referred to by the term "state," creating a list of 44 states for rankings. The seven states that did not fund a preschool initiative during the 2015-2016 school year are omitted from all rankings and instead receive notations of "No Program" on their state profile pages.

Tennessee	Kindergarten-age eligible children with documented disabilities may enroll in preschool
Texas	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Vermont	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Kindergarten-age eligible children may enroll in preschool at the request of parents
Virginia	School divisions may assess a child born between October 1 and December 13 to determine his or her readiness for the kindergarten program; Kindergarten age-eligible children may enroll in preschool at local program's discretion only, not solely at the request of parents
Washington	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>s</sup>
West Virginia	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Local school districts can allow for early entrance to kindergarten based on an assessment?
Wisconsin 4K	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Kindergarten-age eligible children may enroll in preschool at the request of parents; Kindergarten-age eligible children may enroll in preschool at the request of parents; Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>6</sup>
Wisconsin HdSt	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Kindergarten-age eligible children may enroll in preschool at the request of parents; Kindergarten-age eligible children may enroll and repeat 4-year-old preschool; Kindergarten-age eligible children with documented disabilities may enroll in preschool
Guam	State policy does not regulate the enrollment of kindergarten age-eligible children in preschool

## INCOME REQUIREMENT

STATE	Besides age, how is eligibility for state-funded preschool determined for individual children?
Alabama	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>3</sup>
Alaska	Eligibility is determined by individual child or family characteristics in addition to age
Arizona	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
Arkansas	Eligibility is determined by individual child or family characteristics in addition to age <sup>9</sup>
California SPP	Eligibility is determined by individual child or family characteristics in addition to age <sup>8</sup>
California TK	All age-eligible children in districts offering the program, or in the entire state, may enroll
Colorado	Eligibility is determined by individual child or family characteristics in addition to age
Connecticut CDCC	Eligibility is determined by individual child or family characteristics in addition to age <sup>8</sup>
Connecticut SRP	All age-eligible children in districts offering the program, or in the entire state, may enroll?
Connecticut Smart Start	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>7</sup>
Delaware	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
District of Columbia	All age-eligible children in the District may enroll <sup>6</sup>
Florida	All age-eligible children in districts offering the program, or in the entire state, may enroll
Georgia	All age-eligible children in districts offering the program, or in the entire state, may enroll
Hawaii	Eligibility is determined by individual child or family characteristics in addition to age <sup>5</sup>
Illinois	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Indiana	Eligibility is determined by individual child or family characteristics in addition to age <sup>11</sup>
Iowa Shared Visions	Eligibility is determined by individual child or family characteristics in addition to age <sup>8</sup>
Iowa SWVPP	All age-eligible children in the entire state, may enroll <sup>11</sup>
Kansas Preschool	Eligibility is determined by individual child or family characteristics in addition to age <sup>2</sup>
Kansas State Pre-K	Eligibility is determined by individual child or family characteristics in addition to age
Kentucky	Eligibility is determined by individual child or family characteristics in addition to age <sup>10</sup>
Louisiana 8(g)	Eligibility is determined by individual child or family characteristics in addition to age <sup>3</sup>
Louisiana LA 4	Eligibility is determined by individual child or family characteristics in addition to age
Louisiana NSECD	Eligibility is determined by individual child or family characteristics in addition to age
Maine	Determined locally <sup>8</sup>
Maryland	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
Massachusetts IPLE	Eligibility may also be determined by individual child or family characteristics in addition to age at the local level <sup>9</sup>
Massachusetts UPK	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>6</sup>
Michigan	Eligibility is determined by individual child or family characteristics in addition to age <sup>9</sup>
Minnesota	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Mississippi	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>3</sup>
Missouri	Determined Locally <sup>6</sup>
Nebraska	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Nevada	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>7</sup>
New Jersey Abbott	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>7</sup>
New Jersey ECPA	All age-eligible children in districts offering the program, or in the entire state, may enroll
New Jersey ELLI	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
New Mexico	All age-eligible children in locations offering the program may enroll <sup>5</sup>
New York	All age-eligible children in districts offering the program may enroll <sup>7</sup>
North Carolina	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Ohio	Eligibility is determined by individual child or family characteristics in addition to age
Oklahoma	All age-eligible children in districts offering the program, or in the entire state, may enroll
Oregon	Eligibility is determined by individual child or family characteristics in addition to age <sup>3</sup>
Pennsylvania RTL	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Pennsylvania HSSAP	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Pennsylvania K4 & SBPK	K4: All age-eligible children in districts offering the program, or in the entire state, may enroll; SBPK: Eligibility may be determined by individual or family characteristics in addition to age
Pennsylvania Pre-K Counts	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Rhode Island	All age-eligible children in communities offering the program may enroll <sup>4</sup>
South Carolina 4K/EIA	Eligibility is determined by individual child or family characteristics in addition to age <sup>3</sup>
South Carolina CDEP	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Tennessee	Eligibility is determined by individual child or family characteristics in addition to age
Texas	Eligibility is determined by individual child or family characteristics in addition to age
Vermont	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>2</sup>
Virginia	Eligibility is determined by individual child or family characteristics in addition to age
Washington	Eligibility is determined by individual child or family characteristics in addition to age
West Virginia	All age-eligible children in districts offering the program, or in the entire state, may enroll
Wisconsin 4K	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>7</sup>
Wisconsin HdSt	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Guam	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>4</sup>

## INCOME REQUIREMENT

STATE	How is the income requirement applied to determine eligibility?	
Alabama	NA	
Alaska	Not reported	
Arizona	100% of children must meet the income requirement	
Arkansas	90% or more of the children meet the income criteria; other children may qualify with other characteristics and/or be on a sliding fee scale <sup>9</sup>	
California SPP	Once all children meeting the income criteria are served, other children can enroll <sup>8</sup>	
California TK	NA	
Colorado	Income is one of many eligibility criteria <sup>6</sup>	
Connecticut CDCC	100% of children must meet the income requirement <sup>®</sup>	
Connecticut SRP	60% of children must meet the income requirement	
Connecticut Smart Start	NA	
Delaware	At least 90% of each program's ECAP-funded seats must meet the income requirement	
District of Columbia	NA	
Florida	NA	
Georgia	NA	
Hawaii	Priority is given to families meeting the income requirement <sup>5</sup>	
Illinois	NA <sup>4</sup>	
Indiana	100% of children must meet the income requirement <sup>11</sup>	
Iowa Shared Visions	At least 80% must meet the income requirement <sup>9</sup>	
Iowa SWVPP	NA	
Kansas Preschool	50% of children must meet the income requirement <sup>2</sup>	
Kansas State Pre-K	Children must meet at least one of eight specified risk factors	
Kentucky	Once all at-risk 4-year-olds (160% of FPL) and 3- and 4-year-old children with disabilities are served, other children can enroll if space is available <sup>10</sup>	
Louisiana 8(g)	Priority is given to students who qualify for free or reduced price lunch <sup>3</sup>	
Louisiana LA 4	100% of children must meet the income requirement	
Louisiana NSECD	100% of children must meet the income requirement	
Maine	NA <sup>8</sup>	
Maryland	All children are at 185% FPL or below; PDG must be 200% FPL or below; State PreK Expansion must be 300% FPL or below	
Massachusetts IPLE	NA	
Massachusetts UPK	NA	
Michigan	90% of children must meet income eligibility of 250% of FPL, with exceptions for up to 300%	
Minnesota	if sufficient numbers of children cannot be recruited at 250% of FPL <sup>9</sup> Per Federal Head Start requirements <sup>4</sup>	
Mississippi	NA	
Missouri	NA	
Nebraska	70% of children must meet the income requirement <sup>4</sup>	
Nevada	NA <sup>7</sup>	
New Jersey Abbott	NA <sup>7</sup>	
New Jersey ECPA	NA	
New Jersey ELLI	100% of children must meet the income requirement <sup>6</sup>	
New Mexico	NA <sup>5</sup>	
New York	NA <sup>7</sup>	
North Carolina	20% of a county's NC Pre-K slots may be used to serve children above 75% of SMI if they have another risk factor	
Ohio	100% of children must meet the income requirement <sup>5</sup>	
Oklahoma	NA	
Oregon	Per Federal Head Start requirements <sup>3</sup>	
Pennsylvania RTL	NA	
Pennsylvania HSSAP	Per Federal Head Start requirements <sup>4</sup>	
Pennsylvania K4 & SBPK	NA	
Pennsylvania Pre-K Counts	100% of children must meet the income requirement <sup>4</sup>	
Rhode Island	NA	
South Carolina 4K/EIA	100% of children <sup>3</sup>	
South Carolina CDEP	Priority is given to students who qualify for free or reduced price lunch or Medicaid <sup>5</sup>	
Tennessee	100% of children must meet the income requirement <sup>3</sup>	
Texas	Qualifying for free or reduced Price lunch is one of six ways to qualify	
Vermont	NA	
Virginia	85% of children must meet the income requirement <sup>3</sup>

STATE	Does the state collect the results of structured observations of classroom quality?	How often do classrooms receive structured observations of classroom quality?
Alabama	Yes, in all classrooms beginning in their second year <sup>15</sup>	More than once per year <sup>15</sup>
Alaska	No	NA
Arizona	Yes, in randomly selected classrooms	Every two to three years
Arkansas	Yes, in all classrooms	Less than once per year
California SPP	Yes, in all classrooms	More than once per year
California TK	No	NA
Colorado	No <sup>13</sup>	NA
Connecticut CDCC	Yes, in low performing classrooms; programs without NAEYC accreditation or Head Start approval <sup>18</sup>	Once per year <sup>18</sup>
Connecticut SRP	Yes, in low performing classrooms; programs without NAEYC accreditation or Head Start approval <sup>18</sup>	Once per year <sup>18</sup>
Connecticut Smart Start	Yes, in low performing classrooms; programs without NAEYC accreditation or Head Start approval <sup>17</sup>	Once per year <sup>17</sup>
Delaware	Yes, in randomly selected classrooms <sup>14</sup>	Less than once per year
District of Columbia	Yes, in all classrooms	Once per year
Florida	Yes, in all classrooms	Once per year
Georgia	Yes, in all classrooms	Less than once per year <sup>19</sup>
Hawaii	Yes, in all classrooms	More than once per year
Illinois	Yes, in randomly selected classrooms	Less than once per year
Indiana	Yes, in randomly selected classrooms	Once per year
Iowa Shared Visions	No	NA
Iowa SWVPP	Yes, in new classrooms (second year) <sup>24</sup>	Once per year <sup>24</sup>
Kansas Preschool	No	NA
Kansas State Pre-K	Yes, in all classrooms	Once per year
Kentucky	Yes, in all classrooms <sup>28</sup>	Once per year <sup>28</sup>
Louisiana 8(g)	Yes, in all classrooms <sup>14</sup>	More than once per year
Louisiana LA 4	Yes, in all classrooms <sup>16</sup>	More than once per year <sup>16</sup>
Louisiana NSECD	Yes, in all classrooms	More than once per year <sup>17</sup>
Maine	Yes, in all classrooms	Once per year
Maryland	Yes, in all classrooms	More than once per year
Massachusetts IPLE	Yes, for programs participating in the QRIS, at Level 3 <sup>28</sup>	At least once per year
Massachusetts UPK	Yes, in all classrooms	At least once per year
Michigan	Yes, in all classrooms <sup>20</sup>	More than once per year <sup>20</sup>
Minnesota	No	NA
Mississippi	Yes, in all classrooms	Once per year
Missouri	Yes, in all classrooms <sup>15</sup>	Once per year
Nebraska	Yes, in new classrooms and some additional classrooms <sup>13</sup>	Less than once per year <sup>13</sup>
Nevada	Yes, in PDG-funded classrooms <sup>16</sup>	More than once per year
New Jersey Abbott	Yes, in all classrooms <sup>16</sup>	More than once per year
New Jersey ECPA	No	NA
New Jersey ELLI	No	NA
New Mexico	Yes, in all classrooms	Once per year
New York	Yes, two prekindergarten grant funding streams require annual site visits	Determined locally
	Yes, in all classrooms	At least once per year
North Carolina Ohio	Yes, in all classrooms	At least once per year At least once per year
Oklahoma	No <sup>16</sup> Yes, in all classrooms	NA At least once per veer
Oregon Pennsylvania RTL	No	At least once per year NA
Pennsylvania HSSAP	Yes, in new classrooms; in randomly selected classrooms	Once per year
Pennsylvania K4 & SBPK	No	NA
Pennsylvania Pre-K Counts	Yes, in randomly selected classrooms	Once per year
Rhode Island	Yes, in all classrooms	Once per year
South Carolina 4K/EIA	Yes, in low performing and randomly selected classrooms <sup>9</sup>	Less than once per year
South Carolina 40/EIA	Yes, in new classrooms	Less than once per year
Tennessee	Yes, in new classrooms	More than once per year
Texas	No	NA
Vermont	Yes, in all classrooms <sup>14</sup>	Once per year <sup>14</sup>
Virginia	No	NA
Washington	Yes, in all classrooms <sup>15</sup>	Less than one time per year
West Virginia	Yes, in all classrooms	More than once per year
Wisconsin 4K	No	NA

STATE	Information collected for monitoring purposes	
Nebraska	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Annual Review of program records (Every 3 to 5 years) <sup>13</sup>	
Nevada	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Ann Results of classroom quality self-assessments (More than once a year); Participation in a state quality rating system (Every 2 to 3 year Review of program records (Annually)	
New Jersey Abbott	Documentation of children's learning and/or child outcomes (Annually); Review of facilities and safety requirements (Every 2 to 3 years) Results of classroom quality self-assessments (More than once a year); Participation in a state quality rating system (Every 2 to 3 years) Review of program records (Annually) <sup>18</sup>	
New Jersey ECPA	Review of program records (Annually) <sup>12</sup>	
New Jersey ELLI	Review of program records (Annually)	
New Mexico	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Annually); Results of classroom quality self-assessments (Annually); Participation in a state quality rating system (Annually); Review of program records (Annually)	
New York	Documentation of children's learning and/or child outcomes (Annually); Review of facilities and safety requirements (Annually); Results of classroom quality self-assessments (Annually); Participation in a state quality rating system (Annually); Review of program records (Annually)	
North Carolina	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Annually); Participation in a state quality rating system (Annually); Review of program records (Annually); Results of classroom quality ECERS-R assessments (Every 2 to 3 years) <sup>20</sup>	
Ohio	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Annually); Results of classroom quality self-assessments (Annually); Participation in a state quality rating system (Every 2 to 3 years); Review of program records (Every 2 to 3 years) <sup>12</sup>	
Oklahoma	None	
Oregon	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (More than once a year); Results of classroom quality self-assessments (More than once a year); Participation in a state quality rating system (More than once a year); Review of program records (More than once a year)	
Pennsylvania RTL	Fiscal and enrollment information (Annually)	
Pennsylvania HSSAP	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Annually) Results of classroom quality self-assessments (Annually); Participation in a state quality rating system (More than every 5 years); Review of program records (Annually) <sup>7</sup>	
Pennsylvania K4 & SBPK	Enrollment information	
Pennsylvania Pre-K Counts	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Annually); Results of classroom quality self-assessments (Annually); Review of program records (Annually)	
Rhode Island	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Annually); Results of classroom quality self-assessments (Every 2 to 3 years); Participation in a state quality rating system (Annually); Review of program records (Annually)	
South Carolina 4K/EIA	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (More than every 5 years)	
South Carolina CDEP	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Annually); Review of program records (Every 3 to 5 years)	
Tennessee	Documentation of children's learning and/or child outcomes (At least annually); Review of facilities and safety requirements (Minimum of two times per year); Results of classroom quality self-assessments (When new classes or new teachers are added, and once every 5 years following the initial evaluation); Review of program records (As needed); Other monitoring (Throughout the year) <sup>8</sup>	
Texas	None <sup>12</sup>	
Vermont	Programmatic details; Program quality; Documentation of children's learning and/or child outcomes <sup>14</sup>	
Virginia	Documentation of children's learning and/or child outcomes (More than once a year) <sup>13</sup>	
Washington	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Every 3 to 5 years); Results of classroom quality self-assessments (Annually); Participation in a state quality rating system (Every 3 years); Review of program records (More than once a year)	
West Virginia	Documentation of children's learning and/or child outcomes (More than once a year); Review of facilities and safety requirements (Annually); Results of classroom quality self-assessments (Annually); Review of program records (Every 2 to 3 years) <sup>20</sup>	
Wisconsin 4K	None <sup>23</sup>	
Wisconsin HdSt	Other monitoring (Annually) <sup>17</sup>	
Guam	Documentation of children's learning and/or child outcomes (Annually); Review of facilities and safety requirements (Monthly); Review of program records (Annually)	

STATE	How is monitoring information collected by the state?
Alabama	Documentation of children's learning and/or child outcomes: Site visits; Review of facilities and safety requirements: Site visits; Results of classroom quality self-assessments: Site visits; Review of program records: Site visits; Program Memorandums of Understanding: Submission of information by program or local entity
Alaska	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Submission of information by program or local entity
Arizona	Documentation of children's learning and/or child outcomes: Other method; Review of facilities and safety requirements: Other method; Results of classroom quality self-assessments: Other method; Participation in a state quality rating system: Other method <sup>24</sup>
Arkansas	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Site visits; Results of classroom quality self-assessments: Site visits; Participation is a state guality string antenny Site visits; Participation for grant program and site visits;
California SPP	Participation in a state quality rating system: Site visits; Review of program records: Site visits Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Site visits; Results of classroom quality self-assessments: Submission of information by program or local entity; Participation in a state quality rating system: Site visits; Review of program records: Site visits
California TK	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity, Site visits; Review of facilities and safety requirements: Submission of information by program or local entity, Site visits; Results of classroom quality self-assessments: Submission of information by program or local entity, Site visits; Participation in a state quality rating system: Submission of information by program or local entity, Site visits; Review of program records: Submission of information by program or local entity, Site visits;
Colorado	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity: Site visits; Results of classroom quality self-assessments: Site visits; Participation in a state quality rating system: Site visits; Review of program records: Site visits
Connecticut CDCC	Review of facilities and safety requirements: Submission of information by program or local entity; Review of program records: Submission of information by program or local entity <sup>17</sup>
Connecticut SRP	Review of facilities and safety requirements: Site visits; Results of classroom quality self-assessments: Submission of information by program or local entity; Review of program records: Submission of information by program or local entity; Other monitoring: Submission of information by program or local entity, Site visits <sup>19</sup>
Connecticut Smart Start	NA
Delaware	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Submission of information by program or local entity, Site visits; Results of classroom quality self-assessments: Submission of information by program or local entity; Participation in a state quality rating system: Submission of information by program or local entity, Site visits; Review of program records: Submission of information by program or local entity, Site visits
District of Columbia	Documentation of children's learning and/or child outcomes: Site visits; Review of facilities and safety requirements: Site visits; Participation in a state quality rating system: Site visits; Review of program records: Site visits; Other monitoring: Submission of information by program or local entity <sup>19</sup>
Florida	Site visits; Submission of information by program or local entity; DCF monitors all licensed programs at least three times per year and posts reports online
Georgia	Documentation of children's learning and/or child outcomes: Site visits; Review of facilities and safety requirements: Site visits; Results of classroom quality self-assessments: Submission of information by program or local entity; Participation in a state quality rating system: Site visits; Review of program records: Site visits
Hawaii	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Submission of information by program or local entity, Other method; Results of classroom quality self-assessments: Site visits; Review of program records: Submission of information by program or local entity
Illinois	Documentation of children's learning and/or child outcomes: Site visits; Review of facilities and safety requirements: Other method; Results of classroom quality self-assessments: Site visits; Participation in a state quality rating system: Site visits, Other method; Review of program records: Site visits; Other monitoring: Site visits <sup>17</sup>
Indiana	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity, Other method; Review of facilities and safety requirements: Site visits; Results of classroom quality self-assessments: Submission of information by program or local entity, Other method; Participation in a state quality rating system: Site visits; Review of program records: Site visits
Iowa Shared Visions	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Other method; Results of classroom quality self-assessments: Submission of information by program or local entity; Review of program records: Submission of information by program or local entity; Other monitoring: Submission of information by program or local entity;
Iowa SWVPP	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity, Other method; Review of facilities and safety requirements: Other method; Participation in a state quality rating system: Other method; Review of program records: Site visits; Other monitoring: Submission of information by program or local entity <sup>25</sup>
Kansas Preschool	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Submission of information by program or local entity; Results of classroom quality self-assessments: Submission of information by program or local entity; Family Protective Factors Survey: Submission of information by program or local entity
Kansas State Pre-K	NA
Kentucky	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Submission of information by program or local entity, Site visits; Results of classroom quality self-assessments: Submission of information by program or local entity, Site visits; Review of program records: Submission of information by program or local entity, Site visits;
Louisiana 8(g)	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity, Site visits; Review of program records: Submission of information by program or local entity, Site visits; Other monitoring: Submission of information by program or local entity, Site visits <sup>15</sup>
Louisiana LA 4	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Other method; Results of classroom quality self-assessments: Submission of information by program or local entity, Site visits; Participation in a state quality rating system: Submission of information by program or local entity, Site visits; Review of program records <sup>17</sup>
Louisiana NSECD	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Other method; Results of classroom quality self-assessments: Submission of information by program or local entity; Participation in a state quality rating system: Submission of information by program or local entity, Site visits; Review of program records: Submission of information by program or local entity <sup>18</sup>
Maine	Documentation of children's learning and/or child outcomes: Submission of information by program or local entity; Review of facilities and safety requirements: Submission of information by program or local entity, Site visits; Review of program records: Site visits <sup>21</sup>

STATE	How are preschool child assessments used by the state agency?
Alabama	To guide teacher training, professional development, or technical assistance; To identify programs for corrective action or sanctions; To make funding decisions about programs or grantees; To make adjustments to curricula; To track child and program level outcomes over time;
	To make changes to state policies regarding the preschool program; To evaluate teacher performance; To provide a measure of kindergarten readiness
Alaska	To guide teacher training, professional development, or technical assistance; To make decisions regarding a child's enrollment in kindergarten; To identify programs for corrective action or sanctions; To make funding decisions about programs or grantees; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To evaluate teacher performance; To provide a measure of kindergarten readiness
Arizona	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula
Arkansas	To guide teacher training, professional development, or technical assistance; To identify programs for corrective action or sanctions; To make funding decisions about programs or grantees; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness
California SPP	To guide teacher training, professional development, or technical assistance; To identify programs for corrective action or sanctions; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness; To rate programs on the QRIS <sup>22</sup>
California TK	NA
Colorado	To guide teacher training, professional development, or technical assistance; To identify programs for corrective action or sanctions; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness
Connecticut CDCC	NA
Connecticut SRP	Child-level assessment information is not collected or used by the state; Assessments information may be used in these ways at the local level <sup>21</sup>
Connecticut Smart Start	NA
Delaware	To guide teacher training, professional development, or technical assistance; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness
District of Columbia	To guide teacher training, professional development, or technical assistance; To track child and program level outcomes over time
Florida	To identify needs that will guide teacher training or professional development; To make adjustments to the curricula; To track child and program level outcomes over time
Georgia	To guide teacher training, professional development, or technical assistance; To identify programs for corrective action or sanctions; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness
Hawaii	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula; To track child and program level outcomes over time; To provide a measure of kindergarten readiness
Illinois	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula; To make changes to state policies regarding the preschool program
Indiana	To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness <sup>23</sup>
Iowa Shared Visions	To guide teacher training, professional development, or technical assistance; To identify programs for corrective action or sanctions; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program
Iowa SWVPP	To guide teacher training, professional development, or technical assistance; To identify programs for corrective action or sanctions; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program
Kansas Preschool	To make adjustments to curricula; To track child and program level outcomes over time; To provide a measure of kindergarten readiness
Kansas State Pre-K	NA
Kentucky	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness; To meet OSEP requirements
Louisiana 8(g)	To guide teacher training, professional development, or technical assistance; To make decisions regarding a child's enrollment in kindergarten; To identify programs for corrective action or sanctions; To make funding decisions about programs or grantees; To make adjustments to curricula; To track child and program level outcomes over time; To provide a measure of kindergarten readiness
Louisiana LA 4	To guide teacher training, professional development, or technical assistance; To track child and program level outcomes over time
Louisiana NSECD	To guide teacher training, professional development, or technical assistance; To track child and program level outcomes over time
Maine	Data from preschool child assessments are not used by the state agency
Maryland	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula; To track child and program level outcomes over time; To provide a measure of kindergarten readiness
Massachusetts IPLE	NA
Massachusetts UPK	To guide teacher training, professional development, or technical assistance; To provide a measure of kindergarten readiness; To determine meeting the UPK program requirements <sup>22</sup>
Michigan	Data from assessments are used by grantees and their subcontractors; data are not used at the state level
Minnesota	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness <sup>14</sup>
Mississippi	To guide teacher training, professional development, or technical assistance; To identify programs for corrective action or sanctions; To make funding decisions about programs or grantees; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness
Missouri	Data from preschool child assessments are not used by the state agency
Nebraska	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program
Nevada	To guide teacher training, professional development, or technical assistance; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness; To report outcome indicators to the legislature
New Jersey Abbott	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness

STATE	How are preschool child assessments used by the state agency?
New Jersey ECPA	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To evaluate teacher performance; To provide a measure of kindergarten readiness
New Jersey ELLI	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program; To provide a measure of kindergarten readiness
New Mexico	To guide teacher training, professional development, or technical assistance; To identify programs for corrective action or sanctions; To make funding decisions about programs or grantees; To make adjustments to curricula; To track child and program level outcomes over time; To make changes to state policies regarding the preschool program
New York	Data from preschool child assessments are not used by the state agency
North Carolina	To guide teacher training, professional development, or technical assistance; To make adjustments to curricula; To evaluate teacher performance <sup>22</sup>

## APPENDIX A: STATE SURVEY DATA 2015-2016

#### ALABAMA - First Class Pre-K: Alabama's Voluntary Pre-Kindergarten Program

- <sup>1</sup> The 562 children listed as "Other Races" are Latino/Hispanic.
- <sup>2</sup> Extended day programs are locally determined and are not part of the 6.5-hour state-funded Pre-K day.
- <sup>3</sup> For First Class Pre-K, a child has to be 4 years old and a resident of the state of Alabama; other locally determined school system boundaries may be applicable.
- <sup>4</sup> All classrooms have a 1:9 staff to child ratio and a maximum enrollment of 18 students with the exception of Head Start, which is allowed to have a 1:10 staff to child ratio and maximum of 20 students.
- <sup>5</sup> Classrooms must provide at least one mealtime per day. Additional snacks and/or meals are optional but suggested.
- <sup>6</sup> Screenings are to be provided on site at no cost by a medical professional. The Office of School Readiness has partnered with Alabama Partnership for Children to offer 2-1-1 Help Me Grow referrals to parents as needed.
- <sup>7</sup> All nonpublic school programs are encouraged to participate in the food subsidy program.
- <sup>8</sup> Alabama has partnered with the University of Alabama Birmingham to participate in a Dual Language Learner (DLL) Professional Development grant that will offer DLL language and literacy supports to teachers who choose to participate.
- <sup>9</sup> The state uses Teaching Strategies GOLD and it has been aligned with the Alabama Developmental Standards for Preschool Children.
- <sup>10</sup> Each classroom is assigned a coach who works directly with teachers on best practices and self-reflection, including incorporation of the developmental standards into daily planning and reviewing assessment practices.
- <sup>11</sup> The state does not endorse any one particular curriculum, but a curriculum must promote appropriate instructional practice and enhance learning and development while being consistent with the intent of the Office of School Readiness First Class Framework. It should also align with the state required assessment tool, Teaching Strategies GOLD.
- <sup>12</sup> A salary parity plan was put in place in 2015-2016 to ensure lead teachers were paid at least the minimum starting salary for a public school teacher. Incremental yearly step raises have been put in place to help elevate teacher pay.
- <sup>13</sup> Alabama's Pre-K program uses a tiered model of coaching so the teacher is continuously setting goals and self-reflecting throughout the year.
- <sup>14</sup> There are three types of grants: Excellence (\$45,000), Tiered (range from \$80,100-\$92,800), and Plus (new grants for start-up funds, \$120,000-\$150,000). The Tiered grants and the Plus grants require the use of the sliding scale based on family income and percentage of poverty and cannot charge fees that exceed the amount allowed in the sliding scale. Classrooms that receive Excellence grants may charge parents the normal cost of child care that is common in the local community, unless they receive federal funds.
- <sup>15</sup> First year teachers are not CLASS trained until their second year and at that time would receive structured observations. All teachers receive CLASS observations after their first year and all classrooms are coached and monitored a minimum of once per month.
- <sup>16</sup> Teaching Strategies GOLD performance data are available at http://children.alabama.gov/uploadedFiles/File/First\_Class\_PreK\_Gold\_Performance.pdf

#### ALASKA - Alaska Pre-Elementary

- <sup>1</sup> The exact number of special education students is unknown, but it is estimated at 10% of enrollment.
- <sup>2</sup> Hours per day and operating schedule are locally designed to fit district needs. Programs may partner with child care or other services to provide wraparound care, but, by state definition, state-funded pre-K cannot operate more than five hours a day.
- <sup>3</sup> Exceptions to age requirements may be made for children with IEPs. If parents and members of the IEP team determine that pre-K is the least restrictive environment for the child, the child could receive services through pre-K even if he or she did not meet the age requirements.
- <sup>4</sup> This is a local decision and may vary.
- <sup>5</sup> All programs follow state pre-elementary statute and regulations. School districts partnering with Head Start programs must follow federal Head Start requirements. Support services include parenting support or training, health services for children, and nutrition information.
- <sup>6</sup> Teachers must be state certified with a BA in ECE or a related field or specialized training in a related field, and assistant teachers must have a current CDA, 12 ECE credits, an AA in ECE, or specialized training in Early Education or a related field.
- <sup>7</sup> Coaching and mentoring services are being piloted to some lead and assistant teachers on a voluntary basis. Alaska uses the My Teaching Partner Coaching System and currently has 27 teachers enrolled.
- <sup>8</sup> Alaska is working with REL Northwest to develop a preschool evaluation tool. The evaluation tool is expected to be complete by Fall 2017.

#### **ARIZONA** - Quality First Scholarships

- <sup>1</sup> First Things First was designed to meet the diverse needs of Arizona communities. Decisions about which early childhood strategies will be funded are made by 28 regional partnership councils composed of community volunteers. More information about the Regional Partnership Councils can be found here: http://www.azftf.gov/pages/yourregionalcouncil.aspx2
- <sup>2</sup> Quality First Scholarships served a total of 7,632 children. In addition to serving 5,365 preschool children in center-based care, an additional 207 preschool children were served in regulated family child care homes. A total of 1,865 children under 3 were also served in center-based care, and an additional 195 children under 3 were served in regulated family child care homes. In previous years, enrollment totals have included children age 0 to 5.
- <sup>3</sup> In addition to the 80 preschool-aged children served in center-based programs, there are 15 children under age 3, and four children served in regulated family child care homes with an IEP/IFSP.
- <sup>4</sup> A minimum of three days per week and a minimum of three hours per day is required. A full-time slot is defined as 28 hours per week or more, and a part-time slot is defined as 12 hours per week.
- <sup>5</sup> The state preschool program can be blended with other funding to support a full-day or extended-day, or to support additional children who are on a wait list and unable to be served with the program's current funding.
- <sup>6</sup> All children must be at or below 200% FPL.
- <sup>7</sup> Some early care and education programs charge a co-payment to the family in addition to the funding that the state provides, but this is a local decision.
- <sup>8</sup> Eligibility is re-determined each fiscal year based on child's age and family's income. Children who are deemed ineligible are disenrolled from the program.
- <sup>9</sup> Group size and teacher-child ratio are based on the age of the youngest child in attendance.
- <sup>10</sup> Programs are required to follow state child care licensing regulations. Children enrolled two to four hours receive one or more snacks; children enrolled four to eight hours receive one or more snacks and a meal; children enrolled nine or more hours receive two snacks and a meal.
- <sup>11</sup> There is a requirement that programs participating in the state-funded preschool program have a written procedure for screening. Programs may provide screening themselves or refer families to receive screening from other organizations.
- <sup>12</sup> Programs are assessed on their provision of transition to kindergarten activities, parent conferences and/or home visits, and screening/referral policy every 24 to 27 months.
- <sup>13</sup> No specific child assessment tools are required nor are they required to be aligned with the ELDS. However, the tools used by a program must include the domains of social development, emotional development, cognitive development, and physical development. In addition, the evidence required for the assessment must include a variety of methods such as anecdotal record, photograph, family input, and work samples.

- <sup>14</sup> All programs participating in the state preschool program receive on-site coaching that can support the implementation of the ELDS.
- <sup>15</sup> The minimum requirement is that 25% of lead teachers and administrators must have 12 college credit hours in early childhood or related fields or a Certificate of Completion in ECE or Child Development, or a CDA. However, all programs must have a minimum star rating to participate in the state-funded preschool.
- <sup>16</sup> Fifty percent of Quality First Scholarships assistant teachers must have a minimum of six months of experience working in an early care and education program. However, all programs must have a minimum star rating to participate in the state-funded preschool.
- <sup>17</sup> For Quality First Scholarships, there is no salary parity or benefit parity requirement. However, there is a requirement in some Local Education Agencies (LEAs) for salary and benefit parity for pre-K teachers and assistant teachers. Salary and benefit parity is a requirement of the Preschool Development Grant.
- <sup>18</sup> Quality First Scholarships requirements for ongoing professional development are aligned with the State Licensing standards.
- <sup>19</sup> Those who participate in professional development on the implementation of curricula and assessments have an individual professional development plan.
- <sup>20</sup> Coaching is provided to all programs participating in Quality First Scholarships. The coaching can be used to support teachers, assistant teachers, and administrators. While the coaching is required, the audience receiving the coaching is not dictated by the state.
- <sup>21</sup> In 2015-2016, Arizona spent an additional \$11,178,526 for children birth to age 3 for Quality First Scholarships, not included in the total.
- <sup>22</sup> First Things First is funded through a voter initiative tobacco tax. Part of this funding is used for Quality First Scholarships.
- <sup>23</sup> Each assessor must achieve initial reliability on any tool that they are using for structured classroom observations. Additionally, every 10th assessment, a reliability check with another reliable observer occurs to check for drift. In addition, CLASS assessors are reassessed through Teachstone annually and ERS lead assessors participate in annual drift testing through ERSI.
- <sup>24</sup> All programs participating in Quality First Scholarships must also participate in Quality First, Arizona's Quality Improvement and Rating System. Each program receives a program assessment every 24 to 27 months that includes assessments in one-third of the total number of classrooms at the site using the ERS (ITERS, ECERS, FCCERS), the CLASS (Toddler, Pre-K), and the Quality First Points Scale that includes reviewing curriculum, child assessment, ratios and group sizes, staff qualifications, staff turnover, and policies for kindergarten transition and screening/referral. The assessments are used to determine if the program is eligible to participate in the state-funded preschool program, Quality First Scholarships, and to support the program in improving or maintaining quality.
- <sup>25</sup> The Quality First Validation study is currently underway. Results from Phase I of the study will be available in June 2017. Phase I is reviewing the theoretical framework, the data system, and the validity of the rating scale. The next phase will include review of the components (coaching, assessment, quality improvement plan, financial incentives, etc.), followed by child outcomes.

