The Pandemic Threatens West Virginia’s Progress in Providing High-Quality Preschool

Federal/State Partnership Needed to Better Serve Young Children and their Families

NEW BRUNSWICK, NJ—The COVID-19 pandemic set back state preschool enrollment and funding across the country, according to the 2020 edition of The State of Preschool Yearbook by the National Institute for Early Education Research (NIEER) at the Rutgers Graduate School of Education.

Pre-pandemic, West Virginia saw an increase in enrollment and a decrease in inflation-adjusted spending as a result of a policy change moving up the minimum age eligibility date the previous year. The state maintained high standards for quality.

Now is the time for a renewed commitment to high-quality pre-K for all, beginning with those in the lowest income families. Nationally, the report found that:

- Growth in state-funded preschool was slowing before the pandemic.
- The pandemic imposed serious setbacks and reversed recent progress.
- Uneven progress among states is worsening inequality in children’s access to high-quality preschool.
- Most states spend too little per child to support high-quality, full-day pre-K and few reach all their 3- and 4-year-olds.

“West Virginia has been a leading example to other states for policies to ensure preschool quality while expanding access. As the state expands access to more children, including for 3-year-olds, continuous quality improvement will remain essential to success,” said Steven Barnett, Ph.D., NIEER’s founder and senior co-director.

Nationwide, enrollment in state-funded preschool increased slightly in 2019-2020, but took a hit in 2020-2021 as many programs closed or only offered virtual learning and parents were hesitant to send children to in-person school during the pandemic.

“West Virginia must act now to mitigate the pandemic’s impacts on young children and pre-K programs, get pre-K back on track for next year, and plan for even greater long-term success,” said Barnett. “The federal government should provide support for, and states commit to, high-quality pre-K. While federal rescue and recovery dollars can help, a new federal initiative NIEER has proposed could bring $34.9 million in federal support to West Virginia for preschool during the next four years.”

Across the country the survey reveals bipartisan support for preschool with both "red" and "blue" states among the nation's leaders in high quality pre-K. That offers hope that the nation can move ahead to expand access to high-quality pre-K more rapidly in the future.

The 2020 State of Preschool Yearbook was supported with funding from the Heising-Simons Foundation and the Bill and Melinda Gates Foundation. Cost modeling and funding analyses were supported with funding from the PNC Foundation.
