### WASHINGTON HOLDS PRE-K PROGRAM STEADY

#### *State poised to improve current offerings*

*New York. N.Y.* — Total state preschool enrollment declined for the first time as states, hard hit by the Great Recession, continued to deal with its consequences in the 2012-2013 school year. And, while total funding was up slightly, more than half of states with programs continued to make cuts. Those are the conclusions of a national study conducted by the National Institute for Early Education Research (NIEER), a nonpartisan organization at Rutgers, the State University of New Jersey.

“Our nation has emerged from the recession, but preschool-age children are being left to suffer its effects,” said NIEER director Steve Barnett. “A year ago, our data showed a half-billion-dollar cut in funding for state pre-K and stalled enrollment. For 2012-2013, we find that enrollment is down and funding per child, while up slightly, remains stalled at near-historic lows,” he said.

Nationally, four thousand fewer children attended state pre-K in 2012-2013 than the previous year—the first time a decline in total enrollment has been documented since NIEER began tracking state pre-K in 2002. Of the 40 states and District of Columbia with programs, 20 cut funding and 18 increased funding by more than one percent. The increases outweighed the decreases which, coupled with reduced enrollment, resulted in a net increase of \$36 per child or \$30.6 million, nationally.

Barnett said program quality standards, which also declined in a number of states as a result of the recession, remained stalled in 2012-2013. The study found one state (Ohio) gained against one quality benchmark while two (Missouri and Arizona) lost ground. More than half a million children, or 41 percent of nationwide enrollment in state pre-K, were served in programs that met fewer than half of NIEER’s 10 research-based benchmarks for quality standards.

Washington has largely managed to hold its pre-K program steady over the last few years. The state remains far below average in access to quality pre-K: it ranks 32<sup>nd</sup> for 4-year-old access, enrolling just 8 percent of children at that age, and 20<sup>th</sup> for enrolling 1 percent of 3-year-olds. The program saw no real enrollment growth from the previous year. The state ranks 9<sup>th</sup> for state spending, though it experienced a slight decrease in per-child spending this year (reduced \$98). With the addition of funding from other sources, Washington spends \$6,806 per child, ranking 13<sup>th</sup> on this measure. The state meets nine of NIEER's 10 quality standards benchmarks. "While Washington has largely been in a holding pattern, we are encouraged by ongoing efforts to improve the early childhood system statewide. Seattle is also one of several large U.S. cities considering committing itself to providing access to quality pre-K program to all children," said Barnett.

In the aftermath of bad news nationally, some positive responses are already apparent. Local governments are developing their own plans to move ahead on early childhood education, from Boston and Cleveland to San Antonio and Seattle. A few states, including Connecticut and Maine, have made strong commitments to their existing programs while others, including Mississippi and Indiana, are beginning work on small programs for the first time. No better example can be found than New York, where the Mayor of the nation's largest city put forward a bold proposal for universal high quality pre-K and was joined in this commitment by the Governor and state legislature. "If ever there were a time for leaders at the local, state, and national levels to unite in their efforts to provide high-quality preschool education to our next generation, this is it," Barnett said.