# **ARKANSAS** - Arkansas Better Chance/Arkansas Better Chance for School Success

- State funding is provided through the Arkansas Department of Education (ADE). The ADE has an agreement with the Division of Child Care and Early Childhood Education (DCCECE) to have the administrative oversight of the ABC Programs to ensure compliance with the state law and regulations. The ADE Board of Education must be informed of and/or approve grant awards, program standards/regulations and the impact of these services as it relates to school readiness.
- <sup>2</sup> School districts classified as being in academic distress, appearing on the school improvement list, or where more than 75% of fourth graders score below proficient on benchmark exams, are required to establish an ABC/ABCSS pre-K program. Funding goes to either the school district or a community provider in the identified locations.
- <sup>3</sup> The 54 children enrolled in pre-K who were age-eligible for kindergarten had to submit a waiver and obtain approval prior to this occurring. The waivers approved indicated that the child had disabilities resulting in a need of time for maturation. The enrollment total does not include children who received ABC home-visiting services only during the 2015-2016 program year. Children who are dually served in center-based care and home visiting are included in the enrollment total.
- <sup>4</sup> There are additional children receiving services via private contracts but are not a part of IDEA or Part C or B. These data only reflect those children who are a part of IDEA.
- <sup>5</sup> Home language is missing for 389 children.
- <sup>6</sup> Totals include only 3- and 4-year-olds.
- <sup>7</sup> All state-funded preschool services are expected to operate for a minimum of seven hours per day. All children are served in a school-day program with the day being a minimum of seven hours per day for a total of 178 days per year. This is considered the regular school day and not an extended day.
- <sup>8</sup> Programs may apply for Child Care Development Funds (CCDF) to assist with before- and after-school care, provided the children meet the requirements of eligibility for CCDF. CCDF will also fund ABC summer school to provide an extended year for those programs interested in providing these services. Funding for before- and afterschool care and the summer program has been reduced due to limited funding.
- <sup>9</sup> The \$10 Million (Arkansas Better Chance) uses other individual child or family characteristics to determine eligibility and can serve children beginning at birth. Children eligible to participate in an ABC program shall have at least one of the following characteristics: family with gross income not exceeding 200% FPL; a parent without a high school diploma or GED; low birth weight (below 5 pounds, 9 ounces); parent who was under 18 years of age at child's birth; immediate family member with a history of substance abuse; a demonstrable developmental delay identified through screening; eligible for services under IDEA; income-eligible for Title I programs; limited English proficiency; a parent who has a history of abuse or neglect, or who is a victim of abuse or neglect; meets the state's homeless criteria; in foster care; or has an incarcerated parent. The \$101 Million (Arkansas Better Chance for School Success) uses income eligible to participate in the ABCSS program, the family must have a gross income not exceeding 200% FPL and be age-eligible. A sliding fee scale applies to families with incomes between 200 and 250% FPL.
- <sup>10</sup> Translators or bilingual staff are available if some children do not speak English.
- <sup>11</sup> Current ELDS are in alignment with the State K-3 Standards and link to the kindergarten entry assessment (KEA).
- <sup>12</sup> The state strongly supports the ELDS and has approved these standards via the Early Childhood Commission which is an advisory group. Funding is being provided to contractors to disseminate training statewide to EC Providers.
- <sup>13</sup> Funding is provided to programs that may be used for TA to support curriculum implementation. The use of the TA funding is a decision made at the local level. Professional Development is available via state support that will support enhancements to any curriculum.
- <sup>14</sup> There are state-developed curricula, Adventures in Learning Curriculum and Adventures for Toddlers, that correlate with the State Framework.
- <sup>15</sup> The lead teacher in a public school shall hold a standard Arkansas teacher license with P-4 certification. The lead teacher in a nonpublic school-based program must have a minimum of a BA in Early Childhood Education or Child Development. For all programs with multiple classrooms at a single location, the teacher of the second classroom shall hold, at a minimum, an AA in Early Childhood Education or Early Childhood Development. State policy does allow programs to hire staff under an approved staff qualifications plan while completing coursework to obtain minimum credentialing.
- <sup>16</sup> Some teachers are close to completing their degree. When there is another degreed person on staff, the individual must submit a request for a staff qualification plan for approval by the state and remain under the guidance of the certified or credentialed staff.
- <sup>17</sup> The Birth to Pre K Credential, AA Degree in ECE/CD, and Technical Certificate in ECE/CD are also options for the state-funded preschool program.
- <sup>18</sup> Salary parity has been highly recommended and was initially expected but because the program has been flat-funded with only a minimal increase, the salary schedule may vary. Many districts do pay their teachers on a comparable pay scale as other teachers in K-3 depending on their educational level and credentials.
- <sup>19</sup> The professional development requirements were changed in 2015 to require no less than six days of professional development per year. Beginning with the 2015-2016 school year, educators are required to obtain a minimum of 30 hours per year of professional development for licensure renewal and contractual agreement.
- <sup>20</sup> Classroom-embedded support is not required by state policy but is encouraged at the local level. There is TA available for the environmental rating scale and for the state assessment in recording anecdotal recording and observation.
- <sup>21</sup> All programs must provide a 40% match based on the amount provided by the state. The local match may be in-kind and not necessarily currency. In 2015-2016, the state received a one time \$1.5 million Cost-of-Living adjustment from the Governor's budget that was prorated per child.
- <sup>22</sup> The USDA/CACFP and NSLP do provide support for the ABC Program but the dollar amount being utilized is not known. ABC programs are in some Head Start Programs

and Head Start also coordinate services with the ABC programs, which is not financially tracked other than the funding provided through DCCECE. The same is true of IDEA in that the ABC children may receive additional services from IDEA but the dollar amount is not tracked separately.

<sup>23</sup> QUALLS Early Learning Inventory is the State Kindergarten Entry Assessment for "K." Each LEA can choose a tool for the ongoing assessment of children's learning and development. This will be changing in the upcoming year.

# **CALIFORNIA** - California State Preschool Program

- <sup>1</sup> Enrollment is from one point in time in October 2015. Cumulative enrollment during the 2015-2016 program year was 179,297.
- <sup>2</sup> Home language is missing for 504 children.
- <sup>3</sup> Data is only available on enrollment by agency with administrative and/or fiscal responsibility: There were 361 LEAs (public schools) that served 92,652 children; 26 other public agencies that served 3,293 children; and 257 private agencies that served 38,564 children. A total of 525 children are counted twice.
- <sup>4</sup> The part-day program is funded to operate at least three hours per day for a minimum of 175 days per year, unless the contract specifies a lower minimum of days of operation. The full-day program is funded to operate at least six hours per day for a minimum of 246 days per year unless the contract specifies a lower minimum days of operation.
- <sup>5</sup> A total of 207 children are included in both the part- and school-day counts.
- <sup>6</sup> California regulation allows Head Start to braid and blend funding. Partnerships with Head Start are determined locally.
- <sup>7</sup> Preschool age eligibility definitions for enrollment and reporting of children and families in a California State Preschool Program (CSPP) are: "Three-year-old children" are children who will have their third birthday on or before September 1 of the fiscal year they are being served. "Four-year-old children" are children who will have their third birthday on or before September 1 of the fiscal year they are being served. "Four-year-old children" are children who will have their fourth birthday on or before September 1 of the fiscal year they are being served. Children whose fifth birthday are on or between September 2 and December 2 of the fiscal year they are being served, are eligible for transitional kindergarten.
- <sup>8</sup> Family eligibility is established by one of the following: current aid recipient, income eligible, homeless, or has children who are recipients of protective services, or whose children have been identified as being abused, neglected, or exploited, or at-risk of being abused, neglected or exploited. A family is income-eligible when the family's adjusted monthly income is at or below 70% of the state median income, adjusted for family size, and adjusted annually. For part-day services children whose family's income is no more than 15% above the income eligibility threshold may be enrolled only after all eligible children are enrolled. No more than 10% of the children enrolled may be filled with families that are above this income eligibility threshold for part-day services.
- <sup>9</sup> CalWORKs cash-aided (TANF) families are excluded from paying the family fee. Children in Child Protective Services and those children at risk of being abused, neglected, or exploited may be excluded from family fee payment for up to 12 months.
- <sup>10</sup> Part-day CSPP services only require families to establish eligibility at time of enrollment. A family that enrolls in full-day care must continue to meet the family income criteria and need for care for school day programs to remain in the full-day program. However, if a family no longer meets the need criteria for full-day services they may remain in part-day services for the remainder of the school year based on the eligibility at enrollment.
- <sup>11</sup> Although there is no limit to class size, programs typically enroll 24 children in a class.
- <sup>12</sup> Contractors must provide meals and snacks that meet nutritional requirements specified by the federal CACFP or the National School Lunch Program. For the part-day program, one meal or snack is required. For the full-day program, one meal and two snacks or two meals and one snack are required, depending on hours of operation.
- <sup>13</sup> Other health screenings are determined locally. If screenings are not provided by parents, local programs must address them.
- <sup>14</sup> English Language Development is one of the domains of learning listed in our California Preschool Learning Foundations and Preschool Curriculum Framework. The California Preschool Program Guidelines also include a chapter dedicated to research-based practices to support dual language learners. Recruitment and enrollment materials are provided in the home language if 10% or more of the local population speaks a specific language other than English. Effective September 2013, the primary language in the home is reported by the parent at the time of eligibility determination. This information is collected by the California Department of Education (CDE). Children whose home language is not English are identified as a part of the child assessment system, Desired Results Developmental Profile (DRDP).
- <sup>15</sup> California does not recommend specific curricula or keep a list of recommended curricula. However, the three volumes of the California Preschool Curriculum Framework give guidance on best practices to implement whatever chosen curriculum a program uses.
- <sup>16</sup> The California Preschool Curriculum Framework, while not a curriculum, does provide guidance for implementing subject specific curricula in the areas of Social-Emotional Development, Language & Literacy, English Language Learners, Mathematics, Visual and Performing Arts, Physical Development, Health, History-Social Science, and Science.
- <sup>17</sup> The California Child Development Associate Teacher Permit is the minimum requirement for a teacher in a California State Preschool Program (CSPP) classroom and exceeds the requirement of the CDA. The permit requires 12 units in ECE or child development and 50 days of work experience in an instructional capacity. It may be renewed one time for a five-year period. A teacher may also have the full Child Development Teacher Permit, which requires a minimum of 40 semester units of education including a minimum of 24 units in ECE or child development, and 175 days of work experience, or a Master Teacher permit.
- <sup>18</sup> Assistant teachers in CSPP (both public and non-public employees) are required to have a high school diploma or equivalent. The optional Child Development Assistant Teacher Permit requires six credits in ECE or CD. The permit is issued for five years and is renewable for successive five-year periods upon completion of 105 hours of professional growth.
- <sup>19</sup> Funding totals represent unaudited expenditures as of October 2016. The fiscal year 2015-2016 budget provided a five percent increase and a one percent increase to the part-day rate to expand professional development activities for teachers and increase training for parents. Funding was also shifted so that all programs operated by LEAs are funded by only Proposition 98 education funding, resulting in a decrease in federal funding for the program.
- <sup>20</sup> Optional domains include Visual and performing arts (VPA), History, and Social Science.
- <sup>21</sup> While DRDP is the only required tool, locally many programs use several other assessments in addition to DRDP.
- <sup>22</sup> Although the General CSPP funding is not determined by the DRDP results, those programs who are participating in the CSPP QRIS block grants may receive additional points when they are rated and this may lead to additional funding at the local level.

# **CALIFORNIA** - California Transitional Kindergarten (TK)

- <sup>1</sup> Transitional Kindergarten (TK) is administered by California Education Code 48000(c).
- <sup>2</sup> When calculating the number of children eligible for Free and/or Reduced-Price Lunch, the California Department of Education (CDE) includes a socioeconomically disadvantaged filter which allows for a slightly broader number because it includes parent education level parents who did not graduate from high school.
- <sup>3</sup> TK programs operated by a district must be of equal length to any kindergarten programs operated by the same school site and/or district, unless there is an approved State Board of Education waiver on file.
- <sup>4</sup> It is locally determined whether students who turn 5-years-old during the school year and after December 2 may be admitted to TK at the beginning of the school year or at another point during the school year.
- <sup>5</sup> Local educational agencies (LEAs) are required to make available, free or at a reduced price, one nutritionally adequate meal to each needy student who qualifies according to specified family size and income standards every school day. California public LEAs are enrolled in the National School Lunch Program which assists schools and other agencies in providing nutritious lunches to children at reasonable prices.
- <sup>6</sup> The California Department of Health Care Services regulations allow for the health examination to be completed up to 18 months prior to entry into first grade or within 90 days thereafter. The screenings indicated are based on the first grade requirement, with the exception of the immunizations which are required before TK entry. The first grade screening also includes a nutritional assessment; blood, urine, and blood lead tests.
- <sup>7</sup> Some policies to support DLL/ELLs in TK (or kindergarten) programs are locally determined. The following instruction or programs are permitted or available with an approved waiver: Bilingual instruction in child's home language, dual language immersion programs, transitional bilingual programs.

- <sup>8</sup> CDE provides many statewide, in-person trainings, certifications, online modules, and engaging professional web sites for early childhood professionals. CDE professional resources are aligned to CA ELDS.
- <sup>9</sup> CA provides the following resource and training: TK Implementation Guide: http://www.cde.ca.gov/ci/gs/em/documents/tkguide.pdf#search=Tk%20implementation%20 guide&view=FitH&pagemode=none
- <sup>10</sup> The California Preschool Curriculum Framework and the TK Implementation Guide are used as guides for the California Learning Foundations. It is the intent that TK curricula are aligned with the California Preschool Learning Foundations.
- <sup>11</sup> A school district or charter school shall ensure that credentialed teachers who are first assigned to a TK classroom after July 1, 2015, have, by August 1, 2020, one of the following: (1) At least 24 units in early childhood education, or childhood development, or both; (2) As determined by the LEA employing the teacher, professional experience in a classroom setting with preschool-aged children that is comparable to the 24 units of education; or (3) A child development teacher permit issued by the Commission on Teacher Credentialing. Teachers hired prior to July 1, 2015 are required to have a teaching credential.
- <sup>12</sup> Title I paraprofessionals whose duties include instructional support must have: (1) High school diploma or the equivalent, and (2) Two years of college (48 units), or (3) AA degree (or higher), or (4) Pass a local assessment of knowledge and skills in assisting in instruction. Many districts use the California Basic Educational Skills Test for this purpose.
- <sup>13</sup> TK teachers and assistant teachers are on the same pay scale as public K-12 teachers and assistant teachers, respectively, which is locally determined. TK teachers work the same number of hours as K-3 teachers.
- <sup>14</sup> This data comes from the National Education Association (NEA) Research, Rankings and Estimates 2013, 2014, and 2015. It reflects the average salary for TK and K teachers who are on the same salary scale.
- <sup>15</sup> The need for ongoing classroom-embedded support is locally determined. The General Education Induction Consortium is an approved induction program to assist TK-12 beginning teachers, experienced teachers, and school site administrators to ensure beginning teacher success and retention through at least one hour per week of support and/or mentoring.
- <sup>16</sup> Total state funding for TK is an estimate.
- <sup>17</sup> TK is funded through the Local Control Funding Formula (LCFF) based on Average Daily Attendance (ADA) in the TK/K-3 grade span. The ADA in this grade span does not distinguish between ADA in grades TK/Kindergarten, 1, 2 or 3. Furthermore, the funds apportioned on the basis of ADA in the TK/K-3 grade span are not "dedicated" to serving TK students; they are general purpose funds apportioned to LEAs as part of their LCFF entitlement. LEAs can blend and braid federal sources to support TK.
- <sup>18</sup> The California Basic Educational Data System (CBEDS) is an annual data collection administered in October and reported through an Online Reporting Application to collect data about schools and districts, as well as some aggregate data on students and staff. LEAs may be selected for an on-site or online monitoring every two years. Several factors, including compliance history, academic achievement, program size, and fiscal analysis are considered in identifying LEAs for reviews. Using these established selection criteria, approximately 120 LEAs are selected each school year for on-site or online monitoring.
- <sup>19</sup> The American Institutes for Research (AIR) studied the impact of TK in CA on children's academic and social-emotional skills in kindergarten, and how these impacts are related to program quality characteristics. This study, however, did not measure child outcomes.
- <sup>20</sup> It is the intent of the CA Legislature that the TK curriculum be aligned to the California Preschool Learning Foundations developed by the CDE.
- <sup>21</sup> State policy does not require kindergarten programs to assess children's learning and development but the use of the Desired Results Developmental Profile (DRDP) is encouraged by the State department.

# **COLORADO** - Colorado Preschool Program

- <sup>1</sup> School districts can contract with community preschool sites in their district, as well as provide services in district classrooms. Colorado has 178 traditional school districts and 1 Charter School Institute, making a total of 179 school districts in the state.
- <sup>2</sup> District advisory councils are encouraged to blend Colorado Preschool Program (CPP) funding with other sources, such as Head Start, so that children can participate in full-day programs.
- <sup>3</sup> Enrollment by race does not equal the total enrollment because there is some overlap between the Biracial and Hispanic/Latino numbers.
- <sup>4</sup> The program is funded for five days per week, although the statute requires children attend four days per week or the equivalent, with the fifth day being funded for home visits, teacher planning time, completion of child assessments, or staff training. Programs may extend the hours and days beyond the minimum requirement of ten hours per week. These opportunities are determined locally and based on the needs of children and families. While district advisory councils are encouraged to blend CPP funding with other sources such as Head Start, child care subsidy, and parent tuition so that children can participate in full-day programs, enrollment by schedule is not collected. Half-day CPP funding requires 360 hours per year at a minimum and full-day CPP funding requires 720 hours per year at a minimum.
- <sup>5</sup> Under the early childhood councils, three school districts have waivers to serve children younger than age 3 in CPP. In 2015-2016, 363 children under age 3 participated in CPP. Under certain conditions, highly advanced, gifted children may be granted early entrance to kindergarten. There is no designated cut-off date for the maximum age a child could be served in preschool; this is locally determined. However, there is a state policy limiting children to two years of participation. A kindergarten-eligibility date is established by the local school board. Children must turn 5 by October 1 in order to be funded, so no school district establishes a cut-off date later than October 1. However, school districts may establish dates as early as June 1 for eligibility for kindergarten.
- <sup>6</sup> Income eligibility may be the sole factor or may be one of several eligibility factors. In some areas of the state where the cost of living is extremely high, district advisory councils have increased the eligibility to 200-225% of FPL. Locally determined risk factors that have been selected by the district advisory councils include: parent is incarcerated, parent is on active military duty, and developmental delay that raises concerns for school readiness but does not require special education services. Four-year-olds can qualify with one risk factor. Three-year-olds must have three or more risk factors.
- <sup>7</sup> Meals and nutritious snacks must be served at suitable intervals. Children who are in the program for more than four hours per day must be offered a meal that meets at least one-third of their daily nutritional needs.
- <sup>8</sup> Although not required, of the 175 districts serving CPP, 165 have hearing and vision screenings during their enrollment process.
- <sup>9</sup> CPP must meet the Colorado Department of Education Quality Standards for Early Childhood Services. This includes providing information in lay terms, in the family's native language, and through a variety of communication methods.
- <sup>10</sup> The Professional Development Information System (PDIS) is the statewide web-based system supporting professional development for Colorado's early childhood workforce. There is a training course on the Early Learning and Development Guidelines in PDIS.
- <sup>11</sup> There is no specific category for assistant teacher, but staff aides must meet Colorado Department of Human Services Licensing Requirements (at least 16 years of age with favorable background checks).
- <sup>12</sup> In the Colorado School Finance Formula, each preschool slot is funded at 0.5 FTE and provides for both a local and state share. Local school districts are required to contribute to their per-pupil revenue according to the school finance formula. This local share varies widely by school district.
- <sup>13</sup> District Advisory Councils use Colorado Quality Standards two times per year. Although not required, many districts serving CPP use ERS/ECERS and CLASS for classroom observations.
- <sup>14</sup> Each year, participating programs submit an annual report that is reviewed in depth. State staff use a rubric for review and feedback about these annual applications and reports. Programs also submit audited revenue and expenditures for district-level programs, documentation of family outcomes, longitudinal data on children's performance in statewide assessment in grades K-12, graduation rates, retention rates, and placement in special education in grades K-12. Programs are required to conduct self-assessments through Colorado Quality Standards or NAEYC Accreditation, but the state does not collect this data. Status and growth data are reported to the Colorado Legislature through an annual report provided at the commencement of the legislative session. Under Results Matter, the process for evaluating the program's effectiveness is ongoing and based on performance-based assessments, parent surveys, K-12 assessment data and retention rates, and program quality ratings. State policy required the use of an approved assessment system to measure child outcomes. In 2015-2016, all programs chose to use Teaching Strategies GOLD<sup>®</sup>.
- <sup>15</sup> Approaches Toward Learning is assessed through objectives embedded in other developmental domains in state-approved assessment tools.

- <sup>16</sup> While only one tool is currently approved, other tools are reviewed periodically and must meet certain requirements including online infrastructure, assessment of wholechild domains of learning and development, automated federal reporting, and well-defined objective progressions of development.
- <sup>17</sup> Additional information can be found in the CPP legislative report: http://www.cde.state.co.us/cpp/legreports.htm
- <sup>18</sup> One state law requires school readiness assessment at kindergarten entry only. Another law requires ongoing assessment of literacy skills for children identified with a significant reading deficiency. State policy requires the use of an approved assessment tool to measure school readiness at kindergarten entry. Approved kindergarten school readiness assessments include: GOLD<sup>®</sup> by Teaching Strategies, Riverside Early Assessment of Learning (REAL), and Desired Results Developmental Profile for Kindergarten (DRDP-K). In addition, state policy requires interim assessment for all kindergarteners in the area of literacy. Approved interim reading assessments include: Aimsweb; i-Ready; DIBELS Next; IDEL; FAST; ISIP ER Istation (English and Spanish); PALS (English and Spanish); and STAR. Approved diagnostic assessments include: i-Ready, PALS Marketplace Phonological Awareness (English and Spanish), STAR Early Literacy Assessments, NWEA-CPAA, PPVT, TVIP, VRMT-III, DIBELS Deep, Amplify Burst Reading Assessments, and Woodcock-Munoz LS. Approved optional summative assessments include i-Ready, NWEA-MPG, and Terra Nova.

# **CONNECTICUT** - Connecticut Child Day Care Contracts

- <sup>1</sup> Child Day Care Contracts (CDCC) are with individual contractors which by statute may be municipalities, human resource development agencies or nonprofit corporations. However, information about the location of Child Day Care Services is available by town. No towns are required to offer these services and the funds are currently distributed through purchase of service contracts.
- <sup>2</sup> There is no cut-off date for enrollment in CDCC. Enrollment numbers reflect the average enrollment for the months of October, November, and December 2015. A breakdown by age is not available for this program.
- <sup>3</sup> There are a total of 712 Preschool Development Grant spaces in Connecticut: there are 433 expansion spaces which are not included in enrollment totals for any of the three state-funded preschool programs in this report, and 279 are improved spaces, with 244 included in the School Readiness enrollment total and 35 included in the CDCC enrollment total.
- <sup>4</sup> All CDCC enrollment is in nonpublic schools, which may be Head Start, publicly operated programs or private programs.
- <sup>5</sup> CDCC programs are required to be in operation for 10 hours per day; however, individuals do not necessarily attend for the full amount of time. For those enrolled in part-day and wrap-around services, the total hours provided through both programs must total 10 hours.
- <sup>6</sup> Programs generally operate for 52 weeks a year; however, they are allowed up to 22 days of closure per year. Funding for this program is a combination of state and federal (SSBG) funds, with differing income thresholds for the two funding sources; therefore, it is not possible to break down how many hours per year were funded with state funds.
- <sup>7</sup> Children may enroll in preschool spaces funded by CDCC at any point of the year, however they must be at least 2 years, 9 months of age as required by licensing.
- <sup>8</sup> All children enrolled in CDCC must be below 75% SMI. Children funded by the federal Social Service Block Grant funds supporting this program must be from families at or below 200% FPL.
- <sup>9</sup> Programs are required to participate in CACFP, but can apply for a waiver due to financial hardships or lack of a facility.
- <sup>10</sup> Crosswalks were completed to document the alignment of the CT ELDS to the Next Generation Science Standards and CT's new Social Studies Framework. A crosswalk to document alignment with the Head Start Early Learning Outcomes Framework is in progress.
- <sup>11</sup> An assessment aligned to the CT ELDS is under development. This tool is being designed to facilitate a formative assessment process and to summarize child progress. This assessment will replace the one currently being used in CDCC. Currently, CDCC programs are required to meet NAEYC accreditation standards related to assessment practices.
- <sup>12</sup> On-going technical assistance is provided on a limited basis. Currently CDCC programs are required to meet NAEYC accreditation standards related to curricular practices.
- <sup>13</sup> The minimum requirement for lead teachers is a CDA plus 12 credits in early childhood, per licensing. In addition, CDCC programs are required to be Head Start approved or accredited by NAEYC and therefore need to meet the requirements for lead teachers defined in their accreditation/approval system.
- <sup>14</sup> Seventeen CDCC teachers have ECE teaching endorsements.
- <sup>15</sup> CDCC programs are required to be licensed, which requires professional development (PD) for staff that totals 1% of the total annual hours worked. Content may include, but is not limited to, early childhood education and child development, licensing and regulations, health issues, nutrition, first aid, social services, child abuse laws, and programming for children with disabilities or special health care needs. The programs are required to develop, implement, and maintain a written PD plan and to document and maintain the PD plan for each program staff member and make it available for review.
- <sup>16</sup> In state funds, \$18,786,146 was allocated for FY 2016; however, only \$17,387,750 of this funding was expended. An additional \$54,895 of state funds is dedicated to support children enrolled in Child Day Care PDG spaces who did not meet the federal enrollment guidelines.
- <sup>17</sup> State statute specifies that contractors may be municipalities, human resource development agencies or nonprofit corporations.
- <sup>18</sup> Any programs that are not yet NAEYC accredited or Head Start approved, or who have lost their accreditation or approval status, are required to have an ECERS completed annually.
- <sup>19</sup> Review of facilities and safety requirements (licensing) occurs annually and documentation of this status must be provided. CDCC programs submit monthly reports detailing children and families served. Documentation of program-level outcomes (NAEYC accreditation or Head Start approval) is required.
- <sup>20</sup> The CT Kindergarten Entrance Inventory was developed by the state for kindergarten teachers to provide a global rating of children across four areas of development.

#### **CONNECTICUT** - Connecticut School Readiness

- <sup>1</sup> Of the 67 communities, 20 are priority districts and 47 are competitive municipalities as defined by legislation. The 20 priority school districts are not required to participate in the School Readiness Program, but funds are available to all eligible districts.
- <sup>2</sup> There is no cut-off date for enrollment in the School Readiness Program. Enrollment numbers reflect the enrollment for the month of May 2016, and an age breakdown is not available.
- <sup>3</sup> There are a total of 712 Preschool Development Grant spaces in Connecticut: there are 433 expansion spaces which are not included in enrollment totals for any of the three state-funded preschool programs in this report, and 279 are improved spaces, with 244 included in the School Readiness enrollment total and 35 included in the CDCC enrollment total.
- <sup>4</sup> The hours of operation are locally determined. Program options include: 6-hour pre-K funded school-day with before and after care provided by individual grantees; 6-hour pre-K funded school-day with before and after care provided but paid for by families; School Readiness/Head Start blend; Wraparound; or Home-based.
- <sup>5</sup> Operating schedules are locally determined and hours vary by program. Extended-day programs operate 10 hours per day, 50 weeks per year, while school-day programs operate 6 hours per day, 180 days per year. Part-day programs operate 2.5 hours per day, 180 days per year. Funding from another source can be used to extend programs.
- <sup>6</sup> As defined by legislation, communities may allow a small number of kindergarten-eligible children to remain in the program (up to 5% of the total served) if the child has been enrolled in the School Readiness program for one year and if the parent or guardian, School Readiness provider, and the local or regional school district agree that the child will not enter kindergarten.
- <sup>7</sup> All families, regardless of income levels, can apply for School Readiness spaces in Competitive and Priority municipalities. However, 60% of the children enrolled in each municipality must meet the income requirement of being at or below 75% of state median income.
- <sup>8</sup> All children remain eligible for the program but the fee is reassessed annually and residency is verified (although a School Readiness Council does have the local option whether to accept non-residents). Parent fees can change depending on a change of income and/or family size. Programs work with families to keep children enrolled.
- 9 Programs are required to serve one snack to children who attend fewer than 5 hours per day and one snack plus one meal to children in school for 5 to 8 hours per day.

Children attending more than 8 hours per day must be provided one snack and two meals or two snacks and one meal. Either the program or the parent may provide the food.

- <sup>10</sup> Programs are not required to conduct screenings, but they are required to refer children who may need to be screened. This includes: vision, hearing, height/weight/BMI, blood pressure, immunizations, psychosocial/behavioral, dental, developmental, full physical exam.
- <sup>11</sup> Crosswalks were completed to document the alignment of the CT ELDS to the Next Generation Science Standards and CT's new Social Studies Framework. A crosswalk to document alignment with the Head Start Early Learning Outcomes Framework is in progress.
- <sup>12</sup> An assessment aligned to the CT ELDS is under development. This tool is being designed to facilitate a formative assessment process and to summarize child progress.
   <sup>13</sup> Ongoing technical assistance is provided on a limited basis.
- <sup>14</sup> Programs must meet either NAEYC or Head Start requirements for assistant teachers.
- <sup>15</sup> Public school lead teachers that are certified by the Department of Education are required to have annual PD plans. For those who are not certified, it is a local decision.
- <sup>16</sup> Individual sites may receive federal USDA CACFP funding but specific information is not collected.
- <sup>17</sup> The funding level is based on previous year's space capacity and local requests for proposals addressing ability to increase capacity.
- <sup>18</sup> Programs not yet NAEYC accredited or Head Start approved are required to have an ECERS completed annually for up to three years until accreditation is achieved.
- <sup>19</sup> Licensed programs are required to have health and a safety inspection annually. School Readiness programs are required to be observed quarterly by the School Readiness Liaison. Programs are required to submit monthly reports regarding utilization revenue, income, health and special education services.
- <sup>20</sup> All programs that are not accredited by NAEYC or Head Start approved are required to be evaluated using the CT School Readiness Preschool Program Evaluation System (CSRPPES) which is completed collaboratively by the School Readiness Liaison, the program director, and a School Readiness Parent.
- <sup>21</sup> There is no policy regarding how the pre-K assessment data is used. Communities have been known to use this data to guide teacher training and professional development, make decisions about kindergarten enrollment, to adjust curricula and track child and program outcomes over time.
- <sup>22</sup> The Connecticut Kindergarten Entrance Inventory requires teachers to provide a global rating of children in each of four areas of development.

#### **CONNECTICUT** - Connecticut Smart Start

- <sup>1</sup> Only local or regional boards of education are eligible to apply for Smart Start program funds.
- <sup>2</sup> There is no cut-off date for enrollment in the Smart Start Program. The enrollment total is based upon an average of enrollment for the months of October, November and December 2015. Aggregate enrollment information is collected and not separated by 3- and 4-year olds.
- <sup>3</sup> The percentage of children with an IEP in a Smart Start classroom must meet or exceed the percentage of K-12 students enrolled in special education in the district in order for it to receive Smart Start funding. A local or regional board of education must treat children with and without IEPs equally with regard to enrollment in Smart Start. Data cannot be disaggregated into 3- and 4-year-olds.
- <sup>4</sup> Sites are required to report information on either eligibility for free and reduced-price lunch or if a family is below 75% SMI, and some report both. Smart Start averaged 39% enrollment of children eligible for Free and Reduced Lunch and 53% at or below 75% SMI, these are unduplicated percentages.
- <sup>5</sup> Smart Start programs must operate the same number of days as the rest of the school system, which is a minimum of 180 days/year.
- <sup>6</sup> Regarding the minimum age for preschool eligibility, children age 2 years and 9 months may attend, but it is locally determined if they can start prior to their 3rd birthday.
- <sup>7</sup> Districts may prioritize enrollment based on local need.
- <sup>8</sup> It is a local decision whether to charge tuition, however if the district chooses to charge tuition, they must use the Office of Early Childhood (OEC) Sliding Fee Scale.
- <sup>9</sup> Smart Start does not require comprehensive services, but local School Districts provide a variety of services unique to their communities.
- <sup>10</sup> Crosswalks were completed to document the alignment of the CT ELDS to the Next Generation Science Standards and CT's new Social Studies Framework. A crosswalk to document alignment with the Head Start Early Learning Outcomes Framework is in progress.
- <sup>11</sup> An assessment aligned to the CT ELDS is under development. This tool is being designed to facilitate a formative assessment process and to summarize child progress. <sup>12</sup> Ongoing technical assistance is provided on a limited basis.
- <sup>13</sup> The State Department of Education certification, which must include pre-K or early childhood specialization, is required for all Smart Start teachers.
- <sup>14</sup> Thirty-nine lead teachers have ECE teaching endorsements.
- <sup>15</sup> Based on local bargaining decisions, Smart Start teachers are paid the same as K-12 teachers in the LEA by which they are employed.
- <sup>16</sup> Professional development is locally determined. Lead Teachers are certified by the State Department of Education (SDE) and must meet SDE professional learning requirements and professional learning plans.
- <sup>17</sup> Any programs that are not yet NAEYC accredited or Head Start approved are required to have an ECERS completed annually.
- <sup>18</sup> The Connecticut Kindergarten Entrance Inventory requires teachers to provide a global rating of children in each of four areas of development.

# **DELAWARE** - Delaware Early Childhood Assistance Program (ECAP)

- <sup>1</sup> The Office of Early Learning and the Early Development and Learning Resources Workgroup merged in 2015 into one branch within the Department of Education called the Office of Early Learning.
- <sup>2</sup> ECAP serves all three of Delaware's counties: New Castle County, Kent County, and Sussex County.
- <sup>3</sup> ECAPs can apply for a waiver to meet the 10% enrollment of children with disabilities requirement per the federal Head Start Program Performance Standards.
- <sup>4</sup> Programs are required to provide a minimum of 3.5 hours of services per day. Schedule requirements are indicated by the Head Start Program Performance Standards and Delaware's QRIS requirements. Programs that operate longer than 3.5 hours per day have funding from multiple sources to support the additional service hours. Some ECAP programs align with school district schedules. Some programs use state subsidy (Purchase of Care) dollars to extend the program day for children. Programs operate for at least 9 months but do not necessarily follow the school district calendar. The program year for state-funded ECAPs extends from July 1 to June 30th of the following year; programs determine operating schedules within this program year. Schedule requirements are indicated by the Head Start performance standards.
- <sup>5</sup> There is no state policy on exceptions to the age requirement for kindergarten entry, this is a local school district decision
- <sup>6</sup> ECAP children must meet the federal Head Start Program Performance Standards eligibility guidelines. Ten percent of available slots must be provided for children with disabilities; programs can apply for waivers to this requirement. Effective as of 2007, 35% of enrollment may be children whose family incomes are between 100% and 130% FPL after priority is given to children at or below 100% FPL.
- <sup>7</sup> As per the federal Head Start Program Performance Standards, each program establishes selection criteria annually based on community needs identified in its community needs assessment.
- <sup>8</sup> ECAPs follow the requirements for screenings per the federal Head Start Program Performance Standards. All screenings are conducted within the first 45 calendar days of the program year. Screening procedures are locally determined.
- <sup>9</sup> ECAPs follow the federal Head Start Program Performance Standards for serving DLL children. Some of the ECAP sites are participating in the WIDA projects for DLL.
- <sup>10</sup> Curriculum decision-making and implementation is guided by Delaware Stars for Early Success, Delaware's Quality Rating and Improvement System. All ECAPs are a Star 4 or 5, and thus follow curricula guidelines for a Stars Level 4 or 5 center.
- <sup>11</sup> ECAPs' approved curriculum list also includes Core Knowledge, DLM Early Learning Express, Family Child Care, Funshine Express, Investigators Club, Mother Goose

Time, and Scholastic.

