ARKANSAS MAINTAINING HIGH QUALITY PRESCHOOL
Research shows positive effects of program

Washington, D.C. — State funded preschool education, hard hit by the Great Recession, has turned the corner and in many states is back on an expansion track according to the national survey of the states done annually by the nonpartisan National Institute for Early Education Research (NIEER) at Rutgers University. For the second year in a row, NIEER’s data show that, nationally speaking, the states have increased funding for pre-K.

Adjusted for inflation, state funding for pre-K increased by nearly $120 million nationally in 2013-2014. Enrollment growth also resumed, albeit modestly, with a total increase of 8,335 slots to reach its highest level recorded over the report’s 12-year history. And program quality standards increased as an unprecedented seven states gained ground on NIEER’s 10 benchmarks for quality standards.

Arkansas continues to maintain a high-quality preschool program. Researchers who studied it found positive effects on children’s learning. The state ranks 12th for access for 4-year-olds and it ranks 13th for spending per child. The program continues to achieve 9 of NIEER’s 10 benchmarks for quality standards. Arkansas was awarded a federal preschool development grant for $14.9M. Arkansas has not infused new funding into the pre-K program since 2008.

“Elsewhere, it is heartening to see state funded pre-K, once the fastest growing area in the entire education sector, back on the road to recovery,” said NIEER director Steve Barnett, “but given that the states cut half a billion dollars in funding in 2011-2012 and a number of states have yet to address those cuts, much work remains to be done. Hopefully, Arkansas will be one of the states that resumes progress with preschool investments.”

Joined at the press conference by U.S. Secretary of Education Arne Duncan, Barnett called on all levels of government to dedicate additional resources to preschool education in order to bridge the gap. “Unfortunately, the effects of the recession landed hardest on preschool-age children and our future prosperity depends on their future productivity,” he said.

Barnett said that in addition to adequate funding, state pre-K should have adequate quality and serve all children under 200 percent of poverty. Bold leaders from both major parties are moving some cities and states dramatically ahead, but far too many states have yet to follow. As some
cities move to provide preschool for all, most recently New York and Seattle, other areas of their states are left behind. At the same time, quality preschool is becoming a right for every child in some states; other states offer their children no pre-K at all.
