Maine's Progress Toward Universal Preschool Makes Major Rebound from Pandemic Decline

Nationally Uneven Access & Quality Span Two Decades, but New Universal Preschool Efforts Offer Hope

NEW BRUNSWICK, NJ –Maine's public preschool enrollment returned to near the pre-pandemic level but still has much room to grow. Nationally, as well as in Maine, state-funded preschool partially recovered last year from the negative impacts of the COVID-19 pandemic. However, longstanding problems in early education in across the nation persisted as preschool access remained below pre-pandemic levels, funding was inadequate, and quality standards failed to improve, according to the [2022 State of Preschool Yearbook](#), released today by Rutgers University's National Institute for Early Education Research ([NIEER](#)).

Key findings from the annual survey, which focused on the 2021-2022 school year, are summarized below for Maine:

- Enrollment in state-funded preschool was 5,591, an increase of 1,012;
- State spending for preschool programs was \$22,675,135, a decrease of \$5,188,785 (inflation adjusted);
- State spending per child enrolled in preschool was \$4,056;
- Maine met 9 of 10 quality standards benchmarks;
- Maine has committed to universal preschool for four-year-olds and an additional \$10 million was allocated for expansion grants in the current school year;
- Maine did not provide incentives for preschool teacher retention or recruitment.

MAINE: 2022 NATIONAL RANKINGS

- Enrollment at age 4: 14th (41%)
- Enrollment at age 3: None served
- State spending per child: 35th (\$4,056)
- All-reported spending per child: 27th (\$7,372)

The new [report](#) found substantial year-over-year progress in enrollment nationally with a 13% increase of children in state-funded preschool in 2021-2022 with 180,668 more preschoolers enrolled than in the prior school year, and growth in nearly every state.

Despite this, most children still lack access to high-quality, publicly-funded early childhood education, and preschool enrollment is down by 8% compared to pre-pandemic levels, from the high of 1.66 million in 2019-2020 to 1.53 million in 2021-2022.

States spent an estimated \$9.9 billion on preschool, including more than \$393 million in COVID-19 relief, an inflation adjusted increase of only \$71 million (0.7%) from the prior year. Spending per child enrolled in preschool was \$6,571. Adjusting for inflation, spending per child has not changed in 20 years and remains too low to support high-quality full-day preschool.

Most state-funded preschool programs reported experiencing a shortage of qualified teachers during the 2021-2022 school year, including Maine, but few states reported providing incentives for teacher recruitment or retention. Waivers to teacher education requirements were more prevalent than in previous years, raising concerns about preschool quality.

“Nationally, progress in expanding access to high-quality state-funded preschool over the last two decades has been slow and uneven, despite proven benefits to children, families and our nation’s economy as a whole,” **said Allison Friedman-Krauss, Ph.D., the report’s lead author.** “Maine leaders are encouraged to continue their commitment to universal preschool and ensuring all children have access to the educational opportunities they deserve.”

A handful of states considering universal preschool offers a bright spot and an opportunity to expand access for nearly half of preschoolers across the country.

“For the first time in decades, new state commitments to universal preschool give hope that the USA might take a giant step forward.” **said W. Steven Barnett Ph.D., NIEER’s senior co-director.** “As it rebounds from the pandemic aided by a new Preschool Development Grant award, Maine is poised for national leadership in expanding access so that every child—including those in rural communities—can receive a quality preschool education.”