- <sup>12</sup> For a nonpublic school lead teacher, federal Head Start Program Performance Standards require at least an associate degree in early childhood education or in a related field in addition to coursework equivalent to a major relating to early childhood education and experience teaching preschool-age children.
- <sup>13</sup> Assistant teachers in public schools are most likely paraprofessionals, which requires an associate degree, high school diploma or equivalent, or a qualifying score on the Para Pro assessment. For nonpublic school assistant teachers, federal Head Start Program Performance Standards require that he or she must have at least a CDA, be enrolled in a program leading to an associate or baccalaureate degree, or be enrolled in a CDA program to be completed within 2 years.
- <sup>14</sup> ECAPs participate in Delaware Stars for Early Success, the state QRIS system. Structured observations of classroom quality are done in accordance with the QRIS.

# DISTRICT OF COLUMBIA - D.C. Public Pre-K

- <sup>1</sup> An additional 22 pre-K programs are run out of community-based organizations (CBO).
- <sup>2</sup> All elementary schools in the District of Columbia Public Schools (DCPS) and Public Charter School offer pre-K for age-eligible students. Additionally, the pre-K grant is available to highly-qualified community-based organizations that are awarded funds through a competitive grant process. D.C. Public Charter Schools that are approved by way of their charters to provide pre-K may offer it to all age-eligible students who are D.C. residents.
- <sup>3</sup> Head Start programs are offered in public schools and private child care centers. These schools and centers serve children who are funded by Head Start, as well as children not funded by Head Start. In order to provide unduplicated counts, children are not listed as being served in Head Start.
- <sup>4</sup> All DCPS Title I-eligible Pre-K classrooms incorporate Head Start services through a "blended" classroom model, where federal Head Start and local pre-K funding is combined to offer a more comprehensive education for at-risk children.
- <sup>5</sup> A small number of LEAs may use later cutoff dates.
- <sup>6</sup> All students in D.C. Public Pre-K must be residents of the District of Columbia.
- <sup>7</sup> Ratios and group size requirements are only applicable to DCPS and CBOs.
- <sup>8</sup> As a result of D.C.'s Healthy Tots Act, all DC Public Pre-K programs are required to follow CACFP dietary guidelines as identified by the USDA.
- <sup>9</sup> Psychosocial/behavioral and developmental screenings are required within 45 days of enrollment for CBOs and DCPS Title I schools with public pre-K. Health exams are provided directly in some, but not all, programs. All students must have a completed DC Universal Health Certificate, completed by the health provider, and must verify screenings for vision, hearing, health, dental, language/speech, developmental/behavioral, height/weight/BMI, and completion of immunizations.
- <sup>10</sup> If children are screened positive for developmental delays, CBOs and DCPS (along with some charter schools) make referrals to the Early Stages DC program.
- <sup>11</sup> CBOs and DCPS Title I schools with pre-K programs are required to provide comprehensive services.
- <sup>12</sup> All D.C. Public Pre-K students are assessed using DC's ELL assessment, ACCESS for ELLs 2.0, except those in CBOs (policy is not applicable to CBOs).
- <sup>13</sup> Child assessments are required to align with approved pre-K curriculum models in DCPS and the CBO sector. These curriculum models, in turn, are aligned with ELDS.
- <sup>14</sup> Frog Street, Core Knowledge and Houghton Mifflin Pre-K are also pre-approved by the Office of the State Superintendent of Education (OSSE) for use by pre-K programs in the CBO sector.
- <sup>15</sup> D.C. provides pre-K programming through three sectors: D.C. Public Schools (DCPS), Public Charter Schools (PCS), and in community-based organizations (CBO). Each sector has different teacher requirements. In DCPS and CBOs, lead teachers must have a Bachelor's degree. The District gives Public Charter Schools the authority to establish their own requirements for teacher education and credentials.
- <sup>16</sup> Assistant teachers in DCPS and CBOs are required to have at least an associate degree. OSSE does not mandate specific credentials for assistant teachers at PCS schools.
- <sup>17</sup> While there are health and safety training requirements for CBOs that participate in the Pre-K Enhancement Program, they are not in terms of credit or clock hours.
- <sup>18</sup> D.C.'s Uniform Per-Student Spending Formula (UPSFF) links program funding to student enrollment. Each year, the District sets a "foundation level" of funding for each student. To the foundation are added various amounts (called "weightings") for students at certain grade levels, or with certain characteristics.
- <sup>19</sup> The District requires that children enrolled in a CBO pre-K program be assessed using a curriculum-aligned tool at least three times during the program year. These programs provide assessment results for each child to OSSE. Pre-K programs from all three sectors (DCPS, PCS and CBO) are assessed on an annual basis using the CLASS Pre-K tool. Only CBO programs participate in D.C.'s QRIS. Likewise, only CBO programs receive site visits from child care licensing specialists and monitors for D.C.'s child care subsidy program.
- <sup>20</sup> For pre-K CBOs, child assessment tools are required to be aligned with the curriculum selected by pre-K programs. These curricula include all of the child development domains mentioned (e.g. literacy, math, science, etc.). Programs are required to conduct a developmental screening within 45 days of enrollment that includes assessments of social and emotional development.
- <sup>21</sup> In School Year 2015-2016, D.C. administered the Early Development Instrument (EDI) in Pre-K-4 classrooms across the city. A total of 4,423 4-year-olds were assessed using the EDI. Across D.C.'s neighborhoods, 73% of Pre-K-4 children were "ready" for school -- in other words, they did not show vulnerability in any of the five developmental domains measured by the EDI (physical health and well-being; social competence; emotional maturity; communication skills and general knowledge; cognitive and language development).

# FLORIDA - Florida Voluntary Prekindergarten Program

- <sup>1</sup> These state agencies shared responsibility for the implementation of the program in the 2013-2014 program year. Each agency was assigned responsibilities that align with their statutory functions.
- <sup>2</sup> All school districts are required to offer the 300-hour VPK program during the summer.
- <sup>3</sup> Participation in the VPK program is projected to follow Florida's 4-year-old population rate, anticipating a 1% growth in future years.
- <sup>4</sup> In Florida, faith-based centers are a subset of private child care centers. Students may move between provider types. In addition, there may be overlap between the school-year and summer program enrollment. The Florida Office of Early Learning exercises administrative rules that allow re-enrollment for certain hardships that may allow a child who had attended some portion of the school year program to enroll for summer in some circumstances.
- <sup>5</sup> Minimum operating hours are 540 hours for the school-year program (most programs operate 3 hours per day, 5 days per week) and 300 hours for the summer program (most programs operate 8 hours per day, 5 days per week). Providers are allowed to determine their individual calendars in order to meet those requirements. Specialized Instructional Services programs offer reimbursement for services to children with disabilities for whom a traditional VPK program may not be appropriate. The funding for these specialized services for children with disabilities is equal to that for children in traditional school-year or summer VPK program and is used in lieu of attending a traditional VPK program. The school-year program cannot start earlier than two weeks before Labor Day, or before the first day of school according to the local school district calendar, and must end by June 30. The summer program may run between May 1 and the beginning of the next public school year. Most school-year programs operate on a 180-day calendar. Most summer programs operate on a two-month calendar.
- <sup>6</sup> Children must be 4 years old on or before September 1 to attend VPK. If a child's birthday falls between February 2 and September 1, parents can decide to postpone their child's enrollment in VPK until the following year.
- <sup>7</sup> State policy permits exceptions to the age requirement for kindergarten only. A student who transfers from an out-of-state nonpublic school and does not meet regular age requirements for admission to Florida public school, may be admitted if he or she meets the age requirements for the public schools in the state from which he/she is transferring. Any student who transfers from an out-of-state public school, and who does not meet regular age requirements for admission to Florida public schools, will be admitted to kindergarten or first grade when certain data are presented, based on each district's pupil progression plan.
- <sup>8</sup> Child care providers are required to have a plan of scheduled daily activities, which includes meals and snacks as appropriate for the age and the times the children are in care. Meals and snacks are required for extended-day programs.
- <sup>9</sup> All children participating in programs in licensed child care facilities or public schools must have evidence of vision, hearing, and immunization/general physical health screenings. Referrals for follow-up are recommended by the health professional. For public school programs, referrals for further follow-up are required.

- <sup>10</sup> The Florida Department of Education has the authority to grant Good Cause Exemptions (waivers) from performance requirements for specific populations, which may include children with disabilities and English language learners. To be eligible for a Good Cause Exemption, the provider must demonstrate learning gains, adherence to an improvement plan, and high health and safety standards.
- <sup>11</sup> The standards are aligned to the kindergarten Florida Standards.
- $^{\mbox{\tiny 12}}$  These curricula are approved for VPK programs on probation.
- <sup>13</sup> Lead teachers in the summer program must have a Bachelor's degree or higher in: Early Childhood Education, prekindergarten or primary education, preschool education, family and consumer science, or teacher certification in any area. Lead teachers in the school-year program are required to have a CDA or equivalent, plus specified training about performance standards and emergent literacy training. VPK requires lead teachers, whether working in public or nonpublic school settings, to maintain a valid CDA or the Florida Child Care Professional Credential (FCCPC) equivalent as a minimum credential for the school-year program. A CDA or FCCPC must be renewed every five years. Training in specified performance standards and emergent literacy is also required for school year teachers. Lead teachers in the summer program must have a Bachelor's degree in a specified major and/or teacher certification. All child care personnel in licensed facilities must complete a minimum of 10 clock hours of in-service training.
- <sup>14</sup> Assistant teachers do not have to meet any degree requirements, but must complete a 40-hour training course for those employed at licensed child care facilities. This training course is offered by DCF. Additionally, VPK providers on probation completing the Staff Development Plan as a part of their improvement plan are required to have directors, VPK instructors, and VPK assistants complete several additional trainings.
- <sup>15</sup> Funding is appropriated using estimated population counts and the base student allocations.
- <sup>16</sup> Other community programs that may help implement the parent outreach component of 4K and approved licensed or certified professionals who provide specialized instructional services for children with disabilities can also be subcontracted with.
- <sup>17</sup> Early Learning Coalitions monitor staff credentials and provide guidance to coalitions on elements for program monitoring. There is no requirement that each provider receive a site visit at least once during a specified period. Rather, the site visits are determined by random sample except where follow-up is needed due to technical assistance or corrective action plan follow-up. Each early learning coalition is responsible for the onsite monitoring of VPK providers and for monthly attendance records reviews. The coalition monitors a sample of VPK providers on an annual basis.
- <sup>18</sup> The Florida Kindergarten Readiness Screener (FLKRS), composed of FAIR and ECHOS assessments, is administered annually to all kindergarteners in public schools and to all available kindergarteners attending nonpublic schools as a state assessment by the Department of Education. Results of children participating in VPK are compared to those who have not participated in the program. Florida's VPK program is reviewed annually as part of the legislative appropriation process using the Florida Voluntary Prekindergarten (VPK) Assessment.

# **GEORGIA** - Georgia's Pre-K Program

- <sup>1</sup> Georgia has a separate state agency governing services for children birth to age five and their families. Bright from the Start: Georgia Department of Early Care and Learning (DECAL) administers Georgia's Pre-K Program.
- <sup>2</sup> Children must be 4-years-old by September 1st of the school year they are attending Georgia's Pre-K program. Five-year-olds can participate in the program if they did not previously attend Georgia's Pre-K Program or if specific approval is given. The exact number of 5-year-olds is unknown; however, eligible 5-year-olds served are included in the enrollment total.
- <sup>3</sup> Georgia's Pre-K Program does not collect data on how many children qualify for free and/or reduced lunch. There were 42,839 children who qualified for Category One child eligibility. This is defined as the child's and/or family's participation in one of the following programs: SNAP, SSI, Medicaid, TANF, CAPS (child care subsidy).
- <sup>4</sup> DECAL offers a Rising Kindergarten Summer Transition Program. This program is offered through a competitive grant process. The grant funds a six-week program which supports children's early literacy skills throughout the last few months prior to kindergarten. The program is targeted for low-income families. To be eligible, children must be age eligible for kindergarten and did not attend either Georgia's Pre-K Program or Head Start during the prior school year. During the 2015-2016 school year DECAL served 2,048 students in 128 classrooms. The staff to child ratio for the Rising Kindergarten program is 1:8.
- <sup>5</sup> DECAL partners with child care centers and Head Start programs to offer before- and after-care services. DECAL also partners with Childcare and Parent Services (CAPS) to provide funding to families who need before- and after-care.
- <sup>6</sup> The maximum class size and teacher-to-student ratio were changed as of the 2011-2012 school year, as a result of budget constraints, and will continue at least until the 2016-2017 school year.
- <sup>7</sup> All programs are required to serve lunch, but if a program participates in the Child and Adult Care Food Program (CACFP) then the program is required to also serve a snack during the pre-K day.
- <sup>8</sup> Blended Georgia Pre-K Program/Head Start classrooms are required to have developmental screenings as well. All of Georgia's Pre-K programs are required to ask parents if a child has received his/her developmental health screening and provide a referral and appropriate follow-up to those children who have not. Children who are eligible for Medicaid or PeachCare, Georgia's State Children's Health Insurance Program (SCHIP) are required to have a 4-year-old full physical exam. Georgia's Pre-K Program providers work with families regarding follow up on any areas of concern related to screenings.
- <sup>9</sup> Additional comprehensive services are offered in the Summer Transition Program (STP). Each STP site is funded for a Transition Coach to work with families.
- <sup>10</sup> DECAL offers a Rising Pre-K (RPK) Summer Transition Program which is targeted to low-income families whose children must be age eligible for Georgia's Pre-K Program in the upcoming school year. The RPK program is focused on children whose home language is Spanish. The instruction in these classrooms is taught in both English and Spanish. Classrooms are staffed with bilingual staff. During the 2015-2016 summer, DECAL served 588 children in 42 classrooms. The staff to child ratio for the RPK is 1:7.
- <sup>11</sup> DECAL provides a website (www.gelds.decal.ga.gov) which includes resources for families, teachers, and providers on the ELD. PEACH is a newly developed interactive website (www.peach.decal.ga.gov) that provides ELD aligned activities for teachers to use.
- <sup>12</sup> DECAL completes a full curriculum review every three to five years to identify curriculum models that best support Georgia's Pre-K Program. DECAL's approved curriculum list also includes: Alpha Skills Pre-K, Beyond Centers and Circle Time, Big Day for Pre-K, CORE Knowledge, DIG, Frog Street, Galileo, Investigator Club, We Can, and Wings.
- <sup>13</sup> Lead teachers must have a minimum of a Bachelor's degree in Early Childhood Education or a related specified field (i.e., Child Development). Lead teachers who were approved in the 2009-2010 school year with an ECE Associate Degree will be considered approved as long as they continue employment as a pre-K lead teacher with the same company. Many teachers have an advanced degree beyond a BA; 124 teachers have their Specialist and 8 teachers have their Doctorate.
- <sup>14</sup> A CDA is the minimum requirement for assistant teachers in Georgia's Pre-K Program, though public school systems may require a higher credential.
- <sup>15</sup> Pre-K teachers in both public and private settings have the same starting salary as K-3 teachers if they hold the state certification. DECAL provides two types of salaries for lead teachers. The starting salary for a certified lead teacher is \$34,740. The starting salary for a lead teacher with a four-year degree is \$24,740.
- <sup>16</sup> DECAL offers a minimum of 15 clock hours of training each year to all Georgia's Pre-K lead and assistant teachers. Training is customized for the participants based on their lead or assistant teacher role. Orientation training for all new employees in a child care center includes six hours of health and safety training. This is in addition to their required pre-K training for the year. DECAL also provides coaching to a group of teachers on the Instructional Support Domain of the CLASS observational tool. Teachers receive pre- and post-CLASS observations and training is provided in between.
- <sup>17</sup> Coaches observe each teacher monthly. They conference with the teacher on the same day to identify and discuss the effective interactions from the Instructional Support domain of the CLASS observational tool. The number of teachers assigned to a coach can vary depending on the type of coaching model being implemented.
- <sup>18</sup> Georgia's Pre-K Program is supported by the state lottery dollars; the total amount for 2015-2016 is \$313,062,469. The Summer Transition Program is supported by state and federal dollars. The total amount for 2015-2016 is \$4,886,933 of which \$1,398,400 is state dollars and \$3,488,533 is federal dollars.
- <sup>19</sup> How often a classroom is observed is impacted by the professional development model in which the class/teacher is participating.

# HAWAII - Hawaii Executive Office on Early Learning Public Prekindergarten Program

<sup>1</sup> The Executive Office on Early Learning (EOEL) is administratively attached to the Hawaii Department of Education (DOE).

- <sup>2</sup> Hawaii is unique in that it is comprised of one school district.
- <sup>3</sup> Enrollment numbers are from the spring of 2016 as they better represent enrollment for 2015-2016 than fall 2015 counts.
- <sup>4</sup> Although there is no minimum requirement specifically stated in statute, the understanding is that the publicly funded pre-K program will run on the same calendar and schedule as the DOE public elementary school in which the classrooms are housed. This is the equivalent of 30.5 hours per week.
- <sup>5</sup> Priority is given to families meeting the income requirement. However, if a school offering an EOEL Prekindergarten is unable to fill all spaces, the income requirement may be waived and the spaces can be offered to families who do not meet the income requirements.
- <sup>6</sup> Breakfast is offered before the start of the school day for a fee (unless the student qualifies for free or reduced-price meals).
- <sup>7</sup> In order for a child to register and enroll in the EOEL Prekindergarten Program, which is offered on DOE public school campuses, he/she must have completed a physical exam which includes vision, hearing screening, height/weight, blood pressure, required immunizations, and a TB test.
- <sup>8</sup> Parent conferences are offered to all families who have children in DOE schools, which includes pre-K. While transition to kindergarten activities is not a requirement, most DOE schools offer support (determined by individual schools) to students entering kindergarten across the state. Home visits are not required and are done on a voluntary basis by teachers who choose to implement this practice.
- <sup>9</sup> Teaching Strategies Gold is aligned with the Hawaii Early Learning and Development Standards.
- <sup>10</sup> This does not meet the NIEER quality standard benchmark because the AA is not required to be in ECE or a related field.
- <sup>11</sup> Although there is no state requirement, the union contract requires 21 hours of teacher in-service professional development. All teachers are required to be in the union. The union contract is negotiated with the state. For EOEL Prekindergarten teachers, at least 60 hours of professional development in Early Childhood Education are offered to teachers per year in addition to the required 21 hours.
- <sup>12</sup> The frequency of coaching and mentoring is dependent upon the skill of the individual teacher and assistant teacher based on self-reporting as well as the CLASS assessment. Experienced teachers may receive coaching and/or mentoring 1-2 times a month while those needing more support may receive coaching/mentoring 1-2 times per week.

#### **ILLINOIS** - Illinois Preschool for All

- <sup>1</sup> Children from all counties participate. However, funding does not allow for services to be provided to all children whose parents want them to attend.
- <sup>2</sup> There is not a formal partnership but child care centers are eligible recipients of Preschool for All (PFA) funding and provide wraparound services for the children in PFA who are also in their centers.
- <sup>3</sup> A child must be 3 years old to enroll in preschool. If a child turns 3 after September 1, he/she may enroll in PFA after turning 3 if there is space in the class. School districts may enroll children in kindergarten before they are age 5 based on local policy.
- <sup>4</sup> Low income is one of the risk factors taken into account in determining program eligibility. Programs use an eligibility form that consists of weighted criteria based on risk factors. Programs serve those children most in need in the community determined by those exhibiting the most at-risk factors.
- <sup>5</sup> Vision and hearing screenings must be conducted annually for preschool-age children by technicians or nurses trained and certified by the Illinois Department of Public Health. Evidence of completing the physical exam and immunizations must be provided by October 15. Programs work with parents to ensure children receive dental examinations but there is no state requirement to report on dental examinations until kindergarten.
- <sup>6</sup> Additional information regarding policies to support DLLs/ELLs can be found at: http://www.isbe.net/bilingual/pdfs/preschool\_faq.pdf and http://www.isbe.net/earlychi/ preschool/preschool\_ell.htm.
- <sup>7</sup> ExceleRate Illinois, the Quality Recognition and Improvement System, provides additional information about child assessment and a list of assessments that are aligned with the Illinois Early Learning and Development Standards (IELDS). Additional information can be found at: http://www.excelerateillinoisproviders.com/resources/ resources-by-standard?id=51. The Illinois Early Learning Project provides resources, tip sheets, benchmark videos, etc.: (http://www.illinoisearlylearning.org/).
- <sup>8</sup> Ninety-six percent of the PFA programs are using Creative Curriculum. ExceleRate Illinois provides additional information about curriculum and a list of curricula that are aligned with the IELDS (http://www.excelerateillinoisproviders.com/resources/resources-by-standard?id=48%20).
- <sup>9</sup> Lead teachers are required to have a professional Educator License with early childhood endorsement. The lead teacher may also need a special education endorsement and/or bilingual/English as a second language endorsement depending on the children in the classroom.
- <sup>10</sup> These numbers are not mutually exclusive.
- <sup>11</sup> The teacher assistant in the classroom must hold an Educator License with stipulations endorsed for paraprofessional educator. To be eligible, an individual must be at least 20 years of age and hold a high school diploma or its recognized equivalent (GED) and meet one of the following requirements: (a) Holds an associate degree (or higher) from a regionally accredited institution of higher education, (b) Completed at least 60 semester hours of credit from a regionally accredited institution of higher education, (c) Presents an official score report from Educational Testing Service (ETS) showing a score of 460 or higher on the ParaPro test, or (d) Presents evidence of earning the following scores on the Work Keys test: Reading for Information (4), Writing or Business Writing (3), and Applied Mathematics (4).
- <sup>12</sup> Salaries for teachers in a public school are generally determined by a union contract. There are no state or district policies requiring salary, benefit, or paid planning or professional development time for lead or assistant teachers. However, 98.8% of school districts have union contracts. Therefore, most preschool teachers in public school settings in practice do have salary parity with other public school teachers.
- <sup>13</sup> Assistant teachers must work under the direct supervision of a licensed teacher.
- <sup>14</sup> Each program must have staff development assessment procedures and ongoing professional development activities that demonstrate how the results of the assessment were used to inform the program's staff development.
- <sup>15</sup> Coaching is provided to teachers in PFA classrooms based on the monitoring report for that PFA program. However, coaching is not required by state policy.
- <sup>16</sup> Preschool for All is funded through the Early Childhood Block Grant, which constitutes the state funding for PFA. The total allocation for the Early Childhood Block Grant was \$314,238,100 and PFA funding was \$246,729,910. Other Early Childhood Block Grant funding included: Prevention Initiative for Birth to Age 3 Years (\$62,664,138) and Infrastructure/Administration (\$4,844,052).
- <sup>17</sup> Additional monitoring includes annual health, life, safety inspection of school buildings. Child care centers must meet licensing requirements. All PFA programs are required to participate in ExceleRate Illinois, the state's Quality Recognition and Improvement System. All programs have a rating that is renewed after each monitoring visit. In addition to the ECERS or CLASS, assessors use a compliance checklist. Compliance reviews examine teacher certification, use of a research-based screening tool, research-based curriculum, kindergarten transition planning, community collaboration plan, and meeting requirements for serving homeless children and ELL students.
- <sup>18</sup> Sixty-one percent of PFA programs use Teaching Strategies GOLD and 28% use Work Sampling. The state does not require a specific assessment tool and pre-K assessment tools are determined locally. Each program must use a research-based authentic assessment system that aligns with the curriculum and documents children's progress over time with measurable outcomes. The Illinois State Board of Education is developing and implementing a comprehensive kindergarten assessment process that was piloted in the 2012-2013 school year. The second phase pilot implementation in 2013-2014 doubled the number of school districts participating. Statewide implementation is planned for the 2017-2018 school year. The Desired Results Developmental Profile-School Readiness (DRDP-SR) is being adapted, piloted, field tested, and calibrated for the Illinois Kindergarten Individual Development Survey (KIDS).
- <sup>19</sup> KIDS was adapted from the DRDP-SR. It has been piloted, field tested, and calibrated. Fourteen measures have been identified for state reports. In school year 2017-2018, all schools must report to the state on those 14 measures for all kindergarten students.

# INDIANA - On My Way Pre-K

- <sup>1</sup> Statute requires Indiana Department of Education involvement in the administration of On My Way Pre-K. Additionally, prior to implementation, the State Board of Education must review and comment on the provision of the program.
- <sup>2</sup> Indiana code limited the program to include eligible providers in not more than five counties. Allen, Jackson, Lake, Marion and Vanderburgh counties were selected out

of a total of 18 who completed an assessment based on county readiness and need.

- <sup>3</sup> On My Way Pre-K eligibility, set by Indiana code, limits enrollment to children at least four years of age and less than five years of age on August 1 of the state fiscal year for which the grant is sought. One of the pilot counties, Marion, has also created the Indy Preschool Scholarship Program (PSP) by an Indianapolis City Council ordinance. Indy PSP provides funding to serve additional Marion County children predominantly at age 3 but also some additional children at age 4 whose families earn less than 127% FPL. Indy PSP also provides the required matching funds for Marion County. FSSA, United Way of Central Indiana, and the Indianapolis Mayor's Office worked closely together to streamline services for children, families and providers by creating alignment across the eligibility requirements for providers and families, use of a shared data system, shared Intake Agents, joint family/provider applications and collaborative efforts for family outreach and capacity building. Those children are not included in the enrollment totals.
- <sup>4</sup> Some children enrolled in On My Way Pre-K receive special education services while enrolled in the program but this data is not collected.
- <sup>5</sup> Head Start programs participate in On My Way Pre-K and 113 children were dually enrolled in Head Start and the state preschool program. However, it is unknown if Head Start dollars are used to support these children. Programs may decide how to blend funds or provide half-day Head Start and half-day On My Way Pre-K to support the individual family's needs, with total reimbursement not to exceed the cost of providing such services.
- <sup>6</sup> The sum of enrollment by race exceeds the total number of children enrolled because some report more than one race.
- <sup>7</sup> Public schools must meet eligibility requirements according to Indiana code by meeting requirements of Level 3 or Level 4 in Paths to QUALITY, Indiana's QRIS.
- <sup>8</sup> Families have a choice of full-day or part-day, as well as calendar-year or school-year. Programs can set their schedules individually and may choose to operate on either a school- or calendar-year schedule, as long as the total operating hours and days reaches the minimum required amount. On My Way does not have a minimum number of hours per day requirement; however, the program requires a minimum number of program hours per year (450) and a minimum number of days per year (114) in order to determine program reimbursement. For a program to meet the minimum requirements for both hours and days per year, the program would need to run at least four hours per day. Programs are reimbursed based on the total hours of pre-k services offered. Children may be counted multiple times in the enrollment by operating schedule numbers if they attend a provider whose schedule is of varying hours of length throughout the week.
- <sup>9</sup> A formal partnership is not in place; however, many programs in public schools, CCDF, and Head Start are layering funding to provide full-day, full-year services as appropriate, with total reimbursement not to exceed the cost of providing such services.
- <sup>10</sup> Indiana Code limits an eligible child to an individual who is at least 4 years of age and less than 5 years of age on August 1 of the state fiscal year for which a grant is sought. A child that does not meet the August 1 deadline and will attend kindergarten the following year may be allowed to enroll in pre-K if signed documentation on school letterhead is received stating that the child will be allowed to enroll in kindergarten the following year. This is sometimes allowed for children whose birthday falls within the first week of August.
- <sup>11</sup> Age-eligible children must reside in one of the approved pilot counties to be eligible to receive a grant and be a member of a household with an annual income that does not exceed 127% FPL. Eligibility was also determined by a randomized, computerized lottery as family applications exceeded the funds made available for grants.
- <sup>12</sup> Programs must provide nutritious meals and snacks at appropriate times. Part-day programs are required to provide a snack. Full-day programs provide meals according to licensing requirements.
- <sup>13</sup> Programs are required to have immunization records and current physicals on file for all children. However, no screenings are required.
- <sup>14</sup> Programs may choose their classroom options. There are no state requirements concerning DLL/ELL within the state funded pre-K program.
- <sup>15</sup> Indiana's Early Learning Guidelines are in alignment with the K-12 standards. The required assessment for On My Way Pre-K, Indiana Standards Tool for Alternate Reporting of Kindergarten Readiness (ISTAR-KR), is aligned with the ELDS. ISTAR-KR is aligned to the Indiana Standards for kindergarten in the areas of English/Language Arts and Mathematics and includes three functional areas: physical, personal care, and social-emotional skills. Programs receive technical support and coaching from the QRIS coaches to support ELDS
- <sup>16</sup> Targeted assistance grants were awarded to 41 programs in 2015-2016 to provide curriculum and implementation of a curriculum. The state did not provide support in decision making of choice of curriculum.
- <sup>17</sup> Educational requirements are based on requirements of the QRIS Paths to QUALITY<sup>TM</sup>. Program eligibility is Level 3 or 4. Requirements for Level 3 are that 50% of staff has a CDA, equivalent, or higher. Level 4 requires accreditation and programs must meet an approved accrediting body's education or degree requirements. QRIS standards may be found at http://childcareindiana.org.
- <sup>18</sup> There is not a requirement for a specific number of hours in health and safety for 2015-2016 but hours should be continuing education approved by the division and related to the age appropriate educational development, care, and safety of children. Also, to meet the requirements of the federal Child Care and Development Block Grant Act of 2014, health and safety pre-service or orientation training for lead teachers and assistant teachers in this state-funded preschool program is required.
- <sup>19</sup> Coaches are available to all enrolled Paths to QUALITY<sup>TM</sup> programs on an as-needed basis. State Licensing Consultants are also available to programs to provide assistance. Programs are assigned to coaches, not individual teachers and there are not state requirements as to the number of programs assigned a coach. Coaches are employees of entities under contract with the state and caseloads are addressed within that scope of work.
- <sup>20</sup> Programs are assessed with a state-developed assessment as part of QRIS, Paths to QUALITY™.
- <sup>21</sup> Purdue University has been selected to evaluate classroom quality and the improvement of school readiness and academic outcomes through 3rd grade of children receiving a grant. Structured observations are also completed by the Paths to QUALITY<sup>TM</sup> raters yearly.
- <sup>22</sup> Program evaluation is ongoing. Programs must be highly rated on Paths to QUALITYT<sup>M</sup>. The Office of Early Childhood and Out of School Learning (OECOSL) of the Indiana Family and Social Services Administration contracted with Purdue University to conduct an evaluation of Indiana's On My Way Pre-K. This evaluation is designed to inform stakeholders on program quality and growth of children's skills, as well as address the effectiveness of the pre-K program in improving children's school readiness, children's early school performance, and parents' school engagement. Evaluators will also examine the impact of part-day vs. full-day and part-year vs. full-year programming on children's learning outcomes.
- <sup>23</sup> The purpose of ISTAR-KR is to measure skills in children from infancy to kindergarten. This web-based instrument is rated by teachers based on their ongoing observations of children engaged in typical daily routines and activities. It is available to all public schools in Indiana and to private early childhood education programs at no cost. Assessment results from ISTAR-KR can be used to determine which skills a child has mastered and to identify the skills a student needs to learn next. This assessment is required to be administered within six weeks of beginning and ending the program, but encouraged as needed throughout the year to inform practice.

# **IOWA** - Iowa Shared Visions

- <sup>1</sup> There are 32 grants held within these 22 school districts. Additionally, there are 16 other organizations (including Head Start programs and licensed non-profit child care centers) which provide services through a total of 35 grants/locations.
- <sup>2</sup> The total enrollment numbers reflect children supported by the Shared Visions Preschool grant dollars and enrolled as of the third Friday in September of the grant year.
- <sup>3</sup> Of the 223 children in Shared Visions receiving special education services, 84 children were identified after enrollment in the program.
- <sup>4</sup> There were 510 children enrolled in a Shared Visions program where the awarded grantee was a Head Start program. It is unknown how many additional children attended a part-day Shared Visions program and spent the remainder of the day in a Head Start program. Additional children enrolled in Shared Visions are also enrolled in Head Start but the number is unknown. Program designs include dually enrolled, part-day of each program, and state preschool with Head Start as wrap-around.
- <sup>5</sup> All program operating schedules are determined locally and are to be based on community need in the application process. There is no minimum number of hours required for the Shared Visions program.
- <sup>6</sup> In the 2015-2016 school year, some Shared Visions programs blended with the Statewide Voluntary Preschool Program (SWVPP) and/or Head Start programs to increase hours in order to meet the needs of children and families. SWVPP funds may be used to provide school- or extended-day services to children if the program meets NAEYC standards and adds at least 10 hours of instruction per week by an early childhood endorsed teacher. The daily and annual operating schedules are described as part of the competitive grant application process and address identified needs within the community.
- <sup>7</sup> Kindergarten-age eligible children who meet these other criteria may only enroll in Shared Visions if they meet eligibility criteria for income and/or other risk factors.
- <sup>8</sup> A minimum of 80% of funded slots must be filled by children whose families are at or below 130% FPL. No more than 20% of funded slots may be filled by children who

are over income but meet certain other risk factors.

