Kansas Loses Ground in National Preschool Rankings

States hit new national records for preschool enrollment and spending as federal funding uncertainty puts pressure on states to close pre-K gaps

NEW BRUNSWICK, N.J. - A new national [report](#) released today finds that Kansas fell from 12th to 16th in the nation in preschool access for four-year-olds, and held steady at 5th in the nation in access for three-year-olds. In 2023-2024, Kansas served 45% of its four-year-olds and 21% of its three-year-olds in state-funded pre-K.

The [National Institute for Early Education Research's 2024 State of Preschool Yearbook](#) presents a critical snapshot of preschool education in America. The 2023-2024 school year set national records for state-funded preschool enrollment and spending. However, the increases in funding and enrollment are skewed by a small number of states making progress— and quality remains highly uneven from state to state.

Currently, 44 states and DC fund preschool programs. Most state pre-K programs continue to primarily or only serve four-year-olds. Nationally, enrollment reached 37% of four-year-olds but only 8% of three-year-olds.

In Kansas the report found that in the 2023-2024 school year:

- Kansas preschool enrolled 24,236 children, a decrease of 76 from the prior year.
- State spending totaled \$106,427,052, and an additional \$4,132,317 in TANF funds supporting the program, up \$9,357,190 (9%), adjusted for inflation, since last year.
- State spending per child (including TANF) equaled \$4,562 in 2023-2024, up \$399 from 2022-2023, adjusted for inflation.
- Kansas met 6 of 10 research-based preschool quality benchmarks recommended by NIEER.

"When states put money into quality preschool programs, they are investing in children's futures and can expect to see strong returns on their investments," said **W. Steven Barnett Ph.D., NIEER's senior director and founder**. "For those who invest in low quality programs, it may look like they are saving money, but those programs are not likely to support children's development enough to result in lasting academic and other gains that ultimately deliver savings for taxpayers. Despite some recent progress, Kansas still ranks toward the bottom nationally in per-pupil funding for preschool."

States spent more than \$13.6 billion on preschool in 2023-2024, including \$257 million in federal COVID-19 relief dollars. This represents an increase of nearly \$2 billion (17%) over the previous year. However, just four states—California, New Jersey, New York, and Texas—accounted for half (51%) of total national preschool spending.

Preschool investments increased in all but five states with existing programs. Six states—California, Colorado, Maryland, New Jersey, New Mexico, and Texas—each boosted preschool spending by more than \$100 million.

Enrollment grew to 1,751,109 children nationwide, an increase of more than 111,000 from the previous year. Ten states saw enrollment growth exceeding 20%: Alaska, Colorado, Delaware, Hawaii, Mississippi, Missouri, Nevada, New Mexico, North Dakota, and Ohio. California and Colorado alone added more than 30,000 children each, together accounting for over 60% of the national enrollment increase.

Alabama, Hawaii, Michigan, Mississippi, and Rhode Island remain the only states nationwide to meet all 10 of NIEER's recommended benchmarks for preschool quality. NIEER's benchmarks measure essential preschool quality indicators, including teacher qualifications, class sizes, early learning standards, and program assessments.

A key question across the country is how the Trump Administration's proposed cuts to the U.S. Department of Education, U.S. Department of Health and Human Services, and other federal agencies will affect Head Start and other programs for children. If Head Start funding for children in low-income families is eliminated, access to public preschool will decline in several states by more than 10 percentage points, and in some, by 20 percentage points.

"Nearly 5,000 three- and four-year-olds in Kansas could lose access to Head Start if federal funding for the program is eliminated," **said Allison Friedman-Krauss, Ph.D., lead author of the report.** "Increased uncertainty about federal funding underscores the urgency for states to prioritize and expand early childhood investments."

NIEER's Yearbook includes a special pullout section highlighting Alabama, Michigan, New Mexico, and Oklahoma as strong examples that states can replicate— despite having taken different paths to success.
