Ohio improves in national pre-K rankings due to major funding boost

Meanwhile, federal funding uncertainty puts pressure on states to close preschool gaps

NEW BRUNSWICK, N.J. - A new national [report](#) released today finds that Ohio rose from 36th to 35th in preschool enrollment for four-year-olds, and from 26th to 23rd in preschool enrollment for three-year-olds. In 2023-2024, Ohio served 15% of its four-year-olds and 6% of three-year-olds in state-funded preschool.

The [National Institute for Early Education Research's 2024 State of Preschool Yearbook](#) presents a critical snapshot of preschool education in America. The 2023-2024 school year set national records for state-funded preschool enrollment and spending. However, the increases in funding and enrollment are skewed by a small number of states making progress— and quality remains highly uneven from state to state.

Currently, 44 states and DC fund preschool programs. Most state pre-K programs continue to primarily or only serve four-year-olds. Nationally, enrollment reached 37% of four-year-olds but only 8% of three-year-olds.

In Ohio the report found that in the 2023-2024 school year:

- Ohio preschool enrolled 28,144 children, an increase of 10,144 from the prior year.
- State spending totaled \$119,612,000, up \$47,969,063 (67%), adjusted for inflation, since last year.
- State spending per child equaled \$4,250 in 2023-2024, up \$270 from 2022-2023, adjusted for inflation.
- Ohio met 5 of 10 research-based quality standards benchmarks recommended by NIEER.

"We applaud recent efforts by Governor DeWine and Ohio lawmakers to expand access to pre-K and increase per child pre-k investments," **said W. Steven Barnett, Ph.D., NIEER's senior director and founder.** "When states put money into quality preschool programs, they are investing in children's futures and can expect to see strong returns on their investments. We encourage state leaders to keep up the progress, as much work remains to provide access to full-day, adequately funded early learning opportunities for Ohio's children."

States spent more than \$13.6 billion on preschool in 2023-2024, including \$257 million in federal COVID-19 relief dollars. This represents an increase of nearly \$2 billion (17%) over the previous year. However, just four states—California, New Jersey, New York, and Texas—accounted for half (51%) of total national preschool spending.

Preschool investments increased in all but five states with existing programs. Six states—California, Colorado, Maryland, New Jersey, New Mexico, and Texas—each boosted preschool spending by more than \$100 million.

Enrollment grew to 1,751,109 children nationwide, an increase of more than 111,000 from the previous year. Ten states saw enrollment growth exceeding 20%: Alaska, Colorado, Delaware, Hawaii, Mississippi, Missouri, Nevada, New Mexico, North Dakota, and Ohio. California and Colorado alone added more than 30,000 children each, together accounting for over 60% of the national enrollment increase.

Alabama, Hawaii, Michigan, Mississippi, and Rhode Island remain the only states nationwide to meet all 10 of NIEER's recommended benchmarks for preschool quality. NIEER's benchmarks measure essential preschool quality indicators, including teacher qualifications, class sizes, early learning standards, and program assessments.

A key question across the country is how the Trump Administration's proposed cuts to the U.S. Department of Education, U.S. Department of Health and Human Services, and other federal agencies will affect Head Start and

other programs for children. If Head Start funding for children in low-income families is eliminated, access to public preschool will decline in several states by more than 10 percentage points, and in some, by 20 percentage points.

"More than 21,000 three- and four-year-olds in Nevada could lose access to Head Start if federal funding for the program is eliminated," **said Allison Friedman-Krauss, Ph.D., lead author of the report.** "Increased uncertainty about federal funding underscores the urgency for states to prioritize and expand early childhood investments."

NIEER's Yearbook includes a special pullout section highlighting Alabama, Michigan, New Mexico, and Oklahoma as strong examples that states can replicate— despite having taken different paths to success.