- <sup>9</sup> There must be at least one risk factor present for eligibility. Children who are not eligible based on income may enroll provided they are served on a sliding-fee schedule determined at the local level and are eligible according to one or more of the other eligibility criteria. Additional locally determined risk factors also considered include: parent is incarcerated, parent is illiterate, parent is chronically mentally ill, and other special circumstances which may be interpreted by the local program. Teen parent is defined as under the age of 18.
- <sup>10</sup> In accordance with NAEYC Standards and Accreditation Criteria, mixed-age classrooms with 3- and 4-year-olds must not exceed a maximum group size of 18.
- <sup>11</sup> The specific meals offered depend on the hours of operation but are required by NAEYC criteria. Programs must serve a meal and ensure a second meal is served if children are still in attendance at least two hours later but no more than three hours later. Depending on whether children attend for a full-day or part-day, as well as if the hours attended are in the morning or afternoon, will determine if breakfast, lunch and/or snack(s) are offered.
- <sup>12</sup> Dental screenings are locally determined, but required as part of the full physical exam for 3-year-old children per routine screening schedule from American Academy of Pediatrics (AAP). Shared Visions program standards require following the AAP schedule. Screenings are typically conducted prior to enrollment but children may enroll if not yet conducted as long as proof of appointment can be provided. Full physical exams include routine screenings as outlined by AAP.
- <sup>13</sup> Title III does not apply to pre-K. If state policy is silent on supports for DLLs, it does not restrict a district from providing these services or engaging in these practices, and therefore these policies are locally determined. Data is not collected by the state in order to determine which locally determined services and practices are in place. Program standards state that assessments and some program/classroom practices are to be sensitive to and informed by children's home languages. The home language survey is sent home at the beginning of the school year in public schools and Head Start, but is a local decision for other public, non-profit agencies.
- <sup>14</sup> During 2015-2016, materials were made available to districts, including the preschool grade-level, to support instruction at the universal tier level. Additionally, detailed guidance related to assessment is provided, a state-sponsored training was conducted in 2015-2016, and information was offered on assessment and curriculum.
- <sup>15</sup> All teachers employed by nonpublic schools must have a minimum of an AA or equivalent, and at least 75% of teachers must also have a minimum of a BA in ECE, CD, Elementary Education, or Early Childhood Special Education, and this training must include the development and learning of children birth through kindergarten. Lead teachers in nonpublic settings follow NAEYC standards, which increased in 2015 to require a minimum of an AA in ECE or CD. If there is only one classroom, the lead teacher must have a minimum of an AA and be working towards a BA. When there is more than one classroom, some teachers will be required to have a BA and some may have an AA. Lead teachers in Shared Visions classrooms that are blended with SWVPP are required to have an early childhood endorsement as part of their teaching license and meet the SWVPP requirements.
- <sup>16</sup> All programs must follow NAEYC requirements to have assistant teachers with a minimum of a high school diploma. At least 50% of assistant teachers must have a CDA or equivalent and 100% of those without the CDA or equivalent must be working toward that qualification. An equivalent to the CDA is defined as a minimum of 12 college credits (semester hours) in ECE, CD, Elementary Education, or Early Childhood Special Education that encompass the following: child development and learning of children birth through kindergarten; family and community relationships; observing, documenting, and assessing young children; teaching and learning; and professional practices and development.
- <sup>17</sup> There are explicit salary requirements for state funded pre-K teachers in public schools. School districts determine the salary schedule for percent increases based on experience. There are no salary requirements for teachers in nonpublic settings.
- <sup>18</sup> Per program standards, initial orientation and training of staff members must include health, safety and emergency procedures. All program staff must receive professional development (PD) in curriculum, assessment, working with diverse families, child development, and working with children with special needs per requirements of program standards. Staff members (regardless of location) with a teaching license must renew their license every five years, including six credit hours of PD. Program standards also require each staff member to have an individualized annual staff development plan but the number of hours is not specified in these requirements. Nonpublic settings must be licensed by the Department of Human Services and require 6 clock hours of PD annually.
- <sup>19</sup> Program standards require that all teaching staff: evaluate and improve their own performance based on ongoing reflection and feedback from supervisors, peers and families; add to their knowledge and increase their ability to put knowledge into practice; and develop an annual individualized professional development plan with their supervisor and use it to inform their continuous professional development.
- <sup>20</sup> Program standards state that mentoring, coaching, and professional development must be included in a program's professional development plan, but it is locally developed.
- <sup>21</sup> There is an annual state appropriation which funds programming for at-risk populations. Part of this appropriation is dedicated to the Shared Visions preschool program. The state source amount reported is the portion of the annual appropriation for preschool. The total appropriation is \$12,606,196.
- <sup>22</sup> Review of facilities and safety requirements occurs through licensing site visits by DHS every two years (in nonpublic settings and licensed public settings) as well as every five years through NAEYC site visits. Review of program records occurs at the beginning and end of the year. A survey was sent out to collect information about professional development plans and further needs within programs.
- <sup>23</sup> The state is currently contracting with the University of Iowa to conduct a program evaluation to be completed by the end of this grant year. The purpose of the planned evaluation is to collect baseline data for years 1 and 2 of the grant cycle (2015-2016 and some of 2016-2017). This data will be used for program improvement in years 3-5 of the grant cycle. Additionally, information on professional development and support needs of teaching staff and information on the utilization of the required state assessment will be collected. A staff survey will be conducted and data from various sources will be utilized (annual reports, applications, assessment data, etc.).
- <sup>24</sup> Teaching Strategies GOLD is required, Individual Growth and Developmental Indicators (IGDIs) is optional. Documentation for science and technology, social studies, and the arts objectives in GOLD is not required based on guidance in Iowa GOLD Procedures.
- <sup>25</sup> State law requires an approved literacy screening assessment by October 1 for kindergartners so districts may address additional supports needed to help children be proficient in literacy by the end of third grade. Most districts use FAST (Formative Assessment System for Teachers); however, districts may use any screener that is state approved for this grade level.

# IOWA - Iowa Statewide Voluntary Preschool Program

- <sup>1</sup> School districts may partner with Head Start and/or community-based preschools. The school district remains responsible for program and fiscal monitoring. Funds flow from the school district to community partners.
- <sup>2</sup> The total enrollment is an unduplicated count for the children enrolled in the Statewide Voluntary Preschool Program (SWVPP). Not all of these children receive the 0.5 funding for SWVPP as some children are supported with state special education funds or other sources of funding.
- <sup>3</sup> A total of 282 four-year-olds had support-only IEPs and were eligible for the 0.5 funding for SWVPP. There were 976 children with instructional IEPs who were supported by state special education funding.
- <sup>4</sup> Children in the SWVPP may participate in both state-funded preschool and Head Start (dually enrolled); however, information about the ages and numbers of children dually enrolled is not collected systematically. The information provided was collected from Head Start directors of Iowa grantees and it should be considered an estimate based on interview.
- <sup>5</sup> Community partners often do not request that families apply for free and/or reduced-price lunch. This information is also often not available from districts as families sometimes refuse to provide this information if children do not attend SWVPP during meal times. Therefore, these numbers may underestimate the number of children enrolled in SWVPP who qualify for free and/or reduced- price lunch.
- <sup>6</sup> Data totals for ethnicity and race do not include 5-year-old children (eligible for K) who are served in the SWVPP.
- <sup>7</sup> All programs are under the auspices of the school district. Community partners such as Head Start, state-accredited nonpublic schools, licensed child care/preschools, and community-based preschool/child care also serve children. The number of children enrolled by location is based on preliminary data from Fall 2015 and should be considered estimates, particularly for Head Start locations.
- <sup>8</sup> Programs operate a minimum of 10 hours per week; the average is about 14 hours per week. Almost all programs operate at least three days per week; most operate four to five days per week. Although there is not a formal state partnership to provide extended-day services, partnerships with Head Start may exist at the local level to provide school-day programming.
- <sup>9</sup> State funding is not provided based on a minimum number of hours annually. State funding is provided based on meeting SWVPP assurances which include providing

a minimum of 10 instructional hours weekly. An estimate is provided for minimum number of hours per year that may be offered based on a 180-day calendar year, accounting for five days to complete required home visits. Many programs offer more than the minimum required weekly hours.

- <sup>10</sup> Children who are age-eligible for kindergarten may enroll in the pre-K program if space and funding are available. Pre-k funding may not be used to support participation of children who are age-eligible for kindergarten. Kindergarten age-eligible students may generate the full 1.0 funding if they are provided additional hours comparable with part-time kindergarten and are working on the lowa Core in the pre-K classrooms.
- <sup>11</sup> All age-eligible lowa children may enroll in any participating district. Enrollment is not dependent on the district of residence.
- <sup>12</sup> Programs are only required to offer a snack, although it is recommended that they serve a meal. If the program operates more than 15 hours per week, a meal is served. The majority of programs provide lunch or breakfast to children who qualify for free or reduced-price meals.
- <sup>13</sup> Record of physical exam within six weeks of enrollment is required based on program standards and criteria. The Iowa Department of Public Health Administrative Code requires that immunizations be current prior to enrollment. Program standards and criteria provide guidance for appropriate referral practices in the event that a child has a positive screen.
- <sup>14</sup> Title III does not apply to pre-K. If state policy is silent on supports for DLLs it does not restrict a district from providing these services or engaging in these practices, and therefore these policies are locally determined. Data is not collected by the state in order to determine which locally determined services and practices are in place. Program standards state that assessments are to be sensitive to and informed by children's home languages. A home language survey is required.
- <sup>15</sup> Training for curricula adopted by programs is determined locally, but may occur by the local program, intermediate agencies (e.g., Area Education Agencies--AEAs-in lowa), and/or vendors. Existing funds may be used to support professional development of SWVPP staff in the area of curriculum; additional funds are not provided specifically for this purpose.
- <sup>16</sup> During 2015-2016, materials were made available to districts, including the preschool grade-level, to support instruction at the universal tier level.
- <sup>17</sup> All teachers in the SWVPP have a BA, an lowa teaching license, and the early childhood endorsement. Appropriate endorsements in lowa include prekindergarten through grade three, including special education; prekindergarten through kindergarten; and prekindergarten through grade three. All lead teachers must hold one of these endorsements. A teacher who holds only an early childhood special education license is not appropriately licensed/endorsed.
- <sup>18</sup> Requirements depend on the overseeing agency. Some classrooms follow lowa program standards, others NAEYC, and others Head Start. For lowa standards, classroom assistants may choose the lowa paraeducator certificate with early childhood or CDA. If they choose the lowa paraeducator certificate they must enroll in the classes and complete them within a year. A paraeducator certificate is required in Title I schools. If the program operates under NAEYC, annual reports and onsite monitoring require evidence that 50% of assistant teachers have a CDA and the rest are working toward a CDA. NAEYC defines an equivalent to the CDA as 12 college credits in ECE fields. In addition, assistant teachers participate in orientation prior to, or at the beginning of, employment.
- <sup>19</sup> There are explicit salary requirements for state-funded pre-K teachers in public schools. There is a minimum starting salary of \$33,500 for lead teachers in public settings. School districts determine the salary schedule for percent increases based on experience. There are no salary requirements for SWVPP teachers in Head Start or other community-based settings. Assistant teacher salary and benefit information is determined locally.
- <sup>20</sup> Districts make available to any SWVPP teacher who is not employed by the district staff professional development that the district offers to the district's personnel to maintain the skills appropriate to the teacher's role. Career development for school district preschool teachers shall be addressed in the school district's career development plan implemented in accordance with Iowa Code section 284.6. The school district shall ensure that program staff members are provided appropriate staff development in early childhood education.
- <sup>21</sup> State policy requires professional development but does not specify hours. Guidance recommends that SWVPP teachers have 15 clock hours of professional development each year. State policy and guidance does not specify a number of hours of professional development annually required for teacher assistants but does require that teacher assistants receive appropriate professional development in early childhood education. Each staff member should have an individualized professional development plan that is used to inform continuous professional development.
- <sup>22</sup> Total state funding was \$73,282,654 plus additional special education funding. Pre-K students who are 4 years old by September 15 are funded at 50% of the K-12 student aid. The preschool budget enrollment is equal to 50% of the actual enrollment of eligible students participating in the program. Preschool foundation aid is calculated by multiplying the district cost per pupil for the base year times the district's preschool budget enrollment.
- <sup>23</sup> Iowa flows funding directly to public schools. Public schools may subcontract 95% of the per-child allocation to Head Start, private preschool/child care centers and/or accredited nonpublic schools. The state does not support religious instruction during the 10 hours per week.
- <sup>24</sup> Classrooms in districts (and their community partners) that are newly implementing the SWVPP are visited in their second year of implementation. In addition, districts or community partners that are newly implementing the Iowa Quality Preschool Program Standards receive site visits in their second year of implementation. Programs also receive visits at least each year by AEA staff.
- <sup>25</sup> Iowa Code requires all district sponsored classrooms and SWVPP community partner classrooms to use Teaching Strategies GOLD online. Review of facilities and safety requirements are included in onsite monitoring and AEA visits; facilities that are DHS licensed would also be monitored by DHS licensing consultants. QRIS levels are currently reviewed every 2 years; however, QRIS participation is voluntary. For those programs receiving onsite visits, review of program records is included. All districts are required to report compliance information which the Department of Education cross checked with student reporting and teacher licensure.
- <sup>26</sup> Teaching Strategies GOLD is required, Individual Growth and Developmental Indicators (IGDIs) is optional. Documentation for science and technology, social studies, and the arts objectives in Teaching Strategies GOLD is not required based on guidance in Iowa Teaching Strategies GOLD Procedures.
- <sup>27</sup> Classroom observations use the Iowa Quality Preschool Program Standards and Criteria. There are 172 criteria within 10 Program Standards. Data presented reflect the percent of criteria met within each program standard for the nine school districts and their community partners that were visited during the 2015-2016 school year. Program Standard 1: Relationships, 91%; Program Standard 2: Curriculum, 90%; Program Standard 3: Teaching, 87%; Program Standard 4: Assessment of Child Progress, 78%; Program Standard 5: Health, 89%; Program Standard 6: Teachers, 76%; Program Standard 7: Families, 99%; Program Standard 8: Community Relationships, 100%; Program Standard 9: Physical Environment, 87%; Program Standard 10: Leadership and Management, 89%.
- <sup>28</sup> State law requires an approved literacy screening assessment by October 1 for kindergartners so districts may address additional supports needed to help children be proficient in literacy by the end of third grade. Most districts use FAST (Formative Assessment System for Teachers); however, districts may use any screener that is state approved for this grade level.

# KANSAS - Kansas Preschool Program

- <sup>1</sup> Programs must provide 465 hours per year of education. The actual schedule is determined at the local level, with most programs operating approximately three hours per day, five days per week, but some programs operate four days per week.
- <sup>2</sup> At least 50% of children enrolled must meet one of the risk factors, which include eligibility for free or reduced-price lunch. Priority for enrollment includes low parent education, non-English-speaking family, teen parent, parent on active military duty, single parent families, referrals of at-risk 4-year-olds from early childhood programs, developmentally or academically delayed based on assessments, and social rehabilitation services referral. Eligibility for the other 50% of children is based on the local program's discretion.
- <sup>3</sup> Other screenings may be conducted, but these are locally determined.
- <sup>4</sup> Selection of curriculum is a local decision, but the State Education Agency (SEA) does provide support for aligning curriculum according to the standards.
- <sup>5</sup> KELI-4 is administered two times per year. MyIGDI is administered three times per year.

#### KANSAS - Kansas State Pre-Kindergarten Program

- <sup>1</sup> A total of 181 districts were selected to participate in this program. The districts remained the same for the 2015-2016 school year.
- <sup>2</sup> Three-year-olds are enrolled in Pre-K, but they cannot be disaggregated as part of State Pre-Kindergarten Program (At-Risk Pre-K) versus other types of Pre-K programs.
- <sup>1</sup> For classes with 21 to 25 students, a third teacher must be added. This additional teacher can be an assistant teacher.
- <sup>4</sup> The Early Childhood Special Education program has a curriculum list, and many Pre-K programs are blended and use the same tools.

# **KENTUCKY** - Kentucky Preschool Program

<sup>1</sup> Children with disabilities are eligible for preschool services on or after their 3rd birthday.

- <sup>2</sup> Home language is reported by district and is currently not broken out by age. Next to Spanish the other most frequently spoken languages are Arabic, Burmese, and Bosnian.
- <sup>3</sup> Income eligibility, which only applies to 4-year-olds, is based on 160% FPL.
- <sup>4</sup> Race and ethnicity enrollment breakdowns do not match the total enrollment because the data were extracted from the system at different times. In addition, when there are fewer than 10 children in a grouping, those numbers are not reported to protect the privacy of those children.
- <sup>5</sup> Kentucky's database system does not specify if classrooms are physically located in a public school building or Head Start facility. A total of 46 out of 173 districts are fully blended with Head Start and the children could be served in a public school or in a Head Start building. Another 24 districts partially blend with Head Start, meaning that some of the classrooms could have both preschool and Head Start children.
- <sup>6</sup> The Kentucky Preschool Program (KPP) is required to serve children for at least 2.5 hours per day plus a meal which usually totals at least three hours. There are 1,033 part-day programs and 506 full-day programs.
- <sup>7</sup> Standard program operation is four to five days per week. Other schedules must be approved by the Kentucky Board of Education. Districts may use one of the weekdays for home visits, parent education, special education evaluations, and other work related to providing comprehensive preschool services.
- <sup>8</sup> The preschool program is required to follow the school year. However, because of the comprehensive nature of the program, school districts are permitted to have the children begin later and end the school year earlier than the other children in the district so that the teachers can complete the family components such as home visits and screenings.
- <sup>9</sup> Some IEPs for kindergarten children with severe disabilities specify that they may attend the preschool program under certain circumstances. The Admissions and Release Committee (ARC) decides the best placement for children with special needs. If the best placement for a 5-year-old child with disabilities is the preschool program and there is space available, the child is placed there but still coded as a first-year primary student (kindergarten). No preschool funds may be used to support this child.
- <sup>10</sup> Four-year-old children whose family income is up to 160% FPL are eligible to attend the preschool program. Children who have an identified disability may enroll on their third birthday or whenever they are identified. Eligibility based on homelessness and foster care applies to 4-year-olds. Homeless children are categorically eligible as free-lunch eligible.
- <sup>11</sup> If space is available, districts may charge tuition to non-eligible children. Some districts offer a sliding scale payment which is based on annual gross income and family size. Tuition children are not counted in enrollment figures as they are ineligible for KPP funding.
- <sup>12</sup> The school districts are required to serve breakfast or lunch for a half-day program. Full-day programs serve both breakfast and lunch.
- <sup>13</sup> A vision exam is required by January 1 of the year of enrollment by a qualified specialist. Districts are required to contact parents/legal guardians if any screening results indicate a need for further assessment by a specialist, follow-up, or referral for special education and related services or other appropriate resources.
- <sup>14</sup> Two home visits are required each year. Also, the preschool program has access to Family Resource Centers (FRCs) for support services and referrals. For districts that blend with Head Start, additional services may be available to state-funded students.
- <sup>15</sup> The preschool program does not have direct access to Title III funds and English Language services begin in kindergarten. However, schools may have access to the Title III coordinator or staff in the district for support and resources. According to the preschool regulation, there must be staff and program resources reflecting the racial and ethnic population of the children in the program and child assessments used are expected to consider the cultural background of the children.
- <sup>16</sup> KDE provides a list of assessments that are aligned with the ELDS. In addition, the Kentucky's common kindergarten entry screener must be aligned with the state's definition of school readiness and the state's early childhood standards
- <sup>17</sup> The Early Learning Leadership Networks (ELLNs) provided leadership, service and support to school districts with implementation of assessments and standards, focusing on math, English Language Arts, and science standards.
- <sup>18</sup> Technical Assistance includes the use of higher education faculty who were provided stipends for their time.
- <sup>19</sup> Curriculum decisions are made locally by school districts. However, curriculums must be developmentally appropriate, relevant and reflective of students needs, and integrate a variety of skills into activities that are targeted toward the interests of children. Support for making decisions about curriculum is provided to districts by the Kentucky Department of Education (KDE) and Regional Training Centers (RTCs).
- <sup>20</sup> The Interdisciplinary Early Childhood Education (IECE) certification, birth to primary (kindergarten), is the unified special and general education certification for Kentucky early childhood teachers.
- <sup>21</sup> Out of a total of 991 lead teachers, 754 (76%) had the IECE certification, 132 (13%) were exempted from holding this certification (hired with a bachelor's degree prior to 2004, or probationary or emergency certified) and another 105 (11%) were exempt (hired prior to 2014) and hold an associate's degree or Child Development Associate.
- <sup>22</sup> In Title I schools, assistant teachers must complete two years of higher education, hold an associate's degree or achieve an acceptable score on the Kentucky Paraeducator Assessment (KPA). Kentucky is still reviewing the possibility of recognizing the CDA as equivalent to the KPA for Title I qualification. All preschool assistant teachers are required to have 18 clock hours of training each year.
- <sup>23</sup> Teacher salary parity requirements went into effect in 2004 after the certification requirements for preschool teachers went into effect.
- <sup>24</sup> The pay scale of assistant teachers is a locally controlled decision made by school districts and nonpublic schools.
- <sup>25</sup> Lead teachers who are employed by public schools receive paid planning time and are required to have four days of professional development each year, the same as the other certified teachers (K-12). Assistant teachers employed by public schools are required to have professional development, but not paid planning time, which is a decision left to the district.
- <sup>26</sup> Kentucky follows the Danielson Framework in promoting teacher professional growth and development, for more information about Kentucky's Professional Growth and Effectiveness System (PGES): http://education.ky.gov/TEACHERS/PGES/Pages/PGES.aspx; and the Preschool PGES guidance: http://education.ky.gov/teachers/PGES/ TPGES/Documents/TPGES%20Guidance%20for%20Preschool.pdf.
- <sup>27</sup> State funds are appropriated to school districts through a non-competitive allotment system approved by the Kentucky Board of Education. This typically represents the highest portion of funding districts spend on preschool. However, most districts use local funds to support the program. In 2015-2016, the state legislature allocated \$90 million, but the programs spent \$92.6 million. The state-funded preschool formula is an average number of eligible children served on December 1 and March 1 of the prior academic year. The final award amount is achieved by multiplying the per-child rates for each eligibility category (e.g., at-risk, speech, developmental delay, severe) by the average number of students per category. There is a standard rate for the at-risk, speech, and developmental delay categories. There is a weighted rate for 3- and 4-year-old children with severe disabilities.
- <sup>28</sup> The KPP evaluates local program quality through the Preschool Program Review (P2R) process. Every district receives a visit from a KDE site visit team once every five years, or a visit from the Regional Training Center (contractor with KDE) to conduct an ECERS-R observation. Additionally, 14 school districts are randomly selected to participate in a Consolidated Monitoring (CM) site visit. During this CM process each district receives a site visit from a KDE team that includes one or more preschool team members. After the CM visit, the district receives individual program reports (preschool, Title I, etc.), a consolidated monitoring report, and follow up technical assistance. The CM report includes collective strengths and concerns noted by individual program reviewers across the entire school district. Districts participating in the CM process are not exempt from the five year P2R schedule of ECERS-R site visits. In addition to using the ECERS-R, all pre-K classroom teachers are observed annually using the Danielson Framework. Data from the observation is used to create an improvement plan.
- <sup>29</sup> Preschool programs migrated into Kentucky All STARS, the state's QRIS, with a level 3 rating in July 2016.
- <sup>30</sup> The preschool program was included in a third-party evaluation conducted by the University of Kentucky entitled the Early Care and Education Final Report 2012-2014. One finding of the study suggests that students attending preschool demonstrated higher gains in language and literacy by end of kindergarten than children who did not attend preschool.
- <sup>31</sup> Districts may choose one of five approved assessment tools for preschool: the AEPS, Carolina Curriculum, Teaching Strategies GOLD, COR Advantage (High/Scope), and WSS. See: http://www.kedsonline.org/preschoolhome.aspx
- <sup>32</sup> A winter assessment is limited to students enrolling mid-term or whose assessment data were not available.

<sup>33</sup> Schools must administer the Brigance K to all students at kindergarten entry. Schools must assess K-3 students formatively in reading and math, but assessment choices are locally determined.

# LOUISIANA - Louisiana 8(g) Student Enhancement Block Grant

- <sup>1</sup> Districts receive an allocation and they determine whether to use the funds for the pre-K focus area.
- <sup>2</sup> Many schools offer before- and after-school programs, but the state does not track or subsidize this activity.
- <sup>3</sup> Primarily, priority is given to students who qualify for free or reduced-price lunch. However, if all income-eligible children are otherwise served, additional students may also be served if they are screened and deemed "developmentally unprepared." After this, a decision could be made locally to serve a student with one of the aforementioned risk factors.
- <sup>4</sup> All meals and snacks must meet USDA/CACFP guidelines.
- <sup>5</sup> This program strongly encourages vision and hearing screenings.
- <sup>6</sup> School programs with large ELL populations perform screenings and assessment on a local level and address each child's needs individually.
- <sup>7</sup> The Board of Elementary and Secondary Education (BESE) approved the new Birth to Five Early Learning and Development Standards in April 2013. Some schools chose to implement immediately; full implementation occurred in the 2013-2014 school year.
- <sup>8</sup> Programs must assess students using Teaching Strategies GOLD or another state-approved assessment tool.
- <sup>9</sup> Collaborative sessions are conducted several times a year to support programs in implementation of assessment, observations, and ELDS utilization.
- <sup>10</sup> In Louisiana, all districts are able to purchase instructional materials that are best for their local communities. The Louisiana Department of Education led an online review of instructional materials to determine the degree of alignment with state content standards to support districts with these decisions.
- <sup>11</sup> Effective June 1, 2002, Louisiana issued a Pre-K–3 license, instead of standalone Nursery School and Kindergarten licenses. A teacher with an elementary certification may be employed while working toward an approved early childhood certification within a maximum of three years.
- <sup>12</sup> All paraprofessionals/teacher assistants must meet LEA specific requirements for employment and one of the following requirements: Meet the definition of "highly qualified," which may include passing the ParaPro test, achievement of a CDA or AA credential, possess a high school diploma or equivalent, have extended experience of assuming responsibility and care for a group of preschool-age children (children younger than 5 years of age), possess proficient oral and written communication skills, or meet all other district requirements for employment.
- <sup>13</sup> Public agencies blend and braid 8(g) funds with other state and federal funding to provide programs. The Board allocated \$11,349,476 to local education agencies for the FY 2015-2016 8(g) Student Enhancement Block Grant Program. A total of \$9,142,013 was allocated to high-quality early childhood programs. Districts received a base amount of \$55,000 and \$8.92 per pupil amount. In addition, funds were allocated to the Louisiana Department of Education to administer the 8(g) Statewide Early Childhood Care and Education Network Expansion Program.
- <sup>14</sup> Coordinated observation is the local process by which each community network ensures that every classroom in a publicly funded site in the community network receives two CLASS observations each school year. All observers must be reliable, and maintain inter-rater reliability and fidelity. The community network must conduct inter-rater reliability observation checks for 10% of all classrooms observed.
- <sup>15</sup> 8(g) maintains a regular monitoring cycle of site visits/evaluation. These visits were conducted by independent program evaluators employed by the oversight agency. BESE compliance officers conduct monitoring visits to make sure agencies are complying with state auditing practices and both fiscal and programmatic procedures relating to the project. Site visits, desk evaluations, and technical assistance is conducted by 8(g) staff on a regular basis. Since 8(g) students are likely intermixed in LA 4 classrooms, the LA 4 program monitoring covered the majority of the 8(g)-funded pre-K classes/sites during 2015-2016.
- <sup>16</sup> Evaluations are conducted annually for districts by independent evaluators to measure the impact on student outcomes. In June 2013, the Cecil J. Picard Center for Child Development and Lifelong Learning conducted a longitudinal report entitled, Longitudinal Study: Longitudinal Impacts on Academic Achievement for Participants in Louisiana's LA 4, NSECD, and 8(g) Early Childhood Programs.
- <sup>17</sup> A total of 5,744 publicly funded classrooms statewide (98%) including classrooms in both school and diverse delivery settings were observed using the CLASS tool. Based on the approved scale, 2% of sites were rated Excellent, 61% Proficient, 37% Approaching Proficient, and 1% Unsatisfactory.
- <sup>18</sup> Each LEA shall require that every child entering kindergarten for the first time be given a nationally recognized readiness screening. The results of this screening shall be used in placement and for planning instruction. The pupil progression plan for each LEA shall include criterion for placement.

# LOUISIANA - Cecil J. Picard LA 4 Early Childhood Program

- <sup>1</sup> A total of 64 out of 70 geographic school districts, 24 charter schools, and one tribal school received allocations for the LA 4 program during the 2015-2016 school year. Any LA 4 provider not under the school district's jurisdiction operates as its own district. This results in a total of 89 LA 4 participating districts.
- <sup>2</sup> Districts are not required to offer the program and, due to limited funds, programs must apply for funding. Priority is given to programs with previous history in the program.
- <sup>3</sup> The total enrollment figure does not include 563 tuition-paying students and an additional 3,654 students with braided funding from other sources for a total of 20,400 children. The enrollment data are based on October 2015 reports.
- <sup>4</sup> All children in the LA 4 program are in public settings, other than those in diverse delivery settings. These are not considered nonpublic schools as the allocation is still made directly to the district. These settings are required to meet the same qualifications as public school settings.
- <sup>5</sup> Many schools may offer before and after school care, but the state does not track or subsidize this activity.
- <sup>6</sup> Tuition may be charged for any child who does not meet eligibility requirements (at or below 185% FPL). Such children may be charged for all or part of the LA 4 class, in an amount not to exceed that necessary for the system to provide the LA 4 class to the child. Tuition will be no more than the average amount expended per pupil on those children from whom no tuition may be required, excluding any amount attributable to the provision of classroom space and utility costs.
- <sup>7</sup> Schools are required to report annually who conducts screenings and when they are conducted. Screenings that are not required are strongly encouraged and determined at the local level.
- <sup>8</sup> School programs with large ELL populations perform screenings and assessments on a local level and address each child's needs individually.
- <sup>9</sup> The Board of Elementary and Secondary Education (BESE) approved the new Birth to Five Early Learning and Development Standards in April 2013. Some schools chose to implement immediately; full implementation occurred in the 2013-2014 school year.
- <sup>10</sup> Programs must assess students using Teaching Strategies GOLD or another state-approved assessment tool.
- <sup>11</sup> Collaborative sessions are conducted several times a year to support programs in implementation of assessment, observations, and ELDS utilization.
- <sup>12</sup> In Louisiana, all districts are able to purchase instructional materials that are best for their local communities. The Louisiana Department of Education (LDE) led an online review of instructional materials to determine the degree of alignment with state content standards to support districts with these decisions.
- <sup>13</sup> For mixed-delivery LA 4 programs housed in child care centers, teachers must meet the same qualifications as those in public school settings. A teacher with an elementary certification may be employed while working toward an approved early childhood certification within a maximum of three years. Effective June 2002, Louisiana issued a Pre-K-3 license instead of stand-alone Nursery School and Kindergarten licenses.
- <sup>14</sup> All paraprofessionals/teacher assistants must meet LEA specific requirements for employment and one of the following requirements: (a) meet the definition of "highly qualified," which may include passing of the ParaPro test or achievement of a CDA or AA credential, (b) possess a high school diploma or equivalent, (c) have extended experiences of assuming responsibility and care for a group of preschool age children (children younger than five years of age), or (d) possess proficient oral and written communication skills.
- <sup>15</sup> LDE determines the per-pupil allocation annually based on number of available slots. Allocations are based on a per-pupil formula. Non-required local contributions are not determined or allocated by the state; instead, they are funds that may vary annually to support local community programs. Districts must agree to maintain in each

year of participation in LA 4 the same total level of funding from any source for programs or classes of early childhood education or child care provided in the year prior to participation in LA4, therefore the local amount is an average as it varies from district to district.

- <sup>16</sup> Coordinated observation is the local process by which each community network ensures that every classroom in a publicly funded site in the community network receives two CLASS observations each school year. All observers must be reliable, and maintain inter-rater reliability and fidelity. The community network must conduct inter-rater reliability observation checks for 10% of all classrooms observed.
- <sup>17</sup> All programs are monitored annually and required to provide documentation of program-level outcomes through compliance with program guidelines on an annual basis. Sites must meet all safety and sanitation requirements for BESE-approval and/or child care licensing. All classes are monitored to ensure appropriate teacher credentialing and entry of assessment information. Children's learning and/or child outcomes are assessed using the DSC annually, portfolios, and/or Teaching Strategies GOLD. Teacher self-assessments are also conducted during site visits. Monthly, quarterly, and semi-annual reports are conducted and reviewed. Monitoring of reports includes enrollment in a six-hour program, collaboration and provision of support services reports, vision/hearing screenings and referrals, and accommodations for students with disabilities and ESL students.
- <sup>18</sup> Informal evaluations were conducted to report child outcomes (DSC/Teaching Strategies GOLD) and program quality (CLASS). The last formal evaluation was conducted in 2012-2013 by the Picard Center at University of Louisiana at Lafayette.
- <sup>19</sup> Publicly funded sites ensure all publicly funded children receive completed assessments in October, February, and May. Publicly funded sites must obtain approval from the department prior to using child assessment tools different from Teaching Strategies GOLD.
- <sup>20</sup> A total of 5,744 publicly funded classrooms statewide (98%), which includes classrooms in both school and diverse delivery settings, were observed using the CLASS tool. Based on the approved scale, two percent of sites were rated excellent, 61% proficient, 37% approaching proficient, and one percent unsatisfactory.
- <sup>21</sup> K-3 Literacy Screening Assessments are also used. These are district selected and LDOE approved.

# LOUISIANA - Louisiana Nonpublic Schools Early Childhood Development Program (NSECD)

- <sup>1</sup> Seats are awarded to programs through the Early Childhood Community Network Coordinated Funding Request. Inclusion in this request for the NSECD Program is open to all state-approved nonpublic schools and quality-rated child care centers statewide. Due to funding limitations, the Department prioritizes slot allocation to schools and centers located in parishes found to be in greatest need based upon the Early Childhood Risk and Reach Report, the most recent copy of which can be found here: http:// www.lsutuearlychildhood.org/EarlyChildhoodRiskLA\_Fall2012.pdf. In addition, not all parishes have representation in the application process.
- <sup>2</sup> The reported enrollment figure represents funded slots.
- <sup>3</sup> Many schools may offer before- and after-school programs, but the state does not track or subsidize this activity.
- <sup>4</sup> Nonpublic schools determine their own tuition rates.
- <sup>5</sup> Screenings that are not required are strongly encouraged and determined at the local level.
- <sup>6</sup> School programs with large ELL populations perform screenings and assessments on a local level and address each child's needs individually.
- <sup>7</sup> The Board of Elementary and Secondary Education (BESE) approved the new Birth to Five Early Learning and Development Standards in April 2013. Some schools chose to implement immediately; full implementation occurred in the 2013-2014 school year.
- <sup>8</sup> Programs must assess students using Teaching Strategies GOLD or another state-approved assessment tool. In 2015-2016, all NSECD Programs used the GOLD assessment tool.
- <sup>9</sup> Collaborative sessions are conducted several times a year to support programs in implementation of assessment, observations, and ELDS utilization.
- <sup>10</sup> In Louisiana, all districts are able to purchase instructional materials that are best for their local communities. The Louisiana Department of Education (LDE) led an online review of instructional materials to determine the degree of alignment with state content standards to support districts with these decisions.
- <sup>11</sup> In Louisiana, all districts are able to purchase instructional materials that are best for their local communities. The Louisiana Department of Education led an online review of instructional materials to determine the degree of alignment with state content standards to support districts with these decisions. The following are considered Tier I curricula: Abrams Learning Trends - DIG Develop. Inspire. Grow. ECE Ages 3-4; Frog Street Press - Frog Street Pre-K, ECE Ages 3-4; Pearson Education, Inc. - Opening the World of Learning OWL, ECE Ages 3-4; Teaching Strategies, LLC - The Creative Curriculum for Preschool, ECE Ages 3-4; Voyager Sopris Learning, Inc. - We Can Early Learning Curriculum, ECE 3-4.
- <sup>12</sup> Incumbent and new NSECD teachers must be certified in early childhood or working toward certification; those not already certified must have passed the Praxis I and taken all prerequisites to enroll in a Pre-K-3 or Early Interventionist alternate certification program. They must continually be enrolled and complete certification within three years of their hire date. Teachers with a kindergarten or Elementary Education Certificate must become an Early Childhood certified teacher by either taking the Praxis II or completing 12 hours of coursework within 18 months of their hire dates.
- <sup>13</sup> Of 90 Lead Teachers, 60 were Early Childhood certified (67%) and seven were Elementary grade certified. Sixty teachers have a Bachelor's degree only (67%), 31 have a Master's or Master's plus 30 (28%), and two have a PhD/EdD.
- <sup>14</sup> New NSECD teacher assistants must be certified with at least a CDA or AA or higher in Early Childhood, Education, or Family Studies. Incumbent NSECD teacher assistants who are not state-certified must be enrolled in a CDA program or Early Childhood associate's degree program, be continually enrolled, and complete the certification within three years of hire dates.
- <sup>15</sup> Providers shall appropriately compensate staff for time spent attending required NSECD or LDE sponsored-events prior to the beginning of the school year, as well as travel expenses incurred. During the academic year, providers are responsible for travel expenses such as mileage, meals or hotel accommodations related to ongoing continuing education. Reimbursement for registration fees is determined at the discretion of the provider.
- <sup>16</sup> In 2012, Act 3 was enacted to promote and support collaborative mixed model delivery to assist programs in rural communities. Nonpublic and parochial schools must be licensed by the Louisiana Department of Education and adhere to the NSECD standards. Agencies are not allowed to combine funds with other funding streams (i.e., Title I, Head Start, or LA4) for NSECD students; however, agencies are allowed to serve multiple populations within a site.
- <sup>17</sup> Coordinated observation is the local process by which each community network ensures that every classroom in a publicly funded site in the community network receives two CLASS observations each school year. All observers must be reliable, and maintain inter-rater reliability and fidelity. The community network must conduct inter-rater reliability observation checks for 10% of all classrooms observed.
- <sup>18</sup> Providers are required to use the Teaching Strategies Gold assessment tool (ongoing). They may choose to use the DSC or other age-appropriate tool, though this is not required. Sites must meet all safety and sanitation requirements for BESE-approval and/or child care licensing. Providers receiving public funds are required to participate in Community Networks. Information regarding performance is reported each academic year for each publicly funded site and Community Network composed of the site or Community Network's performance rating and informational metrics. Programs are audited annually by the NSECD Program Manager. In addition, NSECD End of the Year Reporting is collected annually.
- <sup>19</sup> Publicly funded sites ensure all publicly funded children receive completed assessments in October, February, and May. Publicly-funded sites must obtain approval from the department prior to using child assessment tools different from Teaching Strategies GOLD.
- <sup>20</sup> A total of 5,744 publicly funded classrooms statewide (98%), which includes classrooms in both school and diverse delivery settings, were observed using the CLASS tool. Based on the approved scale, two percent of sites were rated excellent, 61% proficient, 37% approaching proficient, and one percent unsatisfactory.

