Preschool in Delaware Declines Further, Will the First State Be Last?  
\textit{Nationally Uneven Access & Quality Span Two Decades, but New Universal Preschool Efforts Offer Hope}

NEW BRUNSWICK, NJ – State-funded preschool partially recovered last year from the negative impacts of the COVID-19 pandemic nationally but remained flat in Delaware. Over the past 20 years, Delaware’s ranking nationally for preschool enrollment at age 4 has fallen from 20th to 40th. Remarkably, Delaware provided preschool to fewer 4-year-olds in 2022 than it did in 2002. Elsewhere in the nation, longstanding problems persisted as preschool access remained below pre-pandemic levels, funding was inadequate, and quality standards failed to improve according to the \textit{2022 State of Preschool Yearbook}, released today by Rutgers University’s National Institute for Early Education Research (NIEER).

Key findings from the annual survey, which focused on the 2021-2022 school year, are summarized below for Delaware:

- Enrollment in state-funded preschool was 818, a decrease of 12;
- State spending for preschool programs was $6,149,300, a decrease of $510,440 (inflation adjusted);
- State spending per child enrolled in preschool was $7,517;
- Delaware met 9 of 10 quality standards benchmarks;
- Delaware provided incentives for preschool teacher retention and recruitment.

The new \textit{report} found substantial year-over-year progress in enrollment nationally with a 13% increase of children in state-funded preschool in 2021-2022 with 180,668 more preschoolers enrolled than in the prior school year, and growth in nearly every state.

Despite this, most children still lack access to high-quality, publicly-funded early childhood education, and preschool enrollment is down by 8% compared to pre-pandemic levels, from the high of 1.66 million in 2019-2020 to 1.53 million in 2021-2022. Thirty-two percent of 4-year-olds and 6% of 3-year-olds were enrolled in state-funded preschool. Adding in Head Start and Early Childhood Special Education, public preschool enrollment was 41% at age 4 and 17% at age 3.

States spent an estimated $9.9 billion on preschool, including more than $393 million in COVID-19 relief, an inflation adjusted increase of only $71 million (0.7%) from the prior year. Spending per child enrolled in preschool was $6,571, which is likely higher than what it would have been...
if enrollment was fully recovered. Adjusting for inflation, spending per child has not changed in 20 years and remains too low to support high-quality full-day preschool.

Most state-funded preschool programs, including Delaware, reported experiencing a shortage of qualified teachers during the 2021-2022 school year. Delaware was one of just a few states to report providing incentives for teacher recruitment and retention. Waivers to teacher education requirements were more prevalent than in previous years, raising concerns about preschool quality.

“Progress in expanding access to high-quality state-funded preschool over the last two decades has been slow and uneven, despite proven benefits to children, families and our nation’s economy as a whole,” said Allison Friedman-Krauss, Ph.D., the report’s lead author. “Delaware must address this ongoing lack of access to ensure that all children have access to the educational opportunities they deserve.”

A handful of major states considering universal preschool offers a bright spot and an opportunity to expand access for nearly half of preschoolers across the country.

“For the first time in decades, new state commitments to universal preschool give hope that the USA might take a giant step forward. If these states make good on their newly promised investments in preschool for all they will advance early education opportunities dramatically,” said W. Steven Barnett Ph.D., NIEER’s senior co-director. “Having made no progress in two decades, Delaware should take a hard look at how poorly its support for preschool stakes up against neighboring states that provide much stronger programs. Delaware’s young children deserve no less than others.”
