California

California became one of the first states to make state-funded preschool education available when it began offering the California State Preschool Program in 1965. Through a competitive application process, the state provides funding to school districts, private child care and faith-based centers, and Head Start and other public agencies. The initiative usually funds part-day programs but also provides a full-day program. In addition, the program works with other state and federal child care assistance programs to fund extended care. Participation in the State Preschool Program is limited to 3- to 5-year-old children from families below 75 percent of the state median income or to children who have experienced or are at risk for abuse, neglect, or exploitation.

California adopted and published a set of early learning standards, the California Preschool Learning Foundations, in 2008. While not yet implemented, the standards focus on social-emotional development, language and literacy, English language development, and mathematics. A second volume of standards is being developed, expected to be ready in 2010, and will focus on visual and performing arts and physical development and health. To record children’s development and to plan curriculum and other developmentally appropriate activities, the program uses the Desired Results for Children and Families system, which is being aligned with the Learning Foundations. A new version of the Desired Results Development Profile – Revised (DRDP-R) will be required in the 2010-2011 school year and implemented along with the learning foundations.

In the 2007-2008 school year, California launched the Prekindergarten and Family Literacy Program (PKFLP). Modeled after the State Preschool Program, PKFLP provides either part- or full-day services with an added literacy component and serves children from families at or below 75 percent of SMI or who receive protective services or are at risk for abuse, neglect, or family violence.

While not distinct state-funded preschool education programs, California runs other programs providing developmental services and child care. General Child Care Programs fund full-time slots for 3- and 4-year-olds, following the same requirements and curriculum as the State Preschool Program. The First 5 initiative funds programs promoting early childhood development from prenatal care to age 5 with funds generated by a tobacco tax. County commissions use the funds to provide services including child health care, parent education, family support, and early care and education. Lastly, California allocates $200 million for a School Readiness Initiative for four years.

The California State Preschool Program Act was enacted in 2008 with the goal of streamlining funding for multiple preschool programs. Effective July 1, 2009, the State Preschool, Prekindergarten and Family Literacy, and General Child Care programs providing services to eligible 3- and 4-year-old children in center-based settings were consolidated into the new California State Preschool Program. The program provides part- and full-day services to 3- and 4-year-olds and is administered through local educational agencies, colleges, community action agencies, and private nonprofit agencies.

1 The enrollment figure is a duplicated count as children can be enrolled in both the State Preschool Program and PKFLP. Total enrollment is a sum of both programs, with 86,118 served in the State Preschool Program and 8,503 served in PKFLP. These numbers are only for 3- and 4-year-olds, an additional 3,327 children who are younger than 3 years old or are 5-year-olds are also included in the total above.
2 The State Preschool Program is offered in 97 percent of counties, while the PKFLP is offered in 66 percent of counties, specifically counties with low-performing schools.
3 After children receiving protective services and those families with the lowest incomes are served and if there are no other eligible families, agencies can enroll up to 10 percent of children from families who may be up to 15 percent over income (and up to 20 percent from families with no income) limits for PKFLP.
4 Part-day programs typically operate for an academic year (175 days). Some programs operate a full calendar year (246 days) and exceptions can be granted.
5 The Preschool Learning Foundations that include early learning standards were published in the 2007-2008 school year and will be implemented in the 2010-2011 school year after being aligned with the Desired Results Developmental Profile-Revised (DRDP-R).
6 The Child Development Associate Teacher permit is the minimum requirement for an individual who may function as a lead teacher in the classroom. The permit requires 12 units in ECE or child development and 50 days of work experience in an instructional capacity. It may be renewed once for a five-year period. A CDA credential issued in California meets temporary alternative qualifications for the Associate Teacher permit. The full Child Development Teacher permit requires a minimum of 40 semester units of education including a minimum of 24 units in ECE or child development, and 175 days of work experience.
7 An optional Child Development Assistant Teacher Permit is offered and requires six credits in ECE or child development.
8 Programs typically enroll 24 children in the class. Three- and 4-year-olds are served in the State Preschool Program and only 4-year-olds are served in PKFLP.
9 Vision and hearing screenings are determined locally. A physical exam including vision, hearing and general health is required for program entry, but not mandated by the state. Health and social services referral and follow-up to meet family needs are required. Other support services include two annual parent conferences or home visits, parent education or job training, parent involvement activities, health services for children, referral to social services, and transition to kindergarten activities. PKFLP also offers parenting support or training and other support services.
10 Licensing laws and regulations require that all part-day programs provide at least a snack. Lunch and two snacks are required but breakfast is optional for all full-day programs. Contractors must meet the nutritional requirements specified by the federal Child Care Food Program or the National School Lunch Program, and programs must provide breakfast or lunch if specified in the original application for services.
11 This total is a sum of spending from the State Preschool Program ($325,773,525) and PKFLP ($34,820,520).
12 Per-child spending was calculated using the sum of total enrollments from both programs. However, because enrollment is a duplicated count, per-child spending may be higher.