# MAINE - Maine Public Preschool Program

- <sup>1</sup> School administrative units have the following governance structures: cities or towns with individual supervision, regional school units, regional school units doing business as school administrative districts and school administrative districts, community school districts, alternative organizational structures, unions of towns, Maine Indian education, Technology Center, Technology Region, and Education in the Unorganized Territory. Although there are 256 school administrative units in Maine, only 191 have kindergarten.
- <sup>2</sup> Children must be 4 years old by October 15. It is a local district's decision as to whether a School Administrative Units (SAUs) will continue to serve children who are not age-eligible in a public preschool program. If a child attended kindergarten in another state with a different age-eligibility requirement, this will be honored. Allowances

are made for children with IEPs who turn 5 between July 15 and October 15. The district receives the same level of subsidy for children pre-K through 2nd grade.

- <sup>3</sup> Maine's Part B 619 is overseen by an Individual Educational Unit-Child Development Services. Children who receive special education services may attend state pre-K classrooms. A break out of which children were in public preschool programs is not available.
- <sup>4</sup> School administrative units and Head Start programs blend funds but the way funds are blended varies across the state. Thirty-five percent of public preschool programs are in partnership with Head Start.
- <sup>5</sup> Other languages include: Arabic, French, Passamaquoddy, Portuguese, and Somali. The language, ethnicity, and race breakdown data were collected at different points in time from the total enrollment count; therefore, the totals are different.
- <sup>6</sup> The number of hours and days per week a program operates is a local decision, however programs must operate a minimum of 10 hours per week to receive a per-pupil subsidy through the school funding formula.
- <sup>7</sup> It is a locally determined decision, but most preschool programs follow the kindergarten calendar.
- <sup>8</sup> All eligibility, beyond age, is locally determined. Some SAUs without universal capacity use a first come, first served basis; lottery; or targeted program. In addition, districts in partnership with Head Start programs may have eligibility requirements for a certain ratio of enrolled children.
- <sup>9</sup> If a child has been screened and evaluated and the IEP team determines the public four-year-old program is not the least restrictive environment, another placement may be found.
- <sup>10</sup> Each classroom must have two adults: an early childhood certified teacher and an Ed Tech II (60 college credits).
- $^{\rm 11}\,$  If a program operates fewer than three hours per day, only a snack is required.
- <sup>12</sup> The developmental screenings used must be research-based.
- <sup>13</sup> There is not an approved list of assessments. It is the responsibility of the district to show the Maine DOE how their assessment(s) align with Maine's ELDS.
- <sup>14</sup> The Maine DOE partnered with Maine Roads to Quality (Maine's Professional Development Network) to create and deliver training on the ELDS.
- <sup>15</sup> A teacher who is certified K-3 or K-8 may apply for "conditional" endorsement and may teach in a public preschool setting. If a public preschool program is in partnership with a Head Start or private preschool the teacher must meet the same requirements as a public school employee.
- <sup>16</sup> All assistant teachers must have an Educational Technician II (Maine DOE Certificate) that requires a minimum of 60 college credit hours, including coursework in early childhood or a related field.
- <sup>17</sup> Salary scales are locally determined for teachers employed by nonpublic schools and may be part-time depending on length of program day/week/year. All benefits (except state retirement) are locally determined.
- <sup>18</sup> Teachers employed by school districts are evaluated according to the state approved Performance Evaluation and Professional Growth (PEPG) plans.
- <sup>19</sup> Public preschool in Maine is funded through the school funding formula (Essential Programs and Services School Funding Formula). Once a school has gone through an approval process for a public preschool program, student counts are factored in to compute the following year's Essential Programs and Services SAU allocation. Children who are 4 years old by October 15 and in a program a minimum of 10 hours a week receive a full per-pupil subsidy based on Maine's Essential Programs and Services school funding formula.
- <sup>20</sup> Schools are required to provide a local match to draw down the per-pupil state subsidy. The required local match is part of the school funding formula based on property wealth (state valuation) multiplied by a statewide mill rate.
- <sup>21</sup> Starting in 2015-2016, new and expanded programs are monitored during the first year of operation and then, every 3 years.

#### MARYLAND - Maryland Prekindergarten Program

- <sup>1</sup> A total of 2,732 children were served through PDG. A total of 707 of these students are served in a mixed delivery system of community-based child care and Head Start and not broken out by age, ethnicity, or race. Of the 2,732 PDG-funded slots, 1,459 were new slots and 1,273 were improved slots. All of the 2,732 slots were expected to increase quality by requiring programs receiving PDG funding to hire an ECE-certified teacher, participate in Maryland EXCELS Quality Rating and Improvement System (QRIS), achieve Maryland State Department of Education (MSDE) accreditation, and establish Memorandums of Understanding (MOUs) with the school system in which they were located to support students in need of IEP or ELL services.
- <sup>2</sup> Totals include only 3- and 4-year-olds.
- <sup>3</sup> Programs operate five days per week as a full school-day program or four days per week as a part-day program with the fifth day used for home visits and teacher planning.
- <sup>4</sup> Partnerships with Head Start provide some extended-day services. The state provided extended-day, extended-year services to 8,383 children ages 3 to 5 enrolled in Head Start.
- <sup>5</sup> Policy requires local school systems to have an early admissions policy to allow for enrollment of 3-year-olds who are otherwise eligible (economically disadvantaged or homeless) and who demonstrate educational needs warranting early admission into prekindergarten. Local school systems may create prekindergarten programs for 3-year-olds who are economically disadvantaged, homeless, or who lack school readiness.
- <sup>6</sup> All children must first meet the income, homelessness, or foster care requirement to qualify for enrollment. Remaining vacancies may be filled by enrolling 4-year-old applicants who are not from low-income families, but who exhibit a lack of readiness for school. Eligibility can be determined by other risk factors or criteria chosen by the local school system.
- <sup>7</sup> State policy stipulates an average of 20 students per classroom. Exceptions may occur where individual classrooms exceed this number, provided an overall program average of 20 is maintained. By policy, 3-year-olds are not eligible for state pre-K, but state child care regulations require a maximum class size of 20 and a staff to child ratio of 1:10 for 3- and 4-year-olds.
- <sup>8</sup> Developmental and dental screenings are locally determined. Vision and health screenings and referrals are the responsibility of the school health services program, in conjunction with the Health Department under Title I, which applies to all children enrolled.
- Paraprofessionals in Title I schools must also have completed two years of college, hold an AA degree, or have a qualifying score of 455 on the Para Pro assessment administered by ETS.
- <sup>10</sup> For certified teachers funded out of pre-K Expansion funds served in public and nonpublic settings there is salary parity based on the starting salary for a teacher in a public setting. The parity is not required for all years of service in nonpublic settings. Benefits are not required to be the same in nonpublic settings.
- <sup>11</sup> Maryland does not have a dedicated source of state funding for its pre-K program. Rather, pre-K funding is assumed to be adequately supported in K-12 funding distributed to the states via the Maryland school funding formula. Therefore, actual state spending on pre-K outside of the expansion grant was estimated based on 50% of the state per child amount from the K-12 average per pupil revenue multiplied by the number of children enrolled in the program not through the expansion grant.
- <sup>12</sup> Prekindergarten Expansion Act of 2014, (Senate Bill 332), provided \$4.3 million to expand access to pre-K for 4-year-olds from families with household incomes at or below 200% FPL.
- <sup>13</sup> State aid accounts for foundation and compensatory funds. Foundation funds account for all mandatory state aid divided by the total enrollment for K-12. Compensatory funds account for weight associated with low-income, ELL, and special education students. Local school systems must provide services for all eligible 4-year-olds using state and/or local funds. There are no dedicated state aid dollars for pre-K. Pre-K Spending from federal and local sources is determined through a funding estimation scheme given that there are no dedicated pre-K funds from these sources. As such actual spending estimates cannot be provided for federal and local sources. In addition, the Prekindergarten Expansion Act of 2014 made possible \$4.3 million to expand the access to public pre-K for 4-year-olds from families with household incomes at or below 300% of FPL.
- <sup>14</sup> The University of Maryland is currently conducting an evaluation on pre-K expansion for the state's PDG grant. The Department of Education allows PDG to include statefunded pre-K if meeting the definition of high-quality pre-K required by PDG.
- <sup>15</sup> Child assessments could include those that align with the State recommended curriculum or the State developed Early Learning Assessment.

# MASSACHUSETTS - Massachusetts Inclusive Preschool Learning Environments Grant (IPLE) – Fund Code 391

- <sup>1</sup> Of the 351 towns/communities in Massachusetts, IPLE grant-funded preK sites were located within 118 cities and towns (34%). IPLE preK programs served children from 184 Massachusetts communities (52%).
- <sup>2</sup> The IPLE Grant was awarded through a renewal grant in 2015-2016.
- <sup>3</sup> A total of 2,309 children were also identified as low-income. This state-funded preschool program does not collect information about family income by age of the child.
- <sup>4</sup> The 896 children listed as "Other Races" are Latino/Hispanic.
- <sup>5</sup> Worcester Public School (WPS) is a Head Start Agency and a Public School District. WPS enrollment is reported under Head Start. All Head Start programs are also Department of Early Education and Care (EEC) licensed early education and care programs.
- <sup>6</sup> Formal state-level partnerships exist between federal Head Start Grantees and the commonwealths' Head Start state supplemental grantees. Nine of these grantees are also IPLE grantees.
- <sup>7</sup> Multiple operating schedules are available through IPLE preschool programs. Schedules are determined locally to address local need and to support parent choice. The majority of the IPLE preschool programs follow the public school calendar year. On average, programs are in operation 39 weeks of a calendar year (range 32 to 52 weeks).
- <sup>8</sup> Most public school programs use September 1st as the cut-off date for age-eligibility for kindergarten. Per State Special Education Regulations, the IEP team may allow a child to remain in a program designed for 3- and 4-year-old children for the duration of the school year in which the child turns 5 years old (including the summer following the date of the child's fifth birthday).
- PIPLE grant-funded preschool programs that are supported by other supplemental funding sources, such as EEC financial assistance, IDEA, and Head Start, must also meet the eligibility criteria of those funding sources.
- <sup>10</sup> Although not used to determine eligibility at the state level, IPLE preschool programs may use other risk factors at the local level to prioritize the selection of eligible children without an IEP, due to the high demand for the program.
- <sup>11</sup> The sliding payment scale is determined by the IPLE Agency. Any programs receiving subsidy funds use the Massachusetts sliding fee scale.
- <sup>12</sup> When the classroom has up to five children with disabilities, total class size may not exceed 20. When the classroom has six or seven children with disabilities, total class size may not exceed 15 children.
- <sup>13</sup> Programs operating between four and nine hours must schedule a regularly scheduled meal in addition to a snack, while those operating more than nine hours must schedule two meals and two snacks. Parents or programs/providers may provide snack.
- <sup>14</sup> The state funded preschool program (IPLE) does not specifically include a requirement for health screenings. The health screenings requirements are regulated by the State agency(ies) with administrative authority. For public schools, all LEAs are required to offer screenings and referrals under Child Find. These developmental screenings are available to children in non-LEA programs through services provided in the public schools. The types of health screening offered are not specified for public schools. Head Start Programs are required to meet the screening requirements for the federal Head Start Program (developmental, health, vision, and hearing). All EEC licensed programs are required to obtain documentation of immunizations, proof of physical exam (completed within 12 months of program admissions); and documentation of screening for lead poisoning.
- <sup>15</sup> The licensee shall have a written plan describing procedures for referring parents to appropriate social, mental health, educational, and medical services, including but not limited to dental check-up and vision or hearing screening for their child, should the program staff feel that an assessment for such additional services would benefit the child.
- <sup>16</sup> Other types of comprehensive services may be required, as determined by other federal and state regulations and/or funding sources. Therefore, comprehensive services are not identified as a grant requirement for this state pre-K program at this time. EEC-licensed programs may provide referrals for appropriate social, mental health, educational and medical services, including but not limited to dental check-up and vision or hearing screening for their child, should the program staff feel that an assessment for such additional services would benefit the child, with written parental consent.
- <sup>17</sup> Early Education and Care (EEC) Licensing Regulations include requirements for child records, curriculum, and family engagement based on language needs. Licensing regulations also require that 10% of educator's annual professional development time is focused on children who have special needs, including linguistic. The Massachusetts Quality Rating and Improvement System (QRIS) includes quality standards related to having classroom materials that reflect the language and culture of the children in the classroom, their communities, and represent the diversity of society.
- <sup>18</sup> The Massachusetts Standards for Preschool and Kindergarten in the Domains of Social and Emotional Learning, and Approaches to Play and Learning, released in 2016, focus on the following areas: Self-Knowledge, Self-Management, Social Knowledge, Relationship Skills, Responsible Decision-Making, Initiative, Curiosity, Engagement/ Persistence, Creativity, Cooperative Play and Learning, Problem Solving, Organizational Skills, and Memory. For additional information see: http://www.mass.gov/edu/ birth-grade-12/early-education-and-care/curriculum-and-learning/pre-school-and-kindergarten-standards.html
- <sup>19</sup> The Educator and Provider Support (EPS) Grantees provide statewide professional development and coaching on how to implement the curriculum in the classrooms. A priority of this state-funded grant program is to provide professional development opportunities that align with EEC's Core Competencies, QRIS, and the early learning standards and guidelines. EEC provides these supports to nonpublic school programs in the state. The majority of public school supports for preschool curriculum decision-making and implementation are determined at the local level.
- <sup>20</sup> Lead teachers in public schools are required to: (1) have a bachelor's degree, (2) pass the Communication and Literacy Skills test, (3) pass the subject matter knowledge test(s) appropriate to the license sought, and (4) meet additional requirements for the early childhood licensure, including seminars or courses that address teaching this population. Lead teachers in nonpublic schools are required to have certification which requires three credits in Child Development plus nine credits in three different categories of study within Early Childhood Education. Teachers are also required to have prior experience, the amount of which varies based on their other qualifications. When the IPLE-funded program elects to participate in the QRIS at a higher QRIS Level (Level 2 Level 4), the programs and schools are required to ensure that in programs at Level 2 in the QRIS, all members of the teaching staff have a minimum of three credits in ECE or a related field, and 50% of classrooms have an educator with a BA. For Level 4 programs, 75% of classrooms must have an educator with a BA.
- <sup>21</sup> The majority of lead teachers for this state-funded preschool program are public school employees. Data for 14 lead teachers is not available.
- <sup>22</sup> Instructional paraprofessionals in public schools are not required to be licensed in the Commonwealth. Paraprofessionals must work under the direct supervision of a licensed teacher. The minimum requirements to be employed in this role are possession of a high school diploma or equivalent and one of the following: An Associates degree; completion of 48 credit hours at an Institution of Higher Education; or passing completion of paraprofessional exam. Assistant teachers in nonpublic schools must have a high school diploma or equivalent and must work at all times under the direct supervision of at least a teacher qualified staff person.
- <sup>23</sup> There is parity between preschool and K-3 at the local level (LEA). Public school preschool teachers are included in the teacher contract agreements, which are determined locally.
- <sup>24</sup> For public schools, paid planning time and/or professional development are negotiated through teacher contractual agreements. Public school employee salary is based on school year calendar and nonpublic school employee salary is based on a calendar year.
- <sup>25</sup> All public school educators that hold a teacher's license must renew their professional license every five calendar years in order to keep it active. The number of inservice professional development hours required is based on the licensed type held and the type being sought or renewed. For teachers in public schools, the Educator License Renewal states that each standard educator certificate shall be valid for five years and continued every five years thereafter upon the successful completion of an individual professional development plan that meets the subject matter knowledge and teaching skill requirements set by the MA DESE board. Individual professional development that meet the subject matter and teaching skill requirements are designed to increase the ability of the teacher to improve student learning. A Professional Development Point (PDP) is equal to one clock hour of professional development.
- <sup>26</sup> Coaching or mentoring opportunities are available for nonpublic employees through the state's Educator Provider Support Grant, but not required.
- <sup>27</sup> IDEA Part B 619 funds are distributed in IPLE towns and communities. The portion of the Early Child Special Education Entitlement Grant (Fund Code 262) used in the specific IPLE Site, if any, is determined locally. Head Start funds are distributed through the state supplemental grant. The portion of funds allocated to IPLE funded sites (if any) is locally determined.
- <sup>28</sup> The IPLE grant does not require structured observations of classroom quality as a grant requirement. For programs participating QRIS, Massachusetts reviews self-

reported observation results for programs participating in QRIS at Level 2 and 3. A site visit is required as part of the QRIS verification process at Level 3 and the Early Childhood Environment Rating Scale, Revised Edition (ECERS-R) is used as the classroom observation tool. When the programs have multiple preschool classrooms, the classrooms observed are randomly selected.

- <sup>29</sup> The ECERS-R is used to for classroom quality. Sites also use the Classroom Assessment Scoring System (CLASS) or the Arnett-Caregiver Interaction Scale (Arnett/CIS) to observe teacher child interactions. The Program Administration Scale (PAS) and Strengthening Families Program Self-Assessment are also used to collect information on program quality.
- <sup>30</sup> EEC collects information for monitoring through the grant renewal process and the submission of information from programs. Data pertaining to operating schedule, QRIS participation, personnel, resources, accountability is collected once annually, while enrollment/demographics information is collected twice a year. Programs also receive Technical Assistance site visits one time per year. IPLE-funded public schools are monitored by the Massachusetts Department of Elementary and Secondary Education (MADESE) and the LEAs. IPLE-funded nonpublic schools are monitored by EEC. EEC licensors conduct site visits (every three years) and review of facilities and safety requirements, review of program records, and review of professional qualifications.
- <sup>31</sup> The assessment of children's learning and development during the preschool year is not articulated as a requirement of this state funded preschool program. Public schools and nonpublic schools that participate in this state-funded preschool program are required to fulfill other existing state policies which include the developmental assessment of preschool age children in the areas of Language/Literacy, Math Science, Social and Emotional Development, Approaches toward Learning, Physical/Motor Development, and General Cognitive Development. The assessment tools vary and are determined locally and as a result their frequency varies by assessment type and/ or assessment results. Child level assessment data is collected at the local level for public schools and provided to the district in aggregate for DESE.
- <sup>32</sup> Through the Massachusetts Kindergarten Entry Assessment Initiative, school districts that are recipients of the Quality Full Day Kindergarten Grant must utilize a formative assessment tool in the classroom to document children's progress across the developmental domains throughout the school year. The school districts may elect to choose either TS GOLD or Work Sampling System as the formative assessment tool. Other tools are determined locally to assess children's progress in Kindergarten.

# MASSACHUSETTS - Massachusetts Universal Pre-Kindergarten (UPK)

- The Department of Early Education and Care (EEC) does not collect enrollment data by children's home language but will begin to do so in the FY18 Grant application.
   EEC is planning to start collecting this data in the FY18 grant application.
- <sup>3</sup> The hours and operating schedule vary by type of program and setting. Programs can operate either a school-year or full-year schedule. UPK programs are required to offer or provide access to full-day, full-year services.
- <sup>4</sup> The UPK Grant funds 100% of the grant award amounts to those programs that provide "full-day, full-year" services, which is defined as operating for at least 231 days and 2,079 hours per year. Additionally, the UPK Grant prorates the grant award amounts based on a program providing less than full-day, full-year services.
- <sup>5</sup> Most public school programs use September 1st as the cut-off date for age-eligibility for kindergarten. Per State Special Education Regulations, the IEP team may allow a child to remain in a program designed for 3- and 4-year-old children for the duration of the school year in which the child turns 5 years old (including the summer following the date of the child's fifth birthday).
- <sup>6</sup> Any child may enroll in any program, but programs are selected to receive UPK funding based on program characteristics and on the characteristics of the children in the program. An 85% of SMI income requirement applies to all children in UPK receiving subsidy money, but does not apply to tuition-paying families. For families to enter the subsidy system, they can have up to 50% of SMI and can continue receiving assistance up to 85% of SMI. For families with special needs, they can enter up to 85% of SMI and remain until 100% SMI.
- <sup>7</sup> The sliding scale is determined by the UPK program if a child is part of the financial assistance system, and the sliding fee scale for parent co-pay is determined by income. Any programs receiving subsidy funds may use the Massachusetts sliding fee scale. If the program does not receive subsidy funds, they may use their own sliding fee scale.
- <sup>8</sup> Programs operating fewer than four hours per day must schedule snacks. Programs operating between four and nine hours must schedule a regularly scheduled meal in addition to a snack, while those operating more than nine hours must schedule two meals and two snacks. Parents or programs/providers may provide snack.
- <sup>9</sup> All LEAs are required to offer screenings and referrals under "Child Find," and screenings are available to children in non-LEA programs through services in the public schools. Types of health screening offered are not specified.
- <sup>10</sup> UPK programs are required to engage in efforts to support enhanced Pre-K to 3rd Grade Alignment to improve outcomes for children, which may include mechanisms for enhanced cross-sector alignment with grades kindergarten through third grade. Other types of comprehensive services may be required, as determined by other federal and state regulations and/or funding sources.
- <sup>11</sup> Early Education and Care (EEC) Licensing Regulations include requirements for child records, curriculum, and family engagement based on language needs. Licensing regulations also require that 10% of educator's annual professional development time is focused on children who have special needs, including linguistic. The Massachusetts Quality Rating and Improvement System (QRIS) includes quality standards related to having classroom materials that reflect the language and culture of the children in the classroom, their communities, and represent the diversity of society.
- <sup>12</sup> The Massachusetts Standards for Preschool and Kindergarten in the Domains of Social and Emotional Learning, and Approaches to Play and Learning, released in 2016, focus on the following areas: Self-Knowledge, Self-Management, Social Knowledge, Relationship Skills, Responsible Decision-Making, Initiative, Curiosity, Engagement/ Persistence, Creativity, Cooperative Play and Learning, Problem Solving, Organizational Skills, and Memory. For additional information see: http://www.mass.gov/edu/ birth-grade-12/early-education-and-care/curriculum-and-learning/pre-school-and-kindergarten-standards.html
- <sup>13</sup> UPK programs can use Teaching Strategies Gold, Working Sampling System, HighScope, or Creative Curriculum which are all aligned with the ELDS.
- <sup>14</sup> The Educator and Provider Support (EPS) Grantees provide statewide professional development and coaching on how to implement the curriculum in the classrooms. A priority of this state-funded grant program is to provide professional development opportunities that align with EEC's Core Competencies, QRIS, and the early learning standards and guidelines.
- <sup>15</sup> Instructional paraprofessionals in public schools are not required to be licensed in the Commonwealth. Paraprofessionals must work under the direct supervision of a licensed teacher. The minimum requirements to be employed in this role are possession of a high school diploma or equivalent and one of the following: An Associates degree; completion of 48 credit hours at an Institution of Higher Education; or passing completion of paraprofessional exam. Assistant teachers in nonpublic schools must have a high school diploma or equivalent and must work at all times under the direct supervision of at least a teacher qualified staff person.
- <sup>16</sup> The UPK Grant requires programs to provide competitive compensation packages for preschool educators as demonstrated by any five of the following criteria: (1) Written salary scale that reflects education and experience; (2) Annual salary increases (3) Compensation plan that provides for merit increases in addition to annual salary increases; (4) Health insurance benefits; (5) Paid sick/personal days; (6) Paid vacation days; (7) Contribution to retirement plans; (8) Reimbursement for professional development; and/or (9) Tuition reimbursement.
- <sup>17</sup> All UPK programs are required to be at Level 3 in the QRIS, which requires Individualized Professional Development Plans, including formal professional development in the components of the assessment process, including screening, observation, use of assessment tools, and IDEA processes.
- <sup>18</sup> For center-based programs: Infant/Toddler Environment Rating Scale (ITERS-R), Program Administration Scale (PAS), Strengthening Families Program Self-Assessment, Arnett-Caregiver Interaction Scale (Arnett/CIS). For Family Child Care Providers: Family Child Care Environment Rating Scale, Revised Edition (FCCERS-R), Business Administration Scale (BAS), Strengthening Families Program Self-Assessment, Arnett-Caregiver Interaction Scale (Arnett/CIS) are used.
- <sup>19</sup> EEC's Program Quality Specialists are trained on all of the Environment Rating Scales. They conduct the Level 3 Technical Assistance (TA) site visits with the programs. During the TA site visits, the Program Quality Specialists utilize the Environment Rating Scales (the ITERS-R and ECERS-R for center-based programs and FCCERS-R for family child care providers) to determine whether the programs have met the minimum standards of the Environment Rating Scales.
- <sup>20</sup> Massachusetts is in the process of developing policies for sharing QRIS information and QRIS ratings with families; however, it has not yet been fully implemented.
- <sup>21</sup> UPK programs can choose to use Work Sampling System, Teaching Strategies Gold, Creative Curriculum or HighScope COR as their child assessment tool.
- <sup>22</sup> Child Assessments are used at the program level. At the state level, evidence of completion is used for determining meeting the UPK program requirements.
- <sup>23</sup> Programs submit child assessment data twice a year per requirement of UPK however this data is not aggregated at the state level at this time.
- <sup>24</sup> Through the Massachusetts Kindergarten Entry Assessment Initiative, school districts that are recipients of the Quality Full Day Kindergarten Grant must utilize a formative

assessment tool in the classroom to document children's progress across the developmental domains throughout the school year. The school districts may elect to choose either TS GOLD or Work Sampling System as the formative assessment tool. Other tools are determined locally to assess children's progress in kindergarten.

# **MICHIGAN** - Michigan Great Start Readiness Program

- <sup>1</sup> In addition, there were 77 out of 302 public school academies (PSAs; charter schools) and 235 community-based organizations (CBOs) with state-funded preschool. All funding flows through 54 intermediate school districts (ISD) to LEAs/PSAs/CBOs. Some ISDs also provide direct programming.
- <sup>2</sup> All grants and funding flow through the ISDs, and all ISDs participate, so every child in the state who is eligible is covered by a participating agency. Some ISDs provide direct service in the local school buildings or other sites.
- <sup>3</sup> Due to an age eligibility rollback from December 1 to September 1, legislation allowed early entry into GSRP for children with birthdates between September 2 and December 1 to align with kindergarten legislation which does the same for 5-year-olds. The legislation has a September 1 cutoff and allowed exceptions in 2015-2016. The exception language was eliminated for FY 2016-2017.
- <sup>4</sup> The majority of 4-year-olds receiving special education services are enrolled in separate, segregated classrooms. Those children are not included in the total preschool enrollment count. Only children receiving special education services within GSRP are included in the enrollment total.
- <sup>5</sup> Legislation allows for a GSRP/Head Start Blend option, which receives \$3,625 in state funding to blend with the federal Head Start funding per child. This option requires adherence to all federal Head Start and GSRP policies and regulations, with the more stringent standard from either program prevailing.
- <sup>6</sup> School-day classroom programs are reimbursed at two slots per child (\$7,250); all others are reimbursed at one slot per child (\$3,625). The minimum operating schedule is four days per week for 30 weeks per year. It is allowable for new grantees or newly licensed sites to operate only for 20 weeks during the first year. Subsequent years must be 30 weeks per year. Legislation allows for a GSRP/Head Start Blend option, and requires a tuition-based sliding scale for children who are over-income. GSRP/ Head Start Blend is also included in the extended-day count. In addition, grantees that offer supplementary child care using funds other than GSRP to achieve a full-day program (minimum 10 hours) receive priority in the allocation of GSRP funds.
- <sup>7</sup> Operating schedule may vary depending on program option. The requirement for a part-day program is three hours per day, for a minimum of four days per week for 30 weeks. For school-day and GSRP/Head Start Blend, the formal partnership requires 6.5 hours per day, four days per week for 30 weeks. In Michigan, 6.5 hours per day is considered a school-day and extended-day (wrap-around) would constitute a minimum of 10 hours.
- <sup>8</sup> GSRP is aligned to kindergarten age eligibility law and that allows for exceptions to the September 1 cutoff by parent request. Parents may request early entry into kindergarten for children with birthdates between September 2 and December 1. Therefore, there is early entry into GSRP as well for those dates.
- <sup>9</sup> At least 90% of the children in each grantee's enrollment must meet the income requirement of 250% FPL or below, with exceptions for up to 300% if sufficient numbers of children cannot be recruited at 250% FPL. There are seven factors that determine eligibility: low family income (below 250% FPL), diagnosed disability or identified developmental delay, severe and challenging behavior, primary language other than English, parent(s) with low educational attainment, abuse/neglect of child or parent, and environmental risk. All families above 250% FPL, except for children who qualify as homeless, in foster care, or with an IEP, must pay tuition based on a sliding scale. Families that are over income as part of the 10% allowed must have at least two other risk factors and pay tuition based on a locally determined sliding scale.
- <sup>10</sup> For class enrollments above the 16th child, a third adult that meets licensing requirements is required at all times.
- <sup>11</sup> Minimally, part-day programs provide a snack, though many provide breakfast and snack for morning classes and some also provide lunch and snack for afternoon classes. School-day programs typically provide breakfast, lunch, and snack.
- <sup>12</sup> Dual language learner policy is locally determined.
- <sup>13</sup> Providers are encouraged to be trained directly by a certified trainer of their chosen curriculum.
- <sup>14</sup> All lead teachers must have Elementary teaching certification with an Early Childhood endorsement or a BA in Early Childhood Education or Child Development with specialization in preschool teaching. If training is incomplete, they may be considered out of compliance, but must be enrolled in a training program and in compliance within two years.
- <sup>15</sup> The one percent reflects teachers working toward the required credentials and in non-compliance status. GSRP law allows for teachers to be hired who have significant, but incomplete, training and credentialing. They have two years to complete the training and come into compliance with requirements.
- <sup>16</sup> An assistant teacher may have a CDA or an AA in ECE/CD. If a suitable person cannot be hired, someone can start while out of compliance, but must have completed at least one credit-bearing course in child development and have a plan to complete the requirements within two years.
- <sup>17</sup> Lead teachers who are certificated in public school settings must also complete six credit hours or an equivalent of continuing education units (CEUs) every five years to keep their teaching certification current. Newly certified lead teachers must complete even more training to renew the certificate for the first time.
- <sup>18</sup> All classrooms are assigned an Early Childhood Specialist (ECS, i.e., master's level coach). The requirement is that each ECS is to be in the classroom for a minimum of three times per year. However, the reality is that ECSs are in the classroom anywhere from weekly to monthly depending on the needs of each teaching team. Classrooms with new lead teachers receive more frequent visits. Classrooms with lower Program Quality Assessment (PQA) scores or other concerns also receive more attention. See http://www.michigan.gov/gsrp for Implementation Manual and Early Childhood Specialist section for details.
- <sup>19</sup> GSRP has both a community needs assessment and a formula component that contributes to the final grantee allocation. GSRP cannot operate solely on the state funding, but the state does not collect information on local, federal, or in-kind contributions. Grantees often include in-kind space for GSRP because GSRP does not allow funding to cover the cost of facilities. All funding flows through the State School Aid Fund to ISDs. Additional federal sources, such as CCDF subsidies, CACFP, and Title I, are used in providing GSRP children the program. Funding is determined by formula. Please see http://www.michigan.gov/documents/mde/FY17\_GSRP\_Funding\_ SectionADA\_535164\_7.pdf for details. Included in this total is \$300,000 allocated from state resources for ongoing statewide evaluation activities.
- <sup>20</sup> The Michigan Department of Education (MDE) implements a self-created monitoring tool for GSRP implementation based on a three- to four-year cycle for the ISDs as GSRP grantees. MDE is in the process of transitioning to a risk-based assessment process for determining monitoring visits. Monitoring will cover the programmatic, administrative, and fiscal aspects of the work of the ISDs as GSRP grantees. The ISD is responsible for monitoring its sub-recipients for compliance with policies and guidelines for fiscal and programmatic issues, as well as program quality using the PQA.
- <sup>21</sup> The PQA is done by the ECS for each site. Most ECSs are employed or contracted by the ISD that serve as GSRP grantees. A few ISDs allow GSRP providers to contract directly with a qualified ECS who does the PQA. All must be certified annually as a reliable assessor by HighScope.
- <sup>22</sup> Documentation of children's learning is required to be done at the local classroom level, and used for planning for each child and the classroom. It is aggregated at the agency and ISD levels and used by a local and ISD-wide data analysis team for planning professional development and setting goals for improvement plans for the next year. Additionally, each ISD is required to have a local monitoring system used with its program providers. GSRP state consultants review documentation of that ISD system during their GSRP monitoring.
- <sup>23</sup> Although not specifically mandated, annual funding is allocated for ongoing statewide evaluation of GSRP.
- <sup>24</sup> Programs may choose tools that comprehensively assess children according to the Early Learning Expectations in the Michigan Department of Education Early Childhood Standards of Quality for Prekindergarten. The state also allows supplemental tools in particular areas to meet particular needs, but grantees must follow a process for decision-making that is based on data. Additional information can be found here: http://www.michigan.gov/documents/mde/FY17\_GSRP.\_Child\_Assessment\_ SectionADA\_535150\_7.pdf
- <sup>25</sup> Michigan's experience during the three-year Kindergarten Entry Assessment (KEA) pilot project provided evidence that observation-based assessments require a significant level of preparation, training, professional development, and support for kindergarten educators before implementation. MDE is developing a plan and timeline for next steps in implementation of authentic observation-based assessments upon kindergarten entry as part of the MDE Early Literacy Initiative. This work is ongoing. For teachers in schools who have already begun to implement authentic observation-based assessments (schools that participated in Fall 2015), MDE has offered the opportunity to continue using the Teaching Strategies Gold KEA tool in the 2016-2017 school year at the local level. A stakeholder feedback group has been formed and will inform the 2017-2018 implementation of the Kindergarten Entry Status Observation of Skills (KEOS). MDE will provide additional professional development opportunities for teachers in Developmentally Appropriate Practice (DAP) and implementing authentic observation-based assessment of child development skills.

