Too Many New York Preschoolers Didn’t Receive High-Quality Education Amid Pandemic

State funding for preschool programs declined nationally for the first time since 2014, enrollment decreased in almost every state

NEW BRUNSWICK, NJ – The COVID-19 pandemic highlighted and intensified existing problems of access to high-quality early childhood education in New York, leading to declines in enrollment and state funding during the 2020-2021 school year, according to the 2021 State of Preschool Yearbook, released today by the National Institute for Early Education Research (NIEER) at the Rutgers Graduate School of Education.

Key findings from the annual survey - focused on the first school year fully impacted by the COVID-19 pandemic – are summarized below. In 2020-2021, many states funded preschool to maintain capacity despite unprecedented drops in enrollment due to the pandemic. To account for this, we report both spending per child and spending per child if the program was at capacity (full enrollment equivalent). For some states, the two are the same. States are ranked on the latter.

- Enrollment in state-funded preschool in New York was 115,597, a decrease of 4,542;
- State spending for preschool programs in New York was $815 million, a decrease of $34.8 million (inflation adjusted);
- New York state spending per child and spending per full enrollment equivalent was $7,052;
- The state met 7 of 10 quality standards benchmarks;
- New York is within reach of serving at least 70% of 4-year-olds across state preschool, Head Start, and special education and the state legislature’s recent proposals for increased preschool funding would help the state meet its stated goal of universal preschool.

According to the report, 298,000 fewer children were enrolled in preschool nationally than in the prior year due to difficulties created by the pandemic such as health risks, closed classrooms, and remote preschool. States across the country served less than 30 percent of 4-year-olds and less than five percent of 3-year-olds in 2020-21. Most states preserved capacity during 2020-2021 allowing enrollments to rebound in the current year, but far too many children still lack access to preschool. Further, total state pre-K spending was $8.97 billion, an inflation adjusted decrease of nearly $255 million (3%) from the previous year. Nationally, this is the largest decline since the Great Recession. States also used at least $440 million in pandemic relief funding to support
preschool, more than offsetting the decline in state spending and preserving pre-K capacity that otherwise would have been lost. However, nationally, state spending per child remains about the same as it was 20 years ago, adjusted for inflation.

“Our country has yet to adequately invest in high-quality preschool programs, while the pandemic has erased a decade of progress and exacerbated inequality,” said W. Steven Barnett, Ph.D., NIEER’s founder and senior co-director. “Children and parents in New York need high-quality, full-day preschool programs that support early learning and parental employment. The pandemic has made it even clearer that such preschool programs are essential for young children and their families. New York needs to renew its two-decade old commitment to universal preschool for 4-year-olds. The state can turn to New York City for lessons on how to make good on this promise for both 3- and 4-year-olds.”

“Too many children in New York and across the country missed out on a year of learning. New York must ensure that health risks are mitigated health risks in order to get children back into classrooms,” said Allison Friedman-Krauss, Ph.D., NIEER assistant research professor. “And teachers are burnt out as they’ve worked to provide support and learning to young students amid the challenges of the past year. There is no time to waste. New York needs to fund universal preschool to address pervasive problems in access to high-quality early learning.”
