## Missouri Elevates Early Education: National Report Shows Big Improvement in Access

*States looking to address the child care crisis are expanding access to free pre-K for three- and four-year-olds. However, researchers warn that access without quality isn't enough to improve student outcomes. Meanwhile, Georgia Pre-K sets a new example for the nation.*

**NEW BRUNSWICK, N.J.** A new national [report](#) released today finds that Missouri improved from 39<sup>th</sup> to 30<sup>th</sup> in preschool access for four-year-olds and from 29<sup>th</sup> to 28<sup>th</sup> for three-year-olds. In 2024-2025, Missouri served just 22% of its four-year-olds (up from just 10% in the previous year) and 3% of its three-year-olds (up from 2%) in state-funded pre-K. The state ranked 42<sup>nd</sup> in preschool spending per child.

The [National Institute for Early Education Research's 2025 State of Preschool Yearbook](#) presents a critical snapshot of preschool education in America. Currently, 44 states and DC fund preschool programs. Most state pre-K programs continue to primarily or only serve four-year-olds. Nationally, enrollment reached 37% of four-year-olds but only 9% of three-year-olds.

In Missouri the report found that in the 2024-2025 school year:

- Missouri's two state-funded preschool programs enrolled 18,264 children, an increase of 9,468 from the prior year.
- State preschool spending totaled \$56,524,225, up \$13,124,189 (30%), adjusted for inflation, since last year.
- State spending per child equaled \$3,095 in 2024-2025 down \$1,839 from 2023-2024, adjusted for inflation.
- Missouri met an average of 5.1 of 10 quality standards benchmarks.

"When states invest in quality preschool programs that can produce strong outcomes, they invest in a better future for children and taxpayers," **said W. Steven Barnett Ph.D., NIEER's senior director and founder.** "Missouri doubled access to preschool in 2024-2025, but leaders still have work to do when it comes to serving more three- and four-year-olds and increasing funding to implement quality preschool."

Nationally, state support for preschool education hit record highs in enrollment and funding in 2024-2025, but the pace of growth slowed compared to the previous year— and quality remains highly uneven from state to state.

Georgia's state-funded pre-K program for four-year-olds made history this year. It became the largest state-funded preschool program in the nation to meet all 10 quality benchmarks recommended by NIEER, and the first universal program to do so. Only five additional states meet all 10 of NIEER's research-based benchmarks for quality — Alabama, Hawaii, Michigan, Mississippi, and Rhode Island—in this year's report. None of those programs have the reach of Georgia's Pre-K Program. NIEER's benchmarks measure essential preschool quality indicators, including teacher qualifications, class sizes, early learning standards, and curriculum supports.

"Not only does preschool access vary by which state a child happens to live in, but so does the quality of that preschool experience," **said Allison Friedman-Krauss, lead author of the report.** "Only high-quality early care and education programs support children's development enough to result in lasting academic and other gains that ultimately deliver savings for taxpayers."

### MISSOURI: 2025 NATIONAL RANKINGS

- Enrollment at age 4: 30<sup>th</sup> (22%)
- Enrollment at age 3: 28<sup>th</sup> (3%)
- State spending per child: 42<sup>nd</sup> (\$3,095)
- All reported spending per child: 44<sup>th</sup> (\$3,095)
- Average benchmarks met: 5.1

States spent nearly \$14.4 billion on preschool in 2024-2025. Twenty-eight states increased their investments in preschool from the prior year, for a total increase of \$434 million, or 3%, adjusted for inflation. Including federal and local dollars, total spending was almost \$17.7 billion. Three states each spent more than \$1 billion last year: California (\$4.1 billion), New Jersey (\$1.2 billion), and New York (\$1 billion). Together, these three states account for 45% of all state preschool spending. Texas adds almost another \$1 billion.