# MINNESOTA - Minnesota Head Start

- <sup>1</sup> By statute, state Head Start funding is non-competitively allocated to all federally designated Head Start grantees in Minnesota. This includes one school district, seven tribal governments, and 24 private, nonprofit agencies, each serving one or more counties. Head Start services are available to eligible residents in all parts of the state.
- <sup>2</sup> In accordance with Head Start regulations, at least 90% of children enrolled in the Minnesota Head Start program qualify for free lunch. Nearly all children are low-income.
- <sup>3</sup> Programs comply with the federal Head Start requirement of at least 3.5 hours per day, four days per week, for 32 weeks per year, which is the most common schedule. A formal process that approves the use of Child Care Assistance funding for Head Start Integrated full-day programming has been established. Extended-day services are also provided through collaborations with the Early Learning Scholarships program.
- <sup>4</sup> State pre-K children, as defined by NIEER, must meet the federal Head Start income guidelines. Effective as of 2007, 35% of enrollment may be children whose family incomes are between 100 and 130% FPL after priority is given to children at or below 100% FPL. Other criteria for eligibility include homeless families and foster children. Families may also be income-eligible if they qualify for child-care services as a participant in Minnesota's TANF program. Reported risk factors may be considered in prioritizing applicants for enrollment in a limited number of enrollment slots. Agencies may work with their parent council to establish additional priorities.
- <sup>5</sup> Eligibility is reassessed between Early Head Start and Head Start, and before a third year of Head Start. Income and other family circumstances are reassessed and support is provided for finding other options if children are found to be no longer eligible.
- <sup>6</sup> Federal Head Start Performance Standards require part-day programs to provide children with at least one-third of their daily nutritional needs (breakfast or lunch), and full-day programs to provide one-half to two-thirds of daily nutritional needs (breakfast, lunch, and a snack).
- <sup>7</sup> At minimum, follows Head Start regulations.
- <sup>8</sup> State authorizing statute requires compliance with federal Head Start requirements. The Learning for English Academic Proficiency and Success Act was added to the state statute for Head Start in the last legislative session. Translators or bilingual staff must be available if 50% or more of children in a class speak a language other than English. Per Head Start Standards, information about enrolled children's program and performance must be presented to families in their home language. Programs are highly encouraged to screen and assess all children in their home language. State early childhood staff are working with K-12 DLL staff to align resources where possible. Many additional supports for DLLs are locally determined.
- <sup>9</sup> Under the Head Start Reauthorization Act of 2007, all lead teachers were required to have at least an AA in Early Childhood Development by October 2011; by September 30, 2013, 50% must have at least a BA in ECE or a related field. By September 30, 2013, all assistant teachers must have at least a CDA or be enrolled in a program to receive a CDA, AA, or BA within two years. In a public school, teachers' union rules require that teachers have at least a BA. Programs are scrutinized annually by the federal Office of Head Start to assess continuing progress toward meeting these goals.
- <sup>10</sup> Assistant teachers must meet Department of Human Services (DHS) licensed child care center regulations which includes a CDA.
- <sup>11</sup> The requirement for in-service professional development is 2% of total work hours. As of December 2007, however, the Head Start reauthorization required 15 clock hours of professional development per year for teachers and assistant teachers. By federal law, Head Start staff must follow the highest standard. For those working full-time, that will be the 2% standard.
- <sup>12</sup> The state funding formula is based on federal resources and unmet need. The funding formula is calculated based on elements used federally to determine funding for the entire Head Start agency. It is then locally determined what proportion of funding goes to birth-to-3 and 3- to 5-year-olds.
- <sup>13</sup> State staff review PIR information and enrollment data, conduct additional surveys throughout the year, and review and approve program work plans. Paperwork is submitted to the state. Head Start programs are monitored per federal Head Start requirements.
- <sup>14</sup> Required assessments of preschool children are determined locally and must comply with federal Head Start requirements. Programs are not required to submit data to the state.
- <sup>15</sup> Additional information can be found here: http://www.mnheadstart.org/outcomes.html.
- <sup>16</sup> Kindergarten assessments are locally determined. Districts are invited to be part of the statewide Kindergarten Entry Profile study but can decline. Districts also assess children throughout the kindergarten year as part of a high level option to receive additional funding.
- <sup>17</sup> Desired Results Developmental Profile (DRDP) is used for the Kindergarten Entrance Profile. Kindergarten staff can use any assessment throughout the year.

# **MISSISSIPPI** - Mississippi Early Learning Collaborative

- <sup>1</sup> The majority of the Early Learning Collaboratives (ELCs) are led by school districts, but some are led by nonprofit organizations. A few ELCs include multiple school districts. In addition to the school districts that offer preschool, 15 out of 82 counties in the state offer preschool programs.
- <sup>2</sup> On enrollment forms, parents do not identify themselves by both ethnicity and race. Therefore, parents who indicate an ethnicity are not also required to report their race. The Early Learning Collaborative has 45 children identified as Hispanic/Latino. The rest of the responses total 1,736.
- <sup>3</sup> Eligibility is coordinated with Head Start agencies in local areas and shall not cause a reduction in the number of children served by Head Start.
- <sup>4</sup> At least one meal is required. All programs voluntarily provide snacks. Of the 48 sites included in the collaborative, 39 report serving breakfast, lunch, and snack daily. Another nine reported serving breakfast and lunch daily.
- <sup>5</sup> Assistant teachers are required to have an associate degree in Early Childhood Education, Child Development, or an equivalent field; or an associate degree in any field and a Child Development Associate credential, a Montessori certification, or an equivalent certification.
- <sup>6</sup> A total of \$812,686 was donated for the 1:1 tax credit donations to the preschool program. Individuals or corporations may make a contribution to support the local matching fund of an approved early learning collaborative. The donated funds may be eligible to receive a state tax credit for the donated amount up to \$1,000,000. The Mississippi Department of Revenue can approve 1:1 tax credits up to the amount the Legislature appropriates to the Early Learning Collaborative Act each year.
- <sup>7</sup> The state provides \$2,150 per full-time child enrolled. The ELC provides a 1:1 match to make the total investment for each child \$4,300.
- <sup>8</sup> The Mississippi State Kindergarten Readiness Assessment is administered twice a year. For preschool, the ELC also uses selected assessments that are aligned with the standards.

#### **MISSOURI** - Missouri Preschool Program

- <sup>1</sup> Missouri Preschool Program (MPP) contracts are awarded through a competitive bid process, with the grants limited to five years. Therefore the number of programs and children served changes every year.
- <sup>2</sup> Enrollment is not collected on specific languages spoken, just the number of English Language Learners (ELL). The number of 3-year-old ELL children was 39 and the number of 4-year-old ELL children was 170 for a total ELL enrollment of 209.
- <sup>3</sup> The program must provide 6.5 hours of educational activities appropriate to the developmental level of the child per day between the hours of 7:30 am and 5:00 pm. Only governmental entities or public school districts (awarded funding prior to FY16) can provide a part-day program (minimum of 3 hours) to better serve those children participating in other district programs, such as Title 1 and/or early childhood special education.
- <sup>4</sup> Preschool programs are required to operate five days per week. However, public schools that implement a four-day school week for their K-12 grade levels can also implement a four-day schedule for the preschool program. The length of the preschool day is expected to mirror the length of the K-12 day.
- <sup>5</sup> Preschool programs must provide educational activities appropriate to the developmental level of the child 12 months a year. Governmental entities or public school districts only may provide preschool services for no less than the school year.
- <sup>6</sup> Eligibility is determined by age, with all other eligibility requirements determined locally.
- <sup>7</sup> If a preschool program charges a fee for preschool, they must implement a sliding scale fee. The sliding scale fee is required for families whose income does not exceed 185% FPL.
- <sup>8</sup> Part-day programs are required to provide one meal or one snack. School-day programs are required to provide one meal and two snacks or two meals and one snack.

- <sup>9</sup> All preschool programs are required to partner with their local Parents as Teachers (PAT) program which provides parent education and health and developmental screenings. In addition, PAT also provides referrals to services that may be beneficial to the family based on need/request.
- <sup>10</sup> Missouri Early Learning Goals are inclusive of children infant to kindergarten entry; new K-12 standards were approved in April 2016.
- <sup>11</sup> Lead teachers must have Early Childhood Teacher Certification, Early Childhood Special Education Teacher Certification, or a four-year college degree in child development.
- <sup>12</sup> A total of 92 teachers have Early Childhood Certification; four teachers have Early Childhood Special Education Certification; six teachers have Early Childhood/Early Childhood Special Education Certification; and seven teachers have a four-year child development degree.
- <sup>13</sup> Assistant teachers must have a CDA, two-year Associate Degree in Child Care/Education or 60 college hours with a minimum of three college credit hours in early childhood, child development, or child/family related courses and experiences working in a program with young children and their families.
- <sup>14</sup> Salaries and benefits must be commensurate with other professionals in similar positions.
- <sup>15</sup> Classroom observations are used for teacher and program goal setting and planning for professional development.

#### **NEBRASKA** - Nebraska Early Childhood Education Program

- <sup>1</sup> Some school districts begin a program, or add capacity, with the help of competitive grants. Other school districts may start a program without grant funding, and may receive state aid funding for their 4-year-olds after three years of program approval.
- <sup>2</sup> Most programs operate 3.5 to four hours per day, four or five days per week. Schools are encouraged to partner with Head Start and community providers, but there is no formal agreement at the state level. Programs must operate at least 12 hours per week. Additionally, if districts receive State Aid (TEEOSA) or an early childhood grant, the program must operate at least 450 hours per year.
- <sup>3</sup> Children with IEPs may participate, based on their IEPs. Kindergarten-age children with verified disabilities may enroll in preschool if their IEP team determines that the child can be served best in preschool. Districts may enroll children under age 3, but the district would have to meet staffing and group size requirements established for younger children. The state does not have a minimum age for preschool entry.
- <sup>4</sup> Eligibility may be determined by low income, disability or developmental delay, low parent education, non-English speaking family, teen parent, or low birth weight. While all prekindergarten age-eligible children may be served in a school district early childhood program, regardless of their abilities, disabilities, or the social, linguistic, or economic diversity of the children's families, funds are targeted to children with at least one risk factor. Some districts enroll all age-eligible children, while others may use locally determined risk factors in addition to those specified by the state. The program may serve children with no risk factors, including income.
- <sup>5</sup> If charging fees, districts must utilize a sliding fee scale, but may set the scale at whatever level they choose. Children who are receiving services through Head Start or IDEA pay nothing. For other children, districts must utilize a sliding fee scale, but may set the scale at whatever level they choose to fit with their community.
- <sup>6</sup> A meal and/or snack meeting USDA requirements must be served each session.
- <sup>7</sup> Coaching is provided to district classrooms that participate in the state QRIS or are Pyramid Model full implementation sites.
- <sup>8</sup> If teachers have endorsements other than those listed, they must take college coursework and make annual progress until they obtain an early childhood endorsement. Regardless of where the classroom is housed, it is considered a public school program.
- <sup>9</sup> School districts who hire the teacher or assistant teacher put the teacher or assistant on the district salary schedule. Occasionally, in programs that partner with Head Start or child care, the non-school entity may employ the teacher or assistant. In those cases, the teacher or assistant may not receive a salary on par with elementary teachers.
- <sup>10</sup> Classroom embedded support is not required, but is available for school district classrooms that participate in the state QRIS. Teachers in schools that are implementing program-wide Pyramid Model must receive coaching.
- <sup>11</sup> Local sources include local district funds, parent fees, community agencies and resources, and other sources. Funding for the program includes an allocation for the grant program, as well as funding in the state aid formula. In the third year of approval by the Nebraska Department of Education, the count of 4-year-olds is put into the formula along with other data. Equalization aid is then calculated for the next year. A total of \$4,593,005 is included in the state funds. These are state flex funds for special education.
- <sup>12</sup> School districts that have met requirements to have an approved early childhood program for the required number of years are qualified to be part of the State aid calculations which is based on the number of 4-year-olds multiplied by the number of hours in session multiplied by 0.6. The district's overall need calculation is matched to their ability to fund the need. If the need outweighs the ability to fund the need, then the district is eligible to receive the state aid.
- <sup>13</sup> New programs have two years of ECERS-R observations done by staff who are reliable with the state anchor (who is reliable with the authors of the tool). Additionally, beyond the second year of operation, schools can choose which tool, ECERS-R or CLASS, to be observed and rated on. After the new classrooms/teachers are identified, a percentage of the remaining classrooms are observed. The basis of those observations is: history of past observations, length of time between observations, etc. It is possible, however, that not all sites will receive a visit.

#### **NEVADA** - Nevada State Prekindergarten Program

- <sup>1</sup> State PreK grantees include 11 school districts and 1 community-based organization. Eleven out of 17 districts have State PreK that meet state pre-K guidelines; however, other districts do offer other prekindergarten programs funded through Title I and/or Zoom DLL funding.
- <sup>2</sup> Priority is given to 4-year-olds who will be entering kindergarten the following school year. However, if there is an opening and no other 4-year-olds are on the waiting list, programs may enroll younger children. The age of five children is unknown.
- <sup>3</sup> The enrollment by home language breakdown total does not equal the total enrollment because data are missing on 13 children.
- <sup>4</sup> Data are available by income range based on families, not children. Families with multiple children enrolled in pre-K are only listed once (for a total of 1,511 families): Not reported: 14 families; Under \$9,999: 193 families; \$10,000-\$19,999: 324 families; \$20,000-\$29,999: 292 families; \$30,000-\$39,999: 247 families; \$40,000-\$49,999: 164 families; \$50,000+: 277 families.
- <sup>5</sup> The majority of state-funded pre-K programs are half-day (minimum of 10 hours/week) unless braided with PDG funds which results in a full day (minimum of 25 hours/ week).
- <sup>6</sup> Children who are eligible for kindergarten are not eligible for State PreK unless a local determination is made based on the child's IEP.
- <sup>7</sup> Districts or programs determine eligibility based on highest need (i.e., low income, DLLs, homeless, etc.).
- <sup>8</sup> Redetermination is not included in state policy but is permitted at the discretion of districts if claims of irregular attendance are verified, or if claims that a family moves outside of the district are substantiated and it is determined appropriate to fill the space with another child on the waiting list.
- <sup>9</sup> Programs are required to follow NAEYC guidelines.
- <sup>10</sup> Most programs are half-day and therefore, only require snacks. Full-day programs, as supported by PDG grant, must provide meals.
- <sup>11</sup> Screenings are encouraged, and are locally determined. All programs are required to conduct the Brigance screener starting this year.
- <sup>12</sup> SB405/Zoom legislation provides support in PreK for DLLs.
- <sup>13</sup> A partnership with WIDA was formed to develop a new PreK DLL assessment.
- <sup>14</sup> The state is in the process of creating birth-3rd grade standards as a more comprehensive document.
- <sup>15</sup> State PreK funding is allocated each legislative session out of the DSA. The funding level has remained relatively flat since the program began more than 16 years ago.
- <sup>16</sup> Previously, formal evaluations including ECERS observations were conducted in all State PreK programs; however, due to loss of evaluation funding, this is no longer possible. Only programs that are able to participate in QRIS are formally observed using ECERS-3 and CLASS. In 2015-2015, only PDG programs receive structured observations through the QRIS (using ECERS-3 and CLASS) at the beginning of the year, and another at the end of the year.

- <sup>17</sup> Previously, funding for evaluation was available annually, and then every other year. This funding has been cut and is no longer available.
- <sup>18</sup> Programs are currently required to use EOWPVT and WIDA for DLLs. In 2016-2017, programs will be required to use the Brigance screener that measures all domains. Many programs use Teaching Strategies GOLD, but assessment data are not collected at the state level.
- <sup>19</sup> Nevada will begin using the Brigance screener for all kindergarteners next school year.

### **NEW JERSEY** - New Jersey Former Abbott Preschool Program

- Primary oversight for the preschool education program is through the state Department of Education's (DOE) Division of Early Childhood Education. The Department of Children and Families oversees licensing of private preschool providers. The Department of Human Services has oversight of the wraparound program. The State Head Start Collaboration office serves as a liaison between Head Start agencies and all of the above Departments.
- <sup>2</sup> Thirty-one districts are required to offer the program due to a state Supreme Court decision. The remaining four districts are required to offer the program after applying to expand their existing program, beginning in the 2008-2009 school year.
- <sup>3</sup> The enrollment includes only general education preschoolers. Preschoolers with disabilities are also included in the program, but are funded separately and are not included in the enrollment numbers.
- <sup>4</sup> This is out of 43,597 children.
- <sup>5</sup> The DOE funds the program for the school calendar year and day. All programs must operate for at least six hours. Some programs offer extended-day programs with an additional four hours of wraparound care for income-eligible children. The wraparound program is funded through the Department of Human Services (DHS). Some districts have also used surplus or Title 1 funds to provide summer programs.
- <sup>6</sup> Kindergarten age-eligible children with an IEP that requires enrollment in a preschool program may enroll in the program, but are funded through special education.
- <sup>7</sup> The program is offered in the poor urban districts initially identified by the New Jersey Supreme Court in 1990 as having at least 40% of children who qualify for free or reduced-price lunch and five additional districts designated by the legislature. All 3- and 4-year-old children within those districts are eligible to participate.
- <sup>8</sup> Only district residents are eligible for the program. Children who move outside of the district would no longer be eligible to attend the program. Districts continually monitor to ensure that children are still district residents and therefore still eligible for the program.
- <sup>9</sup> As part of the state's Race to the Top grant, all programs are required to offer Community Parent Involvement Specialists that connect families with social services such as mental health services and insurance.
- <sup>10</sup> Bilingual classes are generally encouraged. In specific cases, monolingual non-English classes may be permitted as part of a transition into a bilingual model including English, but a bilingual, non-English class (while not prohibited) would not be encouraged. The quality of bilingual instruction is monitored through New Jersey's Self-Assessment Validation System (SAVS).
- <sup>11</sup> Teachers with a Standard Elementary School Endorsement (preschool through grade eight) may teach preschool if they have an equivalent of two academic years of full-time experience teaching 3- and 4-year-olds or demonstrate content knowledge in line with a district's established documentation requirement. Additionally, teachers with the following certifications may apply for preschool licensure, take the Praxis exam, and begin the process of obtaining a P–3 certificate: K–5 certificate, out-of-state certificate that includes preschool, Teacher of the Blind or Partially Sighted, Teacher of the Deaf or Hard of Hearing, Teacher of the Handicapped certificate, or Teacher of Students with Disabilities certificate. Nursery school (P–K) certificates are no longer granted but still recognized for current holders.
- <sup>12</sup> In districts or schools supported by Title I funding, assistant teachers are required to meet the education/degree requirements specified for Title 1.
- <sup>13</sup> Coaches are provided at a ratio of one coach for 20 classrooms. Master teachers are provided at a ratio of one to 18 classrooms.
- <sup>14</sup> Districts receive a per pupil amount for each projected child depending on where the child is being served (district, Head Start, or private provider setting). However, if this amount provides less for the district than it received in the 2008-2009 school year, the district's aid reverts back to what it was in the 2008-2009 school year.
- <sup>15</sup> School districts are permitted to subcontract with faith-based programs without religious content during the school day.
- <sup>16</sup> The former Abbott districts report their classroom and child assessment data, as well as their demographics, looking at absenteeism rates, etc. Every classroom in the Preschool Expansion Grant districts received a visit. All Abbott preschool classrooms also are observed by master teachers.
- <sup>17</sup> New Jersey switched to the ECERS-3 as the state believes it is a better measure of quality.
- <sup>18</sup> New Jersey has a Self Assessment and Validation System that is used to look at implementation of the components of high quality.

#### NEW JERSEY - New Jersey Former Non-Abbott Early Childhood Program Aid

- <sup>1</sup> Primary oversight for the preschool education program is through the state Department of Education's (DOE) Division of Early Childhood Education. The Department of Children and Families oversees licensing of private preschool providers. The Department of Human Services (DHS) has oversight of the wraparound program. The State Head Start Collaboration office serves as a liaison between Head Start agencies and all of the above Departments.
- <sup>2</sup> The enrollment includes only general education preschoolers. Preschoolers with disabilities are also included in the program, but are funded separately and are not included in the enrollment numbers. Only districts that have between 20% to 40% of children eligible for free and reduced-price lunch receive funding for this initiative.
- <sup>3</sup> Children funded through the Preschool Expansion Grants are enrolled in ECPA or ELLI programs only. There are 883 additional 4-year-olds in the grant-funded program enrolled but not included in the total.
- <sup>4</sup> Preschool Expansion Grant districts serve some children in Head Start settings. Children in the ECPA program are served in public schools.
- <sup>5</sup> Districts may operate either a part- (2.5 hours per day) or school-day (six hours per day) program. DHS funding may be used to extend beyond a full-day for incomeeligible children. Some school-day children may receive extended-day services, but the number of students is unknown. The DOE funds the program for the school year. If the district or provider runs a wrap-around program through DHS, the program would then extend services for the full calendar year. The number of children in full- and part-day programs reflects children across all three New Jersey preschool programs.
- <sup>6</sup> Kindergarten age-eligible children with an IEP that requires enrollment in a preschool program may enroll in the program, but are funded through special education.
- <sup>7</sup> Only district residents are eligible for the program. Children who move outside of the district would no longer be eligible to attend the program. Districts continually monitor to ensure that children are still district residents and therefore still eligible for the program.
- <sup>8</sup> Breakfast, lunch, and snack are required for at-risk students in school- and extended-day programs. Although not specified in the Early Childhood Administrative Code, meals provided in school programs must meet USDA guidelines.
- <sup>9</sup> Teachers with a Standard Elementary School Endorsement (preschool through grade eight) may teach preschool if they have an equivalent of two academic years of full-time experience teaching 3- and 4-year-olds or demonstrate content knowledge in line with a district's established documentation requirement. Additionally, teachers with the following certifications may apply for preschool licensure, take the Praxis exam, and begin the process of obtaining a P–3 certificate: K–5 certificate, out-of-state certificate that includes preschool, Teacher of the Blind or Partially Sighted, Teacher of the Deaf or Hard of Hearing, Teacher of the Handicapped certificate, or Teacher of Students with Disabilities certificate. Nursery school (P–K) is no longer granted but still recognized for current holders.
- <sup>10</sup> In districts or schools supported by Title I funding, assistant teachers are required to meet the education/degree requirements specified for Title 1.
- <sup>11</sup> All state funding is technically run from the state aid formula. However, for the 2015-2016 school year, the former ECPA districts were funded in a manner similar to prior years, which was not according to the funding formula. Districts may, but are not required to, contribute local funding to the operation of the program.
- <sup>12</sup> Districts are required to do an annual self-assessment and are also required to use a curriculum that includes performance-based assessment measures. The results of these assessments are not collected by the state, however.

### **NEW JERSEY** - New Jersey Former Early Launch to Learning Initiative

Primary oversight for the preschool education program is through the state Department of Education's (DOE) Division of Early Childhood Education. The Department of

Children and Families oversees licensing of private preschool providers. The Department of Human Services (DHS) has oversight of the wraparound program. The State Head Start Collaboration office serves as a liaison between Head Start agencies and all of the above Departments.

- <sup>2</sup> The enrollment includes only general education preschoolers. Preschoolers with disabilities are also included in the program, but are funded separately and are not included in the enrollment numbers. These districts also reported serving 230 three-year-olds who are not funded with state dollars and were not included in the total enrollment. This enrollment also reflects only the districts that do not receive funding through the former ECPA program, so as not to double count any students.
- <sup>3</sup> Children funded through the Preschool Expansion Grants are enrolled in ECPA or ELLI programs only. There are 883 additional 4-year-olds in the grant-funded program enrolled but not included in the total.
- <sup>4</sup> Some programs are part-day, some programs are school-day, and some programs offer a combination of both. Some programs participate in DHS wraparound programs for before- and after-care. The DOE funds the program for the school year. If the district or provider runs a wrap-around program through DHS, the program would then extend services for the full calendar year. The number of children in full- and part-day programs reflects children across all three New Jersey programs.
- <sup>5</sup> Kindergarten age-eligible children with an IEP that requires enrollment in a preschool program may enroll in the program, but are funded through special education.
- <sup>6</sup> Children are required to qualify for free and reduced-price lunch (185% FPL) and be a resident of the district. However, districts may allow for other students in unusual circumstances to be eligible for the program. A district may make a case for establishing eligibility based on extenuating circumstances when submitting its annual plan.
- <sup>7</sup> Only district residents are eligible for the program. Children who move outside of the district would no longer be eligible to attend the program. Districts continually monitor to ensure that children are still district residents and therefore still eligible for the program.
- <sup>8</sup> For half-day programs, only snack is provided. For a full-day program, breakfast and lunch may be provided.
- <sup>°</sup> Teachers with a Standard Elementary School Endorsement (preschool through grade eight) may teach preschool if they have an equivalent of two academic years of full-time experience teaching 3- and 4-year-olds or demonstrate content knowledge in line with a district's established documentation requirement. Additionally, teachers with the following certifications may apply for preschool licensure, take the Praxis exam, and begin the process of obtaining a P-3 certificate: K-5 certificate, out-of-state certificate that includes preschool, Teacher of the Blind or Partially Sighted, Teacher of the Deaf or Hard of Hearing, Teacher of the Handicapped certificate, or Teacher of Students with Disabilities certificate. Nursery school (P–K) is no longer granted but still recognized for current holders.
- <sup>10</sup> In districts or schools supported by Title I funding, assistant teachers are required to meet the education/degree requirements specified for Title 1.
- <sup>11</sup> Some districts may use local funding to supplement state funding, but amounts are unknown. All state funding is technically run from the state aid formula. However, for the 2015-2016 school year, the former ELLI districts were funded in a manner similar to prior years, which was not according to the funding formula. Districts may, but are not required to, contribute local funding to the operation of the program. Districts must use local funds or charge tuition to serve regular income general education students and must also use special education funding to serve children with IEPs.

#### NEW MEXICO - New Mexico PreK

- <sup>1</sup> Children, Youth and Families Department funds NM PreK classrooms at Head Start sites. However, these PreK children are not enrolled in Head Start.
- <sup>2</sup> New Mexico's database combines Asian and Pacific Islander and does not have a biracial/multi-racial category.
- <sup>3</sup> New Mexico funds two program schedules: half-day which is 450 total classroom hours, and NM Extended-day which is 900 total classroom hours. Half-day programs must operate at least 1.5 hour per day and NM Extended-day programs must operate at least five hours per day.
- <sup>4</sup> Only programs funded by Children, Youth, and Families Department are allowed to serve 3-year-olds.
- <sup>5</sup> Funding priority is given to age-eligible children who live in the attendance zone of a Title 1 school.
- <sup>6</sup> Staff to child ratios may be smaller in classrooms with children with IEPs, for example one adult to four children.
- <sup>7</sup> One meal is required for half-day programs; two meals are required for NM Extended-day programs.
- <sup>8</sup> The components of a full physical exam are determined by the child's physician. All screenings must be completed by the third month of attendance.
- <sup>9</sup> Nurses who provide health services for children are available in public school settings only.
- <sup>10</sup> The PreK Consultation Model provides monthly three-hour classroom visits, which include a 30- minute debriefing period with the teacher and educational assistant.
- <sup>11</sup> Curricula are locally determined but must be aligned with the NM Early Learning Guidelines.
- <sup>12</sup> Teachers in nonpublic settings who do not yet possess a state-issued Early Childhood teaching license or BA degree must complete a minimum of six credit hours annually toward the degree or license. Teachers in public schools must hold at least a BA/BS and a teaching license in Early Childhood. If a public school teacher is hired who holds either a special education PreK-12 license or an Elementary K-8 license, that person must complete all requirements for an early childhood B-3rd grade or PreK-3rd grade teaching license within two years of hire.
- <sup>13</sup> Assistant teachers in both public and nonpublic settings are expected to have an AA in Early Childhood Education, but may be hired without an AA with an approved professional development plan to complete at least six college credits annually toward the requirement. New Mexico offers an Education Assistant license for P-12 in public settings only.
- <sup>14</sup> The PreK Program Standards require that preschool program personnel are compensated with salaries and benefits that are comparable to other professional positions that have similar qualifications and responsibilities.
- <sup>15</sup> A minimum of two hours per week is required even if that exceeds what is provided in K-3.
- <sup>16</sup> Health and safety professional development is required and provided by Child Care Licensing and school districts, thus it is not funded by NM PreK.
- <sup>17</sup> Faith-based programs cannot have religious content during PreK hours.
- <sup>18</sup> Additional information can be found here: https://www.newmexicoprek.org/index.cfm?event=public.prek.MaterialsPolicy&cachefix=679
- <sup>19</sup> The Public Education Department requires (Administrative Code 6.30.5.12) schools with full-day kindergarten programs to conduct age-appropriate assessments to determine the placement of students at instructional level within the first 30 instructional days of the school year. Under the Race to the Top initiative, a state-wide Kindergarten Entry Assessment, the Kindergarten Observation Tool, will be fully implemented in the fall of 2016. School districts and charter schools that receive Reads to Lead funding from the state must conduct the DIBELS Next or IDEL assessments. Other districts have local control. The New Mexico Kindergarten Observation Tool was field tested in approximately 50% of school districts as a kindergarten entry assessment in 2015-2016. All districts used the instrument to assess children in 2016-2017.

#### NEW YORK - New York State Prekindergarten Program

- <sup>1</sup> New York State has several separate pre-K funding streams, five of which are competitive awards. Universal PreK (UPK) is administered to school districts via an allocation grant award that is non-competitive. Of the approximately 700 school districts in New York State, roughly 440 districts have an award via this program. However, the funds and awardees for this program have been frozen for nearly a decade. For the last four years, school districts have been able to apply for additional funding via a competitive basis for five-year grant awards.
- <sup>2</sup> One competitive grant, the Expanded Prekindergarten Program, allowed school districts to apply to serve both 3- and 4-year-olds as long as the number of slots for 3-year-olds did not exceed the number of slots for 4-year-olds in the district.
- <sup>3</sup> Preschool in two districts is entirely funded by PDG.
- <sup>4</sup> Whether or not children are enrolled in Head Start and state-funded preschool varies by school district. A total of 6,040 children attended UPK at a Head Start provider. Additional UPK children may also receive Head Start services.
- <sup>5</sup> This is an estimation based on the aggregate three-year free and reduced-price lunch averages by districts that have state-funded prekindergarten.
- <sup>6</sup> Funding is for a minimum of 2.5 hours per day, but many programs opt to run a school-day or extended-day program using local funds or other funding sources. Programs must operate five days per week for a minimum of 180 days per year. Some school districts are required to budget, plan, and operate for the full calendar year, but that does not necessarily mean that programs are being provided beyond the school year. However, all school districts can elect to provide prekindergarten

programming in the summer if they wish, using the same prekindergarten funds.

