State-Funded Pre-K in US on Slow Road to Recovery Says National Report

Puerto Rico Described in Report

Washington, D.C — State funded preschool education, hard hit by the Great Recession, has turned the corner and in many states is back on an expansion track according to the national survey of the states done annually by the nonpartisan National Institute for Early Education Research (NIEER) at Rutgers University. For the second year in a row, NIEER’s data show that, nationally speaking, the states have increased funding for pre-K.

Adjusted for inflation, state funding for pre-K increased by nearly $120 million in 2013-2014 across all 50 states and Washington, DC. Enrollment growth also resumed, albeit modestly, with a total increase of 8,335 slots to reach its highest level recorded over the report’s 12-year history. And program quality standards increased as an unprecedented seven states gained ground on NIEER’s 10 benchmarks for quality standards.

Operating as a single school district, Puerto Rico does not formally support a state-funded prekindergarten program as defined in the NIEER report; however, the territory supports early learning initiatives through Level 1 optional nursery school programs for children under age 4, comprising Early Head Start, Head Start, and prekindergarten programs. “We’ve seen new investments and initiatives from several states that have not previously provided pre-K,” said NIEER Director Barnett. “We are aware of several attempts in Puerto Rico in recent years and hope to see it soon join those ranks in prioritizing young learners.”

“Elsewhere, it is heartening to see state funded pre-K, once the fastest growing area in the entire education sector, back on the road to recovery,” said NIEER director Steve Barnett, “but given that the states cut half a billion dollars in funding in 2011-2012 and a number of states have yet to address those cuts, much work remains to be done.”

Joined at the press conference by U.S. Secretary of Education Arne Duncan, Barnett called on all levels of government to dedicate additional resources to preschool education in order to bridge the gap. “Unfortunately, the effects of the recession landed hardest on preschool-age children and our future prosperity depends on their future productivity,” he said.
Barnett said that in addition to adequate funding, state pre-K should have adequate quality and serve all children under 200 percent of poverty. Bold leaders from both major parties are moving some states and cities dramatically ahead, but far too many states have yet to follow. At the same time, quality preschool is becoming a right for every child in some states; other states offer their children no pre-K at all. And, as some cities move to provide preschool for all, most recently New York and Seattle, other areas of their states are left behind.
