Utah Preschool Enrollment Expands but Access, Funding, Quality are Low *Nationally Uneven Access & Quality Span Two Decades, but New Universal Preschool Efforts Offer Hope*

NEW BRUNSWICK, NJ – In Utah and nationally, state-funded preschool partially recovered last year from the negative impacts of the COVID-19 pandemic. However the state ranks near the very bottom on access and spending per child and meets only three of ten quality standards benchmarks. Longstanding problems in early education across the country persisted as preschool access remained below pre-pandemic levels, funding was inadequate, and quality standards failed to improve, according to the [2022 State of Preschool Yearbook](#), released today by Rutgers University’s National Institute for Early Education Research ([NIEER](#)).

Key findings from the annual survey, which focused on the 2021-2022 school year, are summarized below for Utah:

- Enrollment in state-funded preschool was 2,813, an increase of 730;
- State spending for preschool programs was \$6,206,636, an increase of \$4,172,453 (inflation adjusted);
- State spending per child enrolled in preschool was \$2,206;
- Utah met 3 of 10 quality standards benchmarks;
- Utah has not committed to universal preschool for four-year-olds;
- Utah provided incentives for preschool teacher retention and recruitment.

UTAH: 2022 NATIONAL RANKINGS
• Enrollment at age 4: 42nd (4%)
• Enrollment at age 3: 26th (2%)
• State spending per child: 44th (\$2,206)
• All-reported spending per child: 44th (\$3,755)

The new [report](#) found substantial year-over-year progress in enrollment nationally with a 13% increase of children in state-funded preschool in 2021-2022 with 180,668 more preschoolers enrolled than in the prior school year, and growth in nearly every state.

Despite this, most children still lack access to high-quality, publicly-funded early childhood education, and preschool enrollment is down by 8% compared to pre-pandemic levels, from the high of 1.66 million in 2019-2020 to 1.53 million in 2021-2022.

States spent an estimated \$9.9 billion on preschool, including more than \$393 million in COVID-19 relief, an inflation adjusted increase of only \$71 million (0.7%) from the prior year. Spending per child enrolled in preschool was \$6,571. Adjusting for inflation, spending per child has not changed in 20 years and remains too low to support high-quality full-day preschool.

Utah was one of just a few states to report providing incentives for teacher recruitment and retention. Most state-funded preschool programs, including Utah, reported experiencing a shortage of qualified teachers during the 2021-2022 school year. Waivers to teacher education

requirements were more prevalent than in previous years, raising concerns about preschool quality.

“Progress in expanding access to high-quality state-funded preschool over the last two decades has been slow and uneven, despite proven benefits to children, families and our nation’s economy as a whole,” **said Allison Friedman-Krauss, Ph.D., the report’s lead author.** “Utah leaders, with federal support, must address this ongoing lack of access, lackluster quality and related issues of teacher retention and pay to ensure that all children have access to the educational opportunities they deserve.”

A handful of states considering universal preschool offers a bright spot and an opportunity to expand access for nearly half of preschoolers across the country.

“For the first time in decades, new state commitments to universal preschool give hope that the USA might take a giant step forward. If these states make good on their newly promised investments in preschool for all they will advance early education opportunities dramatically,” **said W. Steven Barnett Ph.D., NIEER’s senior co-director.** “Utah should assess its support for preschool against neighbors and other states that provide much stronger support for access, quality standards, and funding per child. Utah’s young children deserve no less than others.”
