## **Kentucky Preschool Enrollment Rebounds, Will the Legislature Increase Access Further?**

*Nationally Uneven Access & Quality Span Two Decades, but New Universal Preschool Efforts Offer Hope*

**NEW BRUNSWICK, NJ** – State-funded preschool partially recovered last year from the negative impacts of the COVID-19 pandemic nationally, and in Kentucky. Despite the rebound, Kentucky’s preschool enrollment remained far below the pre-pandemic level. In key respects, Kentucky offers a stronger preschool program than many other states; access remains the biggest problem. Governor Beshear has proposed to make the program universal. Will leaders in the legislature also commit to this goal? Elsewhere across the nation, longstanding problems persisted as preschool access remained below pre-pandemic levels, funding was inadequate, and quality standards failed to improve, according to the [2022 State of Preschool Yearbook](#), released today by Rutgers University’s National Institute for Early Education Research ([NIEER](#)).

Key findings from the annual survey, which focused on the 2021-2022 school year, are summarized below for Kentucky:

- Enrollment in state-funded preschool was 17,611, an increase of 2,187;
- State spending for preschool programs was \$119,820,503, including \$19,081,493 in federal pandemic relief funding, an increase of \$7,785,654 (inflation adjusted);
- State spending per child enrolled in preschool was \$6,804;
- Kentucky met 8 of 10 quality standards benchmarks;
- Kentucky has not committed to universal preschool for four-year-olds;
- Kentucky did not provide incentives for preschool teacher retention or recruitment.

### **KENTUCKY: 2022 NATIONAL RANKINGS**

- Enrollment at age 4: 24th (25%)
- Enrollment at age 3: 18th (6%)
- State spending per child: 19th (\$6,804)
- All-reported spending per child: 11th (\$11,505)

The new [report](#) found substantial year-over-year progress in enrollment nationally with a 13% increase of children in state-funded preschool in 2021-2022 with 180,668 more preschoolers enrolled than in the prior school year, and growth in nearly every state.

Despite this, most children still lack access to high-quality, publicly-funded early childhood education, and preschool enrollment is down by 8% compared to pre-pandemic levels, from the high of 1.66 million in 2019-2020 to 1.53 million in 2021-2022. Thirty-two percent of 4-year-olds and 6% of 3-year-olds were enrolled in state-funded preschool. Adding in Head Start and Early Childhood Special Education, public preschool enrollment was 41% at age 4 and 17% at age 3.

States spent an estimated \$9.9 billion on preschool, including more than \$393 million in COVID-19 relief, an inflation adjusted increase of only \$71 million (0.7%) from the prior year. Spending per child enrolled in preschool was \$6,571. Adjusting for inflation, spending per child has not changed in 20 years and remains too low to support high-quality full-day preschool.

Most state-funded preschool programs reported experiencing a shortage of qualified teachers during the 2021-2022 school year, including Kentucky, but few states reported providing incentives for teacher recruitment or retention. Waivers to teacher education requirements were more prevalent than in previous years, raising concerns about preschool quality.

“Progress in expanding access to high-quality state-funded preschool over the last two decades has been slow and uneven, despite proven benefits to children, families and our nation’s economy as a whole,” **said Allison Friedman-Krauss, Ph.D., the report’s lead author.**

“Kentucky leaders should address this ongoing lack of access and related issues of teacher retention and pay to ensure that all children have access to the educational opportunities they deserve.”

A handful of states considering universal preschool offers a bright spot and an opportunity to expand access for nearly half of preschoolers across the country.

“For the first time in decades, new state commitments to universal preschool give hope that the USA might take a giant step forward. If these states make good on their newly promised investments in preschool for all they will advance early education opportunities dramatically,” **said W. Steven Barnett Ph.D., NIEER’s senior co-director.** “Kentucky’s citizens should compare their state’s support for preschool against other states that provide much support for access, quality standards, and funding. Kentucky’s young children deserve no less than others.”
