Originally called the Early Childhood Education Comprehensive Plan at its inception in 2001, Nevada’s state-funded pre-K program is now referred to as the Nevada State Pre-Kindergarten Education Program. This program provides funds to establish new preschool programs as well as expand existing ones through both school districts and community organizations. Eligibility criteria are based on each program’s assessment of local community needs, though the program provides preschool access to 3-, 4-, and 5-year-olds. First priority is given to 4- and 5-year-olds who will be eligible for kindergarten the following year, though children are also prioritized if they are from low-income families, are English Language Learners, or have an IEP.

Funding amounts for grantees are determined based on the needs stated in individual grant applications. While program funding has remained the same since the 2008-2009 school year, increased collaboration and blended funding streams have allowed an additional 121 children to be served.

The state establishes program quality through the requirements of the competitive grant application process rather than relying on explicit program policies. Through two types of evaluation, annual and longitudinal, this program has been evaluated for both process quality and program impact/child outcomes. The state conducts a longitudinal evaluation each year, with the first cohort of students now in seventh grade.

The Nevada Pre-Kindergarten Standards were revised in 2010 and approved by the State Board of Education.

A statewide pilot project to assess the learning gains of children identified as Limited English Proficient (who represent 49.8 percent of enrollment) is currently underway. The project uses the Pre-LAS, a measure of oral language proficiency and pre-literacy skills.

1 This is an estimate of children in special education who are not enrolled in state-funded pre-K or Head Start.
2 Programs are required to operate a minimum of 10 hours per week. Specific operating schedules are determined locally, but programs generally operate 2-4 hours per day, 4 days per week.
3 If teachers began with the program prior to 2002, they were grandfathered in. Positions deemed “difficult to fill” with the appropriate certification may develop a professional development plan that the hired teacher would follow if they do not currently have an approved certification. All new hires must be credentialed teachers.
4 The Birth-K license has been incorporated into the Birth–Grade 2 certification and is no longer issued. Persons holding B–K certification are still eligible to teach in Nevada pre-K programs.
5 Screening and referral requirements are decided at the local level. Support services include parenting support or training, parent involvement activities, referral to social services, and other locally determined support services.
6 Meals are not required, but all programs provide at least snack and some provide lunch based on the school’s ability to support meals.
7 Several districts use Title I funds to support their state pre-K classrooms. Additionally, Title I funds are invested in Title I only pre-K classrooms that are not currently aligned with state pre-K.

Data are for the ‘10–‘11 school year, unless otherwise noted.

Although there is no income requirement, programs prioritize children who are English Language Learners, are from low-income families, or homeless among other locally determined enrollment priorities.
