Rhode Island launched a prekindergarten pilot initiative, Rhode Island Prekindergarten Demonstration Project, in the fall of 2009. The program is available to 4-year-old children in four of the state’s most urban communities and was in seven sites as of September 2009. The state allocated $700,000 to support four of seven demonstration classrooms, with local school districts funding the other three classrooms through federal Title I dollars appropriated under the American Recovery and Reinvestment Act. Across these seven classrooms, a total of 126 preschool education slots were available to 4-year-olds during the 2009-2010 school year.

For the Rhode Island Prekindergarten Demonstration Project, preschool teachers are required to hold a bachelor’s degree with early childhood specialization, and the Rhode Island Department of Education provides them with training and technical assistance on an ongoing basis at all seven locations. All children in districts offering the program who are 4 years old by September 1 are eligible and enrollment is determined by a lottery system. Public schools, Head Start, and private child care programs are eligible to receive funding directly and are permitted to subcontract with one another. The Prekindergarten Demonstration Project is included in the funding formula and is expected to grow into a statewide prekindergarten initiative. Through an ongoing process, starting in the 2009-2010 school year, this program is evaluated for both process quality and program impact/child outcomes.

The state also has offered several initiatives over the years with goals of expanding access to early childhood education. One of these early childhood initiatives, The Comprehensive Child Care Services Program (CCCSPI), was launched in 2001 to provide comprehensive services to 3- and 4-year-olds in child care settings. However, CCCSP was eliminated in an effort to close the state budget deficit for fiscal year 2009.

Through another initiative, Rhode Island provides supplemental state funding to the federal Head Start program. During the 2007-2008 school year, $2.97 million in state funds were used to fund an additional 400 slots in Head Start. However, the initiative experienced significant cutbacks in fiscal year 2009. As a result, only a total of 156 children were served during the 2009-2010 school year, using $800,000 in state funds and an additional $200,000 in TANF funds directed toward the state Head Start supplement.

State Head Start spending ....................................$1,000,000
State spending per child enrolled ......................$5,556
All reported spending per child enrolled* ............$9,1271

1 This is the total enrollment which is made up of 76 children being served with state funds only and 50 children being served with Title I funds only.
2 Rhode Island was not able to break its state-funded Head Start enrollment down by single year of age. As a result, this figure is an estimate based on the percentage of federal Head Start enrollees in Rhode Island who were 3 or 4 years old.

1 Each program is required to collaborate with its local Child Outreach program, which conducts screenings and referrals. Other support services include two parent conferences, parent involvement activities, and transition to kindergarten activities.

This sum also represents $200,000 in TANF funds dedicated to Head Start.

1 This number represents children in special education who are not enrolled in Head Start, but includes children who are enrolled in state-funded pre-K.