- <sup>7</sup> Age-eligible children must be residents of the respective school district in order to enroll into state-funded prekindergarten. For children served by the Federal Preschool Development Grant, eligibility is determined by an income requirement.
- <sup>8</sup> Programs that are less than three hours require a nutritional meal or snack. Programs that are more than three hours require meals and snacks to ensure the nutritional needs of the children are met. Meals are required to be offered for full-day programs.
- Programs are required to ensure that children with limited English proficiency are provided equal access to the prekindergarten program and opportunities to achieve the same program goals and standards as other children. Districts can choose to implement specific supports for DLLs.
- <sup>10</sup> Lead teachers in public school settings are required to have a BA if hired prior to 1978 and an MA if hired after 1978. Lead teachers in nonpublic settings hired prior to 2004 are required to have an AA or CDA. Since 2004, programs in nonpublic settings have been required to meet the same certification requirements as those in public settings. A legislative amendment allowed certain community-based organizations to be exempt from this requirement until at least 2013. These teachers must also have a plan to become certified within five years or by 2013. Effective July 1, 2010, all newly hired teachers in nonpublic settings must have a BA in Early Childhood Education or a related field and also have a written plan to earn a New York State (NYS) teaching license or certificate valid for services in the early childhood grades within five years. Nonpublic programs lacking licensed/certified lead teachers must employ an onsite education director possessing a NYS teaching license or certificate in early childhood grades.
- <sup>11</sup> The Level I Teaching Assistant Certificate, the entry-level certificate for teacher assistants, permits the holder to provide direct instruction to students under the general supervision of a certified teacher. Assistant teachers in nonpublic settings are required to have a HSD or meet standards of the licensing or registering agency. Some nonpublic school settings require a temporary license, or continuing certificate, which permits the continued employment of an individual who has completed one year of experience under a temporary license and who has six semester hours of study in education.
- <sup>12</sup> Guidelines indicate that assistant teachers with the Level III Teaching Assistant certificate complete 75 hours per five years of in-service professional development in order to maintain certification. However, local public school districts make decisions regarding the appropriateness of activities to fulfill this requirement.
- <sup>13</sup> State policy does not specifically require ongoing classroom-embedded support but local districts can decide to provide it.
- <sup>14</sup> Local grantees may access federal CCDF and USDA Child and Adult Food Program funds in addition to state general funds. The amount of these federal funds is unknown.
- <sup>15</sup> A half-day state aid rate is based on each school district's combined wealth ratio. The state aid formula takes into account several factors including: foundation cost (the cost of providing the average student with an education that meets state learning standards), pupil need (the proportion of pupils eligible for free and reduced-price lunch), regional cost index, and expected local contribution.
- <sup>16</sup> School districts are required to establish a process for assessing the developmental baseline and ongoing progress of all children participating in the program in at least language, cognitive, and social skill development. Specific assessments used are determined locally. Additional information is found here: https://govt.westlaw.com/nycrr/ Document/I36610ef5c22211ddb29d8bee567fca9f?viewType=FullText&originationContext=documenttoc&transitionType=CategoryPageItem&contextData=(sc.Default)

#### NORTH CAROLINA - North Carolina Pre-Kindergarten Program

- <sup>1</sup> Although the North Carolina Department of Health and Human Services has authority over the state's pre-K program standards and fiscal components, the North Carolina State Board of Education Policy dictates teacher education and educator licensure.
- <sup>2</sup> Wraparound services are determined locally. A few programs based in public schools may operate on a year-round calendar, but funding is limited to 10 months (36 weeks) of services.
- <sup>3</sup> State statute allows for a child's early entry into kindergarten using state-established guidelines and based on information submitted by the child's parent or guardian that the child is gifted and has the maturity to justify admission to school.
- <sup>4</sup> Twenty percent of a county's North Carolina Pre-K slots allocation may be used to serve children above 75% SMI, provided they have another designated risk factor.
- <sup>5</sup> Classrooms that provide for inclusive settings for children with disabilities may require an adult-to-child ratio lower than 1:9. For Local Education-administered public school exceptional children's preschool classrooms, ratios must be in compliance with the North Carolina Policies Governing Services for Children with Disabilities, Section 1508-2, (Appendix B) at: http://ec.ncpublicschools.gov/policies/nc-policies-governing-services-for-children-with-disabilities.
- <sup>6</sup> Per the North Carolina Child Care Rules, each NC Pre-K child must be screened for developmental delays within 90 days of entering program. The screenings are used solely for the purpose of identifying children who should be referred for further evaluation and testing based on concerns in one or more developmental domains. State forms are provided to families for obtaining children's health assessments that include health care provider statements to refer children for further assessments and tests.
- <sup>7</sup> Other support services are provided as needed, such as family support and other types of health interventions (e.g., mental health, positive parenting services) for children with unique needs or challenging behaviors and their families.
- <sup>8</sup> The Division of Child Development and Early Education (DCDEE) has developed a plan to better serve English Language Learners (ELLs), with additional efforts made at the local level to accommodate ELLs and to comply with Title VI laws. North Carolina birth through kindergarten (BK) licensed teachers receive formal, needs-based mentoring/coaching support linked to child assessment and teacher evaluation to improve instructional practices for children served. Coaches/mentors who support BK licensed teachers are required to use a variety of resources and strategies defined by the North Carolina Foundations for Early Learning and Development standards. North Carolina Mentor Teacher Standards align with the North Carolina Professional Teaching Standards.
- <sup>9</sup> North Carolina's early learning standards are aligned with the state's Standard Course of Study (Common Core State Standards and North Carolina's Essential Standards), the standards for what kindergarten children should know and be able to do. The focus of NC's early learning standards is on the early precursor skills that research suggests are important or lay the foundation for what children learn later. The early learning and development standards (ELDS) domains addressed in the standards include: Approaches to Play and Learning, Emotional-Social Development, Health and Physical Development, Language Development and Communication, and Cognition Development.
- <sup>10</sup> BK licensed teachers are assigned mentors to support the implementation of curricula and formative assessments that is informed by and aligned with the ELDS to support children's development and learning needs.
- <sup>11</sup> Additional information on curricula can be found at: http://ncchildcare.dhhs.state.nc.us/providers/pv\_sn2\_curriculum.asp.
- <sup>12</sup> All lead teachers in NC Pre-K classrooms are required to hold a BA/BS in CD/ECE or a related field as well as a NC BK or PK/K add-on license. Teachers in public or nonpublic settings may begin in an NC Pre-K classroom with a minimum of a BA/BS in child development, early education or related field, and be eligible to hold a NC Lateral Entry BK license while working to attain an NC BK or Preschool initial and continuing license within three years. Teachers holding an NC BK or initial or continuing license are formally mentored and required to receive formative and summative evaluations annually and according to the licensure cycle. The AA degree in ECE/CD is permitted only as the minimum education/degree requirement for a long-term substitute teacher (up to 12 weeks). The Intervention Specialists for P-12 in Vision or Hearing Impaired would be accepted if teacher had an endorsement related to early childhood or a BK license.
- <sup>13</sup> Teacher Assistants in public schools may meet requirements specified by NCLB. NC Pre-K generally requires assistant teachers who meet NCLB requirements but do not hold a CDA to have six semester hours of ECE coursework or two years of experience in an early childhood classroom. An AA in ECE is highly encouraged for assistant teachers.
- <sup>14</sup> Professional development for assistant teachers applies only to those working toward AAS Early Child Education or CDA degrees. Teachers holding a Lateral Entry license and working toward the NC BK Continuing licensure requirements will participate in a minimum of six documented semester hours per year, prescribed by a Plan of Study, a professional development plan, and the three-year Beginning Teacher Support Program (BTSP). The BTSP requires mentoring/performance evaluation. The BTSP is a three-year in-service professional development requirement for any teacher holding less than a continuing license (initial or lateral entry).
- <sup>15</sup> All DCDEE regulated (licensed) programs are required to meet health and safety training requirements as stipulated under the NC Child Care Rules, which would include an NC Pre-K Programs.
- <sup>16</sup> The amount of mentoring/coaching that a NC BK licensed teacher receives is based on formally assessed needs that result in different types of professional development plans, including specific strategies designed in collaboration with the teacher, evaluator, and site administer (private sites). Teachers need different amounts of onsite coaching/mentoring (scaffolding, role modeling, etc.), based on each teacher's formally assessed needs. Approximately 50 contact hours per teacher with less than a BK

Continuing License are budgeted.

- <sup>17</sup> There is additional funding through a required local match, but the amount could not be reported.
- <sup>18</sup> The North Carolina Rubric for Evaluating Teachers is used to conduct formative observations and summary evaluations of teacher effectiveness for all NC Pre-K teachers (public and private) based on level and type of BK license held. Work includes teacher self assessment, mentoring, evaluation and professional development defined by assessed needs; schedule set by NC State Education Board Policy. Additionally, every NC Pre-K site receives at least one onsite monitoring visit annually by the local contracting agency, which is monitored by the state. ECERS-R evaluations are conducted as part of the rated license system.
- <sup>19</sup> ECERS-R observations are conducted as part of the QRIS contracted agency; DCDEE regulatory child care consultants conduct regular compliance visits per NC Child Care Rules; BK teachers receive structured formative observations/summary evaluations per North Carolina Professional Teaching Standards based on level and type of license held.
- <sup>20</sup> Documentation of children's learning data collected by each local NC Pre-K program and DCDEE child care consultants monitor for compliance with collection of data. Mentors and Evaluators (for BK licensed teachers) check to ensure use of data to inform child learning (includes families), teacher planning and professional development. Results of classroom quality ECERS-R assessments are collected and reported by independent assessor to DCDEE.
- <sup>21</sup> The NC Educator Effectiveness System under NC State Board Policy requires BK licensed teachers to be formally mentored/coached and evaluated using formative and summative evaluation procedures annually, based on type and level of BK licensure held. Additional information is collected about the level and number of mentoring visits and formal evaluation of NC BK licensed teachers and the number of teachers, directors, mentors and evaluators who have completed required mentor and evaluator training to prepare for NC educator licensure services. Teacher performance data: developing, proficient, accomplished or distinguished ratings are required annually and by BK licensure type. The framework is required for teachers in both nonpublic and public schools. Teachers are required to use self-assessment and mentoring services based on teachers' assessed needs using the NC Rubric for Evaluating NC Teachers/NC Professional Teaching Standards
- <sup>22</sup> Classroom staff may select from a list of approved formative assessments (see: http://ncchildcare.dhhs.state.nc.us/PDF\_forms/NCPre-K\_Program\_Requirements\_ Guidance.pdf). Staff are required to conduct ongoing (regular) formative assessments to gather information about each child's growth and skill development, as well as to inform instruction. All formative assessments used by the NC Pre-K Program must be approved by the NC Child Care Commission based on the assessment tool's ability to collect information on children's behaviors, development, skills, knowledge, strengths, needs and interests across all domains of development. Assessment tools are aligned with the NC Foundation for Early Learning and Development to meet this requirement.
- 23 Additional information on kindergarten assessments is found here: http://www.ncpublicschools.org/curriculum/languagearts/elementary/k2literacy/

#### **OHIO** - Ohio Early Childhood Education

- <sup>1</sup> Since 2006-2007, grants have been awarded based upon a poverty index. With new funds added in 2015-2016, grants were awarded to high-quality preschool programs located within district boundaries that have high needs (i.e., high poverty and low achievement). Ohio expanded its eligible providers to also include public districts, chartered nonpublic districts, charter schools, and child care programs. Ohio has a total of 380 grantees.
- <sup>2</sup> Ohio funded 14,765 children with a per-child allocation of \$4,000. Total enrollment exceeded 14,765 children, so all enrollment breakdowns are based on 14,765 figure. Enrollment breakdowns are estimated figures based on funded enrollment of 14,765 children only and not the total cumulative enrollment. Although legislation says that children should not be age-eligible for kindergarten (age 5) when in pre-K, there are two locally determined school entrance dates (August 1 or September 30) in Ohio, so 5-year-olds may enroll in the program if they are not eligible for kindergarten. Children can turn five after August 1 but before September 30, depending on the district of residence. As such, 2,719 children were over 4 years old but not yet eligible for kindergarten. These children are counted as 4-year-olds as per the NIEER Yearbook age groupings.
- <sup>3</sup> House Bill 64 allows preschool to extend the day using publicly funded child care dollars for children who are eligible at or below 130% FLP.
- <sup>4</sup> There are two locally determined school entrance dates for kindergarten in Ohio (August 1 or September 30). Depending on the local district's entrance date it is possible that 5-year-olds may enroll in the program if not age eligible for kindergarten or if they turn five after August 1 but before September 30, depending on the district of residence.
- <sup>5</sup> Family income is the determining factor for this program. The program is free for families up to 100% FPL. Families between 101% and 200% FPL may pay a fee based on the district's sliding-fee scale. Programs may offer services to children above 200% FPL, but those families pay full tuition.
- <sup>6</sup> All programs are required to participate in Ohio's QRIS, Step Up To Quality (SUTQ), and are given additional points for meeting a 1:10 staff to child ratio or maximum class size of 20. Most programs are meeting this requirement and rated four or five and are receiving points for meeting these ratios.
- <sup>7</sup> Programs are required to provide breakfast, lunch, or snack depending on hours of attendance.
- <sup>8</sup> In the fall of 2014, Ohio began administering the Kindergarten Readiness Assessment (KRA) to assess all domains of school readiness for all children in public school. Ohio collaborated with Maryland State Department of Education to develop the new KRA, which is administered annually between the first day of school to November 1. Ohio has also developed a new pre-K through kindergarten formative assessment, covering ages 36 to 72 months, which began implementation in 2015 within Early Childhood Education programs.
- <sup>9</sup> In all programs, at least 50% of teachers must have a BA in Early Childhood Education.
- <sup>10</sup> Programs are now required to participate in Ohio's QRIS, Step Up To Quality (SUTQ), and are given extra points for attaining 30 hours of PD every two years at the star four and five levels. Most programs are attaining these levels.
- <sup>11</sup> Originally, the allocation was provided starting with the district with the highest poverty rate. The Ohio Department of Education funded awards of up to two classrooms per district until all dollars were allocated. With the expansion in the 2013-2014 school year, a competitive process was used to allocate funds to programs within boundaries of school districts with the highest poverty and lowest achievement on kindergarten readiness assessments and third-grade reading assessments.
- <sup>12</sup> Programs receive annual licensing site visits. Additionally, on-site quality rating visits are conducted every two years for three-star centers and every three years for four- and five-star centers. Program information submitted to the state includes program documentation, teacher credentials, child assessment, self-assessment, and observations. Structured observations of classroom quality are conducted using the state created Ohio Classroom Observation Tool (OCOT). OCOT is aligned to ECERS and CLASS. Programs are also required to report child assessment data. All programs are required to participate in Ohio's QRIS—Step Up To Quality. This includes professional development hours, observations, transition plans, and family engagement review. On-site and desk reviews are conducted annually.

# **OKLAHOMA** - Oklahoma Early Childhood Four-Year-Old Program

- <sup>1</sup> There is a discrepancy between this breakdown and the total enrollment because there are two different data systems used by school districts to report enrollment numbers to the Oklahoma State Department of Education. Also, there were 2,975 students reported in other areas of the district that do not fall into one of the settings categories.
- <sup>2</sup> Programs have the option of operating a part-day or a school-day program or a combination of both within each district. Most school districts operate five days per week. Programs must be offered at least 175 days per year or 1,080 hours per school year. Districts can choose to offer a longer day or year but will not receive additional state funding through the state aid formula.
- <sup>3</sup> The 3-year-olds enrolled qualify for special services. There are districts that utilize local funding or tuition to provide classrooms for 3-year-olds.
- <sup>4</sup> Full-day programs provide breakfast and lunch. Part-day programs provide breakfast or lunch.
- <sup>5</sup> Current immunization records for pre-K entry are required by the state of Oklahoma. If a pre-K program is in collaboration with Head Start, they must meet Head Start requirements.
- <sup>6</sup> The Oklahoma State Department of Education recommends and provides resources for parenting support and training, health services for children, information about nutrition, and transition-to-kindergarten activities but allow local districts to make these decisions. If a pre-K program is in collaboration with Head Start, they must meet Head Start requirements.
- <sup>7</sup> Transitional bilingual and summer programs along with translators and bilingual staff are available, but the amount provided may vary depending upon the funding and capacity of local school districts.

- <sup>8</sup> Oklahoma is currently in the process of adopting an Early Learning Inventory, which will be given during the first weeks of kindergarten. There is currently no required assessment for prekindergarten programs.
- <sup>9</sup> The Oklahoma State Department of Education supports the specific needs of school districts to provide resources for special education services and assistive technology along with curriculum interventions for low performing schools.
- <sup>10</sup> All pre-K teachers in Oklahoma are required to hold a BA in Early Childhood Education. There is a paraprofessional route to becoming an Early Childhood certified teacher in which a person holding a BA in any area of study can work for a minimum of a year as a paraprofessional in an early childhood classroom and pass the Oklahoma General Education Test, Oklahoma Professional Teaching Exam, and the Oklahoma Subject Area Test. Having a BA in Early Childhood or certification through the paraprofessional route are requirements for teaching in an Oklahoma pre-K classroom.
- <sup>11</sup> Teacher assistants are only required to hold a high school diploma or GED and pass the FBI criminal history check. Teacher assistants employed in a Title I school must be highly qualified using one of the following methods: (1) An associate's degree or higher; (2) At least two years or 48 credit hours of study at an institution of higher education; (3) Passed the Oklahoma General Education Test; or (4) Passed the ETS Para Pro Assessment Test or the Work Keys Assessment. About 69% of schools are Title 1
- <sup>12</sup> Training and support for teacher assistants is provided by local districts and not regulated by the state.
- <sup>13</sup> Beginning in the 2018-2019 school year, teachers will be required to have a growth goal as a part of their evaluation system.
- <sup>14</sup> Teachers with low preforming schools would be supported by their local administrators.
- <sup>15</sup> The total expenditure for the Oklahoma Early Childhood Four-Year-Old Program from state funding was \$143,368,061. Of this amount, \$141,394,474 was contributed by the state aid funding formula and \$1,973,587 came from other state sources.
- <sup>16</sup> Pre-K classrooms are required to adhere to the same standards as all other public education classrooms but there is no required observation of classroom quality. Annual site visits are required in all programs.
- <sup>17</sup> No formal evaluations for pre-K are required at the state level. Local districts determine how to assess and support mastery of the pre-K standards.

### **OREGON** - Oregon Head Start Prekindergarten

- <sup>1</sup> Minimum required contact time is determined by the classroom hours combined with home-visit hours offered. School- and extended-day programs (more than six hours) are generally supported with other funding. Most programs operate 3.5 to four hours per day for a school year using state funding. Figures collected by the state do not fully align with NIEER definitions for part-, school-, and extended-day programs. Programs must offer at least 3.5 hours per day for a minimum of 32 weeks per year, plus required home visits at 1.5 hours each.
- <sup>2</sup> The number of days per week is dependent on the service models/options adopted by the program, and can range from no class days per week (home-based) to five days per week.
- <sup>3</sup> State preK children must meet the federal Head Start income guidelines. After priority is given to families whose income is at or below 100% FPL, up to 35% of children can be enrolled whose family income is between 100% FPL and 130% FPL. If a grantee has both state preK and federal Head Start funds, 90% must meet the income requirements. If grantee has only state preK funding, 80% must meet the income requirement. Children in foster care or who are homeless are categorically eligible. A minimum of 10% of total enrollment must include children with disabilities. Locally determined risk factors determine priority for services. Risk factors are prioritized by local boards and policy councils
- <sup>4</sup> Programs are required to offer meals and a snack that provide one-third to one-half of the child's daily nutritional needs in part day programs. Part-day programs provide lunch and either breakfast or snack. Full-day programs serve breakfast, lunch, and snack.
- <sup>5</sup> Screenings are required to be completed within 45 days of enrollment, except immunizations which are required prior to enrollment. Requirements for screenings follow Head Start screening requirements.
- <sup>6</sup> Oregon Pre-Kindergarten programs follow federal Head Start Performance Standards, which include the Head Start Early Learning Outcomes Framework. Programs are required to develop procedures for identifying children who are limited English proficient, ensure that children make progress toward acquiring English through culturally and linguistically appropriate instructional services, and inform parents of such children about instructional services used. If 50% or more of children speak a language other than English, programs must ensure that non-English speaking children are provided language support as needed. Otherwise, DLL/ELL policies related to immersion, instruction, summer language programs, translators/bilingual staff, professional development or coaching provided to teachers of ELL/DLLs are locally determined.
- <sup>7</sup> Under the Head Start Reauthorization Act of 2007, all lead teachers were required to have at least an AA by October 2011; by September 30, 2013, 50% must have earned at least a BA. Some programs have participated in local partnerships (e.g., school districts) where BA-level degrees and early childhood licensure with or without special education are required as locally determined. Teacher licensure options for public schools include Birth-3rd grade and Pre-K-K (Birth-K).
- <sup>8</sup> Some teachers who hold at least a CDA and who are enrolled in a program leading to at least an AA may receive a temporary waiver to the AA requirement.
- <sup>9</sup> Local grantees partnering with agencies may receive Title I and IDEA funding but are unable to directly access those funds. Faith-based programs free of religious content are eligible to receive funding.

### **PENNSYLVANIA** - Pennsylvania Ready to Learn Block Grant

- <sup>1</sup> No data collection occurred for the Pennsylvania Ready to Learn Block Grant program in 2015-2016 due to a significant budget impasse. Therefore, 2016-2017 data are reported.
- <sup>2</sup> Programs must operate 180 days per year.
- <sup>3</sup> Pennsylvania considers the minimum age eligibility for pre-K to be two years prior to kindergarten age. Districts determine the eligibility requirements. Children in RTL pre-K programs may not be age-eligible for kindergarten. Although the eligibility date is determined locally, Pennsylvania recommends that districts use September 1 as the entry date. Approximately 80% use this entry date. The recommended cutoff for kindergarten is 5 years old by September 1, but this is determined locally.
- <sup>4</sup> Eligibility for RTL is locally determined.
- <sup>5</sup> The curriculum must be standards-based, but it is decided upon locally. The state provides a list of curricula which has shown alignment with PA ELS.
- <sup>6</sup> Beginning in the 2009-2010, assistant teachers had to meet NCLB requirements and were required to have two years of post-secondary education/60 college credits, an AA or higher, or the ability to meet a rigorous standard of quality and to demonstrate through formal state or local assessments knowledge of the ability to assist in instruction.
- <sup>7</sup> First year instructionally certified teachers are required to participate in induction.

#### PENNSYLVANIA - Pennsylvania Head Start Supplemental Assistance Program (HSSAP)

<sup>1</sup> Data on enrollment by ethnicity are missing for 425 children.

- <sup>2</sup> Programs must operate according to federal Head Start Performance Standards, which require a minimum of 3.5 hours per day, four days per week. Full-day for HSSAP is considered more than 5.5 hours per day. Center-based programs can operate four or five days per week; home-based programs offer home visits once per week with socialization days. Most programs operate between 128 and 180 days per year with a few offering full-year services of approximately 240 days per year. Collaboration with other agencies and programs is required per program regulation, but implementation is locally determined.
- <sup>3</sup> Age eligibility follows federal Head Start eligibility requirements. Most children who are age-eligible for kindergarten will not be eligible for HSSAP. The recommended age cutoff is 5 by September 1, but this is determined locally. If a child with special needs remains in the pre-K program when they are age-eligible for kindergarten, they are not funded by HSSAP, but instead by other resources.
- <sup>4</sup> State pre-K children must meet the federal Head Start income guidelines. Effective as of December 2007, 35% of the enrollment may be children whose family incomes are between 100 and 130% FPL after priority is given to children at or below 100% FPL. In addition to income requirements, individual Head Start agencies determine

eligibility requirements based on their community assessments and give priority based on multiple risk factors.

- <sup>5</sup> Under the Head Start Reauthorization Act of 2007, all lead teachers were required to have at least an AA by October 2011; by September 30, 2013, 50% must have had at least a BA. By September 30, 2013, all assistant teachers must have had at least a CDA or be enrolled in a program to receive a CDA, AA, or BA within two years. If teachers are employed by a school district, ECE certification is required.
- <sup>6</sup> Data are missing for 12.8% of teachers (53 teachers).
- <sup>7</sup> Participation in state QRIS is required for state funded HSSAP programs, this information is collected at time of application, and when the rating is received.

#### PENNSYLVANIA - Pennsylvania Kindergarten for Four-Year-Olds and School-Based Pre-K

- <sup>1</sup> The total number of children is an estimate. Due to a budget impasse, data sets were delayed, affecting the ability to report accurate numbers.
- <sup>2</sup> Programs are required to operate 180 days per year. School code allows pre-K to be exempted from this requirement when approved which is a locally determined decision.
- <sup>3</sup> K4 programs follow kindergarten requirements so there are no class size limits, but most programs have 20 children and a 1:10 staff-child ratio. School-Based Pre-K (SBPK) follows the school board regulations for pre-K that require a maximum class size of 20 and staff-child ratio of 1:10. SBPK programs determine locally whether to enroll 3-year-olds or to limit enrollment only to 4-year-olds.
- <sup>4</sup> Child assessments are locally determined.
- <sup>5</sup> School code required that pre-K curriculum and instruction must be standards-based.
- <sup>6</sup> The state provided a listing of curricula that has been aligned with PA ELS (this is required for other state-funded Pre-K programs but not K4 or SBPK). Decisions about curricula are locally determined.
- <sup>7</sup> Elementary (K-6) certification is allowed for teachers in public school settings.
- <sup>8</sup> As of the 2009-2010 school year, assistant teachers in SBPK must meet NCLB requirements and are required to have two years of post-secondary education/60 college credits, an AA or higher, or the ability to meet a rigorous standard of quality and to demonstrate through formal state or local assessments knowledge of the ability to assist in instruction; there is no minimum degree required for K4 programs.
- <sup>9</sup> These decisions are locally determined, when pre-K teachers are contracted by the school district; salary parity with K-3 teachers is typical, but may not always be the case. The 180 hours are required of teachers with Instructional Certification; which is required in public school classrooms (SBPK) but not nonpublic schools (K4). An induction plan is required for teachers with Instructional Certification.

### **PENNSYLVANIA** - Pennsylvania Pre-K Counts

<sup>1</sup> Data on enrollment by ethnicity are missing for 1,190 children.

- <sup>2</sup> School-day programs operate for a full-day of programming which includes at least five instructional hours per day; part-day program operate for a half-day program which includes at least 2.5 instructional hours per day.
- <sup>3</sup> Children must be at least 3 years old and no more than 5 years old by the beginning of the program year. Children who are kindergarten age-eligible are not eligible for Pre-K Counts. The recommended kindergarten age cutoff is 5 by September 1, but this is locally determined. In addition, local boards may decide exceptions for kindergarten. Children whose IEPs recommend an additional third year of pre-K may continue in the Pre-K Counts program, but they may not be funded through Pre-K Counts but rather by a non-state source.
- <sup>4</sup> Children must meet the state-specified income requirement. Prioritization based on additional risk factors beyond income and age is locally determined.
- <sup>5</sup> A class size of 17 students is recommended. The recommended staff to child ratio is 2:17; if the 1:10 ratio is used, other qualified staff must be present on-site in case of emergency.
- <sup>6</sup> Regulation guidance was updated in 2015 to include the meal requirement for half-day programs.
- <sup>7</sup> The program is required to share screening results with families and discuss/support referral options.
- <sup>8</sup> The state provides guidance but not regulation on ELL/DLL supports and services which are primarily locally determined.
- <sup>9</sup> Curriculum companies may choose to submit an alignment at any time. The state aligned list reflects those who have voluntarily undergone the alignment process.
- <sup>10</sup> By December 2011, lead teachers in all settings had to have a BA and ECE certification. The N-3 certification will no longer be issued, though teachers who currently have it will still be able to work in the program. Teachers who do not meet this requirement are considered not in compliance, which can lower the program's score on the Program Review Instrument and affect future funding.
- <sup>11</sup> Assistant teachers must meet NCLB requirements and are required to have two years of post-secondary education/60 college credits, an AA or higher, or the ability to meet a rigorous standard of quality and to demonstrate through formal state or local assessments knowledge of the ability to assist in instruction.
- <sup>12</sup> The ACT 48 professional development requirement is the same for all certified teachers.
- <sup>13</sup> An induction plan is required in first year of service.

### **RHODE ISLAND** - Rhode Island State Prekindergarten Program

- <sup>1</sup> Data on home language was not reported for seven children.
- <sup>2</sup> These numbers reflect students leaving the program and new students entering the program.
- <sup>3</sup> There is no formal partnership at the state level, but individual grantees are required to make extended-day services available either by providing such services directly or by partnering with another agency which offers such services.
- <sup>4</sup> Children must reside in the district, town, or community in which the program is offered.
- <sup>5</sup> If a child has been absent more than 20 days, they may become ineligible.
- <sup>6</sup> Additional supports for DLLs are dependent on the district and community and the qualifications and supports provided within the district or community. For example, a pre-K program that is housed within a Head Start grantee would have access to certain supports that a community-based program may not. The availability of translators or bilingual staff depends on the capacity of individual programs.
- <sup>7</sup> State pre-K teachers are required to participate in comprehensive professional development focused on understanding and using the Rhode Island Early Learning and Development Standards (RIELDS).
- <sup>8</sup> Rhode Island has a list of reviewed curricula where an alignment has been done based on a variety of indicators but the state has stayed away from saying the curricula are "approved" or not. HighScope and Creative Curriculum both scored high on this review and are used by some programs in the state. Information on curricula alignment can be found here: http://www.ride.ri.gov/InstructionAssessment/EarlyChildhoodEducation/EarlyLearningandDevelopmentStandards.aspx#1667794-documents
- <sup>9</sup> Information regarding alignment of subject-specific curricula will be available in 2017.
- <sup>10</sup> All lead teachers must have a Pre-K-2 state teaching certification, or an approved interim exception to complete the required courses in order to obtain one by taking six credits per year as a very rare exception.
- <sup>11</sup> Programs are required to provide prekindergarten teachers with comparable salaries to public school teachers. However, these wages are generally more along the starting salary range rather than the mid to higher tiers within public schools. Grantees must compensate all Rhode Island Pre-Kindergarten Program teachers and assistant teachers with a competitive salary and benefits based on their credentials, experience, and past performance.
- <sup>12</sup> There are numerous optional professional development offerings teachers may choose to participate in based on need beyond the required 20 hours per year.

- <sup>13</sup> The state contracts with a vendor who is available to provide in program/classroom support as well as large group support.
- <sup>14</sup> The Rhode Island Education Aid Foundation Formula approved in 2010 takes a phased-in approach to expanding access to high-quality pre-K, starting with communities that have a high proportion of children eligible for free and reduced-price lunch. The phased-in approach, investing \$10 million over 10 years, will ensure that pre-K expansion creates high-quality learning programs, improves access for students who need it the most, and assures a smooth transition between early childhood and K-12.
- <sup>15</sup> Classroom quality data obtained through QRIS assessors as well as child level measures taken at three points in time (the start of pre-K, end of pre-K, and 1st grade), will be used for the evaluation.
- <sup>16</sup> The state is in the process of developing a Kindergarten Entry Assessment which is being piloted this year. The state is hopeful that next year will be the first year of implementation.

# SOUTH CAROLINA - South Carolina EIA Child Development Program (4K)

- <sup>1</sup> Districts not participating in CDEP are required to offer, at a minimum, one half-day EIA 4K class.
- <sup>2</sup> EIA 4K is a part-day program run directly by the districts, without Office of Early Learning and Literacy (OELL) oversite. Student enrollment data are not collected at the state level, but enrollment estimates are provided.
- <sup>3</sup> After all income-eligible children are served, districts can decide on prioritizing other risk factors.
- <sup>4</sup> Comprehensive services are not required, but recommended, including parenting support or training, parent involvement activities, health services for children, and transition-to-K activities.
- <sup>5</sup> The newly revised ELDS will be aligned to the approved child assessments.
- <sup>6</sup> Many of the preschool programs voluntarily use the CDEP list of approved curricula.
- <sup>7</sup> Only appropriated funds for 2015-2016 are reported, actual expenditures are not available.
- <sup>8</sup> The funding formula is dependent on the number of kindergarten students qualifying for free or reduced-price lunch.
- <sup>9</sup> The South Carolina Department of Education Regional Literacy Specialists are conducting the monitoring visits and only using a portion of the ELLCO as a quality improvement assessment.
- <sup>10</sup> Districts must select one of the three assessments on the approved list which includes: myIGDIs, PALS-PreK, or GOLD.

### SOUTH CAROLINA - South Carolina Child Development Education Program (CDEP)

- <sup>1</sup> The South Carolina Department of Education has administrative authority over public school districts. The Office of First Steps has authority over private child care centers.
- <sup>2</sup> A total of 61 school districts participate, and there are an additional three school districts which are eligible based on the 70% or higher poverty level but elect not to participate. Private child care programs in those three districts may participate. The remaining districts do not meet the poverty level to participate.
- <sup>3</sup> Breakdowns are for children enrolled in the public school programs only. Breakdown is not available for 10 children's free and reduced-price lunch status, located in public schools.
- <sup>4</sup> Eligibility is based on residence in a CDEP-funded district, and income eligibility, with students meeting requirements of free or reduced-price lunch or Medicaid eligible.
- <sup>5</sup> Once all children meeting the income criteria are served, students identified as at-risk by low scores on the DIAL or those who meet the risk factors of homelessness or being in foster care may enroll.
- <sup>6</sup> Although, it is not required many districts provide vision and hearing screenings.
- <sup>7</sup> The new revised ELDS will be aligned to the approved child assessments.
- <sup>8</sup> The state is developing resources that will support the implementation of the new ELDS.
- <sup>9</sup> Data are only available for teachers working in public school programs.
- <sup>10</sup> Assistant teachers in both public schools and private centers are required to enroll in the ECD 101 TEACH college class within one year of being in the position.
- <sup>11</sup> In addition to the 15 clock hours annually, lead teachers in public schools are required to take six credit hours every five years.
- <sup>12</sup> The 15 clock hours per year must be approved by the Center for Child Care Career Development, and must include at least five hours in curriculum, five hours in child development, and five hours in health and safety, guidance, or other related topics.
- <sup>13</sup> There are several pilots being funded by the South Carolina Education Oversight Committee using various classroom observation tools, including ECERS, CLASS, and ELLCO.
- <sup>14</sup> Districts must select one of the three assessments on the approved list which includes: myIGDIs, PALS-PreK, or GOLD.
- <sup>15</sup> Analysis of data has not yet been completed.

# **TENNESSEE** - Tennessee Voluntary Pre-K

- <sup>1</sup> Authority over the Tennessee VPK program was moved from the Division of Special Populations to the Division of Early Learning and Literacy.
- <sup>2</sup> PDG funds supported 1,648 children in new slots and 3,010 in improved slots. There were additional children funded with PDG who were not enrolled in VPK, but the exact number is unknown.
- <sup>3</sup> Tennessee has a 3-tier eligibility system. Tier 1 includes children whose income would qualify them for free or reduced-price lunch, as well as children who are homeless or in foster care. The second tier includes children who are screened and identified as at-risk due to an IEP, or who are English Language Learners. The third tier includes locally determined factors, which include (among other possibilities) parents with low education levels, parental substance abuse, risk that child will not be ready for kindergarten, teen parent, low birth weight or other health risk, or a parent on active military duty.
- <sup>4</sup> There are currently 37 curricula on the approved list, however, the list is being revised for 2017-2018.
- <sup>5</sup> State law passed in 2005-2006 requires at least one educational assistant per classroom to hold a CDA or AA, or actively work toward such credentials. If no person with such credentials is available, state law allows a person with a high school degree and relevant experience working with pre-K children or other early childhood programs to be employed. Assistants must demonstrate progress toward completion of a CDA to be rehired. In 2015, 51% of all assistant teachers had a CDA credential or higher level of education. There is no degree requirement for assistant teachers but they are required to receive a minimum of 12 hours of state approved professional development on ECERS, ELLCO, Personal Safety, Tennessee Early Learning Development Standards, Child Care Rules and Regulations, and Social Emotional Learning Foundations. Training may occur prior to or during employment.
- <sup>6</sup> For Assistant teachers, 18 clock hours are required the first year of employment and 12 clock hours are required the following years. In 2017-2018, the requirements will increase to 24 clock hours per year for Directors, Teachers, and Assistants; and 30 hours in 2018-2019.
- <sup>7</sup> PDG funding includes an unknown number of children who did not participate in VPK. VPK funding follows the contract year (i.e. January-December), not the school year.
- <sup>8</sup> Program level outcomes are incorporated into a Plan of Action, which identifies areas of weakness found as a result of the ECERS-R and ELLCO. State statute mandates that an LEA may contract only with those agencies that have received the highest star rating (three stars) from the Quality Rating System (QRS) administered by the Department of Human Services (DHS), the licensing agency for all child care programs. LEA classrooms are not required to participate in the QRS; however, all community based and Head Start child care facilities monitored by DHS must have received the highest star rating in order to partner with the LEA. Program evaluators conduct a minimum of two visits per year to each classroom for compliance with health and safety rules. All education consultant positions were eliminated in May 2013. All self-assessment documentation is submitted to the Director of Early Childhood programs.

<sup>9</sup> No child assessment tools are currently required. In 2017-2018, the state-developed student growth portfolio will be implemented. Teachers and districts will choose an assessment from a state-approved list to demonstrate student achievement. Student achievement scores count as 15% of a teacher's evaluation. Fifty percent of the evaluation is based on classroom observation and the remaining 35% is based on student growth, which comes from a student growth portfolio model.

