Utah currently does not provide a state-funded preschool program meeting the criteria for this report. However, the state does have several other early childhood initiatives.

In 2014, Utah House Bill 96 was passed, creating the High-Quality School Readiness Initiative. The initiative was amended in Utah House Bill 380 during the 2018 session. The purposes of the Utah School Readiness Initiative are to increase school readiness, improve academic performance, and reduce remediation costs associated with poor academic outcomes. Also in 2014, Utah approved future investment in early learning programming through a partnership between businesses and the state. The Utah High-Quality School Readiness Initiative was signed by Governor Herbert, allowing the newly created School Readiness Board to enter into results-based financing contracts with private entities to fund proven high-quality early childhood education programs to serve at-risk students. The bill also creates grant funding for existing public and private early education programs to increase quality, and funds independent evaluation. The bill details components of high-quality programs as well as home-based educational technology programs that may enter into a results-based contract with the Board. The initiative began serving children in the 2014-2015 school year. During the 2017-2018 school year, 438 students were served by LEAs and private providers.

Utah Senate Bill 101, High-Quality School Readiness Initiative Expansion (HQSR-E), passed in 2016. HQSR-E is intended to expand access to high-quality school readiness programs for eligible students to increase school readiness, improve academic performance, and reduce remediation costs associated with poor academic outcomes. The HQSR-E Grant program provides grant funds to LEAs with existing early education programs deemed high-quality, as determined by the Early Childhood Environment Rating Scale (ECERS-3 or ECERS-R) and some additional rubric criteria. Programs are eligible to apply for HQSR-E funding if they provide services to economically disadvantaged 4-year-old children, can illustrate how funds will be used to expand their current preschool programs, and are deemed high-quality school readiness programs based on the criteria noted above. During the 2017-2018 school year 4,948 students were served in HQSR-E classrooms. A total of 1,135 of those seats were created to enroll 4-year-old children from economically disadvantaged families using approximately $5.7 million in TANF funding. The program is set to expire in June 2019.

Utah's UPSTART Program provides a home-based, technology-delivered kindergarten readiness program to children throughout the state. During the 2017-2018 school year, the UPSTART program served children in every Utah school district and reached more than 14,000 students. State funds allocated to the program total $9.6 million, and an additional $2 million in TANF funding was made available through an RFP process. UPSTART prioritizes low-income, ELL, and rural children. The program includes an annual independent evaluation contracted by the Utah State Board of Education.

On February 10, 2017, the Utah State Board of Education agreed to have the Early Childhood Core Standards revised. The standards were originally written and adopted in 2012. The Early Childhood Core Standards cover multiple domains including: physical well-being and motor development, social-emotional development, approaches toward learning, language development, and cognitive and general knowledge. Revised standards are expected to be published and distributed by January 2020.

### NO PROGRAM
