More Children Need Access to Quality Preschool in Ohio

States looking to address the child care crisis are expanding access to free pre-K for 3- and 4-year-olds.

However, researchers warn that access without quality isn't enough to improve student outcomes.

Meanwhile, Georgia Pre-K sets a new example for the nation.

NEW BRUNSWICK, N.J. A new national [report](#) released today finds that Ohio ranked 38th in preschool access for 4-year-olds, down from 35th last year. The state remained 23rd in the nation for preschool access for 3-year-olds. In 2024-2025, Ohio enrolled 13% of 4-year-olds and 5% of 3-year-olds in preschool. The state ranked 32nd in state spending per child, up from 39th last year. Ohio also enrolled 3,000 children in the new Child Care Choice Voucher Program.

The [National Institute for Early Education Research's 2025 State of Preschool Yearbook](#) presents a critical snapshot of preschool education in America. Currently, 44 states and DC fund preschool programs. Most state pre-K programs continue to primarily or only serve 4-year-olds. Nationally, enrollment reached 37% of 4-year-olds but only 9% of 3-year-olds.

In Ohio, the report found that in the 2024-2025 school year:

- Ohio's preschool program enrolled 23,594 children, a decrease of 4,550 from the prior year.
- State spending totaled \$120,573,483, down \$1,257,827 (1%), adjusted for inflation, since last year.
- State spending per child equaled \$5,110 in 2024-2025, up \$781 from 2023-2024, adjusted for inflation.
- Ohio met 5 of 10 research-based quality standards benchmarks recommended by NIEER.

"When states invest in quality preschool programs that can produce strong outcomes, they invest in a better future for children and taxpayers," **said NIEER director Steve Barnett**. "Ohio needs to continue to add to its investments in preschool to help more families prepare their 3- and 4-year-olds for school and life success."

Nationally, state support for preschool education hit record highs in enrollment and funding in 2024-2025. The pace of growth slowed, however, compared to the prior year, and many states continue to lag behind pre-pandemic enrollment levels.

Georgia's state-funded pre-K program for 4-year-olds made history this year. It became the largest state-funded preschool program in the nation to meet all 10 quality benchmarks recommended by NIEER, and the first universal program to do so. Only 5 additional states meet all 10 of NIEER's research-based benchmarks for quality – Alabama, Hawaii, Michigan, Mississippi, and Rhode Island – in this year's report. None of those programs have the reach of Georgia's Pre-K Program. NIEER's benchmarks measure essential preschool quality indicators, including teacher qualifications, class sizes, early learning standards, and curriculum supports.

"Not only does preschool access vary by which state a child happens to live in, but so does the quality of that preschool experience," **said Allison Friedman-Krauss, lead author of the report**. "Only high-quality early care and education programs support children's development enough to result in lasting academic and other gains that ultimately deliver savings for taxpayers. We are happy to see Ohio starting a full-day preschool option."

OHIO: 2025 NATIONAL RANKINGS

- Enrollment at age 4: 38th (13%)
- Enrollment at age 3: 23rd (5%)
- State spending per child: 32nd (\$5,110)
- All reported spending per child: 39th (\$5,110)
- Total benchmarks met: 5

States spent almost \$14.4 billion on preschool in 2024-2025. Twenty-eight states increased their investments in preschool from the prior year, for a total increase of \$434 million, or 3%, adjusted for inflation. Including federal and local dollars, total spending was nearly \$17.7 billion. Three states each spent more than \$1 billion last year: California (\$4.1 billion), New Jersey (\$1.2 billion), and New York (\$1 billion). Together, these 3 states account for 45% of all state preschool spending. Texas adds almost another \$1 billion.

Additional information about the *2025 State of Preschool Yearbook*, including individual state profiles and maps, graphs, and state rankings, can be found at www.nieer.org.
