## **Too Many Tennessee Preschoolers Didn't Receive High-Quality Education Amid Pandemic**

*State funding for preschool programs declined nationally for the first time since 2014, enrollment decreased in almost every state*

**NEW BRUNSWICK, NJ** – The COVID-19 pandemic highlighted and intensified existing problems of access to high-quality early childhood education in Tennessee, leading to drastic declines in enrollment during the 2020-2021 school year, according to the [2021 State of Preschool Yearbook](#), released today by the National Institute for Early Education Research (NIEER) at the Rutgers Graduate School of Education. Despite the pandemic, Tennessee was one of a few states to maintain preschool funding levels.

Key findings from the annual survey - focused on the first school year fully impacted by the COVID-19 pandemic – are summarized below. In 2020-2021, many states funded preschool to maintain capacity despite unprecedented drops in enrollment due to the pandemic. To account for this, we report both spending per child and spending per child if the program was at capacity (full enrollment equivalent). For some states, the two are the same. States are ranked on the latter.

- Enrollment in state-funded preschool in Tennessee was 15,601, a decrease of 2,864;
- State spending for preschool programs in Tennessee was \$82 million, a decrease of \$1.5 million (inflation adjusted);
- Tennessee spent \$5,279 per child but spending per child equaled \$4,460 for the program at full capacity;
- Tennessee met 9 of 10 quality standards benchmarks;
- Tennessee has raised standards in recent years but rigorous evaluation is needed to determine if these changes have produced positive results and what else might be needed to ensure the program yields long-term benefits.

### **TENNESSEE: 2021 NATIONAL RANKINGS**

- Enrollment at age 4: 29<sup>th</sup> (18%)
- Enrollment at age 3: 30<sup>th</sup> (1%)
- State spending per child: 29<sup>th</sup> (\$4,460)
- All reported spending per child: 30<sup>th</sup> (\$5,734)

According to the report, 298,000 fewer children were enrolled in preschool nationally than in the prior year due to [difficulties created by the pandemic](#) such as health risks, closed classrooms, and remote preschool. States across the country served less than 30 percent of 4-year-olds and less than five percent of 3-year-olds in 2020-21. Most states preserved capacity during 2020-2021 allowing enrollments to rebound in the current year, but far too many children still lack access to preschool. Further, total state pre-K spending was \$8.97 billion, an inflation adjusted decrease of nearly \$255 million (3%) from the previous year. Nationally, this is the largest decline since the

Great Recession. States also used at least \$440 million in pandemic relief funding to support preschool, more than offsetting the decline in state spending and preserving pre-K capacity that otherwise would have been lost. However, nationally, state spending per child remains about the same as it was 20 years ago, adjusted for inflation.

“Our country has yet to adequately invest in high-quality preschool programs, while the pandemic has erased a decade of progress and exacerbated inequality,” said **W. Steven Barnett, Ph.D., NIEER’s founder and senior co-director**. “Children and parents in Tennessee need high-quality, full-day preschool programs that support early learning and parental employment. The pandemic has made it even clearer that such preschool programs are essential for young children and their families. With past evaluations in Tennessee raising questions about long-term impacts, Tennessee should be investing in new evaluations to determine if state policy changes have produced the needed improvements and what else might be needed from preschool through 3<sup>rd</sup> grade to ensure children benefit long-term.”

“Too many children in Tennessee and across the country missed out on a year of learning. Tennessee must implement best practices that mitigate health risks in order to get children back into classrooms,” said **Allison Friedman-Krauss, Ph.D., NIEER assistant research professor**. “And teachers are burnt out as they’ve worked to provide support and learning to young students amid the challenges of the past year. There is no time to waste. Tennessee must maintain its commitment to quality and increase access to high-quality early learning.”