# **TEXAS** - Texas Public School Prekindergarten

- <sup>1</sup> A district shall offer prekindergarten classes if the district identifies 15 or more eligible children who are at least 4 years of age by September 1 of the current school year. A school district may offer prekindergarten classes if the district identifies 15 or more eligible children who are at least 3 years of age.
- <sup>2</sup> Districts are required to verify eligibility. Once a student is determined to be eligible, the student remains eligible for that year in the district in which he or she resides, or is otherwise entitled to Foundation School Program benefits.
- <sup>3</sup> There is no rule regarding prekindergarten class size or staff-to-child ratio, though school districts are encouraged to follow the requirements for kindergarten. If a school district contracts with a private entity to operate the district's prekindergarten program, the program must comply with child care licensing standards. The recommendation is a child to staff ratio of 11:1 with a limit of 22 children per classroom, but this is not required.
- <sup>4</sup> Districts are not required to serve meals to pre-K students. However, some districts do serve either breakfast or lunch, and some offer both meals. Districts offering fullday prekindergarten are required to provide lunch.
- <sup>5</sup> Other health screenings are determined locally.
- <sup>6</sup> Translators are used for Language Proficiency Assessment Committees for parents who do not speak English and during parent/teacher meetings. Each school district with an enrollment of 20 or more students of limited English proficiency in any language classification in the same grade level must offer a bilingual education or special language program. The state-level policy regulating services is for ELL only, not DLL.
- <sup>7</sup> Funding goes to providing free professional development and pre-K assessments for all public school teachers.
- <sup>8</sup> For a full list of curricula see: https://tea4avfaulk.tea.texas.gov/ematevi/EMATREPORTS/RptInst/EM\_CURR\_ADPN.pdf
- <sup>9</sup> Texas does not use the term assistant teachers though paraprofessionals serve as Educational Aides I, II, and III. Educational Aide I requires at least a high school diploma and experience working with students or parents. Educational Aide II requires at least a high school diploma and one of the following requirements: two creditable years of experience; a minimum of 15 semester credit hours of college credit with emphasis on child development or related subject areas; demonstrated proficiency in a specialized skill area, as determined by the school district; or experience working with students or parents. Educational Aide III requires at least a high school diploma and one of the following: three creditable years of experience; 30 semester credit hours of college credit with some emphasis on child growth and development or related subject areas; or experience working with students or parents.
- <sup>10</sup> In the grant program that covers approximately 85% of preschool children, the teachers are required to have 30 hours each year in early childhood education including 15 hours of mentoring or instructional coaching.
- <sup>11</sup> Prekindergarten students generate formula funding based on average daily attendance (ADA), in the same manner as K-12 students, with the provision that they are eligible for a maximum of one half-day ADA.
- <sup>12</sup> The state will begin to collect beginning- and end-of-year Prekindergarten Progress Monitoring Data in 2016-2017 school year.
- <sup>13</sup> Districts are required to administer a kindergarten reading instrument from a list adopted by the commissioner or by the district-level committee. Children are assessed in kindergarten at the beginning, middle, and/or end of the year, and programs are required to submit beginning-of-the-year data to the agency.

# **VERMONT** - Vermont Universal Prekindergarten Program (Act 166)

- <sup>1</sup> Act 166 requiring Universal Prekindergarten was partially implemented during the 2015-2016 school year. School districts developed agreements with private prequalified pre-K programs in towns/communities including 138 public prequalified pre-K programs and 230 private prequalified pre-K programs. Full implementation of Act 166 is required in the 2016-2017 school year.
- <sup>2</sup> Act 166 requires school districts to offer pre-K to all 3-, 4- and 5-year-olds not enrolled in kindergarten for 10 hours per week for 35 weeks over the academic year.
- <sup>3</sup> Vermont child care licensing regulations stipulate that the interior space licensed for use by children shall provide a minimum of 35 square feet of safe usable space per child for the maximum number of children using the space at one time.
- <sup>4</sup> As part of Child Find, programs screen children on their developmental growth. Vision and hearing are required under child care regulations as well. Screening information is not collected at the state level. Child Find must be conducted annually by all school districts. Child Find activities to identify (such as pre-K screening) is planned, offered and conducted by local school districts.
- <sup>5</sup> The state anticipates developing a state guidance document to support serving children who are DLL during the 2017-2018 school year.
- <sup>6</sup> Vermont has adopted Teaching Strategies GOLD as its child progress monitoring measure. Teaching Strategies GOLD is aligned with Vermont Early Learning Standards (VELS).
- <sup>7</sup> Under the Race To the Top Early Learning Challenge grant, the VELS website is under construction. Regional trainings are occurring on the VELS and VELS family engagement training materials are being developed.
- <sup>8</sup> A private prequalified prekindergarten education program operated in a licensed center-based program shall employ, or contract for the services of, at least one teacher who holds a valid Vermont educator license with an endorsement in either early childhood education or early childhood special education. The 10 hours the licensed teacher is present shall coincide with the hours of prekindergarten education paid for by tuition from districts.
- <sup>9</sup> A teacher associate must be at least 20 years of age and have a high school diploma or GED, and meets one of the following qualifications: (1) a Vermont Early Childhood Career Ladder Level Three Certificate; (2) an associate degree in Early Childhood, Child or Human Development, Elementary Education, or Child and Family Services and at least 12 months experience working with groups of children in grade three or younger; (3) a Certificate of Completion from the Registered Child Care Apprenticeship Program; (4) a Child Care Certificate from the Community College of Vermont and at least 12 months experience working with groups of children in grade three or younger; (5) successful completion of 21 college credits with an early childhood or school-age focus and at least 12 months experience working with groups of children in grade 3 or younger. A teacher assistant is at least 18 years of age and has a high school graduate or GED, and meets one of the following qualifications: (1) a Vermont Early Childhood Career Ladder Level One or Two Certificate; (2) a current CDA and at least 12 months experience working with groups of children in grade three or younger; (3) a State Board of Education approved Human Services Program Certificate that emphasizes child development or early childhood education and at least 12 months experience working with groups of children in grade three or younger; (4) successful completion of the Fundamentals for Early Childhood Professionals' course or the Vermont Afterschool Essentials Certificate and at least 12 months experience working with groups; (5) successful completion of a three college credit course in child or human development or a three college credit course for school age care and education and at least 12 months experience working with groups of children in grade three or younger.
- <sup>10</sup> Lead teachers in public schools must complete an individualized professional development plan and submit their plan supporting their ECE/ECSE licensure renewal level 1 and 2 by completing necessary coursework and submitting to their local standards board for approval. Under child care licensing regulations private child care staff individualized professional development plans are updated annually and staff must complete 15 hours of annual professional development.
- <sup>11</sup> Currently, Vermont does not require coaching as a professional development (PD) component. There are multiple PD offerings that include coaching to support and increase implementation of evidence based practices in the early childhood setting. Early Multi-Tiered System of Supports (MTSS) is a prime example of training on content that includes practice based coaching elements to ensure implementation in the state.
- <sup>12</sup> A total of \$54,629,329 was used to support Vermont's Act 62 Program. The state was unable to break this down into state, local, and federal sources. This figure likely includes funding from the State Education Fund's school funding formula, state Essential Early Education (early childhood special education) funds, and IDEA. Approximately 25% of all districts also use Title I dollars to support pre-K. However, districts do not report revenues by grade level, so actual amounts are unknown. Additional PDG funds also supported the program in 2015-2016.
- <sup>13</sup> Budgets including district costs for pre-K are determined and approved at the local level and then funded through the Education Fund. The state's Education Fund provides funding for pre-K–12 education spending.

- <sup>14</sup> Vermont is moving toward using the CLASS. The CLASS is currently an option in the state's QRIS and the state has a cadre of state CLASS trainers and trainings are being offered for pre-K as well as K-3. However, CLASS data are not currently being collected at the state level. Through Act 166, the state approved monitoring system for prekindergarten programs includes collecting and evaluating information on program quality to be used to ensure continuous quality improvement through mentoring and training. Additional information collected for monitoring includes programmatic details such as the number of children served and financial investments made, as well as child school readiness and numeracy and literacy outcomes.
- <sup>15</sup> Vermont is in the process of designing a pre-K monitoring and improvement system. The state will be conducting a pilot during spring 2017.

# **VIRGINIA** - Virginia Preschool Initiative

- <sup>1</sup> Funds are available to school divisions where there are at-risk 4-year-olds not served by Head Start. School divisions can choose whether or not to take the funds.
- <sup>2</sup> A minimum of three hours per day is required for part-day programs. School-day programs are required to operate for a minimum of 5.5 hours per day.
- <sup>3</sup> A total of 15% of slots can be filled using locally determined criteria.
- <sup>4</sup> The Appropriation Act language and set of assurances does not mandate meals, but the state office offers the opportunity for all programs to provide meals. The vast majority of programs offer at least one meal a day.
- <sup>5</sup> It is a local decision as to who screens and refers and when. The state does not specifically require but encourages the programs to refer for services as needed.
- <sup>6</sup> All programs follow state pre-elementary statute and regulations. School districts partnering with Head Start programs must follow federal Head Start requirements. Support services include parenting support or training, health services for children, and nutrition information.
- <sup>7</sup> The state requires the use of PALS-PreK for all Virginia Preschool Initiative students.
- <sup>8</sup> Nonpublic employers determine required credentials and specializations. In Virginia, all teachers have at least a CDA and 98% of teachers have a BA or higher. School divisions determine training and specialization requirements for assistant teachers. For program sites where public funds are paying for nonpublic personnel, localities report the highest degree and/or credential for only the teacher who is the instructional lead. The instructional lead, who must hold a BA and appropriate specialized training, supervises the classroom teachers and is responsible for management and oversight of the program's curriculum and instructional practices. This policy does not meet NIEER's benchmark requirement because the instructional lead is not required to be present at all times when children are in attendance.
- <sup>9</sup> The state does not collect data above a bachelor's degree. Only statewide percentages are available.
- <sup>10</sup> Salary scales and parity are determined locally by each school division. Some may have parity some may not. Starting salaries are equivalent but the salary schedules after the starting salary are locally determined.
- <sup>11</sup> The figure reported may not fully represent actual total VPI spending as these figures account for the state contribution plus the local required match. Localities can spend more local funds on VPI than their match requires but figures are not available. The state funding formula for the Virginia Preschool Initiative provides a per-pupil rate of \$6,125, of which the state pays a portion and requires a local match based on the composite index of local ability to pay. The local match is capped at half the per-pupil amount. Funds are provided to localities based on the number of at-risk 4-year-olds not served by Head Start. An estimate of the PDG funds used to enhance VPI seats is included in the total enrollment.
- $^{\rm 12}\,$  The local match is based on the local composite index.
- <sup>13</sup> PALS data is collected twice a year and local plans are submitted twice a year. Site visits by state staff or consultants are no longer conducted, due to budgetary constraints. Monitoring is limited to desk review of selected program documentation and no longer includes review of program facilities, on site safety procedures, and program records. Program-level documentation reviews include state-established criteria for high-quality preschool curriculum, health and social services, transportation, and budgets.
- <sup>14</sup> Only PALS Pre-K is required by the state. Other domains may be assessed through locally determined curriculum assessment.

# WASHINGTON - Early Childhood Education and Assistance Program (ECEAP)

- <sup>1</sup> Of the three counties not served by this program, two are served by Head Start and the other is sparsely populated.
- <sup>2</sup> Slots were awarded through open competitive RFPs for the 2008-2009, 2014-2015, and 2015-2016 school years. Additional slots were awarded to existing contractors based on county poverty levels for the 2011-2012 and 2013-2014 school years.
- <sup>3</sup> The most frequent home languages other than English and Spanish are, in this order: Somali, Vietnamese, Arabic, Amharic, Russian, Chinese, Punjabi, Marshallese, and Oromo.
- <sup>4</sup> Washington has four operating schedule options: (1) old part-day model at 2.5 hours per day minimum; (2) new part-day model (beginning with slots awarded in 2015) at 3 hours per day minimum; (3) full school-day model at 5.5 to 6.5 hours per day; and (4) extended day at 10 or more hours per day. In 2015-2016, 24.7% of ECEAP classes were 2.5-3 hours per day, 55.5% were 3-4.5 hours per day, 14.9% were 5-7.5 hours per day (full-school day model), and 4.9% were 10-12.5 hours per day (extended-day model). Operating schedule varies by program model: part-day programs must provide a total of 320 hours per year for slots awarded before 2015 and 360 hours per year for slots awarded after 2015. Full school-day programs must be four or five days per week and extended-day programs must be five days per week. A typical partday program operates three hours per day, three or four days per week for the school year. Many children in wraparound child care at the same site are not counted in the school day category because ECEAP program standards are not in operation during those hours.
- <sup>5</sup> In 2015-16, for the first time, ECEAP served kindergarten-eligible children in the summer before kindergarten in extended-day programs.
- <sup>6</sup> A priority point system based on a combination of income and other risk factors is used to determined eligibility. Additional risk factors include: expulsion due to behavior, in kinship care, single parent, transferring from Head Start or Early Head Start, parent deployed to combat zone in last year, parent incarcerated, mental illness, health care access, or migrant status.
- <sup>7</sup> Contractors offering sessions lasting less than three hours must provide a breakfast or lunch. An additional snack or meal must be offered when round-trip transportation extends the time children are away from home by an hour or more. Contractors providing sessions lasting three or more hours must provide breakfast or lunch, and a snack.
- <sup>8</sup> The Department of Early Learning began a pilot on research-based curricula in 2015-2016, purchasing Creative Curriculum or HighScope for the participating ECEAP classrooms, providing training, and supporting coaching to fidelity. Research-based curricula are being extended statewide.
- <sup>9</sup> HighScope and Creative Curriculum are approved. Beginning in 2016-2017, a process will be in place for ECEAP contractors to submit additional curricula for approval, based on the Head Start National Center on Quality Teaching and Learning's Preschool Curriculum Consumer Report.
- <sup>10</sup> All persons serving in the role of ECEAP lead teacher must meet one of the following qualifications: (1) An associate's or higher degree with the equivalent of 30 college quarter credits in early childhood education. These 30 credits may be included in the degree or in addition to the degree; or (2) A valid Washington State Teaching Certificate with an endorsement in Early Childhood Education (Pre-K-Grade 3) or Early Childhood Special Education.
- <sup>11</sup> All persons serving in the role of ECEAP assistant teacher must meet one of the following qualifications: (1) Employment as an ECEAP assistant teacher in the same agency before July 1, 1999; (2) The equivalent of 12 college quarter credits in early childhood education; (3) Initial or higher Washington State Early Childhood Education Certificate; or (4) A current Child Development Associate (CDA) credential awarded by the Council for Early Childhood Professional Recognition.
- <sup>12</sup> Lead teachers and family support specialists must complete a minimum of 15 hours of professional development per year, such as workshops or classes but not including individual mentoring.
- <sup>13</sup> Professional development plans are only required by the state for staff who do not fully meet the required ECEAP qualifications and are hired provisionally based on an insufficient workforce in their region.
- <sup>14</sup> Each ECEAP contractor must provide, or have access to, a practice-based coach trained on the Early Achievers Coach Framework to: (1) Support rating readiness and ongoing continuous quality improvement; (2) Assist the contractor in identifying goals and making quality improvement plans to achieve goals, and (3) Assist the contractor in completing remedial activities within the identified timeline, when applicable.
- <sup>15</sup> As part of the QRIS system, Early Achievers, the Department of Early Learning contracts with the University of Washington to conduct CLASS and ERS observations.

The University of Washington consultants who conduct the observations are reliable. In addition, more frequent observations occur to ensure compliance with ECEAP performance standards.

- <sup>16</sup> Teaching Strategies GOLD is used. Three to four times per year, teachers rate all objectives within the following areas: Social Emotional, Physical, Language, Cognitive, Literacy, and Mathematics. The remaining Teaching Strategies GOLD objectives (Science and Technology, Social Studies, and The Arts) are optional.
- <sup>17</sup> For 2015-2016, the Department of Early Learning collected Teaching Strategies GOLD assessment results for more than 7,500 ECEAP children who had ratings in both fall and spring of the school year. Children made progress in all areas of development. The following percentages of children moved from "below age level" to "at or above age level" during their time in ECEAP: Social-emotional development: 41%; Physical development; 35%; Language development: 35%; Cognitive development: 39%; Literacy development: 43%; Mathematics: 53%.

# WEST VIRGINIA - West Virginia Universal Pre-K

- <sup>1</sup> The West Virginia Department of Education (WVDE) is responsible for the West Virginia Board of Education (WVBE) Policy 2525 overseeing universal pre-K. However, the WVDE Office of Early Learning works collaboratively with the West Virginia Department of Health and Human Resources (WVDHHR) and the West Virginia Head Start State Collaboration Office to implement WVBE Policy 2525.
- <sup>2</sup> In West Virginia's collaborative model, all students are considered enrolled in public settings. The total count includes 3-year-olds in pre-K who are enrolled, but not age-eligible, including 1,003 3-year-olds with IEPS and 1,274 3-year-olds (also referred to as in the exclusion category) enrolled in pre-K program through collaborative programs (such as Head Start or child care). Children in the exclusion category are funded by a collaborating partner, but participate in pre-K funded classrooms when space is available. For example, a 3-year-old without an IEP is enrolled due to Head Start eligibility, but is not eligible through pre-K eligibility requirements. Children under three are those who transition into the pre-K program through IEP eligibility and usually transition from a Birth to Three program. These children are 3 after the September 1st age eligibility.
- <sup>3</sup> Total enrollment by home language includes only 3- and 4-year-olds. Home language was not captured for the 1,274 "exclusion" 3-year-olds who are included in the pre-K program total enrollment but are enrolled through other programs such as child care and Head Start. Home language for 434 5-year-olds was not captured in the home language total enrollment.
- <sup>4</sup> For race and ethnicity counts, the data includes only pre-K eligible children. Thus, exclusion children, children under 3-years of age, and 5-year-old children are excluded from the counts.
- <sup>5</sup> In West Virginia's collaborative model, all students are considered enrolled in public settings. The total count includes 3-year-olds in pre-K who are enrolled, but not ageeligible, including 1,274 3-year-olds enrolled in pre-K program through collaborative programs (such as Head Start or child care).
- <sup>6</sup> The number of hours per day is determined locally with a minimum of 14 hours per week and 128 days per year. Programs must operate no fewer than four days per week to meet annual and weekly operational requirements. Beginning with the 2016-2017 school year, each pre-K classroom must provide at least 1,500 minutes of instruction per week and 48,000 minutes of instruction annually.
- <sup>7</sup> School-day programs and part-day program totals do not include 1,274 3-year-old children enrolled in pre-K through collaborative programs such as Head Start or child care.
- <sup>8</sup> There is no formal partnership at the state level to provide extended-day services through collaboration with other agencies and programs (e.g., Head Start, child care); however, partnerships are required at the local level in state policy.
- <sup>9</sup> Children who are 5 years old prior to September 1 shall be enrolled in kindergarten, instead of WV Pre-K, unless assessment data can determine that kindergarten placement for that child is not in the child's best interest. The WV Pre-K Child Assessment System data can be utilized for 5-year-old children previously enrolled in WV Pre-K; alternative assessment data will be necessary for 5-year-old children who are newly enrolled.
- <sup>10</sup> Maximum class size is 20 children as long as there is 35 square feet of useable space per children available. The maximum staff-child ratio is 1-10; however, two adults must be present with children regardless of class size.
- <sup>11</sup> Breakfast and/or lunch are required regardless of the number of hours a program operates per day, but which one is served depends on the time of day for the program. Part-day programs must offer one, and school-day programs typically offer both. Snacks are provided, depending on the meal pattern. Any meal provided during the WV Pre-K hours must be in accordance with the nutrition guidelines set forth in the WVDE National School Lunch Program.
- <sup>12</sup> The full physical exam must examine neurological functions, head, eyes, nose, lungs, abdomen, back, strabismus, ears, heart, skin, reflexes, neck, throat, and pulse.
- <sup>13</sup> West Virginia Universal Pre-K policy requires only comprehensive curricular systems and comprehensive assessment systems that are included on the approved list shall be used by WV Pre-K classrooms, including classrooms that serve children with identified special needs. The West Virginia Early Learning Reporting System: Pre-K, inclusive of the Early Learning Scale, focuses on the formative assessment process which is utilized with all children enrolled in WV Pre-K programs, as per Policy 2520.15: Early Learning Standards Framework: Content Standards and Learning Criteria for West Virginia Pre-Kindergarten (WV Pre-k).
- <sup>14</sup> The West Virginia Pre-K Early Learning Standards Framework (WV ELSF) Professional Development System is a statewide professional development system designed for all early childhood educators, administrators and families as part of WV Universal Pre-K. The system provides content which is research-based, aligned with the WV Early Learning Standards Framework and the WV Pre-K Child Assessment System. This system is available in the following domains: Language and Literacy, Math and Science, Arts and Physical Development, and Social and Emotional.
- <sup>15</sup> Teachers employed by nonpublic schools must hold a minimum of a Bachelors degree and certification or a Community Program Permanent Authorization when they do not hold certification.
- <sup>16</sup> All assistant teachers must have a CDA or equivalent determined by the WVBE. The Early Childhood Classroom Assistant Teacher Authorization is a license required for all pre-K and kindergarten assistant teachers who complete a Child Development Specialist (CDA) or state equivalent.
- <sup>17</sup> State policy requires all county WV Pre-K staff, including teachers and teacher assistants/aides/ paraprofessionals to participate in 15 hours of staff development annually and based on the needs determined in the county continuous quality improvement process.
- <sup>18</sup> State-aid funding for pre-K is allocated as part of the K-12 state aid funding process.
- <sup>19</sup> The West Virginia Universal Pre-K Health and Safety Checklist must be conducted in all pre-K classrooms within 45 calendar days of the first day of school annually. Additionally, state policy requires each county to develop and maintain a continuous quality improvement process that utilizes annual classroom observations such as ECERS or CLASS, and aggregated child assessment data in programmatic decision-making. Classroom observation tools are locally determined.
- <sup>20</sup> Results from classroom quality self-assessments are collected through each county's continuous quality improvement process. Results are reviewed by the state pre-K steering team during WV Universal Pre-K Program Reviews. WV Universal Pre-K Program Reviews are conducted once every three years in every county.
- <sup>21</sup> The WV Universal Pre-K Longitudinal Study is a multi-year study designed to assess the effects of participation in the state pre-K program. The proposed timeline of the study spans from 2015 to 2020.
- <sup>22</sup> West Virginia requires assessment reports for physical health and development and the arts based on the WV Early Learning Standards Framework: Content Standards and Learning Criteria for West Virginia Pre-Kindergarten (WV Pre-K).
- <sup>23</sup> Child outcome data was aggregated through the Early Learning Reporting System: Pre-K (ELRS: Pre-K), utilizing the Early Learning Scale and reported on page 23 of the WV School Readiness Profile 2015 which can be accessed at http://wvde.state.wv.us/ready-set-go/doc/2015-school-readiness-profile.pdf.
- <sup>24</sup> West Virginia Early Learning Reporting System: Kindergarten (ELRS:K) is an educator developed series of standards-focused reporting rubrics. Teachers report on the ELRS:K a minimum of two times per year in the areas of English Language Arts and Mathematics.

#### WISCONSIN - Wisconsin Four-Year-Old Kindergarten (4K)

- <sup>1</sup> The sum of enrollment by age does not equal the total enrollment due to reporting errors.
- <sup>2</sup> Tracking of English Language Learners (and with it, their primary language) does not formally begin until ACCESS testing in kindergarten. Therefore, there is probably a fair amount of under-reporting of enrollment by home language.

- <sup>3</sup> With regard to enrollment by ethnicity, data is reported to be of poor quality. It is also from two different sources, and thus the enrollment by ethnicity by age does not equal the total enrollment by age.
- <sup>4</sup> The state funds a total of 437 hours per year. Districts determine how many days per week the program operates. Districts must provide a minimum of 437 hours of direct instruction per year, or 349.5 hours of instruction plus 87.5 hours of parent outreach. Most programs are part-day, four to five days per week, but an increasing number of rural districts may offer school-day programs two or three days per week. State policies support partnerships with child care and Head Start to extend the number of hours per day or weeks per year. The 4K community approach models allow district contracts with child care, Head Start, and private schools. Additionally, most operating schedules are school year, but some districts extend the program through Head Start partnerships or local calendars.
- <sup>5</sup> Districts may contract with child care or Head Start to implement 4K. State policies also support partnerships with child care and Head Start to extend the number of hours per day or weeks per year.
- <sup>6</sup> The state law is 4 years of age as of September 1, but it does allow districts to have early entrance policies. Districts that do allow this usually only enroll children who are 3 years of age by October or November upon parental request. Sometimes children with disabilities who are under 4 years of age are also counted if they were placed in 4K. Districts are also allowed to establish policies for maximum ages.
- <sup>7</sup> If a district offers 4K, it is open for all age-eligible children. No waiting lists can exist.
- <sup>8</sup> There are no state requirements (at any grade level) for class size or staff-child ratio. If a 4K program partners with a child care or Head Start program, the partnering programs' requirements apply. Districts may consider the following staff-child ratios and class sizes: a 1:10 staff-child ratio with a maximum class size of 20; a 1:13 staff-child ratio with a maximum group size of 24; and early childhood special education inclusion models; or two teachers working with groups of 16 to 20 children as advised by NAEYC. Community-approach models must follow child care or Head Start requirements.
- <sup>9</sup> Head Start programs must follow Head Start requirements. If a school-based program operates more than 2.5 hours per day, it must provide a meal or snack through the school nutrition program.
- <sup>10</sup> Literacy screening is a state requirement. Children are required (with exceptions) to have immunizations and a medical examination that may include vision, hearing, blood pressure, etc. Developmental and psychosocial screenings are routine practice. Some districts provide vision screening.
- <sup>11</sup> Requirements depend on how the services are defined. Parent involvement is required when districts obtain additional funds for parent outreach. Referrals for special education are required as needed. State law requires referral to social services in case of abuse or neglect. When districts partner with Head Start, they must provide services per Head Start federal standards.
- <sup>12</sup> Federal Title III requirements are followed. Specific implementation in 4K is locally determined.
- <sup>13</sup> The state does not have stand alone K-3 or college and career ready early grades standards. Infant toddler standards are included in Wisconsin Model Early Learning Standards (MELS). WMELS are aligned to the literacy and language arts standards. The Head Start standards are also aligned.
- <sup>14</sup> Screening and assessment practices are promoted that align with the ELDS but they are not required.
- <sup>15</sup> The state has a training and technical assistance system that includes cross sector trainers, a 15-hour training, and a variety of resources. For additional information, see: http://www.collaboratingpartners.com/wmels-about.php
- <sup>16</sup> Provision of information is through early learning standards training, at conferences, through some technical assistance providers, and through web-based resources. For additional information, see: http://www.collaboratingpartners.com/curriculum-assessment-curriculum.php
- <sup>17</sup> While the 4K programs are all under the administrative authority of the school, the school can contract with child care, Head Start, and/or private schools for 4K. The teachers in these community programs need to follow the public school requirements for personnel. There are three options: (1) EC Endorsement with or without special education; (2) EC endorsement Birth to age 8; and (3) EC endorsement Birth to age 11.
- <sup>18</sup> Assistant teachers can meet one of three requirements: At least two years of higher education, an AA or higher, or meet a rigorous standard for quality through a state or local academic assessment regardless of degree. The requirements for assistant teachers in nonpublic settings reflect child care licensing regulations. School districts that are federal Head Start grantees may require assistant teachers to have an AA and assistant teacher license.
- <sup>19</sup> Fringe benefits are not defined at the state level and are determined by the local school boards. However, since 4K is part of the school funding formula, when the teachers are school employees, they are at parity with the school benefits. When the district uses community sites and the teachers are employees of the community program, the benefits are defined by the employing program unless parity is defined in the contract with the district. Paid planning time is not required by the state. Lead teachers must be licensed and meet state requirements for professional development related to their license renewal.
- <sup>20</sup> Licensed teachers have the option of doing a performance-based system that includes writing professional development plans, working with a mentor, and having a team review and approval. Educator effectiveness practices for licensed teachers involve individualized professional development plans. For assistant teachers, requirements for individualized professional development plans depend on the employing agency.
- <sup>21</sup> Coaching and mentoring is built into the state teacher licensing system for teachers who elect to use a professional development plan (instead of credit-based license renewal) and in the teacher effectiveness process. For additional information, see: http://dpi.wi.gov/ee
- <sup>22</sup> Spending figures are estimates as 4K is part of the overall state school funding formula, and it is difficult to break out costs for only one grade level. Funding for 4K is 0.5 of the funding level for other grade levels. Districts can provide 0.6 if they provide parent outreach in addition to the full 437 hours of instructional time. Additional information can be found here: http://dpi.wi.gov/sfs/aid/general/equalization/formula
- <sup>23</sup> The Department of Public Instruction does not do onsite monitoring of programs unless they are a part of Title 1 or IDEA. 4K is considered a part of the school district and has statutory requirements to supervise all of their programs. When the 4K program is in a child care center, child care licensing occurs annually. When the 4K program is in Head Start, Head Start monitoring occurs as per the federal monitoring schedule.
- <sup>24</sup> The state requires a literacy screening in 4K through 2nd grade. The state Response to Intervention and the Comprehensive Screening and Assessment Blueprint both promote ongoing assessment. For additional information, see: http://collaboratingpartners.com/curriculum-assessment-rti.php and http://www.collaboratingpartners. com/documents/Healthy\_Children\_Blueprint\_9\_28\_16F.pdf

# WISCONSIN - Wisconsin Head Start State Supplement

- <sup>1</sup> Funds are available to federal Head Start grantees choosing to implement the program.
- <sup>2</sup> Programs follow the federal Head Start performance standards and the grant-approved program design.
- <sup>3</sup> Head Start can partner with a public school to provide public 4-year-old kindergarten.
- <sup>4</sup> Programs follow federal Head Start eligibility requirements and local selection criteria. Children must meet the federal Head Start income guidelines. Effective as of 2007, 35% of enrollment may be children whose family incomes are between 100% and 130% FPL after priority is given to children at or below 100% FPL. Income is the primary determinant of eligibility. However, children in foster care, as well as those who are experiencing homelessness, are also eligible. With a federal waiver, children eligible for free lunch are also eligible for the program. Regulations also allow 10% of the children to be over income and 10% with disabilities to be enrolled. Each Head Start grantee can prioritize risk in their selection process. Children with more risk factors have greater priority for enrollment. Head Start grantees establish their eligibility priorities.
- <sup>5</sup> Per federal Head Start requirements for single sessions.
- <sup>6</sup> The federal Head Start Performance Standards require that part-day programs provide children with at least one-third of their daily nutritional needs and school-day programs provide one-half to two-thirds of daily nutritional needs, depending on the length of the program day.
- <sup>7</sup> Screenings follow federal Head Start requirements. Medical screening is done by a physician that may be the family physician or arranged by Head Start.
- <sup>8</sup> Referrals can include medical follow-up or referrals for evaluations under IDEA.
- <sup>9</sup> Services follow federal Head Start Performance Standards and local practices.
- <sup>10</sup> The standards are utilized in the state's Child Care Quality Rating system.
- <sup>11</sup> The state supports a comprehensive vision for screening and assessment. For additional information, see: http://www.collaboratingpartners.com/documents/Healthy\_

Children\_Blueprint\_9\_28\_16F.pdf

- <sup>12</sup> The state has a training and technical assistance system that includes cross sector trainers, a 15-hour training, and a variety of resources. For additional information, see: http://www.collaboratingpartners.com/wmels-about.php
- <sup>13</sup> Provision of information through early learning standards training, at conferences, through some technical assistance providers, and through web-based resources. For additional information, see: http://www.collaboratingpartners.com/curriculum-assessment-curriculum.php
- <sup>14</sup> Teachers in the Head Start State Supplement programs are employees of the Head Start grantee and they must follow the federal Head Start requirements and local policies.
- <sup>15</sup> Follows federal Head Start requirements.
- <sup>16</sup> Federal Head Start monitoring procedures apply to programs when federal and state students are both served.
- <sup>17</sup> The state is informed if a Head Start grantee is found out of compliance with federal Head Start Performance Standards.
- <sup>18</sup> The state requires a literacy screening in 4K through 2nd grade. The state Response to Intervention and the Comprehensive Screening and Assessment Blueprint both promote ongoing assessment. For additional information, see http://collaboratingpartners.com/curriculum-assessment-rti.php and http://www.collaboratingpartners.com/ documents/Healthy\_Children\_Blueprint\_9\_28\_16F.pdf

# **GUAM** - Guam Department of Education Pilot Prekindergarten Program

<sup>1</sup> The Guam Department of Education is a unitary school district, compromised of four regions. There is one Pilot Prekindergarten School in each of the regions.

- <sup>2</sup> Four Pilot Schools were selected to implement the Prekindergarten Program, one in each region.
- <sup>3</sup> Due to the preparation of newly constructed classrooms, the state-funded Pilot Prekindergarten Program officially opened on October 15, 2015.
- <sup>4</sup> The Pilot Prekindergarten Program is voluntary.
- <sup>5</sup> All children enrolled must complete a registration form, which includes the submission of a physical examination and a TB Clearance.
- <sup>6</sup> Currently, the education policies reflect those of the K-12 program. Pre-K is at its initial stages and policies may be reviewed in the future to address various programs.
- <sup>7</sup> The "Food Friends & Mighty Moves Program," a curriculum that addresses health and nutrition, is being implemented in pre-K with support from the Nutrition Program at the University of Guam.
- <sup>8</sup> The salary is based on the Prekindergarten Teacher's Certification.
- \* Pre-K is in its initial stages and polices regarding classroom-embedded support will be reviewed in the future to include the pre-K teachers.
- <sup>10</sup> The initial funding provided for the personnel for Pilot Prekindergarten Program, the equipment and resources for the four classrooms, and the infrastructure of the Pilot Prekindergarten Classrooms.
- <sup>11</sup> The Guam Department of Education's Administrator for Research, Planning & Evaluation is conducting the Program Evaluation for the Pilot Prekindergarten Program.

# APPENDIX B: HEAD START DATA (continued)

# DATA SOURCES

- a Data are from the Education Commission of the States State Pre-K Funding: 2015-16 fiscal year report and NIEER's survey of state supplements to Head Start.
- b Head Start enrollment supported by state match from the Administration for Children and Families (ACF) or as reported in NIEER's survey of state supplements to Head Start.
- c Federal spending and enrollment data from the Administration for Children and Families (ACF).
- d Data from Head Start Program Information Reports (PIR) for 2015-2016.

# NOTES

Several state's Head Start state supplements also meet the requirements for inclusion as state-funded pre-K programs in this report. The state-funded Head Start enrollment and spending numbers reflected here match those in the state pre-K section of the report for these states: Minnesota, Oregon, Pennsylvania Head Start program, Wisconsin Head Start.

- 1 Some programs in these states meet some or all of the required non-federal share requirement for 20% of the total costs of the program to come from non-federal sources through state funds to support children. This does not represent all state funds that may be used for Head Start but those funds used to meet the federally required match. ACF did not provide enrollment by single year of age. Therefore, enrollment by age was estimated based on enrollment and proportions of all enrollees who were age 3 or age 4, as reported in the 2015-2016 Head Start PIR.
- 2 Funded enrollment was not available by single age of year. Data shown here are estimated based on the percentage of all 3- and 4-year-olds enrolled, as resported in the 2015-2016 Head Start PIR, and the total enrollment by by state as reported by ACF. These numbers do not include children funded by state match. Migrant & Seasonal and American Indian/Alaska Native (AIAN) enrollment and funding are attributed to the state where the program is headquartered, although many programs serve children across state lines throughout the year. The sum for federal Head Start funding only represents the portion of funding provided to states and does not include funding for programs in U.S. territories, but does include AIAN and Migrant & Seasonal programs. Total federal Head Start funding, including U.S. territories, was \$6,373,380,490.
- 3 The percent of children enrolled in full-day, five day per week programs includes AIAN and Migrant & Seasonal Head Start.
- 4 National salary averages include data from programs in the U.S. territories, including Puerto Rico, as well as AIAN and Migrant & Seasonal Head Start.

# APPENDIX C: U.S. CENSUS POPULATION ESTIMATES

# NUMBER OF 3- AND 4-YEAR-OLDS, BY STATE 2015

STATE	3-year-olds	4-year-olds	Total 3- and 4-year-olds
