Alaska Preschool Access, Quality too Low as Enrollment Falls
Nationally Uneven Access & Quality Span Two Decades, but New Universal Preschool Efforts Offer Hope

NEW BRUNSWICK, NJ – State-funded preschool enrollment decreased in Alaska though nationally, there was a partial recovery last year from the negative impacts of the COVID-19 pandemic. Longstanding problems across the country include not just preschool access which remained below pre-pandemic levels, but inadequate funding and quality standards that failed to improve, according to the 2022 State of Preschool Yearbook, released today by Rutgers University’s National Institute for Early Education Research (NIEER).

Key findings from the annual survey, which focused on the 2021-2022 school year, are summarized below for Alaska.

- Enrollment in state-funded preschool was 605, a decrease of 31;
- State spending for preschool programs was $3,238,823, an increase of $229,181 (inflation adjusted);
- State spending per child enrolled in preschool was $5,353;
- Alaska met 2 of 10 quality standards benchmarks;
- Alaska has not committed to working towards universal preschool for four-year-olds;
- Alaska did not provide incentives for preschool teacher retention or recruitment.

The new report found substantial year-over-year progress in enrollment nationally with a 13% increase of children in state-funded preschool in 2021-2022 with 180,668 more preschoolers enrolled than in the prior school year, and growth in nearly every state.

Despite this, most children still lack access to high-quality, publicly-funded early childhood education, and preschool enrollment is down by 8% compared to pre-pandemic levels, from the high of 1.66 million in 2019-2020 to 1.53 million in 2021-2022.

States spent an estimated $9.9 billion on preschool, including more than $393 million in COVID-19 relief, an inflation adjusted increase of only $71 million (0.7%) from the prior year. Spending per child enrolled in preschool was $6,571. Adjusting for inflation, spending per child has not changed in 20 years and remains too low to support high-quality full-day preschool.

Most state-funded preschool programs reported experiencing a shortage of qualified teachers during the 2021-2022 school year, including Alaska, but few states reported providing incentives

ALASKA: 2022 NATIONAL RANKINGS

- Enrollment at age 4: 41st (5%)
- Enrollment at age 3: 30th (1%)
- State spending per child: 25th ($5,353)
- All-reported spending per child: 33rd ($5,403)
for teacher recruitment or retention. Waivers to teacher education requirements were more prevalent than in previous years, raising concerns about preschool quality.

“Progress in expanding access to high-quality state-funded preschool over the last two decades has been slow and uneven, despite proven benefits to children, families and our nation’s economy as a whole,” said Allison Friedman-Krauss, Ph.D., the report’s lead author. “Alaska leaders must address this ongoing lack of access, lackluster quality and related issues of teacher retention and pay to ensure that all children have access to the educational opportunities they deserve.”

A handful of states considering universal preschool offers a bright spot and an opportunity to expand access for nearly half of preschoolers across the country.

“For the first time in decades, new state commitments to universal preschool give hope that the USA might take a giant step forward. If these states make good on their newly promised investments in preschool for all they will advance early education opportunities dramatically,” said W. Steven Barnett Ph.D., NIEER’s senior co-director. “The Alaska Reads Act is a step in the right direction, but Alaska should continue to assess its support for preschool against other states that provide much stronger support for access and quality standards. Alaska’s young children deserve no less than access to a high-quality program.”
