Utah Preschool Access & Funding Among Worst in U.S.

States looking to address the child care crisis are expanding access to free pre-K for 3- and 4-year-olds.

However, researchers warn that access without quality isn't enough to improve student outcomes.

Meanwhile, Georgia Pre-K sets a new example for the nation.

NEW BRUNSWICK, N.J. - A new national [report](#) released today finds that Utah ranked 44th in preschool access for 4-year-olds, up from 45th last year, enrolling just 2% of 4-year-olds. The state ranked 32nd in preschool access for 3-year-olds, down from 30th last year, enrolling just 1% of 3-year-olds. In contrast, neighboring Colorado and New Mexico serve 70% and 53% of their states' 4-year-olds, and 24% and 22% of 3-year-olds, respectively. Utah ranked 39th in spending per child, up from 42nd last year.

The [National Institute for Early Education Research's 2025 State of Preschool Yearbook](#) presents a critical snapshot of preschool education in America. Currently, 44 states and DC fund preschool programs. Most state pre-K programs continue to primarily or only serve 4-year-olds. Nationally, enrollment reached 37% of 4-year-olds but only 9% of 3-year-olds.

In Utah, the report found that, in the 2024-2025 school year:

- Utah's preschool program enrolled 1,653 children, a decrease of 358 from the prior year.
- State spending totaled \$6,474,481, down \$338,229 (5%), adjusted for inflation, since last year.
- State spending per child equaled \$3,917 in 2024-2025, up \$529 from 2023-2024, adjusted for inflation.
- Utah met 6 of 10 research-based quality standards benchmarks recommended by NIEER.

"When states invest in quality preschool programs that can produce strong outcomes, they invest in a better future for children and taxpayers," **said NIEER director Steve Barnett**. "Utah needs to add to its investments in preschool access and quality to help more families prepare their 3- and 4-year-olds for school and life success."

Nationally, state support for preschool education hit record highs in enrollment and funding in 2024-2025. The pace of growth slowed, however, compared to the prior year, and many states continue to lag behind pre-pandemic enrollment levels.

Georgia's state-funded pre-K program for 4-year-olds made history this year. It became the largest state-funded preschool program in the nation to meet all 10 quality benchmarks recommended by NIEER, and the first universal program to do so. Only 5 additional states meet all 10 of NIEER's research-based benchmarks for quality — Alabama, Hawaii, Michigan, Mississippi, and Rhode Island — in this year's report. None of those programs have the reach of Georgia's Pre-K Program. NIEER's benchmarks measure essential preschool quality indicators, including teacher qualifications, class sizes, early learning standards, and curriculum supports.

"Not only does preschool access vary by which state a child happens to live in, but so does the quality of that preschool experience," **said Allison Friedman-Krauss, lead author of the report**. "Only high-quality early care and education programs support children's development enough to result in lasting academic and other gains that ultimately deliver savings for taxpayers."

States spent nearly \$14.4 billion on preschool in 2024-2025. Twenty-eight states increased their

UTAH: 2025 NATIONAL RANKINGS

- Enrollment at age 4: 44th (2%)
- Enrollment at age 3: 32nd (1%)
- State spending per child: 39th (\$3,917)
- All reported spending per child: 36th (\$6,134)
- Total benchmarks met: 6

investments in preschool from the prior year, for a total increase of \$434 million, or 3%, adjusted for inflation. Including federal and local dollars, total spending was almost \$17.7 billion. Three states each spent more than \$1 billion last year: California (\$4.1 billion), New Jersey (\$1.2 billion), and New York (\$1 billion). Together, these 3 states account for 45% of all state preschool spending. Texas adds almost another \$1 billion.

Additional information about the *2025 State of Preschool Yearbook*, including individual state profiles and maps, graphs, and state rankings, can be found at www.nieer.org.
