Vermont has a 30-year history of providing state-funded preschool. In 1987, the Vermont Early Education Initiative (EEI) was created as an annual competitive grant program to finance early education opportunities for at-risk 3- to 5-year-olds. Act 62 was signed into law in 2007, which significantly expanded publicly funded prekindergarten education for 4-year-old children in public schools and private programs. With Act 62, pre-K programs were supported through the state’s Education Fund similarly to K-12, prorated based on the 10 hours per week model. In the 2014 Legislative Session, legislators passed Act 166, which built on Act 62 by requiring all Vermont school districts to provide universal, publicly funded prekindergarten education for a minimum of 10 hours per week for 35 weeks annually for all 3-, 4-, and 5-year-old children who are not enrolled in kindergarten. Act 166 also requires an annual legislative evaluation of the state’s pre-K efforts that includes TS GOLD data, quality rating and improvement system (QRIS) level, and the creation of a pre-K monitoring system.

As mandated, in 2015-2016, all of Vermont’s local education agencies (LEAs) provided pre-K through an arrangement of school-based programs and partnerships with qualified private, family-based or center-based providers, private preschools, and/or with Head Start programs. All pre-K programs, including those operated by public schools, are required to attain at least four out of five stars in Vermont’s quality rating system, Step Ahead Recognition Systems (STARS), or to hold NAEYC accreditation. An exception is made for programs that have three stars. These programs are allowed to operate if the provider has developed a plan to achieve four or five stars within three years and the plan is approved by the Secretaries of Agency of Education and Agency of Human Services. STARS require structured observations of classroom quality using the ECERS or CLASS.

The newly revised Vermont Early Learning Standards (VELS) for birth through grade three were approved by the State Board of Education in August 2015. The VELS are aligned with the Head Start Early Learning Outcomes Framework, Common Core State Standards in English language arts and mathematics, as well as Next Generation Science Standards. The VELS are much more extensive, covering children from birth to third grade, than the previous standards that only covered pre-K.

Funding for Act 166 is provided by a mix of federal, state, and local dollars. State funding per pupil was set at $3,000 for the 2015-2016 school year based on an adequacy study. Federal funding in 2015-2016 came from various sources, including a $33 million, four-year federal Preschool Expansion grant to create full-time, comprehensive, high-quality preschool experiences for 4-year-olds in families with incomes under 200% FPL.

Data are for the 2015-2016 school year, unless otherwise noted.

* Pre-K programs may receive additional funds from federal or local sources that are not included in this figure.
** Head Start per-child spending includes funding only for 3- and 4-year-olds.
*** K-12 expenditures include capital spending as well as current operating expenditures.
