The State of Preschool 2017

The National Institute for Early Education Research annual report finds enrollment in state-funded pre-K has more than doubled since 2002, but funding has failed to keep pace.

Enrollment Top 10 STATES by Percentage of 4-year-old Enrolled in 2016-17

Fact 1: High-quality pre-k can help boost learning and socio-emotional development

Fact 2: High-quality pre-K requires adequate funding for qualified teachers and programs

Fact 3: Average state pre-K spending per-child has decreased since 2002, in real dollars

State Pre-K Spending per child 2002 vs 2017*

* among states with programs in 2002, amount adjusted for inflation

Spending per child varies widely. Some states spend more per child now than in 2002 adjusting for inflation, but most do not. Nationwide, average spending per child dropped in real dollars. For details on each state, visit nieer.org
