## **District of Columbia Continues to Lead Nation in Providing Access to Preschool Education for All Children**

*Nationally Uneven Access & Quality Span Two Decades, but New Universal Preschool Efforts  
Offer Hope*

**NEW BRUNSWICK, NJ** – The District of Columbia continued to lead the nation in preschool enrollment and funding, providing universal access for three- and four-year-olds. Nationally, state-funded preschool partially recovered last year from the negative impacts of the COVID-19. However, longstanding problems in early education across the country persisted as preschool access remained below pre-pandemic levels, funding was inadequate, and quality standards failed to improve, according to the [2022 State of Preschool Yearbook](#), released today by Rutgers University’s National Institute for Early Education Research ([NIEER](#)).

Key findings from the annual survey, which focused on the 2021-2022 school year, are summarized below for the District of Columbia:

- Enrollment in state-funded preschool was 12,326, decrease of 597;
- State spending for preschool programs was \$251,973,895, a decrease of \$17,135,244 (inflation adjusted);
- State spending per child enrolled in preschool was \$20,442;
- The District of Columbia met 4 of 10 quality standards benchmarks;
- The District of Columbia has achieved universal preschool for three- and four-year-olds;
- The District of Columbia did not provide incentives for preschool teacher retention or recruitment.

### **DISTRICT OF COLUMBIA: 2022 NATIONAL RANKINGS**

- Enrollment at age 4: 1st (83%)
- Enrollment at age 3: 1st (69%)
- State spending per child: 1st (\$20,442)
- All-reported spending per child: 1st (\$20,442)

The new [report](#) found substantial year-over-year progress in enrollment: nationally with a 13% increase of children in state-funded preschool in 2021-2022 with 180,668 more preschoolers enrolled than in the prior school year, and growth in nearly every state.

Despite this, most children still lack access to high-quality, publicly-funded early childhood education, and preschool enrollment is down by 8% compared to pre-pandemic levels, from the high of 1.66 million in 2019-2020 to 1.53 million in 2021-2022.

States spent an estimated \$9.9 billion on preschool, including more than \$393 million in COVID-19 relief, an inflation adjusted increase of only \$71 million (0.7%) from the prior year. Spending per child enrolled in preschool was \$6,571. Adjusting for inflation, spending per child has not changed in 20 years and remains too low to support high-quality full-day preschool.

Most state-funded preschool programs reported experiencing a shortage of qualified teachers during the 2021-2022 school year, but few states reported providing incentives for teacher recruitment or retention. Waivers to teacher education requirements were more prevalent than in previous years, raising concerns about preschool quality.

“Nationally progress in expanding access to high-quality state-funded preschool over the last two decades has been slow and uneven, despite proven benefits to children, families and our nation’s economy as a whole,” **said Allison Friedman-Krauss, Ph.D., the report’s lead author.** “The District stands out as an exception, having achieved universal preschool access for three- and four-year-olds.”

A handful of states considering universal preschool offers a bright spot and an opportunity to expand access for nearly half of preschoolers across the country.

“For the first time in decades, new state commitments to universal preschool give hope that the USA might take a giant step forward. If these states make good on their newly promised investments in preschool for all they will advance early education opportunities dramatically,” **said W. Steven Barnett Ph.D., NIEER’s senior co-director.** “We praise the work being done in the District of Columbia to ensure all children have access to preschool with high funding per child levels. The District should work to improve quality standards in all programs.”
